# Our approach to outlining the system-wide opportunities

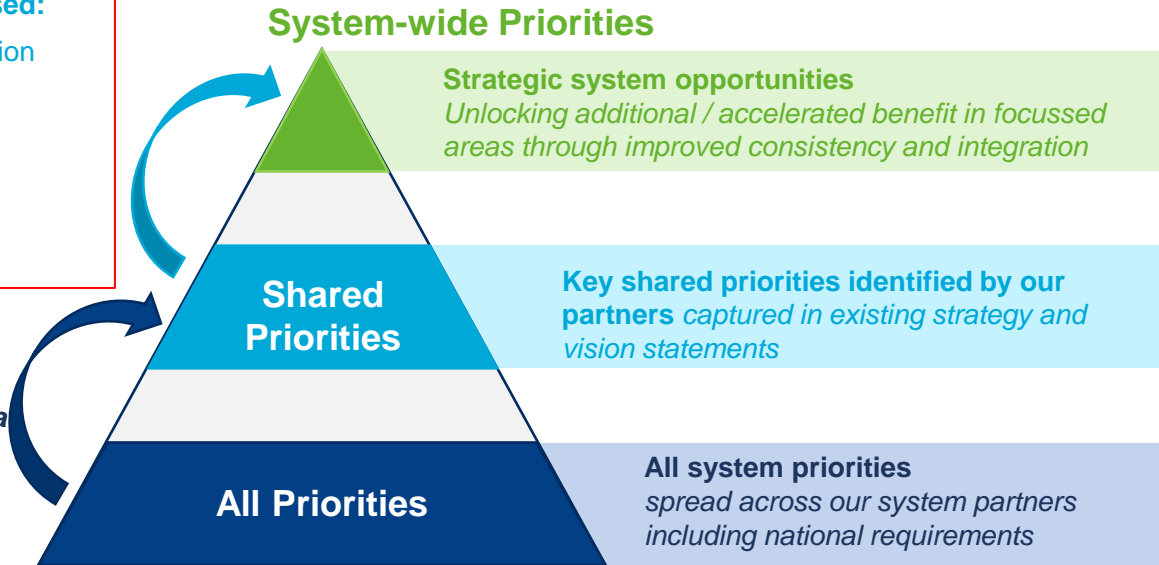

**We are not starting from a blank sheet** - the opportunities have been derived from strategy documentation and priorities (national and local) and thinking that currently exists across the system (see Phase1).

## Phase 2: Cross system working groups mobilised:

- Current state - What are the challenges, population needs, inequalities
- Future demand and target outcomes
- What are the opportunities - How can integrated working accelerate or improve outcomes
- Propose system-wide priorities

## Phase 1: Identifying shared priorities (complete)

- ✓ Review of **input documentation** and **base data**
- ✓ Working with **Strategy Steering Group & stakeholders**
- ✓ Creation of “**starter for 10**” of the **opportunities for the system**

# Proposed timelines and approach – to be confirmed by ICP

The 2022 Health & Care Act requires the ICP to prepare an ICP strategy. The DHSC guidance issued in July sets out further details on requirements including publication dates. Steering group members have been tasked with working closely with their organisations to ensure relevant information and updates are shared regularly with colleagues and elected members so there are no surprises.
