

1. Summary of Significant Accounting Policies

General

The Statement of Accounts summarises the County Council's transactions for the 2018/19 financial year and its position at the year-end 31 March 2019. It has been compiled in accordance with *The Code of Practice on Local Authority Accounting in the United Kingdom 2018/19* (the *Code*), published by the Chartered Institute of Public Finance and Accountancy (CIPFA).

Except where specifically stated otherwise, the Statement of Accounts is prepared on a historic cost basis, modified by the revaluation of certain categories of assets and financial instruments. The accounts have been prepared on a going concern basis, that is, the accounts have been prepared on the assumption that the functions of the County Council will continue in operational existence for the foreseeable future.

Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place, not simply when the cash payments are made or received.

Where income and expenditure has been recognised, but the cash has not been received or paid, a debtor or creditor for the relevant amount is recognised in the Balance Sheet. Where it is doubtful that debts will be settled, the balance of debtors is reduced and a charge is made to revenue for the income that might not be recoverable.

Government Grants and Contributions

Government grants and third party contributions are accounted for on an accrual basis and are recognised in the Statement of Accounts when there is reasonable assurance that the County Council will comply with the conditions attached to their payment and that the grants or contributions will be received.

Grants and contributions relating to capital and revenue expenditure are recognised immediately in the Comprehensive Income and Expenditure Statement as income, except to the extent that the grant or contribution has a condition that the County Council has not satisfied. Conditions are stipulations that require the grant or contribution to be returned to the provider if the terms of the grant or contribution are not met.

Monies advanced as grants or contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors (capital monies within Capital Grants Receipts in Advance). When conditions are satisfied, the grant or contribution is credited to the relevant directorate line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income line (un-ringfenced revenue grants and all capital grants and contributions) in the Comprehensive Income and Expenditure Statement.

Capital grants and contributions credited to the Comprehensive Income and Expenditure Statement are reversed out of the County Fund Balance in the Movement in Reserves Statement - where the grant/contribution has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve; where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

Capital grants and contributions used to finance Revenue Expenditure Funded from Capital Under Statute are accounted for in the same way as other capital grants and contributions i.e. credited to the Taxation and Non-Specific Grant Income line when there are no outstanding conditions and transferred/applied in the same way through the Movement in Reserves Statement.

Revenue grants and contributions that have been credited to the relevant directorate line in the Comprehensive Income and Expenditure Statement that remain unapplied as at the Balance Sheet Date and are required to meet committed expenditure in future years are transferred to an earmarked reserve through the Movement in Reserves Statement.

Council tax and business rates income

The council tax and business rates income included in the Comprehensive Income and Expenditure Statement (CIES) for the year is the accrued income for the year. The difference between the income included in the CIES and the amount required by regulation to be credited to the County Fund is taken to the Collection Fund Adjustment

Account and included as an adjusting item in the Movement in Reserves Statement.

The district councils in Oxfordshire are acting as agents of the County Council in collecting council tax and business rates. The cash collected from council tax payers and business rates payers belongs proportionately to the district councils and the major preceptors. There is therefore a debtor/creditor position between each district council and the County Council to recognise that the net cash paid to the County Council in the year is not the same as its share of cash collected. The County Council recognises its share of council tax and business rates debtor and creditor balances, impairment allowances for doubtful debts and provisions for losses on appeal in its Balance Sheet. The Cash Flow Statement of the County Council includes the net council tax and business rates cash received from the Collection Fund in the year.

Employee Benefits

Benefits Payable during Employment

Short-term employee benefits are recognised as an expense in the year in which employees render service to the Council.

Termination Benefits

Termination benefits are charged, on an accruals basis, to the relevant service line in the Comprehensive Income and Expenditure Statement at the earlier of when the Council can no longer withdraw the offer of those benefits or when the Council recognises costs for a restructuring.

Post-Employment Benefits

The County Council participates in four pension schemes:

- The Local Government Pension Scheme;
- The Fire-fighters' Pension Scheme;
- The Teachers' Pension Scheme; and
- The NHS Pension Scheme.

These schemes provide defined benefits to members. However, the arrangements for the teachers' pension scheme and the NHS pension scheme mean that liabilities for these benefits cannot be identified to the County Council. These schemes are therefore accounted for as if they are defined contributions schemes – no liability for future payment of benefits is recognised in the Balance Sheet and the relevant service

lines in the Comprehensive Income and Expenditure Statement are charged with the employer's contributions payable in the year.

The County Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award are accounted for on the same basis as defined benefit schemes.

For the schemes treated as defined benefit schemes the Cost of Services includes:

- Current service cost – the increase in the present value of a scheme's liabilities resulting from employee service in the current period. This is included in the relevant directorate line within the Cost of Services.
- Past service cost – the increase in the present value of the scheme liabilities for employee service in prior periods, resulting from a scheme amendment or curtailment. This is included in Other Corporate Costs within the Cost of Services.
- Gain/loss on settlement – changes in liabilities relating to actions that relieve the County Council of primary responsibility for a pension obligation. This is included in Other Corporate Costs within the Cost of Services.

The net interest on the defined benefit liability (asset) – the change during the period in the net defined benefit liability (asset) that arises from the passage of time - is included in the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement. Remeasurements comprising actuarial gains and losses – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuary has updated their assumptions – and the return on scheme assets, excluding amounts included in net interest on the net defined liability (asset), are recognised in Other Comprehensive Income and Expenditure within the Comprehensive Income and Expenditure Statement.

Scheme assets attributable to the County Council are measured at fair value as at the Balance Sheet date. Scheme liabilities attributable to the County Council are measured on an actuarial basis using the

projected unit method. The net pensions liability is recognised in the Balance Sheet.

The amount chargeable to the County Fund for providing pensions for employees is the amount payable for the year in accordance with the statutory requirements governing each particular pension scheme. Where this amount does not match the amount charged to the Surplus or Deficit on the Provision of Services for the year the difference is taken to the Pensions Reserve via the Movement in Reserves Statement.

Fire-fighters injury awards are disability benefits paid by the County Council that do not form part of the fire-fighters pension scheme. However, the measurement of these long-term benefits is subject to the same degree of uncertainty as the measurement of fire-fighters post-employment benefits and therefore they are accounted for in the same way as fire-fighters post-employment benefits.

Property, Plant and Equipment

Assets that have a physical substance and are held for use in the production or supply of goods or services, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment. These include operational land and buildings, vehicles, plant and equipment, surplus assets, assets under construction and infrastructure.

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that future economic benefits or service potential associated with the item will flow to the County Council and the cost of the item can be measured reliably. This excludes expenditure on routine repairs and maintenance, which is charged directly to service revenue accounts as an expense when incurred.

Assets are initially measured at cost, comprising:

- The purchase price
- Any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management

- The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located (this only applies when the County Council has an obligation to carry out such activities when the item is acquired, constructed or installed)

The County Council does not capitalise borrowing costs incurred whilst assets are under construction.

Property, Plant and Equipment is subsequently carried in the Balance Sheet using the following measurement bases:

- Infrastructure, community assets and assets under construction – depreciated historic cost
- Other Property, Plant and Equipment assets (excluding surplus assets) – current value, determined as the amount that would be paid for the asset in its existing use
- Surplus assets – fair value (at highest and best use), determined as the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date

Where there is no market-based evidence of current value because of the specialist nature of an asset, depreciated replacement cost is used as an estimate of current value.

Where non-property assets have short useful lives or low values (or both), depreciated historic cost basis is used as a proxy for current value.

A *de minimis* level of £20,000 is applied for land and buildings and £15,000 for vehicles and plant, other than for schools local capital spend where a *de minimis* of £2,000 is applied.

Revaluations of property assets are undertaken on a five-year rolling programme as shown below. Material changes to asset valuations are adjusted in the interim periods.

		Date of Last Revaluation	Date of Next Revaluation
Year 1	Secondary and Special Schools, Other Educational Premises (Children's, Youth and Sports Centres), Surplus Assets and properties not re-valued.	2014/15 Secondary and Special Schools and 2013/14 for other education premises	2018/19
Year 2	Primary, Nursery, Junior and Infant Schools	2015/16	2019/20
Year 3	Social Care Premises, Libraries, Museums and Adult Learning, Fire & Rescue Service Premises, Community Safety, Staff Housing, Central Offices and Highways Depot	2017/18	2020/21

Investment properties valuations are reviewed annually. Assets held for sale are revalued at the point of reclassification to that category.

Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Surplus or Deficit on the Provision of Services where they arise from the reversal of a loss previously charged to a directorate.

Decreases in valuations are accounted for as follows:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant directorate in the Comprehensive Income and Expenditure Statement

Assets are assessed each year as to whether there is an indication of impairment. Where indications exist and the recoverable amount of the asset is materially lower than the carrying amount, an impairment loss is recognised for the shortfall. Where impairment losses are identified they are accounted for in the same way as decreases in valuations.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant directorate, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation of Property, Plant and Equipment

Depreciation is provided for on all Property, Plant and Equipment with a finite life, which is determined at acquisition or revaluation. Assets in the course of construction are not depreciated until they are brought into use. Depreciation is an estimation technique that is calculated using the straight-line method with the following asset lives:

- Buildings: 60 years (or less if specified by the valuer)
- Vehicles, plant and equipment: between 5 and 30 years
- IT equipment and infrastructure: between 3 and 5 years
- Infrastructure (roads and bridges): 35 years

Land is determined to have an infinite life and is not depreciated.

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historic cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Charges to Revenue for Property, Plant and Equipment

Services, support services and trading accounts are charged with a capital charge for all Property, Plant and Equipment used in the provision of services. The charge covers the annual provision for

depreciation and revaluation and impairment losses where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off.

The County Council is not required to raise council tax to fund depreciation or revaluation/impairment losses. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement (referred to as Minimum Revenue Provision (MRP)). Depreciation and revaluation/impairment losses are therefore replaced by the MRP contribution in the County Fund Balance by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement.

Disposals and Non-current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. To be classified as an Asset Held for Sale the asset must meet the following criteria:

- Available for immediate sale in its present condition
- The sale must be highly probable
- Actively marketed at a reasonable sale price
- The sale should be expected to be completed within 1 year

Assets Held for Sale are measured at the lower of their carrying value and fair value less costs to sell at initial reclassification. Gains in fair value are recognised only up to the amount of any previously recognised losses in the Surplus or Deficit on the Provision of Services. Decreases in fair value less costs to sell are recognised in Other Operating Expenditure in the Comprehensive Income and Expenditure Statement. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to Property, Plant and Equipment and valued at the lower of their carrying amount before they were classified as held for sale (adjusted for depreciation or revaluations that would have been recognised had they not been classified as Held for Sale) and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of, the carrying amount of the asset in the Balance Sheet is written off to Other Operating Expenditure in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals are credited to the same line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Any revaluation gains in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Receipts from the disposal of assets in excess of £10,000 are categorised as capital receipts. Capital receipts are appropriated to the Capital Receipts Unapplied reserve from the County Fund Balance in the Movement in Reserves Statement.

The written off value of assets disposed of is appropriated to the Capital Adjustment Account from the County Fund Balance in the Movement in Reserves Statement so that there is no charge against the Council Tax.

Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation.

Investment properties are measured initially at cost and subsequently at fair value (at highest and best use), being the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date. Investment properties are not depreciated and are revalued annually according to market conditions. Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. Gains and losses on disposal are posted to Other Operating Expenditure. The gains and losses are reversed out of the County Fund Balance to the Capital Adjustment Account (or Capital Receipts Unapplied for disposal receipts over £10,000) in the Movement in Reserves Statement so that they do not impact on Council Tax.

Revenue Expenditure Funded from Capital Under Statute

Capital expenditure on non-current assets not owned by the County Council and grants given by the County Council for capital purposes are charged to the relevant directorate in the Comprehensive Income and Expenditure Statement. In accordance with statutory provisions this expenditure is transferred from the County Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement, such that there is no impact on council tax.

Private Finance Initiative (PFI) and similar contracts (service concession arrangements)

PFI type contracts involve a private sector entity (the operator) constructing or enhancing property used in the provision of a public service, and operating and maintaining that property for a specified period of time. The operator is paid for its services over the period of the arrangement. Where the County Council controls or regulates the services provided by the operator and controls the residual interest in the property at the end of the term of the arrangement the contract meets the tests for accounting as a service concession arrangement.

Properties used in service concession arrangements are recognised as Property, Plant and Equipment of the County Council. The original recognition of the assets at fair value (based on the cost to purchase the assets) is matched by the recognition of liabilities for amounts due to the operators to pay for the assets and deferred income where the operator part funds the assets from income from third parties. Once recognised on the Balance Sheet these assets are revalued and depreciated in the same way as other Property, Plant and Equipment owned by the County Council.

The amounts payable to the service concession arrangement operators each year are analysed into five elements:

- The value of services received during the year – charged to the relevant directorate in the Comprehensive Income and Expenditure Statement
- Finance costs – an interest charge on the outstanding finance liability – charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement

- Payments towards the finance liability – applied to write down the Balance Sheet liability towards the operator
- Contingent rents – inflationary increases in the amounts to be paid for the property arising during the contract – charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. Note for the County Council's current service concession arrangement there is no inflation applied to the elements of the contract payments relating to the property build costs and therefore no contingent rents.
- Lifecycle replacement costs – recognised as a capital prepayment in the Balance Sheet and transferred to Property, Plant and Equipment when capital works are undertaken.

Deferred income is released to the relevant directorate in the Comprehensive Income and Expenditure Statement on a straight line basis over the service concession period.

Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a property lease covers both land and buildings, the land and buildings elements are considered separately for lease classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

Where the County Council is the lessee, property, plant and equipment held under a finance lease is recognised on the Balance Sheet at the commencement of the lease at its fair value at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred. The lease payments are apportioned

between a charge for the acquisition of the interest in the asset – applied to writing down the liability, and a finance charge – charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. Once recognised on the Balance Sheet, assets recognised under finance leases are accounted for in the same way as other Property, Plant and Equipment, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life.

Rentals paid by the Council under operating leases are charged to the relevant directorate in the Comprehensive Income and Expenditure Statement on a straight-line basis over the lease period except where the contractual payment terms are considered to be a more systematic and appropriate basis.

Where the County Council leases an asset to others under a finance lease, the asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the County Council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal, matched by a long-term debtor in the Balance Sheet. Finance lease rentals receivable are apportioned between a charge for the acquisition of the interest in the property – applied to write down the long-term debtor (together with any premiums received), and finance income credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is required under statute to be treated as a capital receipt. Where a premium has been received, this is posted out of the County Fund Balance to the Capital Receipts Unapplied reserve in the Movement in Reserves Statement. Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future years, this is posted out of the County Fund Balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the

capital receipt for the disposal of the asset is used to write down the long-term debtor and the deferred capital receipts are transferred to the Capital Receipts Unapplied reserve. The written-off carrying amount of the asset on disposal is appropriated to the Capital Adjustment Account from the County Fund Balance in the Movement in Reserves Statement so that there is no impact on Council Tax.

Where the County Council leases an asset to others under an operating lease, the asset is retained on the Balance Sheet. Rental income is credited to the relevant directorate in the Comprehensive Income and Expenditure Statement on a straight-line basis over the lease period (including any premiums received at the commencement of the lease).

Cash and Cash Equivalents

Cash is represented by cash in hand and bank deposits repayable without penalty on notice of not more than 24 hours. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. The County Council treats the following as cash equivalents:

- Instant Access Call Accounts
- Instant Access Short Term Funds
- Deposits with one working day to maturity from date of deposit

Financial Assets

Financial assets are classified into three types:

- Loans and receivables – assets that have fixed or determinable payments but are not quoted in an active market
- Available-for-sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments
- Financial assets at fair value through profit or loss – assets that are part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking

Loans and receivables are initially measured at fair value and carried in the Balance Sheet at their amortised cost. Credits to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement for external interest receivable are based

on the carrying amount of the asset, multiplied by the effective interest rate for the instrument. For the majority of the County Council's investments, the effective interest rate is the same as the actual interest receivable in accordance with the loan agreement. Short duration receivables with no stated interest rates (e.g. debtors) are measured at original invoice amount.

The County Council has made a number of loans to clients and other organisations at less than market interest rates or zero rate (referred to in the Code as soft loans). For the County Council there are no material differences between the fair value and the nominal value of such loans and no adjustments are made on initial recognition of these loans.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the carrying value of the asset is reduced through the use of an allowance account and a charge made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Any gains and losses arising on the derecognition of assets are credited/debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Financial assets at fair value through Other Comprehensive Income are initially measured and carried in the Balance Sheet at fair value. Where the asset has fixed or determinable payments, credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the amortised cost of the asset multiplied by the effective interest rate for the instrument. Where there are no fixed or determinable payments, income is credited to the Comprehensive Income and Expenditure Statement when it becomes receivable.

Assets are maintained in the Balance Sheet at fair value. Values are based on:

- Instruments with quoted market prices – the market price
- Other instruments with fixed and determinable payments – discounted cash flow analysis

The inputs to the measurement techniques are categorised in accordance with the following three levels:

- Level 1 inputs - quoted prices (unadjusted) in active markets for identical assets that the County Council can access at the measurement date
- Level 2 inputs – inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly
- Level 3 inputs – unobservable inputs for the asset

Changes in fair value are balanced by an entry in the Financial Instruments Revaluation Reserve and the gain/loss recognised in Other Comprehensive Income and Expenditure (except for impairment losses).

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down through the use of an allowance account and a charge made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Any gains and losses arising on the derecognition of assets are credited/debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, along with any accumulated gains/losses recognised in the Financial Instruments Revaluation Reserve.

Financial assets at fair value through profit or loss are initially measured and carried in the Balance Sheet at fair value. Movements in fair value are balanced by posting gains and losses to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement as they arise. Any residual gains and losses arising on derecognition are also credited/debited to the Comprehensive Income and Expenditure Statement. The basis of fair value and the inputs to the measurement techniques is the same as for Financial assets at fair value through Other Comprehensive Income.

The carrying amounts of individual financial assets are separated into their current (short-term) and non-current (long-term) elements for presentation within the Balance Sheet.

Financial Liabilities

Financial liabilities are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of the financial instrument. Financial liabilities are initially measured at fair value and are carried at their amortised cost.

Interest is charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, based on the carrying amount of the liabilities, multiplied by the effective rate of interest for the instruments. This means that:

- The amount included in the Balance Sheet is the outstanding principal repayable, plus accrued interest; and
- Interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

Financial liabilities are de-recognised when the obligation is discharged, cancelled or expires.

Debt Redemption

The County Council complies with legislation to charge a Minimum Revenue Provision (MRP) to the County Fund revenue account for the repayment of debt by making a straight-line charge of the outstanding pre-2008 capital expenditure as at 1 April 2017 calculated over a 50-year period and making provision for repayment of prudential borrowing in equal instalments over the estimated life of the asset for which the borrowing is undertaken. In addition the provision for repayment of debt includes an amount equal to the amount that is taken to the Balance Sheet to reduce the liabilities in respect of PFI and similar contracts and for the prepayment of lifecycle costs relating to these contracts, and an amount equal to the amount that is taken to the Balance Sheet to reduce liabilities in respect of finance leases.

Provisions

Provisions are made where the County Council has a present obligation (legal or constructive) as a result of a past event that probably requires

settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed annually and are adjusted to reflect the current best estimate against the appropriate directorate in the Comprehensive Income and Expenditure Statement. When payments are eventually made they are charged directly to the provision.

Insurance

The County Council has a policy of self-insurance of claims across its main insurance categories. In accordance with the Code the insurance provision is set aside to cover insurance claims actually received and awaiting resolution that have been advised to the County Council and which it has been decided to be insured internally rather than externally. Subject to identified contingent liabilities there are no significant unfunded risks.

Contingent liabilities and contingent assets

The County Council discloses contingent liabilities in the notes to the accounts. Contingent liabilities are possible obligations arising from past events and whose existence will be confirmed by one or more uncertain events occurring in the future and are not wholly under the County Council's control. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that there will be a transfer of economic benefits or where the obligation cannot be measured with sufficient reliability.

Financial guarantee contracts come under the definition of financial instruments and are initially recognised in the accounts at fair value. This only applies to guarantees entered into after 1 April 2006. Any entered into before that date continue to be recognised as contingent liabilities. If payment under the guarantee becomes probable the liability would be determined in accordance with the requirement for provisions.

The County Council discloses contingent assets in the notes to the accounts. Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the County Council.

Reserves

A reserve, whether capital or revenue, results from events that have allowed monies to be set aside, surpluses, or decisions causing anticipated expenditure to have been postponed or cancelled. These can be spent or earmarked at the discretion of the County Council. Earmarked revenue reserves can be used to set aside available monies for major anticipated capital schemes, for projects or service arrangements that the County Council may wish to carry out, business unit surpluses, service efficiency savings and contingent liabilities where a provision is not required.

Reserves are established and used for different reasons. These include:

- Usable reserves - reserves that can be used at the County Council's discretion to fund either revenue or capital spend
- Unusable reserves - reserves relating to unrealised gains, such as the Revaluation Reserve, that are not "cash backed" and cannot be used to fund future capital or revenue spending and reserves relating to differences between accounting policy and statutory requirements, such as the Capital Adjustment Account.

Earmarked reserves are created by appropriating amounts from the County Fund Balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred it is charged to the appropriate directorate. The reserve is then appropriated back into the County Fund Balance in the Movement in Reserves Statement so that there is no net charge against Council Tax for the expenditure.

Group Accounts

The County Council is required to prepare group accounts where it has interests in subsidiaries, associates and/or joint ventures, subject to consideration of materiality. For 2018/19 the County Council did not have any such interests that are considered material and therefore prepared these accounts only as a single entity rather than as group accounts.

The County Council participates in a number of joint operations (e.g. pooled budget arrangements with the health sector and Oxfordshire Local enterprise Partnership). The County Council accounts directly (in its single entity accounts) for its part of the assets, liabilities, income,

expenditure and cash flows held within or arising from such an arrangement.

There are a number of circumstances where the County Council exercises limited influence and these are disclosed as related parties. Under these circumstances, transactions with these bodies are charged against the appropriate service in the Comprehensive Income and Expenditure Statement, and balances owed by them or to them are included in debtors and creditors.

Schools

Under the Code, local authority maintained schools are considered to be separate entities with the balance of control lying with the Council. The Code requires that the income, expenditure, assets and liabilities of maintained schools be accounted for in the single entity accounts of the Council rather than requiring consolidation in the Group Accounts.

In accordance with the Education Reform Act 1988, the scheme of Local Management of Schools provides for the carry forward of individual school surpluses and deficits. These are held as usable earmarked reserves and are committed to be spent on schools.

Taxation

The County Council is exempt from income tax, corporation tax and from capital gains tax.

Value Added Tax is excluded from both revenue and capital in terms of both income and expenditure except where the County Council is not able to recover VAT on expenditure.

The County Council incurs landfill tax, which is charged on a tonnage basis to the County Council by its waste disposal contractors.

In addition, the County Council incurs stamp duty land tax on the acquisition of property freeholds and leaseholds, climate change levy on its energy bills and insurance premium tax on its insurance costs. Also, the County Council incurs employer's national insurance contributions based on a percentage of staff salaries.

Where the County Council incurs tax, this cost is charged to directorates in the Comprehensive Income and Expenditure Statement.

Rounding

In preparing the Statement of Accounts all numbers, including totals, have been rounded independently to avoid unacceptable rounding errors. This may mean that some tables do not cross cast.
