ITEM 11

SAFER AND STRONGER COMMUNITIES SCRUTINY COMMITTEE 18 FEBRUARY 2013

VILLAGE HALL/COMMUNITY CENTRE GRANTS

Report by Head of Law and Culture

Introduction

1. The County Council's grant scheme for the improvement of village halls and other community buildings is administered by the Oxfordshire Rural Community Council (ORCC). The annual budget for the grants is currently £59,137. This Report sets out the criteria by which applications are assessed, the level of grants awarded and presents an analysis of grants awarded over the last five years.

Eligibility Criteria

- 2. Village halls and community centres i.e. buildings in urban and rural areas which are available for use by a wide range of local people and organisations are eligible to apply. The managing body of the building should be a properly constituted voluntary organisation representative of users or a town/parish council in a community of under 10,000 population.
- 3. Buildings managed by one particular sectional organisation will not normally be eligible. If such a building serves a wider role in the community and no publicly-owned facility is available, an application can be considered on its merits. In the case of any building not held on trust for public use, the managing body must undertake to make the building available for general public use for at least 21 years.
- 4. Grants will be considered for:
 - acquisition of land or buildings
 - adaptation and improvement of existing buildings and their accessibility
 - erection of new buildings
 - professional fees, including assistance with initial design and costing work
 - other associated expenses, e.g. fencing, car park

 major replacement items such as a new floor, new roof, new heating system

Grants will not be considered for:

- routine repairs or maintenance work
- associated outdoor facilities, such as play areas, sports facilities and associated changing rooms, which are not related to the indoor use of the building.

5. Other criteria are also taken into consideration:

- There should be sufficient security of tenure of the building a freehold or long lease.
- Planning permission and building regulations approval should have been obtained.
- The property should not be subject to a mortgage or a loan secured on the property
- Grant aid is not available for any expenditure on the project which has already been committed or incurred.

6. Applicants also have to show that:

- there is a need for the project which could not be met by any other means
- there is financial need for a grant
- other sources of finance are available to supplement the grant requested from the County Council to meet the total cost of the project. It will normally be expected that grant aid support will be sought from the Town/Parish Council and District Council
- the project is technically feasible and reasonably priced. At least 3 estimates or a costing by a quantity surveyor should have been obtained
- the design and construction meet health and safety and other relevant regulations
- all building work whether or not it requires building control approval should comply with Part M (2004) of the Building Regs. 2000
- the property is adequately insured

Award of Grants

- 7. The County Council seeks to make available grants of up to 35% of total project costs, normally up to a maximum cash limit of £10,000. For projects to provide access/facilities for people with disabilities, the Council seeks to make available grants of up to 50% of total project costs (normally subject to the same cash limit). For schemes affected by the maximum cash limit there is the possibility of applying for grant aid phased over more than one year.
- 8. All applications should indicate how projects will result in accommodation which is more effective and better able to meet local needs. The County Council will give priority to the following:
 - Projects where there is no existing publicly-owned provision and no other suitable alternative facilities or where existing provision is seriously inadequate.
 - Work on existing accommodation which if not carried out would seriously threaten the future of the building or seriously restrict its use.
 - Work required for health and safety reasons.
 - Work to provide access/facilities for people with disabilities and to ensure, as a minimum, compliance with the Disability Discrimination Act
- 9. It is expected that building work should commence within 12 months from the date on which grant aid is agreed. Work should be completed within 2 years from that date.

Grants Awarded

10. An analysis of grants awarded over the last five years is attached at Annex 1.

RECOMMENDATION

- 11. The Scrutiny Committee is RECOMMENDED to:
 - a) note the report.
