Introduction to the Primary Capital Programme outcomes

This spreadsheet is the summary list for recommendations from the Primary Capital

The "**School list**" tab includes the recommendations fed back to schools after the locality review, along with the school's priority score and likely timescales for capital projects only.

capital needs.

The "**Priority scores**" tab explains how these are calculated, using the formula set by the Primary Capital Board. Approximately the top quarter of scores (a score of 3 or higher) are labelled "High" and these schools should expect PCP funding of any identified capital needs over the 15 year lifespan of the project. Schools scoring 2 are labelled as Medium - if PCP funding continues these schools are likely to receive PCP funding for their identified capital needs. PCP funding is intended for the neediest 50% of schools: "High" and

the 15-year timescale of the Primary Capital Programme. The first and second waves of these projects have been identified, and are shown as having 2009 or 2010 project starts. Other projects are on hold pending decisions on, for example, future housing developments. The "**Key to capital timescales**" tab explains these timescales further.

Key to Primary Capital Programme outcomes	
No recommendations	No specific recommendations were made at this stage. However, given the expected 10-15 year life of the Primary Capital Programme this will be kept under review as the needs of schools, children and their families are certain to change. In addition, recommendations may emerge from the separate review of ICT capital needs.
Significant issues	We recognise that this school has significant problems with its existing school estate, both in terms of condition and suitability for 21st century learning. Primary Capital Programme funding is targeted at schools with a "High" or "Medium" priority score. See separate notes about possible timescales for capital projects. Future funding opportunities will be sought for schools with a "Low" priority score, but schools may also want to discuss with their area Asset Management officer how their issues can be addressed through self-funded schemes.
Internal space	We would like to look closer at how the use of internal space in the existing school buildings might be reviewed to move closer to the expectations of a 21st century school, particularly in providing more personalised learning opportunities. Primary Capital Programme funding is targeted at schools with a "High" or "Medium" priority score. See separate notes about possible timescales for capital projects. Schools with a "Low" priority score may want to discuss with their area Asset Management officer how their issues can be addressed through self-funded schemes.
Temporary classrooms	It is our continued aim to reduce the number of temporary classrooms used for statutory provision, as funding allows. At the same time we would look at whether other suitability issues could be addressed. See separate notes about possible timescales for capital projects.
Housing	Local development plans indicate possible significant housing developments that might affect this school. In some cases this will require an extension of the school; in other cases there may be new schools built nearby. The county and district councils are working together to identify the likely impact of new housing, and as plans come forward we will discuss with the schools affected how, when meeting the needs of the new housing, we can also ensure that all available funds, including devolved capital formula, can be best used to address any existing suitability issues.
Shortage of places	There has been, or is forecast to be, a growing demand for places at this school. In some cases forecasts may be inflated by proposed housing developments which will in time lead to the construction of a new school, but there is likely to be some impact on existing schools, at least in the short term. We will continue to monitor demand, and if an increase in the published admission number is required, we will work with the school to plan any capital implications.
Surplus places	There is currently a relatively high proportion of surplus places, and we are keen to explore how this can be reduced, for example whether part of the building could be used in different ways to better meet the needs of the local community.
Federation	Many schools are starting to consider the benefits offered by closer working relationship between schools, including federation, often in the context of succession planning, or in providing development opportunities for staff. Federation can particularly help in maintaining small primary schools which might otherwise be vulnerable to changing parental preferences and may face difficulties in recruiting and retaining high calibre staff in the future. Claudia Wade, Head of Governor Services, can advise headteachers, chairs of governors or governing bodies on the implications of federation. Where schools identify specific capital needs to help make federation a success, these will be considered sympathetically through the Primary Capital Programme.
Catchment	An increasing mismatch between local population and availability of school places has put pressure on the admissions process. We anticipate that this will require a review of school catchment areas within the next few years.
Infant & Junior schools	Oxfordshire has for some years acted to replace separate infant and junior schools with primary schools, to benefit consistent curriculum delivery and minimise disruption to pupils experienced in transition. We will continue to review with all the remaining Infant and Junior schools in the county the appropriateness of their structure as local circumstances change. In some cases this may lead to extensions of age range, amalgamations of schools, or new working relationships between schools.
Admission number review	An increasing mismatch between local population and availability of school places has put pressure on the admissions process. As part of annual admissions arrangements, we will consult on changes to published admission numbers where they appear out of line with either local demand or school capacity.
Specific	<i>St Philip & St James Primary School/Dunmore Primary School/SS Mary & John Primary School: we will continue to seek solutions to the problems caused by split sites or detached playing fields.</i> <i>St John the Evangelist Primary School/Carterton Primary School/Gateway Primary School/Edith Moorhouse Primary School/St Joseph's Primary School (Carterton)/Five Acres Primary School: the county and MOD are working together to identify the likely impact of personnel movements and once firmer details are known we will discuss with schools the implications of changes in pupil numbers.</i> <i>Watlington Primary School: given the proximity to Ickneild Community College, we would be interested in exploring the longer term possibility of combining funds from Building Schools for the Future and the Primary Capital Programme to create an all-through school.</i>

Guide to priority score calculation		
Priority category	Priority criteria	Maximum score
Enjoy & Achieve	Below 65% in either English or Maths KS2 in all of the last three years	3
Achieving Economic Well Being:	Schools scoring more than 50% using DCSF Deprivation index [uses 2007 pupil census data]	2
Physical buildings	Condition: Schools with condition work more than £200 per sq m [at last condition survey, carried out every 3 years]	2
	Suitability: Those with higher than 25% net capacity in temporary accommodation [classroom use only]	1
	Appropriateness of buildings: Those <i>without</i> a school hall	1
Strategic asset issues	Matching demand to provision: Schools with more than 25% surplus places [assessed each July]	1
	Growth areas: Schools forecast to be more than 10% over capacity for more than 1 year in the next 7 years, <i>or</i> Located in or near a proposed strategic housing development sites	2
Priority scores will be recalculated annually.		

Key to capital project timescale	
2009 start	By the end of 2009, a capital project was already underway or being planned.
2010 start	A feasibility study for a capital project is planned to start during 2010. The purpose of the feasibility study is to identify all options to meet the established need and the associated cost. Once this is determined schools will be notified if and when the project is likely to proceed to the next stage. The decision whether to proceed will depend on the confirmed levels of funding from the DCSF and costs/needs emerging from the whole programme of feasibility studies being undertaken.
On hold	A capital project is likely at this school, but planning is currently on hold awaiting other decisions, e.g. district councils' core strategy decisions or housing developments. This situation will be reviewed regularly.
Annual review	The need for a capital project has been identified at this school, but funding is not likely to be available in the immediate future. However, circumstances and needs may change, and the situation will be reviewed regularly.
No current plans	There are no current plans for a major capital project funded by the Primary Capital Programme at this school. However, circumstances and needs may change, and the situation will be reviewed regularly. The school may also qualify in future from other funding streams.
