**Purpose of Paper:**

The draft Primary Care Framework sets the strategic direction of Primary care in Oxfordshire over the next 5 years and beyond. It aims to provide a framework on which local groups of GPs can build in order to get a sustainable primary care that can meet the needs of patients and public into the future.

Two documents are presented in draft form

- 1) A document which will be used by the CCG and localities to shape the direction of primary care CCGs
- 2) A presentation for the public on what the Framework means to patients

The aim is to get the Framework agreed at the CCG Board at the end of March 2017 so that it can start to be localised and implemented from April 2017.

**Action Required:**

HOSC members are asked to provide comment on the two documents which are currently in draft form.
