Vision for the Horton	3	3	4	1	

Under the heading Emergency Abdominal Surgery, most of the public feedback was questions about how and why the suspension had happened and whether it had to be permanent. The questioners came from the standpoint of opposing the transfer of the service. There was also a comment of unequivocal support for making it permanent after the meeting. A number of people also gave their support to the Trust's vision for the Horton as laid out at the meeting.
