Symptom Free Testing

- Symptom Free testing expanded to four sites from 26 March

- Offer extended to twice a week testing for those who work or volunteer outside the home

- Symptom Free testing to be expanded to all by 9th April.

- Modes of Testing
  - Workplace testing
  - Education
  - Community testing (4 sites)
  - Community collect model (9 sites)
  - Pharmacy Collect
  - LFD Direct

- Community Testing supplements workplace testing – the preferred option

Vaccination Programme

Covid-19: Vaccinations in numbers across Oxfordshire

Over 440,000 vaccinations delivered
Second doses now underway

95% take up (c80% second doses delivered)
in over 80's, 75-79 and 70-74 year old population

More than 90%
of our 60-69 and 50-59 year old population vaccinated

More than 93% take up
in our Clinically Extremely Vulnerable population

95% take up (c80% second doses delivered)
of our Care Home residents 80% Care Home staff

Hands Face Space
Remain important rules to follow even if you have been vaccinated, as you may still be able to spread COVID to others

April key focus on second doses
Patients receiving second doses at 11 and 12 weeks

Vaccination centres
1 Large vaccination centre
2 Hospital hubs
21 GP-led hubs
3 Live pharmacy sites **5** more pending

Vaccine programme delivery
In line with the Government target priority groups 1 – 9 were offered a vaccination by 12 April
Book your vaccination
In line with the national vaccination programme those aged 45 and over are being invited to attend for vaccination at GP led sites, the Kassam and participating Pharmacies

**For more advice**
www.oxfordshireccg.nhs.uk

Based on data from NIMS, up to 19.04.2021

Buckinghamshire, Oxfordshire and Berkshire West Integrated Care System

Priority 1-9 progress by PCN as at 19.04.2021

Oxfordshire Progress

Oxfordshire weekly vaccination events (by delivery model) to 19 April 2021

- Vaccination delivery continues to progress well
- More than 440,000 of the 1.07 million vaccinations across BOB have been in Oxfordshire
- All patients in priority groups 1-9 were offered vaccination ahead of the 15 April deadline
- Second doses continue to go well, delivered to patients 11 or 12 weeks after first dose
- Supply of vaccine has reduced but second dose supply has been maintained
- First doses now being offered to those over 45 years old
- Under 30s cohort will be offered an alternative to the Oxford AstraZeneca vaccine when eligible
- Outreach to diverse communities with pop-up clinics in Oxford Mosques and east Oxford church with further clinics planned for Banbury Mosque and traveller communities

Oxfordshire priority groups 1-9 uptake by ethnicity as at 19.04.2021
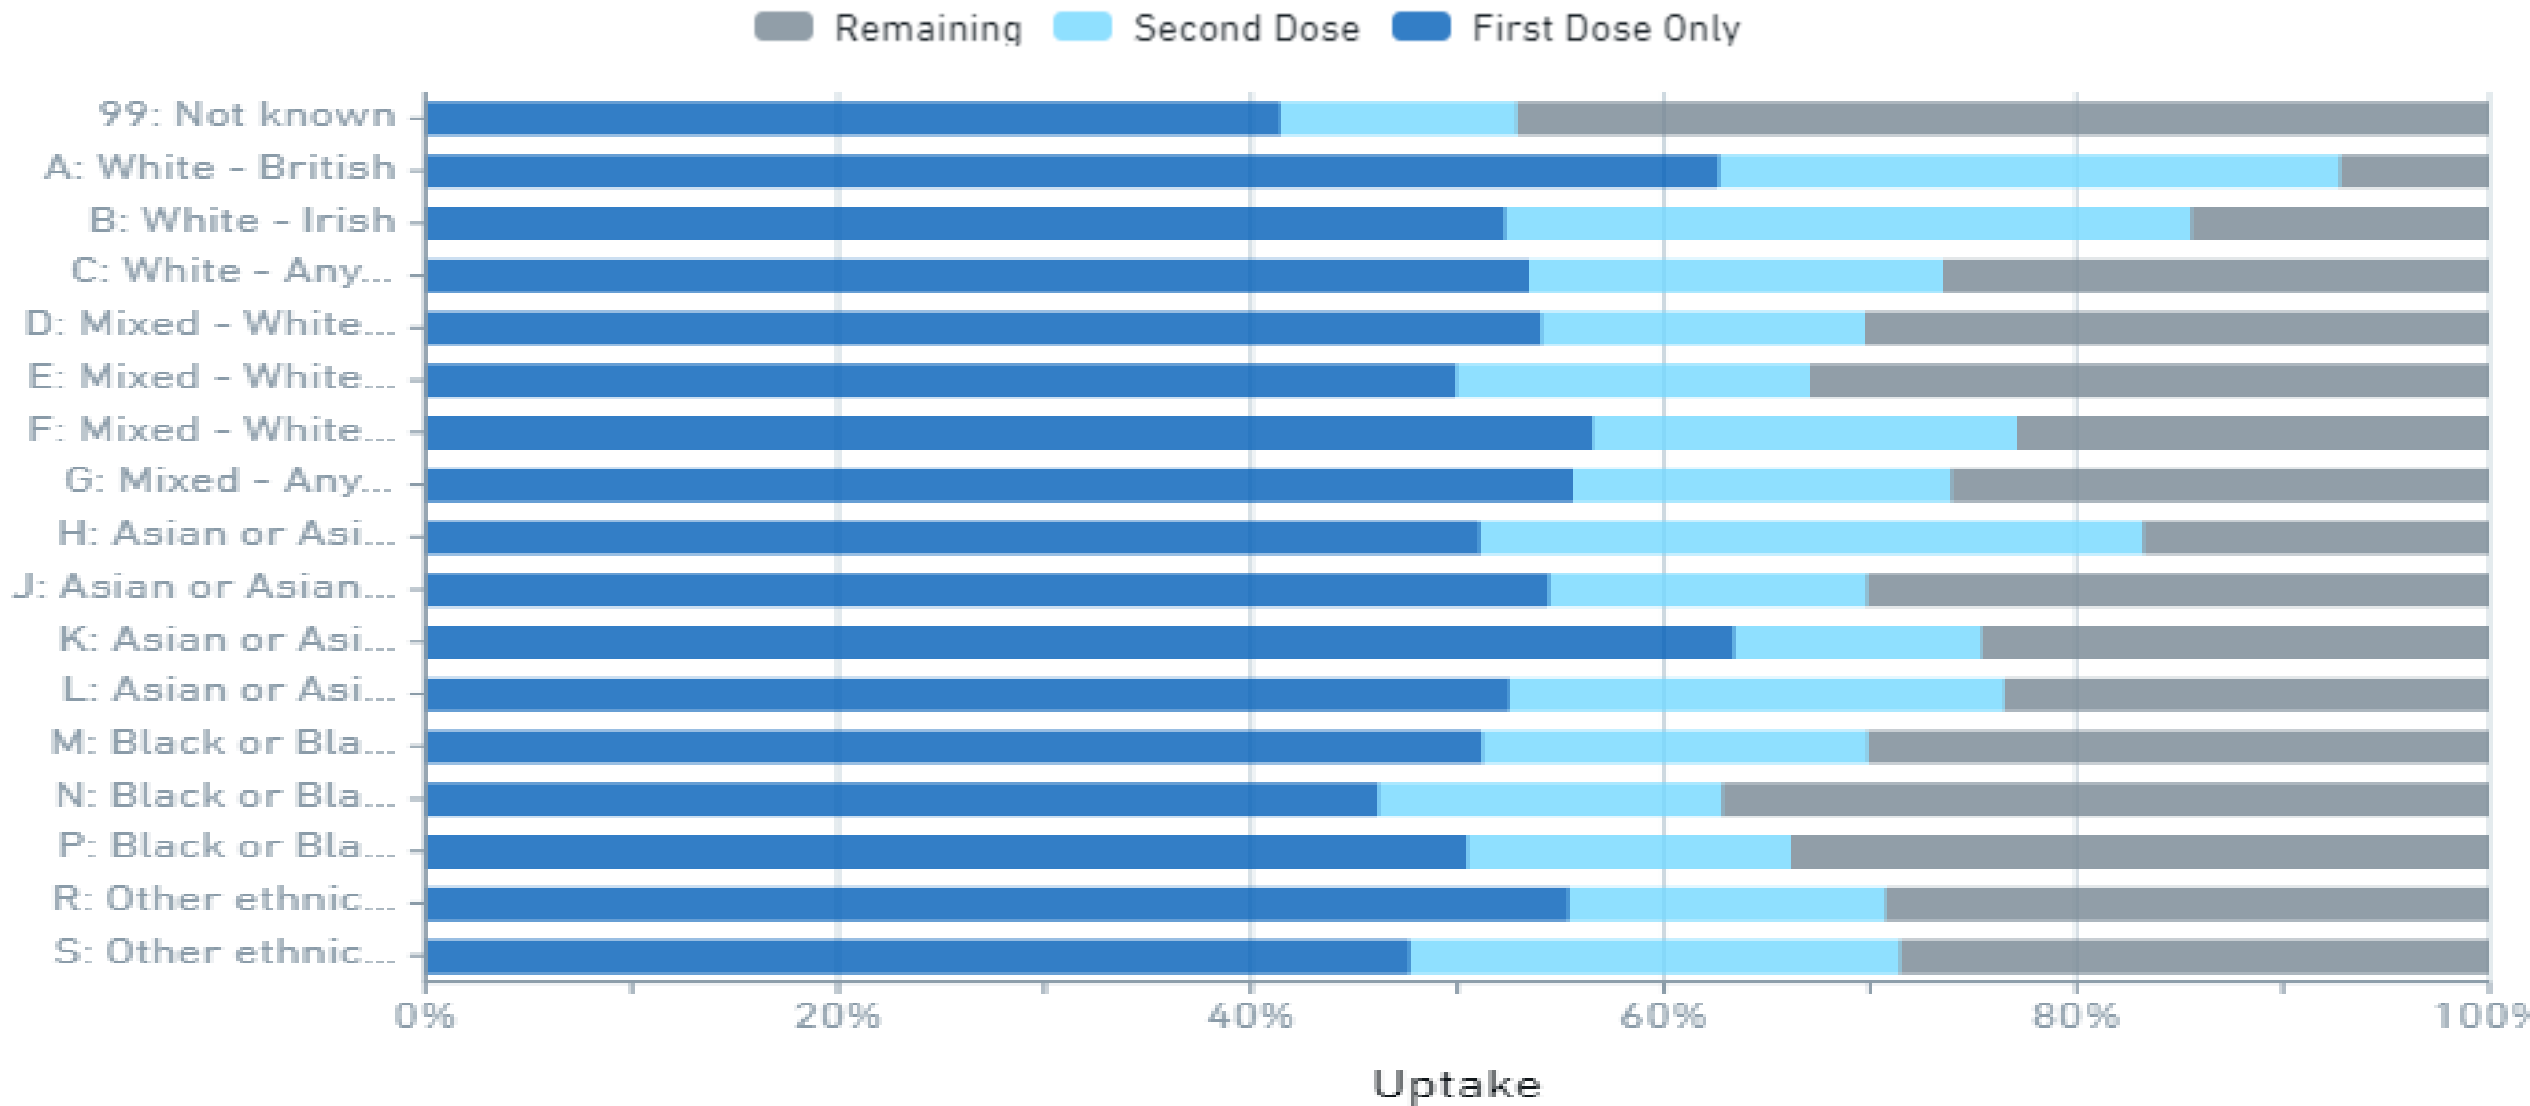

Reaching all parts of the community

- We continue to promote confidence in the vaccination programme and encourage take up in the population

- Communications materials being used to reach different groups include:

  - Short films in different languages being shared via social media, websites etc.

  - Translated written material being made available in different languages

  - Films and animations focussing on facts being shared widely

- Support provided to community groups for online events – including providing speakers and publicity

- Worked with local authority to vaccinate homeless people and patients of Luther Street practice

- Those not registered with a GP or without a NHS number can be vaccinated. People will be encouraged to register with a GP but this is not a requirement

- Outreach teams supporting GP practices in calling on patients who have not responded to invitation for vaccine now reaching out to encourage uptake of 2nd dose.

- Outreach to diverse communities with pop-up clinics in Oxford Mosques and east Oxford church with further clinics planned for Banbury Mosque and traveller communities.

Health and Social Care Update

Harm review process

Established process for reviewing >52 week waits since May 2018.

- Reviewed by clinicians
- Ideally involves speaking to patient
- Clinical and psycho social harm is assessed.
- Moderate and major harm are reviewed as incidents.
- Monthly harm review meeting chaired by Deputy Chief Medical Officer
- Cancer patients 104 day harm review

Harm review process during COVID-19 pandemic

- Adapted during COVID-19 to accommodate higher numbers of patients waiting

- Not possible to undertake all individual harm reviews. Local arrangement for services with smaller numbers would review all patients.

- Nationally mandated prioritisation system for patients on an inpatient waiting list. Introduced as part of recovery to assess level of clinical need due to large numbers of patients waiting post COVID.

- Specialities have reviewed their patient cohorts and risk stratified to minimise harm from waiting

Patients waiting for routine appointments

- Three specialties mainly remain closed to routine referrals; ENT, Maxillofacial and Ophthalmology. Most Gynaecology can be accessed once a triage has taken place.

- GPs can upgrade a routine patient and refer at higher need as they need to, to date no patients from these three specialties have been identified as suffering moderate or severe harm as a result of their wait.

- We do fully recognise the prolonging of symptoms is not good for patients but in these specialities there are still long waits for patients to be seen who have been referred.

- Ophthalmology and Max fax have advice and guidance lines for GPs.

- An audit was undertaken of 50 ENT patients in this routine category. The patients were phoned and asked about the impact of the waits - none reported harm other than prolongation of symptoms

- Significant work has been done with Independent sector providers to identify alternatives for patients and ensure they are seen and new models of care introduced e.g. new Community Gynaecology Service
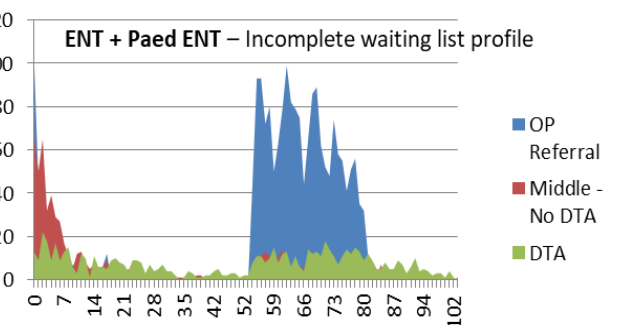

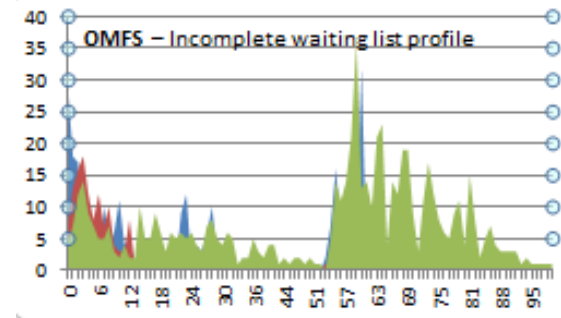

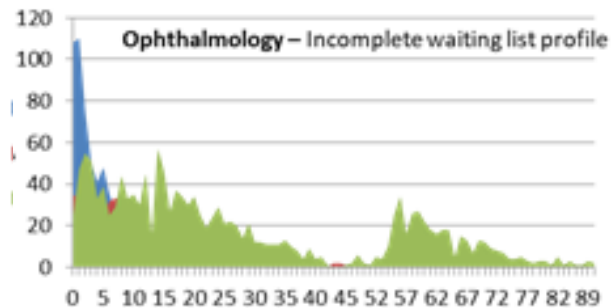

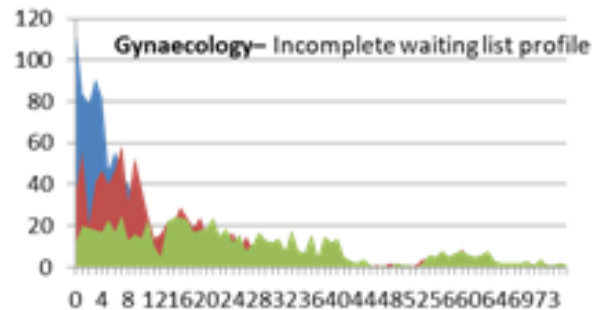

Trust level RTT Incomplete waiting list size and 52 week trend (April 2019-March 2021)
