

PLANNING & REGULATION COMMITTEE – 21 JANUARY 2019

Policy Annex (Relevant Development Plan and other Policies)

Oxfordshire Minerals and Waste Core Strategy 2017 (OMWCS)

POLICY M2: PROVISION FOR WORKING AGGREGATE MINERALS

Provision will be made through policies M3 and M4 to enable the supply of:

- sharp sand and gravel - 1.015 mtpa giving a total provision requirement of 18.270 million tonnes
- soft sand - 0.189 mtpa giving a total provision requirement of 3.402 million tonnes
- crushed rock - 0.584 mtpa giving a total provision requirement of 10.512 million tonnes

from land-won sources within Oxfordshire for the period 2014 – 2031 inclusive.

Permission will be granted for aggregate mineral working under policy M5 to enable separate landbanks of reserves with planning permission to be maintained for the extraction of minerals of:

- at least 7 years for sharp sand and gravel;
- at least 7 years for soft sand;
- at least 10 years for crushed rock;

in accordance with the annual requirement rates in the most recent Local Aggregate Assessment, taking into account the need to maintain sufficient productive capacity to enable these rates to be realised.

POLICY M3: PRINCIPLE LOCATIONS FOR WORKING AGGREGATE MINERALS

The principal locations for aggregate minerals extraction will be within the following strategic resource areas, as shown on the Policies Map:

Sharp sand and gravel

in northern Oxfordshire (Cherwell District and West Oxfordshire District):

- The Thames, Lower Windrush and Lower Evenlode Valleys area from Standlake to Yarnton;

in southern Oxfordshire (South Oxfordshire District and Vale of White Horse District):

- The Thames and Lower Thame Valleys area from Oxford to Cholsey;
- The Thames Valley area from Caversham to Shiplake.

Soft sand

- The Corallian Ridge area from Oxford to Faringdon;
- The Duns Tew area.

Crushed rock

- The area north west of Bicester;
- The Burford area south of the A40;
- The area east and south east of Faringdon.

Specific sites (new quarry sites and/or extensions to existing quarries) for working aggregate minerals within these strategic resource areas will be allocated in the Minerals & Waste Local Plan: Part 2 – Site Allocations Document, in accordance with policy M4.

Specific sites for extensions to existing aggregate quarries (excluding ironstone) outside the strategic resource areas may also be allocated in the Minerals & Waste Local Plan: Part 2 – Site Allocations Document provided they are in accordance with policy M4.

Sites allocated for sharp sand and gravel working (including both new quarry sites and extensions to existing quarries, including any extensions outside the strategic resource areas), to meet the requirement in policy M2 will be located such that approximately 25% of the additional tonnage requirement is in northern Oxfordshire and approximately 75% of the additional tonnage requirement is in southern Oxfordshire, to achieve an approximately equal split of production capacity for sharp sand and gravel between northern and southern Oxfordshire by 2031.

POLICY M5: WORKING OF AGGREGATE MINERALS

Prior to the adoption of the Minerals & Waste Local Plan: Part 2 – Site Allocations Document, permission will be granted for the working of aggregate minerals where this would contribute towards meeting the requirement for provision in policy M2 and provided that the proposal is in accordance with the locational strategy in policy M3 and that the requirements of policies C1 – C12 are met.

Permission will be granted for the working of aggregate minerals within the sites allocated further to policy M4 provided that the requirements of policies C1 – C12 are met.

Permission will not be granted for the working of aggregate minerals outside the sites allocated further to policy M4 unless the requirement to maintain a steady and adequate supply of aggregate in accordance with policy M2 cannot be met from within those sites and provided that the proposal is in accordance with the locational strategy in policy M3 and the requirements of policies C1 – C12 are met.

Permission will exceptionally be granted for the working of aggregate minerals outside the sites allocated further to policy M4 where extraction of the mineral is required prior to a planned development in order to prevent the mineral resource being sterilised, having due regard to policies C1 – C12.

Permission will exceptionally be granted for borrow pits to supply mineral to associated construction projects, having due regard to policies C1 – C12, provided that all of the following apply:

- the site lies on or in close proximity to the project area so that extracted mineral can be conveyed to its point of use with minimal use of public highways and without undue interference with footpaths and bridleways;
- the mineral extracted will only be used in connection with the project;

- it can be demonstrated that supply of the mineral from the borrow pit would have less environmental impact than if the mineral were supplied from an existing source;
- the borrow pit can be restored without the use of imported material, other than that generated by the project; and
- use of the borrow pit is limited to the life of the project.

Notwithstanding the preceding paragraphs, permission for working of ironstone for aggregate use will not be permitted except in exchange for an agreed revocation (or other appropriate mechanism to ensure the non-working) without compensation of an equivalent existing permission in Oxfordshire containing potentially workable resources of ironstone and where there would be an overall environmental benefit.

POLICY M10: RESTORATION OF MINERAL WORKINGS

Mineral workings shall be restored to a high standard and in a timely and phased manner to an after-use that is appropriate to the location and delivers a net gain in biodiversity. The restoration and after-use of mineral workings must take into account:

- the characteristics of the site prior to mineral working;
- the character of the surrounding landscape and the enhancement of local landscape character;
- the amenity of local communities, including opportunities to enhance green infrastructure provision and provide for local amenity uses and recreation;
- the capacity of the local transport network;
- the quality of any agricultural land affected, including the restoration of best and most versatile agricultural land;
- the conservation of soil resources
- flood risk and opportunities for increased flood storage capacity;
- the impacts on flooding and water quality of any use of imported material in the proposed restoration;
- bird strike risk and aviation safety;
- any environmental enhancement objectives for the area;
- the conservation and enhancement of biodiversity appropriate to the local area, supporting the establishment of a coherent and resilient ecological network through the landscape-scale creation of priority habitat;
- the conservation and enhancement of geodiversity;
- the conservation and enhancement of the historic environment; and
- consultation with local communities on options for after-use.

Planning permission will not be granted for mineral working unless satisfactory proposals have been made for the restoration, aftercare and after-use of the site, including where necessary the means of securing them in the longer term.

Proposals for restoration must not be likely to lead to any increase in recreational pressure on a Special Area of Conservation.

POLICY W6: LANDFILL AND OTHER PERMANENT DEPOSIT OF WASTE TO LAND

Non-hazardous waste

Provision for disposal of Oxfordshire's non-hazardous waste will be made at existing non-hazardous landfill facilities which will also provide for the disposal of waste from other areas (including London and Berkshire) as necessary. Further provision for the disposal of non-hazardous waste by means of landfill will not be made.

Permission may be granted to extend the life of existing non-hazardous landfill sites to allow for the continued disposal of residual non-hazardous waste to meet a recognised need and where this will allow for the satisfactory restoration of the landfill in accordance with a previously approved scheme.

Permission will be granted for facilities for the management of landfill gas and leachate where required to fulfil a regulatory requirement or to achieve overall environmental benefit, including facilities for the recovery of energy from landfill gas. Provision should be made for the removal of the facilities and restoration of the site at the end of the period of management.

Inert waste

Provision for the permanent deposit to land or disposal to landfill of inert waste which cannot be recycled will be made at existing facilities and in sites that will be allocated in the Minerals and Waste Local Plan: Part 2 – Site Allocations Document. Provision will be made for sites with capacity sufficient for Oxfordshire to be net-self-sufficient in the management of inert waste.

Priority will be given to the use of inert waste that cannot be recycled as infill material to achieve the satisfactory restoration and after use of active or unrestored quarries. Permission will not otherwise be granted for development that involves the permanent deposit or disposal of inert waste on land unless there would be overall environmental benefit.

General

Proposals for landfill sites shall meet the requirements of policies C1 – C12.

Landfill sites shall be restored in accordance with the requirements of policy M10 for restoration of mineral workings.

POLICY W7: MANAGEMENT AND DISPOSAL OF HAZARDOUS WASTE

Permission will be granted for facilities for the management and disposal of hazardous waste where they are designed to manage waste produced in Oxfordshire. Facilities that are likely to serve a wider area should demonstrate that they will meet a need for waste management that is not adequately provided for elsewhere.

Proposals for new waste management facilities shall meet the requirements of policies W4, W5 and C1 – C12.

POLICY C1: SUSTAINABLE DEVELOPMENT

A positive approach will be taken to minerals and waste development in Oxfordshire, reflecting the presumption in favour of sustainable development contained in the National Planning Policy Framework and the aim to improve economic, social and environmental conditions of the area.

Planning applications that accord with the policies in this plan will be approved, unless material considerations indicate otherwise. Where there are no policies relevant to the application, or relevant plan policies are out of date, planning permission will be granted unless material considerations indicate otherwise, taking into account whether:

- any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits of the proposed development when assessed against the National Planning Policy Framework; or
- specific policies in the National Planning Policy Framework indicate that the development should be restricted.

POLICY C2: CLIMATE CHANGE

Proposals for minerals or waste development, including restoration proposals, should take account of climate change for the lifetime of the development from construction through operation and decommissioning. Applications for development should adopt a low carbon approach and measures should be considered to minimise greenhouse gas emissions and provide flexibility for future adaptation to the impacts of climate change.

POLICY C3: FLOODING

Minerals and waste development will, wherever possible, take place in areas with the lowest probability of flooding. Where development takes place in an area of identified flood risk this should only be where alternative locations in areas of lower flood risk have been explored and discounted (using the Sequential Test and Exceptions Test as necessary) and where a flood risk assessment is able to demonstrate that the risk of flooding is not increased from any source, including:

- an impediment to the flow of floodwater;
- the displacement of floodwater and increased risk of flooding elsewhere;
- a reduction in existing floodwater storage capacity;
- an adverse effect on the functioning of existing flood defence structures; and
- the discharge of water into a watercourse.

The opportunity should be taken to increase flood storage capacity in the flood plain where possible, particularly through the restoration of sand and gravel workings.

POLICY C4: WATER ENVIRONMENT

Proposals for minerals and waste development will need to demonstrate that there would be no unacceptable adverse impact on or risk to:

- The quantity or quality of surface or groundwater resources required for habitats, wildlife and human activities;
- The quantity or quality of water obtained through abstraction unless acceptable provision can be made;
- The flow of groundwater at or in the vicinity of the site; and
- Waterlogged archaeological remains.

Proposals for minerals and waste development should ensure that the River Thames and other watercourses and canals of significant landscape, nature conservation, or amenity value are adequately protected from unacceptable adverse impacts.

POLICY C5: LOCAL ENVIRONMENT, AMENITY AND ECONOMY

Proposals for minerals and waste development shall demonstrate that they will not have an unacceptable adverse impact on:

- the local environment;
 - human health and safety;
 - residential amenity and other sensitive receptors; and
 - the local economy;
- including from:
- noise;
 - dust;
 - visual intrusion;
 - light pollution;
 - traffic;
 - air quality;
 - odour;
 - vermin;
 - birds;
 - litter;
 - mud on the road;
 - vibration;
 - surface or ground contamination;
 - tip and quarry-slope stability;
 - differential settlement of quarry backfill;
 - subsidence; and
 - the cumulative impact of development.

Where necessary, appropriate separation distances or buffer zones between minerals and waste developments and occupied residential property or other sensitive receptors and/or other mitigation measures will be required, as determined on a site-specific, case-by-case basis.

POLICY C6: AGRICULTURAL LAND AND SOILS

Proposals for minerals and waste development shall demonstrate that they take into account the presence of any best and most versatile agricultural land.

Significant development leading to the permanent loss of best and most versatile agricultural land will only be permitted where it can be shown that there is a need for the development which cannot reasonably be met using lower grade land and where all options for reinstatement without loss of quality have been considered taking into account other relevant considerations.

Development proposals should make provision for the management and use of soils in order to maintain agricultural land quality (where appropriate) and soil quality, including making a positive contribution to the long-term conservation of soils in any restoration.

POLICY C7: BIODIVERSITY AND GEODIVERSITY

Minerals and waste development should conserve and, where possible, deliver a net gain in biodiversity.

The highest level of protection will be given to sites and species of international nature conservation importance (e.g. Special Areas of Conservation and European Protected Species) and development that would be likely to adversely affect them will not be permitted.

In all other cases, development that would result in significant harm will not be permitted unless the harm can be avoided, adequately mitigated or, as a last resort, compensated for to result in a net gain in biodiversity (or geodiversity). In addition:

- (i) Development that would be likely to have an adverse effect on a Site of Special Scientific Interest (either individually or in combination with other development) will not be permitted except where the benefits of the development at this site clearly outweigh both the impacts that it is likely to have on the Site of Special Scientific Interest and any broader impacts on the national network of Sites of Special Scientific Interest.
- (ii) Development that would result in the loss or deterioration of irreplaceable habitats, including ancient woodland and aged or veteran trees, will not be permitted except where the need for and benefits of the development in that location clearly outweigh the loss.
- (iii) Development shall ensure that no significant harm would be caused to:
 - Local Nature Reserves;
 - Local Wildlife Sites;
 - Local Geology Sites;
 - Sites of Local Importance for Nature Conservation;
 - Protected, priority or notable species and habitats,
 except where the need for and benefits of the development in that location clearly outweigh the harm.

All proposals for mineral working and landfill shall demonstrate how the development will make an appropriate contribution to the maintenance and enhancement of local habitats, biodiversity or geodiversity (including fossil remains and trace fossils),

including contributing to the objectives of the Conservation Target Areas wherever possible. Satisfactory long-term management arrangements for restored sites shall be clearly set out and included in proposals. These should include a commitment to ecological monitoring and remediation (should habitat creation and/or mitigation prove unsuccessful).

POLICY C8: LANDSCAPE

Proposals for minerals and waste development shall demonstrate that they respect and where possible enhance local landscape character, and are informed by landscape character assessment. Proposals shall include adequate and appropriate measures to mitigate adverse impacts on landscape, including careful siting, design and landscaping. Where significant adverse impacts cannot be avoided or adequately mitigated, compensatory environmental enhancements shall be made to offset the residual landscape and visual impacts.

Great weight will be given to conserving the landscape and scenic beauty of Areas of Outstanding Natural Beauty (AONB) and high priority will be given to the enhancement of their natural beauty. Proposals for minerals and waste development within an AONB or that would significantly affect an AONB shall demonstrate that they take this into account and that they have regard to the relevant AONB Management Plan. Major developments within AONBs will not be permitted except in exceptional circumstances and where it can be demonstrated they are in the public interest, in accordance with the 'major developments test' in the NPPF (paragraph 116). Development within AONBs shall normally only be small-scale, to meet local needs and should be sensitively located and designed.

POLICY C9: HISTORIC ENVIRONMENT AND ARCHAEOLOGY

Proposals for minerals and waste development will not be permitted unless it is demonstrated, including where necessary through prior investigation, that they or associated activities will not have an unacceptable adverse impact on the historic environment.

Great weight will be given to the conservation of designated heritage assets: Blenheim Palace World Heritage Site; scheduled monuments; listed buildings; conservation areas; historic battlefields; registered parks and gardens; and non-designated archaeological assets which are demonstrably of equivalent significance to a scheduled monument; and the setting of those assets.

Where an application would affect a non-designated heritage asset, the benefits of the proposal will be balanced against the scale of harm to or loss of the heritage asset and its significance.

Where, following assessment of an application, the loss (wholly or in part) of a heritage asset is considered acceptable in principle, the applicant will be required to record and advance understanding of that asset, proportionate to the nature and level of the asset's significance, and to publish their findings.

Proposals for mineral working and landfill shall wherever possible demonstrate how the development will make an appropriate contribution to the conservation and enhancement of the historic environment.

POLICY C10: TRANSPORT

Minerals and waste development will be expected to make provision for safe and suitable access to the advisory lorry routes shown on the Oxfordshire Lorry Route Maps in ways that maintain and, if possible, lead to improvements in:

- the safety of all road users including pedestrians;
- the efficiency and quality of the road network; and
- residential and environmental amenity, including air quality.

Where development leads to a need for improvement to the transport network to achieve this, developers will be expected to provide such improvement or make an appropriate financial contribution.

Where practicable minerals and waste developments should be located, designed and operated to enable the transport of minerals and/or waste by rail, water, pipeline or conveyor.

Where minerals and/or waste will be transported by road:

- a) mineral workings should as far as practicable be in locations that minimise the road distance to locations of demand for the mineral, using roads suitable for lorries, taking into account the distribution of potentially workable mineral resources; and
- b) waste management and recycled aggregate facilities should as far as practicable be in locations that minimise the road distance from the main source(s) of waste, using roads suitable for lorries, taking into account that some facilities are not economic or practical below a certain size and may need to serve a wider than local area.

Proposals for minerals and waste development that would generate significant amounts of traffic will be expected to be supported by a transport assessment or transport statement, as appropriate, including mitigation measures where applicable.

POLICY C11: RIGHTS OF WAY

The integrity and amenity value of the rights of way network shall be maintained and if possible it shall be retained in situ in safe and useable condition. Diversions should be safe, attractive and convenient and, if temporary, shall be reinstated as soon as possible. If permanent diversions are required, these should seek to enhance and improve the public rights of way network.

Improvements and enhancements to the rights of way network will generally be encouraged and public access sought to restored mineral workings, especially if this can be linked to wider provision of green infrastructure. Where appropriate,

operators and landowners will be expected to make provision for this as part of the restoration and aftercare scheme.

POLICY C12: GREEN BELT

Proposals that constitute inappropriate development in the Green Belt, will not be permitted except in very special circumstances. 'Very special circumstances' will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations.

Conditions may be imposed on any permission granted to ensure that the development only serves to meet a need that comprises or forms an 'other consideration' in the Green Belt balance leading to the demonstration of very special circumstances.

Oxfordshire Minerals & Waste Local Plan (OMWLP) 1996

POLICY SW2: ACCESS TO SUTTON WICK AREA

The County Council will not permit access onto the B4016 between I and Sutton Courtenay, or to south Abingdon via Peep O'Day Lane.

POLICY SW3: STONEHILL LANE

Access will be via Stonehill Lane and particular attention will be paid to the needs of the other users of the lane.

POLICY SW4: RATE OF PRODUCTION IN SUTTON WICK AREA

Because of the access difficulties, future planning permissions will seek to limit the rate of production from the area.

Cherwell Local Plan 2011-2031 (CLP)

POLICY ESD 8: WATER RESOURCES

The Council will seek to maintain water quality, ensure adequate water resources and promote sustainability in water use.

Water quality will be maintained and enhanced by avoiding adverse effects of development on the water environment. Development proposals which would adversely affect the water quality of surface or underground water bodies, including rivers, canals, lakes and reservoirs, as a result of directly attributable factors, will not be permitted.

Development will only be permitted where adequate water resources exist, or can be provided without detriment to existing uses. Where appropriate, phasing of

development will be used to enable the relevant water infrastructure to be put in place in advance of development commencing.

POLICY ESD 9: PROTECTION OF THE OXFORD MEADOWS SAC

Developers will be required to demonstrate that:

- During construction of the development there will be no adverse effects on the water quality or quantity of any adjacent or nearby watercourse
- During operation of the development any run-off of water into adjacent or surrounding watercourses will meet Environmental Quality Standards (and where necessary oil interceptors, silt traps and Sustainable Drainage Systems will be included)
- New development will not significantly alter groundwater flows and that the hydrological regime of the Oxford Meadows SAC is maintained in terms of water quantity and quality
- Run-off rates of surface water from the development will be maintained at greenfield rates.

POLICY ESD 10: PROTECTION AND ENHANCEMENT OF BIODIVERSITY AND THE NATURAL ENVIRONMENT

Protection and enhancement of biodiversity and the natural environment will be achieved by the following:

- In considering proposals for development, a net gain in biodiversity will be sought by protecting, managing, enhancing and extending existing resources, and by creating new resources
- The protection of trees will be encouraged, with an aim to increase the number of trees in the district
- The reuse of soils will be sought
- If significant harm resulting from a development cannot be avoided (though locating on an alternative site with less harmful impacts), adequately mitigated, or as a last resort, compensated for, then development will not be permitted
- Development which would result in damage to or loss of a site of international value will be subject to the Habitats Regulations Assessment process and will not be permitted unless it can be demonstrated that there will be no likely significant effects on the international site or that effects can be mitigated
- Development which would result in damage to or loss of a site of biodiversity or geological value of national importance will not be permitted unless the benefits of the development clearly outweigh the harm it would cause to the site and the wider national network of SSSIs, and the loss can be mitigated to achieve a net gain in biodiversity/geodiversity
- Development which would result in damage to or loss of a site of biodiversity or geological value of regional or local importance including habitats of species of principal importance for biodiversity will not be permitted unless the benefits of the development clearly outweigh the harm it would cause to the site, and the loss can be mitigated to achieve a net gain in biodiversity/geodiversity

- Development proposals will be expected to incorporate features to encourage biodiversity, and retain and where possible enhance existing features of nature conservation value within the site. Existing ecological networks should be identified and maintained to avoid habitat fragmentation, and ecological corridors should form an essential component of green infrastructure provision in association with new development to ensure habitat connectivity
- Relevant habitat and species surveys and associated reports will be required to accompany planning applications which may affect a site, habitat or species of known or potential ecological value
- Air quality assessments will also be required for development proposals that would be likely to have a significantly adverse impact on biodiversity by generating an increase in air pollution
- Planning conditions/obligations will be used to secure net gains in biodiversity by helping to deliver Biodiversity Action Plan targets and/or meeting the aims of Conservation Target Areas. Developments for which these are the principal aims will be viewed favourably
- A monitoring and management plan will be required for biodiversity features on site to ensure their long term suitable management

POLICY ESD 11: CONSERVATION AREA TARGETS

Where development is proposed within or adjacent to a Conservation Area Target Area biodiversity surveys and a report will be required to identify constraints and opportunities for biodiversity enhancement. Development which would prevent the aims of a Conservation Target Area being achieved will not be permitted. Where there is potential for development, the design and layout of the development, planning conditions or obligations will be used to secure biodiversity enhancement to help achieve the aims of the Conservation Target Area.

POLICY ESD 13: LOCAL LANDSCAPE PROTECTION AND ENHANCEMENT

Opportunities will be sought to secure the enhancement of the character and appearance of the landscape, particularly in urban fringe locations, through the restoration, management or enhancement of existing landscapes, features or habitats and where appropriate the creation of new ones, including the planting of woodlands, trees and hedgerows.

Development will be expected to respect and enhance local landscape character, securing appropriate mitigation where damage to local landscape character cannot be avoided. Proposals will not be permitted if they would:

- Cause undue visual intrusion into the open countryside
- Cause undue harm to important natural landscape features and topography
- Be inconsistent with local character
- Impact on areas judged to have a high level of tranquillity
- Harm the setting of settlements, buildings, structures or other landmark features, or
- Harm the historic value of the landscape.

Development proposals should have regard to the information and advice contained in the Council's Countryside Design Summary Supplementary Planning Guidance, and the Oxfordshire Wildlife and Landscape Study (OWLS), and be accompanied by a landscape assessment where appropriate.

POLICY ESD 15: THE CHARACTER OF THE BUILT AND HISTORIC ENVIRONMENT

Successful design is founded upon an understanding and respect for an area's unique built, natural and cultural context. New development will be expected to complement and enhance the character of its context through sensitive siting, layout and high quality design. All new development will be required to meet high design standards. Where development is in the vicinity of any of the District's distinctive natural or historic assets, delivering high quality design that complements the asset will be essential.

New development proposals should:

- Be designed to deliver high quality safe, attractive, durable and healthy places to live and work in. Development of all scales should be designed to improve the quality and appearance of an area and the way it functions
- Deliver buildings, places and spaces that can adapt to changing social, technological, economic and environmental conditions
- Support the efficient use of land and infrastructure, through appropriate land uses, mix and density/development intensity
- Contribute positively to an area's character and identity by creating or reinforcing local distinctiveness and respecting local topography and landscape features, including skylines, valley floors, significant trees, historic boundaries, landmarks, features or views, in particular within designated landscapes, within the Cherwell Valley and within conservation areas and their setting
- Conserve, sustain and enhance designated and non designated 'heritage assets' (as defined in the NPPF) including buildings, features, archaeology, conservation areas and their settings, and ensure new development is sensitively sited and integrated in accordance with advice in the NPPF and NPPG. Proposals for development that affect non-designated heritage assets will be considered taking account of the scale of any harm or loss and the significance of the heritage asset as set out in the NPPF and NPPG. Regeneration proposals that make sensitive use of heritage assets, particularly where these bring redundant or under used buildings or areas, especially any on English Heritage's At Risk Register, into appropriate use will be encouraged
- Include information on heritage assets sufficient to assess the potential impact of the proposal on their significance. Where archaeological potential is identified this should include an appropriate desk based assessment and, where necessary, a field evaluation
- Respect the traditional pattern of routes, spaces, blocks, plots, enclosures and the form, scale and massing of buildings. Development should be designed to integrate with existing streets and public spaces, and buildings configured to create clearly defined active public frontages

- Reflect or, in a contemporary design response, re-interpret local distinctiveness, including elements of construction, elevational detailing, windows and doors, building and surfacing materials, mass, scale and colour palette
- Promote permeable, accessible and easily understandable places by creating spaces that connect with each other, are easy to move through and have recognisable landmark features
- Demonstrate a holistic approach to the design of the public realm to create high quality and multi-functional streets and places that promotes pedestrian movement and integrates different modes of transport, parking and servicing. The principles set out in The Manual for Streets should be followed
- Consider the amenity of both existing and future development, including matters of privacy, outlook, natural lighting, ventilation, and indoor and outdoor space
- Limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation
- Be compatible with up to date urban design principles, including Building for Life, and achieve Secured by Design accreditation
- Consider sustainable design and layout at the masterplanning stage of design, where building orientation and the impact of microclimate can be considered within the layout
- Incorporate energy efficient design and sustainable construction techniques, whilst ensuring that the aesthetic implications of green technology are appropriate to the context (also see Policies ESD 1-5 on climate change and renewable energy)
- Integrate and enhance green infrastructure and incorporate biodiversity enhancement features where possible (see Policy ESD 10: Protection and Enhancement of Biodiversity and the Natural Environment and Policy EDS 17: Green Infrastructure). Well designed landscape scheme should be an integral part of development proposals to support improvements to biodiversity, the micro climate and air pollution and provide attractive places that improve people's health and sense of vitality
- Use locally sourced sustainable materials where possible.

The Council will provide more detailed design and historic environment policies in the Local Plan Part 2.

The design of all new development will need to be informed by an analysis of the context, together with an explanation and justification of the principles that have informed the design rationale. This should be demonstrated in the Design and Access Statement that accompanies the planning application. The Council expects all the issues within this policy to be positively addressed through the explanation and justification in the Design & Access Statement. Further guidance can be found on the Council's website.

The Council will require design to be addressed in the pre-application process on major developments and in connection with all heritage sites. For major sites/strategic sites and complex developments, Design Codes will need to be prepared in conjunction with the Council and local stakeholders to ensure appropriate character and high quality design is delivered throughout. Design Codes will usually be prepared between outline and reserved matters stage to set out

design principles for the development of the site. The level of prescription will vary according to the nature of the site.

POLICY PSD 1: PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT

When considering development proposals the Council will take a proactive approach to reflect the presumption in favour of sustainable development contained in the National Planning Policy Framework. The Council will always work proactively with applicants to jointly find solutions which mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area.

Planning applications that accord with the policies in this Local Plan (or other part of the statutory Development Plan) will be approved without delay unless material considerations indicate otherwise.

Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise – taking into account whether:

- any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole; or
- specific policies in the Framework indicate that development should be restricted.

POLICY SLE 4: IMPROVED TRANSPORT AND CONNECTIONS

The Council will support the implementation of the proposals in the Movement Strategies and the Local Transport Plan to deliver key connections, to support modal shift and to support more sustainable locations for employment and housing growth.

We will support key transport proposals including:

- Transport Improvements at Banbury, Bicester and the Former RAF Upper Heyford in accordance with the County Council's Local Transport Plan and Movement Strategies
- Projects associated with East-West rail including new stations at Bicester Town and Water Eaton
- Rail freight associated development at Graven Hill, Bicester
- Improvements to M40 junctions

Consultation on options for new link and relief roads at Bicester and Banbury will be undertaken through the Local Transport Plan (LTP) review process. Routes identified following strategic options appraisal work for LTP4 will be confirmed by the County Council and will be incorporated in Local Plan Part 2.

New development in the District will be required to provide financial and/or in-kind contributions to mitigate the transport impacts of development.

All development where reasonable to do so, should facilitate the use of sustainable modes of transport to make the fullest possible use of public transport, walking and cycling. Encouragement will be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. Development which is not suitable for the roads that serve the development and which have a severe traffic impact will not be supported.

Vale of White Horse Local Plan 2011 (VLP 2011)

POLICY DC5: ACCESS

Proposals for development will only be permitted provided that:

- i) safe and convenient access will be provided both within the site and to and from the adjoining highway network for all users including those with impaired mobility, and for all modes of transport;
- ii) the road network can accommodate the traffic arising from the development without causing safety, congestion or environmental problems;
- iii) adequate provision will be made for loading, unloading, circulation, servicing and vehicle turning;
- iv) adequate and safe provision will be made for parking vehicles and cycles;
- v) off-site improvements to the highway infrastructure (including traffic management measures), cycleways, footpaths and the public transport network can be secured where these are not adequate to service the development; and
- vi) the scheme is designed to minimise the impact of vehicles and give priority to the needs of pedestrians, cyclists, the users of public transport and those with impaired mobility.

POLICY DC9: IMPACT OF DEVELOPMENT ON NEIGHBOURING USES

Development will not be permitted if it would unacceptably harm the amenities of neighbouring properties and the wider environment in terms of:

- i) loss of privacy, daylight or sunlight;
- ii) dominance or visual intrusion;
- iii) noise or vibration;
- iv) smell, dust, heat, gases or other emissions;
- v) pollution, contamination or the use of or storage of hazardous substances; and
- vi) external lighting.

Adopted Vale of White Horse Local Plan 2031 (VLP 2031)

CORE POLICY 1: PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT

Planning applications that accord with this Local Plan 2031 (and where relevant, with any subsequent Development Plan Documents or Neighbourhood Plans) will be approved, unless material considerations indicate otherwise.

Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant planning permission unless material considerations indicate otherwise, and unless:

- i. Any adverse impacts of granting planning permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole, or
- ii. Specific policies in the Framework indicate that development should be restricted.

Vale of White Horse Local Plan 2031 Part 2 (VLP 2031 2)

DEVELOPMENT POLICY 16: ACCESS

All proposals for new development will be required to be of high quality design in accordance with Core Policy 37: Design and Local Distinctiveness. In addition to those criteria set out in Core Policy 37 and other relevant Local Plan policies, proposals for development will also need to provide evidence to demonstrate that:

- i. adequate provision will be made for loading, unloading, circulation, servicing and vehicle turning, and
- ii. acceptable off-site improvements to the highway infrastructure (including traffic management measures), cycleways, public rights of way and the public transport network can be secured where these are not adequate to service the development.

DEVELOPMENT POLICY 23: IMPACT OF DEVELOPMENT ON AMENITY

Development proposals should demonstrate that they will not result in significant adverse impacts on the amenity of neighbouring uses when considering both individual and cumulative impacts in relation to the following factors:

- i. loss of privacy, daylight or sunlight
- ii. dominance or visual intrusion
- iii. noise or vibration
- iv. dust, heat, odour, gases or other emissions
- v. pollution, contamination or the use of/or storage of hazardous substances; and
- vi. external lighting.

DEVELOPMENT POLICY 25: NOISE POLLUTION

Noise-Generating Development

Noise-generating development that would have an impact on environmental amenity or biodiversity will be expected to provide an appropriate scheme of mitigation that should take account of:

- i. the location, design and layout of the proposed development
- ii. existing levels of background noise
- iii. measures to reduce or contain generated noise, and
- iv. hours of operation and servicing.

Development will not be permitted if mitigation cannot be provided within an appropriate design or standard¹.

Noise-Sensitive Development

Noise-sensitive development in locations likely to be affected by existing sources of noise² will be expected to provide an appropriate scheme of mitigation to ensure appropriate standards of amenity are achieved for future occupiers of the proposed development, taking account of:

- i. the location, design and layout of the proposed development
- ii. measures to reduce noise within the development to acceptable levels, including external areas, and
- iii. the need to maintain adequate levels of natural light and ventilation to habitable areas of the development.

In areas of existing noise, proposals for noise-sensitive development should be accompanied by an assessment of environmental noise and an appropriate scheme of mitigation measures.

Development will not be permitted if mitigation cannot be provided to an appropriate standard with an acceptable design.

¹ Currently set out in British Standards 4142:2014 and 8233:2014. The Council is currently developing guidance relating to noise mitigation

² Busy roads, railway lines, aerodromes, industrial/commercial developments, waste, recycling and energy plant, and sporting, recreation and leisure facilities.
Development Policy 24: Noise Pollution

DEVELOPMENT POLICY 26: AIR QUALITY

Development proposals that are likely to have an impact on local air quality, including those in, or within relative proximity to, existing or proposed Air Quality Management Areas (AQMAs) will need to demonstrate measures/mitigation that are incorporated into the design to minimise any impacts associated with air quality.

Where sensitive development is proposed in areas of existing poor air quality and/or where significant development is proposed, an air quality assessment will be required.

The council will require applicants to demonstrate that the development will minimise the impact on air quality, both during the construction process and lifetime of the completed development, either through a redesign of the development proposal or, where this is not possible or sufficient, through appropriate mitigation in accordance with current guidance.

Mitigation measures will need to demonstrate how the proposal would make a positive contribution towards the aims of the council's Air Quality Action Plan.

Mitigation measures will be secured either through a negotiation on the scheme, or via the use of a planning condition and/or planning obligation depending on the scale and nature of the development and its associated impacts on air quality.

South Oxfordshire Core Strategy December 2012 (SOCS)

POLICY CSS1: THE OVERALL STRATEGY

Proposals for development in South Oxfordshire should be consistent with the overall strategy of:

- (i) focusing major new development at the growth point of Didcot so the town can play an enhanced role in providing homes, jobs and services with improved transport connectivity;
- (ii) supporting the roles of Henley, Thame and Wallingford by regenerating their town centres through measures that include environmental improvements and mixed-use developments and by providing new houses, employment, services and infrastructure;
- (iii) supporting and enhancing the larger villages of Berinsfield, Benson, Chalgrove, Chinnor, Cholsey, Crowmarsh Gifford, Goring, Nettlebed, Sonning Common, Watlington, Wheatley and Woodcote as local service centres;
- (iv) supporting other villages in the rest of the district by allowing for limited amounts of housing and employment and by the provision and retention of services; and
- (v) outside the towns and villages, and other major developed sites, any change will need to relate to very specific needs such as those of the agricultural industry or enhancement of the environment.

POLICY CS1: PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT

Planning applications which accord with the policies in the Development Plan (including, where relevant, Neighbourhood Plans) will be approved without delay, unless material considerations indicate otherwise.

Planning permission will also be granted where relevant policies in the Development Plan are out of date or silent unless:

- any adverse impacts of the proposal would significantly and demonstrably outweigh its benefits when assessed against the policies in the National Planning Policy Framework taken as a whole; or
- specific policies in the Framework or other material considerations indicate that development should be restricted.

POLICY CSEM4: SUPPORTING ECONOMIC DEVELOPMENT

Planning permission will be granted for:

- (i) employment on identified allocated employment sites⁵⁶ in accordance with the policy;
- (ii) the redevelopment of employment sites where this improves the quality and choice of business premises available;
- (iii) the reasonable extension of premises on existing sites;
- (iv) appropriate forms of working at home, where permission is needed;
- (v) new premises or the conversion of existing buildings on suitable sites within the built-up area of settlements;
- (vi) the re-use of rural buildings where the proposals accord with other policies in the development plan.

POLICY CSEN1 LANDSCAPE

The district's distinct landscape character and key features will be protected against inappropriate development and where possible enhanced.

- (i) Where development is acceptable in principle, measures will be sought to integrate it into the landscape character of the area.
- (ii) High priority will be given to conservation and enhancement of the Chilterns and North Wessex Downs Areas of Outstanding Natural Beauty (AONBs) and planning decisions will have regard to their setting. Proposals which support the economies and social well being of the AONBs and their communities, including affordable housing schemes, will be encouraged provided they do not conflict with the aims of conservation and enhancement.
- (iii) The landscapes and waterscapes of the River Thames corridor will be maintained and where possible enhanced as will the setting and heritage of the river for its overall amenity and recreation use.

POLICY CSQ3: DESIGN

Planning permission will be granted for new development that is of a high quality and inclusive design that:

- responds positively to and respects the character of the site and its surroundings, particularly the historic significance and heritage values of the historic environment, enhancing local distinctiveness and ensuring that new development is of a scale, type and density appropriate to the site and its setting;
- improves the quality of the public realm with well designed external areas, and, where appropriate a clear structure of open spaces;
- provides and/or links into green infrastructure where available;

- is designed to create safe communities and reduce the likelihood and fear of crime;
- creates a distinctive sense of place and is easy to understand through the use of vistas, landmarks and focal points;
- ensures high levels of accessibility and ease of use by all modes of transport both within the site and with the wider area, also making sure that any new development is properly integrated with existing development ensuring accessibility to local services; and
- is adaptable to changing requirements and constructed with materials appropriate to the area.

All proposals for new development should be accompanied by a design and access statement to show how they have responded to the above criteria.

POLICY CSG1: GREEN INFRASTRUCTURE

A net gain in green infrastructure including biodiversity will be sought through developer works, developer contributions and the targeted use of other funding sources. Proposals for new development must demonstrate that they have taken into account the relationship of the proposed development to existing green infrastructure. Where appropriate, proposals will be required to contribute to the delivery of green infrastructure and/or the improvement of existing assets including Conservation Target Areas in accordance with the standards in the South Oxfordshire Green Infrastructure Strategy and Didcot Natural Greenspaces Study. A net loss of green infrastructure including biodiversity through development proposals will be avoided.

CSM1: TRANSPORT

The council will work with Oxfordshire County Council and others to:

- (i) in partnership with the Vale of White Horse District Council, actively seek to deliver the transport infrastructure and measures which improve movement in Didcot and within the Didcot/ Wantage and Grove corridor, in particular linking Didcot with the major employment sites at Harwell and Milton Park as identified in the County Council's LTP3 SVUK Area Strategy and Southern Central Oxfordshire Transport Study;
- (ii) actively seek to ensure that the impact of new development on the strategic and local road network, in particular the Milton, Chilton and Marcham junctions of the A34 and the road links and junctions identified in the Council's Evaluation of Transport Impact and County Council's Southern Central Oxfordshire Transport Study is adequately mitigated (see Policy CSM2);
- (iii) support improvements for accessing Oxford;
- (iv) work with the authorities affected by cross Thames travel in the Reading area to ensure that traffic and environmental conditions in South Oxfordshire are improved by the implementation of measures which also improve access to Reading;
- (v) support measures which enable modal shift to public transport, cycling and walking particularly where these support the network of settlements in the district;
- (vi) promote and support traffic management measures and environmental improvements which increase safety, improve air quality, encourage the use of sustainable modes of transport and/or make our towns and villages more attractive;

- (vii) adopt a comprehensive approach to car parking aimed at improving the attraction of our town and village centres;
- (viii) encourage the use of sustainable modes of transport;
- (ix) promote electronic communications allowing businesses to operate throughout the district and to provide services and information which reduce the need to travel and encourage sustainable modes of transport; and
- (x) cater for the needs of all users.

CSEN3 – HISTORIC ENVIRONMENT

The district's designated historic heritage assets, both above and below ground such as:

- nationally designated assets including listed buildings, historic parks and gardens, historic battlefields and Scheduled Ancient Monuments;
- conservation areas; and
- their settings

will be conserved and enhanced for their historic significance and their important contribution to local distinctiveness, character and sense of place.

This will be carried out through:

- conservation area appraisals/reviews;
- management plans;
- designating new conservation areas where appropriate;
- the determination of planning, listed building consent and other relevant applications.

Proposals for development that affect non-designated historic assets will be considered taking account of the scale of any harm or loss and the significance of the heritage asset.

CSB1: CONSERVATION AND IMPROVEMENT OF BIODIVERSITY

A net loss of biodiversity will be avoided, and opportunities to achieve a net gain across the district will be actively sought.

Opportunities for biodiversity gain, including the connection of sites, large-scale habitat restoration, enhancement and habitat re-creation will be sought for all types of habitats, with a primary focus on delivery in the Conservation Target Areas.

The highest level of protection will be given to sites and species of international nature conservation importance (Special Areas of Conservation and European Protected Species).

Damage to nationally important sites of special scientific interest, local wildlife sites, local nature reserves, priority habitats, protected or priority species and locally important geological sites will be avoided unless the importance of the development outweighs the harm and the loss can be mitigated to achieve a net gain in biodiversity.

South Oxfordshire Local Plan 2011 (SOLP 2011) (saved policies)

G2: PROTECTION AND ENHANCEMENT OF THE ENVIRONMENT

The district's countryside, settlements and environmental resources will be protected from adverse developments.

C6: BIODIVERSITY CONSERVATION

In considering proposals for development, the maintenance and enhancement of the biodiversity resource of the district will be sought. Full account of the effects of development on wildlife will be taken. Where there is any significant loss in biodiversity as part of a proposed development, the creation and maintenance of new landscape features, habitats, habitat links and wildlife corridors of appropriate scale and kind will be required to ensure there is no net loss in biodiversity resources.

CON7: CONSERVATION AREAS

Planning permission will not be granted for development which would harm the character or appearance of a conservation area.

The following will be required when considering proposals for development in conservation areas:

- (i) the design and scale of new work to be in sympathy with the established character of the area; and
- (ii) the use of traditional materials, whenever this is appropriate to the character of the area.

The contribution made to a conservation area by existing walls, buildings, trees, hedges, open spaces and important views will be taken into account. Proposals for development outside a conservation area which would have a harmful effect on the conservation area will not be permitted.

EP2: NOISE AND VIBRATION

Proposals which would by reason of noise or vibrations have an adverse effect on existing or proposed occupiers will not be permitted, unless effective mitigation measures will be implemented. In addition, noise sensitive development will not be permitted close to existing or proposed sources of significant noise or vibrations.

EP3: LIGHT POLLUTION

Proposals for new floodlighting and other external lighting that would have an adverse effect on neighbouring residents, the rural character of the countryside or biodiversity will not be permitted, unless effective mitigation measures will be implemented.

CF1: SAFEGUARDING RECREATIONAL FACILITIES

Proposals that result in the loss of a recreation facility or an essential community facility or service, through change of use or redevelopment, will not be permitted unless:

- (i) suitable alternative provision is made for the facility (or similar facilities of equivalent community value) on a site elsewhere in the locality, or
- (ii) in the case of recreational facilities, it is not needed, or

(iii) in the case of commercial services, it is not economically viable.

D1: GOOD DESIGN

The principles of good design and the protection and reinforcement of local distinctiveness should be taken into account in all new development through:

- (i) the provision of a clear structure of spaces;
- (ii) respecting existing settlement patterns;
- (iii) providing for a choice of routes and transport modes to, from and within the development;
- (iv) providing a development that users find easy to understand through the use of landmarks, vistas and focal points;
- (v) providing landscape structure as a framework for new development;
- (vi) respecting the character of the existing landscape;
- (vii) respecting distinctive settlement types and their character;
- (viii) providing good quality site and building design and appropriate materials; and
- (ix) providing well-designed external areas.

D2: PARKING

Planning permission will not be granted for developments that fail to incorporate adequate, safe and secure parking for vehicles and cycles. Vehicle parking should be provided in a discreet and sensitive manner.

The Benson Neighbourhood Plan (BNP)

NP6: CONSERVATION AND HERITAGE

Development should respect the history and heritage of Benson in accordance with national and local policy by:

- Conserving and enhancing the significant special architectural and historic interest of listed buildings and their settings;
- Conserving and enhancing the special interest, character and appearance of the two conservation areas at Benson and Preston Crowmarsh, with regard for their setting and context as parts of longer linear historic settlements, and for their wider relationships with the River Thames, the Ewelme Stream (Benson Brook), and the agricultural landscape. Development that would restore traditional design details and window styles or route cables and services underground, and that accords with other policies in the Plan, will be supported;
- Conserving and respecting, in proportion to their importance, the significant character and setting of historic buildings that are not listed but are of local note for their heritage value. This shall apply to buildings included in the Schedule of Buildings of Local Heritage note set out in Appendix E .
Developers should assess the significance of these buildings prior to application, and should provide a public record of any significance that is lost. Demolition of these buildings, or major alterations that would destroy or obscure their historic interest, will not be supported where it is judged that the significance of the building outweighs the scale of harm or loss;

- Where appropriate taking account of the high potential within the Plan area for discoveries of significant archaeological note, and ensuring that proposals reflect the outcome of an appropriate range of prior investigations including field evaluation. Any impact on archaeological remains should be mitigated to reflect the significance of those remains, by maximising potential for preservation, recording any loss and including provision for the preservation in situ of important remains where the loss is not outweighed by the public benefits of the development.

NP7: DESIGN

All new development, including infill development, should be of a high-quality design that respects the distinctive character of the locality. New development should be in accordance with the Principles set out in the Design Statement that accompanies this Plan.

NP22: NEW GREEN SPACE

New development should make appropriate provision of green space in accordance with South Oxfordshire District Council standards in place at the time of the determination of the application. The design of green spaces shall take account of the needs identified in Benson's 'People and Nature Strategy and this plan's biodiversity policies, and must link where practicable via public footpaths to other public footpaths/bridleways connecting to the rest of the village and the wider countryside. Where possible, pedestrian links should be positioned to provide separation from road traffic.

NP23: BIODIVERSITY

Development proposals should maintain and enhance existing on-site biodiversity assets, and provide for wildlife needs on site, where possible. Where appropriate on-site biodiversity enhancements such as new roosting features for bats or nesting features for birds should be incorporated into the fabric of the development.

NP30: SUSTAINABLE DRAINAGE SYSTEMS

Where it is appropriate development proposals should include Sustainable Drainage Systems within their boundaries designed to manage the risk of surface water flooding and foul water sewer overload, and that they will not increase flood risk elsewhere in Benson.

Sustainable Drainage Systems should be designed to maximise the benefits of the features, taking account where possible of the Benson's Strategy for Nature and People.

Chilterns AONB Management Plan 2014 – 2019 (CMP)

L1 - The overall identity and character of the Chilterns should be recognised and

managed positively.

L5 - Developments which detract from the Chilterns' special character should be resisted.

L6 - Degraded aspects of the landscape should be enhanced including the removal or mitigation of intrusive development and features.

D11 - Enhancement of the landscape of the AONB should be sought by the removal or mitigation of intrusive developments.
