For this year's County Council Elections our campaign Champions have made a document called the 'County Councillor Deal 2025'.

A group of Champions thought about the three most important issues that the County Council are in charge of.

They choose these based on how often self advocacy groups have talked about these or similar issues.

For each issue Champions came up with:

One thing that is good about this issue in Oxfordshire right now.

One thing that could be better.

What we want the County Council to do about it.

How we can help.

We would like every County Councillor in Oxfordshire to:

Read the County Council Deal 2025

Sign it to show their support.

Agree to work with us on the issues we think are important.

# 1 Social care

By social care we mean any people or services who help us with our day to day needs.

We think: there is some really good support from social care teams in Oxfordshire

BUT - there are still lots of jobs unfilled in social care which means people do not get the support they need for the lives they want.

# 1 Social care

We want: the County Council to do more to advertise social care jobs and careers, so more people understand why this is great work that really matters.

We will: help by sharing our stories of good support and why it is so important to our lives.

## 2 Education

By education we mean any colleges, schools or training there are to help us get new skills and jobs.

We think: there have been some good adult training and work schemes in the past.

BUT - these can be hard to find and don't always lead to good volunteer or paid roles.

## 2 Education

We want: the County Council and local employers to improve their adult employment scheme so it leads to more real jobs, paid or otherwise.

We will: help by sharing our lived experience of being in work and why it is so important to having a meaningful life.

# 3 Good Places to Live

By good places to live we mean what is built where, how and for whom, this includes houses, shops and other buildings.

We think: some people live in good places and are happy with their life.

BUT - if we don't build in good places to live that can make it hard for us to visit the people and places we like.

# 3 Good Places To Live

We want: all parts of local government to work together to make sure there are enough accessible and well connected communities for everyone.

We will: help by sharing our stories of what it's like to live in a good place.
