

Highway Verge and Vegetation Management policy

1. Oxfordshire County Council, as the Highway Authority, is ultimately responsible for the maintenance of grass verges alongside the carriageway network throughout Oxfordshire excluding motorways and trunk roads.
2. This policy encompasses Oxfordshire County Council's corporate vision, objectives and embraces the nine priority themes of the Council. The policy is also informed by the Local Transport Connectivity Plan, the Highway Asset Management Plan, the Energy Strategy, and the Carbon Management Plan. The priority themes include
 - i. Put action to address the climate emergency at the heart of our work.
 - ii. Improve access to nature and green spaces
3. This document relates to Oxfordshire County Council's Policy of verge and vegetation management only.

Policy: RVP1

The Council will conserve and enhance the natural environment.

Policy: RVP2

The Council will maintain footways and cycleways free and clear from intrusive vegetation. Where resources are limited, priority will be given to those areas.

Policy: RVP3

The Council will undertake verge management on all roadside verges in both rural and urban areas on a cyclical basis in line with our statutory requirements

Policy: RVP4

The Council will maintain visibility at junctions and other high-risk areas, (excluding visibility splays at entrances to residential or commercial premises) and ensure cycle and footpaths are effectively managed.

(Visibility splays are areas of adopted grass verges at locations where roads connect)

Policy: RVP5

Where cutting activities are considered appropriate, liaison with other organisations (such as District Councils) will be undertaken to ensure a co-ordinated approach in maintenance activities (such as litter picking).

Policy: RVP6

Where vegetation from adjoining land/properties encroaches and significantly hinders safe passage of highway network users, enforcement notices to remove and make safe will be issued to the riparian owner. Where they do not undertake action within the given timeframe, works will be carried out under instruction of council officers and costs recovered through legal process.

Policy: RVP7

Management of roadside verges (including those areas the county council has identified as Roadside Verge Nature Reserves) will prioritise the promotion of biodiversity where possible with reference to existing management specifications and to publications from Plantlife (www.plantlife.org.uk) and Oxford University Biodiversity leaflet (<https://www.biodiversity.ox.ac.uk/project/hero/>) as best practice guidelines, taking into account resources and location.

Policy: RVP8

The Council will manage grass verges within of Areas of Outstanding Natural Beauty (AONB) to further the aims of the AONB management plans.

Policy: RVP9

The Council will target additional resources where available to those areas which will have the best biodiversity outcomes, including identifying and managing new RVNRs

Policy: RVP10

The Council will support communities and initiatives to manage verges for biodiversity wherever feasible and subject to agreement with OCC, including ensuring the right species are in the right locations

Service Aims:

1. Ensure cost effective maintenance of new verges to maximise biodiversity
