For 201 previous survey response and planning decisions we used.                           |
| Sharp Sand &<br>Gravel                | <b>1</b> 0.994                | 0.646                               | 0.831                              | 1.015                                 | 12.075          | 11.9                | N/A                    | 1.900              | Capacity not provided in MHCLG survey. For 201 previous survey respons and planning decisions wused.                              |
| Crushed Rock                          | <b>1</b> 0.843                | 0.649                               | <b>1</b> 0.820                     | 0.778                                 | 6.741           | 5.96                | N/A                    | 1.645              | Capacity not provided ir MHCLG survey. For 201 previous survey respons and planning decisions wused.                              |
| Recycled /<br>Secondary<br>Aggregates | 0.372                         | N/A                                 | N/A                                | 0.926                                 | N/A             | N/A                 | N/A                    | 0.562              | 31% response rate from operators. So, the sales a capacity figure are very lot it is believed to actually higher. See Supply Chap |
| Rail Depot Sales<br>(Sand & Gravel    | С                             | С                                   | С                                  | С                                     | С               | С                   | С                      | С                  | Due to confidentiality due<br>two operators of the fou<br>sites, we are unable to sh<br>these figures                             |
| Rail Depot Sales<br>(Crushed Rock)    | С                             | С                                   | С                                  | С                                     | С               | С                   | С                      | С                  | Due to confidentiality, we unable to share these figu                                                                             |

MHCLG and the BGS undertook the 2019 survey, published in 2021. Aggregate sales are taken from this survey's findings. Recycled and Secondary Aggregate and Rail Depot findings were the responsibility of Oxfordshire County Council for 2019.

There has been an increase in all aggregate demand in Oxfordshire given the increase in planned future infrastructure delivery. There has been a slight drop in Recycled and Secondary Aggregates, but the response rate for this part of the Survey was 31% therefore it is expected to be higher

The LAA Rate of 1.015mt for sharp sand and gravel as set in the LAA2014 and each subsequent LAA, and also contained within the Oxfordshire Minerals and Waste Local Plan Part 1: Core Strategy, has been maintained as it is felt this reflects the level of future demand and the current sales figures.

The LAA rate for Soft Sand and Crushed Rock was increased in the LAA2019. This has been maintained within this LAA as demand has continued to rise.

Using the Crushed Rock LAA Rate, we have fallen below the required 10-year landbank. This issue will be considered within the Core Strategy Review and the work on the Minerals and Waste Local Plan Part 2: Site Allocations Plan. There were also two planning applications outstanding at the end of 2019, which would increase the landbank if permitted.
