

Call to Action A briefing for Health and Wellbeing Boards

What is 'Call to Action'?

- Not a public consultation!
- Sustained programme of engagement
 - with patients and the public, staff and stakeholders
 - to debate the future of the NHS and how the NHS needs to change
 - with outputs used to plan for immediate issues and for a sustainable future

Why are we holding 'Call to Action'?

- The NHS is facing a significant number of challenges
- The 'Call to Action' is about putting a consistent national framework and context, and support, to enable conversations that are already happening locally between commissioners and their communities about local health priorities to help meet these challenges

Projected Resource vs. Projected Spending Requirements

Current challenges

We know there is more to do and recommendations for improvement already exist

Professor Sir Bruce Keogh KBE

Recommendations to improve patient safety in the NHS in England.

Pressures

Rise in Long Term Conditions

• Diabetics up 29% by 2025 to reach 4 million

An ageing population

• The number of over 80s will double by 2030

Increasing expectations

- Seven day access
- New health technology

In addition: Changing demographics of the workforce and carers mirroring the general population which will lead to additional workforce pressures

A Call to Action for General Practice 1^{England}

Preserving strengths of general practice

- Registered lists: providing basis for co-ordination and continuity of care
- Generalist skills
- Central role in management of long term conditions, supported by the Quality and Outcomes Framework (QOF)
- Highly systematic use of IT

A Call to Action for General Practice 2^{England}

Patient care:

- Proactive co-ordination
- Holistic
- Fast and responsive access

Preventing ill-health and ensuring more timely diagnosis of ill-health.

Involving patients and carers more fully in managing their own health and care.

Ensuring consistently high quality of care: effectiveness, safety and patient experience

A Call to Action for General Practice 3^{England}

- General practice operates at greater scale, for instance through networks, federations or practice mergers ...
- ... but scales up in a way that preserves greater relationship continuity that comes from individual practice units
- General practice is at the heart of a wider system of integrated out-of-hospital care
- There is a shift of resources from acute to out-ofhospital care

Specialised commissioning

- Derogation plans have been submitted by Trusts
- Regional meeting on 25 October to agree final position
- Impact on local area will be shared with CCGs and local authorities
- Managed through the Commissioning collaborative which meets bi-monthly

								 	 		PLANS SIG	NED OFF

- £3.8 billion worth of funding to ensure closer integration between health and social care
- A single pooled budget for health and social care services to work closer together in local areas ringfenced for investment in out-of-hospital care
- 'It should be targeted at a range of initiatives to develop out-of-hospital care, including early intervention, admission avoidance, and early hospital discharge, taking advantage of new collaborative technologies to give patients more control of their care.' Sir David Nicholson

Seizing future opportunities

The future does not just pose challenges, it also presents opportunities:

- A health service, not just an illness service we must get better at preventing disease
- Giving patients greater control over their health Developing effective preventative approaches, giving service users greater control over their health:
- Harnessing transformational technologies
- Moving away from a 'one-size fits all' model of care

Thinking to the future

- What are the key characteristics of the NHS that we must retain?
- What future opportunities should we be looking to seize?
- What needs to change to deliver a sustainable and high quality health care system?
- How can we drive greater integration across health and social care?

Thank you
