

Audit and Governance Committee – 25 April 2018

Statement of Accounts 2017/18 - Accounting Policies Briefing Note

Report by the Director of Finance

Introduction

1. The Council's Statement of Accounts is prepared in accordance with the Council's Accounting Policies as set out at Note 1 in the Notes to the Core Financial Statements.
2. The CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom (the Code) defines Accounting Policies as 'the specific principles, bases, conventions, rules and practices applied by an authority in preparing and presenting financial statements'. The accounting policies describe how the Council has interpreted and applied the code.
3. The draft 'Note 1. Summary of Significant Accounting Policies' is included as an appendix to this briefing note.

Accounting policies

4. The Code prescribes that 'authorities shall apply the objective, underlying assumption and qualitative characteristics of useful financial information, in the selection and application of accounting policies and estimation techniques'.
5. The Code provides a detailed framework within which accounting policies must be set:
 - When the Code specifically applies to a transaction, other event or condition, the accounting policy or policies applied to that item shall be determined by applying the Code. Those policies need not be applied when the effect of applying them is immaterial.
 - Where the Code does not specifically apply to a transaction, other event or condition, management shall use its judgement in developing and applying an accounting policy that results in information that is:
 - a. relevant to the decision-making needs of users, and
 - b. reliable, in that the financial statements:
 - i. represent faithfully the financial position, financial performance and cash flows of the authority
 - ii. reflect the economic substance of transactions, other events and conditions and not merely the legal form
 - iii. are neutral, i.e. free from bias

- iv. are prudent, and
 - v. are complete in all material respects.
- In making the judgement management shall refer to, and consider the applicability of, the Code requirements dealing with similar and related issues. Management may also consider the most recent pronouncements of standard-setting bodies and accepted public or private sector practices to the extent, but only to the extent, that these do not conflict with the requirements of the Code.
 - An authority shall select and apply its accounting policies consistently for similar transactions, other events and conditions, unless the Code specifically requires or permits different treatment.
 - An authority shall change an accounting policy only if the change is required by the Code or results in the financial statements providing reliable and more relevant information about the effects of transactions, other events and conditions on the authority's financial position, financial performance or cash flows.
 - Where an authority changes an accounting policy, it shall apply the changes retrospectively unless the Code specifies transitional provisions that shall be followed. A change in accounting policy shall be applied retrospectively by adjusting the opening balance of each affected component of net worth for the earliest period presented and the other comparative amounts disclosed for each prior period presented as if the new accounting policy had always been applied, except to the extent that it is impracticable to so do.

Approval of Accounting Policies

6. The code states that The Chief Finance Officer is responsible for selecting 'suitable' accounting policies and ensuring that they are applied consistently in the preparation of the statement of accounts. The 2017/18 accounting policies, as set out in the appendix 'Note 1. Summary of Significant Accounting Policies', have been approved by the Chief Finance Officer. All significant accounting policies have been selected with reference to the Code.

External Scrutiny

7. The Council's auditors will review the adopted accounting policies as part of the audit of the statement of accounts. As set out in the audit plan, 'there will be particular focus on changes made to [accounting policies] or where policies are different to those suggested by the code'.
8. There is also an expectation that the auditors will be able to evidence that the accounting policies have been approved by Those Charged With Governance. In this council that is the Audit and Governance Committee.

Changes to Accounting Policies 2017-18

9. There have been no material changes to accounting policies for 2017/18.

RECOMMENDATION

10. **The Committee is RECOMMENDED to:**
 - a) **note the report; and**
 - b) **ratify the accounting policies as approved by the Chief Finance Officer and included as an appendix.**

Lorna Baxter
Chief Finance Officer

Contact Officer: Hannah Doney - Strategic Finance Manager (Accounting and Reporting)

Notes to the core Financial Statements**Note 1. Summary of Significant Accounting Policies****General**

The Statement of Accounts summarises the County Council's transactions for the 2017/18 financial year and its position at the year-end 31 March 2018. It has been compiled in accordance with *The Code of Practice on Local Authority Accounting in the United Kingdom 2017/18* (the *Code*), published by the Chartered Institute of Public Finance and Accountancy (CIPFA).

Except where specifically stated otherwise, the Statement of Accounts is prepared on a historic cost basis, modified by the revaluation of certain categories of assets and financial instruments. The accounts have been prepared on a going concern basis, that is, the accounts have been prepared on the assumption that the functions of the County Council will continue in operational existence for the foreseeable future.

Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the County Council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless otherwise stated) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

Events after the Balance Sheet Date

Events after the Balance Sheet date are those events, favourable or unfavourable, that occur between the end of the reporting period (31 March 2018) and the date the Statement of Accounts is authorised for issue. There are two types of event:

- Those that provide evidence of conditions that existed at the Balance Sheet date – the Statement of Accounts is adjusted to reflect such events
- Those that are indicative of conditions that arose after the Balance Sheet date – the Statement of Accounts is not adjusted to reflect such events, but a disclosure is made if the event has a material effect.

Accruals of Income and Expenditure

The accounts are prepared on an income and expenditure basis with activity accounted for in the year it takes place rather than when cash payments are made or received. The bases for recognition are as follows:

- Revenue from the sale of goods is recognised when the County Council transfers the significant risks and rewards of ownership to the purchaser and

it is probable that economic benefits or service potential associated with the transaction will flow to the County Council.

- Revenue from the provision of services is recognised when the County Council can measure reliably the percentage of completion of the transaction and it is probable that economic benefits or service potential associated with the transaction will flow to the County Council.
- Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption; they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received are recorded as expenditure when they are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor is recorded in the Balance Sheet. For manually raised accruals a guideline threshold of £10,000 is used for inclusion within the accounts.

Government Grants and Contributions

Government grants and third party contributions are accounted for on an accrual basis and are recognised in the Statement of Accounts when there is reasonable assurance that the County Council will comply with the conditions attached to their payment and that the grants or contributions will be received.

Grants and contributions relating to capital and revenue expenditure are recognised immediately in the Comprehensive Income and Expenditure Statement as income, except to the extent that the grant or contribution has a condition that the County Council has not satisfied. Conditions are stipulations that require the grant or contribution to be returned to the provider if the terms of the grant or contribution are not met.

Monies advanced as grants or contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors (capital monies within Capital Grants Receipts in Advance). When conditions are satisfied, the grant or contribution is credited to the relevant directorate line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income line (un-ringfenced revenue grants and all capital grants and contributions) in the Comprehensive Income and Expenditure Statement.

Capital grants and contributions credited to the Comprehensive Income and Expenditure Statement are reversed out of the County Fund Balance in the Movement in Reserves Statement - where the grant/contribution has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve; where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

Capital grants and contributions used to finance Revenue Expenditure Funded from Capital Under Statute are accounted for in the same way as other capital grants and contributions i.e. credited to the Taxation and Non-Specific Grant Income line when

there are no outstanding conditions and transferred/applied in the same way through the Movement in Reserves Statement.

Revenue grants and contributions that have been credited to the relevant directorate line in the Comprehensive Income and Expenditure Statement that remain unapplied as at the Balance Sheet Date and are required to meet committed expenditure in future years are transferred to an earmarked reserve through the Movement in Reserves Statement.

Council tax and business rates income

The council tax and business rates income included in the Comprehensive Income and Expenditure Statement (CIES) for the year is the accrued income for the year. The difference between the income included in the CIES and the amount required by regulation to be credited to the County Fund is taken to the Collection Fund Adjustment Account and included as an adjusting item in the Movement in Reserves Statement.

The district councils in Oxfordshire are acting as agents of the County Council in collecting council tax and business rates. The cash collected from council tax payers and business rates payers belongs proportionately to the district councils and the major preceptors. There is therefore a debtor/creditor position between each district council and the County Council to recognise that the net cash paid to the County Council in the year is not the same as its share of cash collected. The County Council recognises its share of council tax and business rates debtor and creditor balances, impairment allowances for doubtful debts and provisions for losses on appeal in its Balance Sheet. The Cash Flow Statement of the County Council includes the net council tax and business rates cash received from the Collection Fund in the year.

Employee Benefits

Benefits Payable during Employment

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as salaries and wages, paid sick leave and paid annual leave and are recognised as an expense for services in the year in which employees render service to the County Council. Where material, an accrual is made for the cost of holiday entitlements earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to the County Fund Balance in the financial year in which the absence occurs in accordance with regulations.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the County Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy in exchange for those benefits and are charged on an accrual basis to the relevant directorate in the Cost of Services at the earlier of when the County Council can no longer withdraw the offer of those benefits or when the County Council recognises costs for a restructuring.

Where termination benefits involve the enhancement of pensions, statutory provisions require the County Fund Balance to be charged with the amount payable

by the County Council to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

Post-Employment Benefits

The County Council participates in four pension schemes: the Local Government Pension Scheme, the Fire-fighters' Pension Scheme (1992, 2006, 2015 and modified schemes and injury compensation scheme), the Teachers' Pension Scheme and the NHS Pension Scheme.

These schemes provide defined benefits to members. However, the arrangements for the teachers' pension scheme and the NHS pension scheme mean that liabilities for these benefits cannot be identified to the County Council. These schemes are therefore accounted for as if they are defined contributions schemes – no liability for future payment of benefits is recognised in the Balance Sheet and the relevant service lines in the Comprehensive Income and Expenditure Statement are charged with the employer's contributions payable in the year.

The County Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award are accounted for on the same basis as defined benefit schemes.

For the schemes treated as defined benefit schemes the Cost of Services includes:

- Current service cost – the increase in the present value of a scheme's liabilities resulting from employee service in the current period. This is included in the relevant directorate line within the Cost of Services.
- Past service cost – the increase in the present value of the scheme liabilities for employee service in prior periods, resulting from a scheme amendment or curtailment. This is included in Other Corporate Costs within the Cost of Services.
- Gain/loss on settlement – changes in liabilities relating to actions that relieve the County Council of primary responsibility for a pension obligation. This is included in Other Corporate Costs within the Cost of Services.

The net interest on the defined benefit liability (asset) – the change during the period in the net defined benefit liability (asset) that arises from the passage of time - is included in the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement. Remeasurements comprising actuarial gains and losses – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuary has updated their assumptions – and the return on scheme assets, excluding amounts included in net interest on the net defined liability (asset), are recognised in Other Comprehensive Income and Expenditure within the Comprehensive Income and Expenditure Statement.

Scheme assets attributable to the County Council are measured at fair value as at the Balance Sheet date. Scheme liabilities attributable to the County Council are

measured on an actuarial basis using the projected unit method. The net pensions liability is recognised in the Balance Sheet.

The amount chargeable to the County Fund for providing pensions for employees is the amount payable for the year in accordance with the statutory requirements governing each particular pension scheme. Where this amount does not match the amount charged to the Surplus or Deficit on the Provision of Services for the year the difference is taken to the Pensions Reserve via the Movement in Reserves Statement.

Fire-fighters injury awards are disability benefits paid by the County Council that do not form part of the fire-fighters pension scheme. However, the measurement of these long-term benefits is subject to the same degree of uncertainty as the measurement of fire-fighters post-employment benefits and therefore they are accounted for in the same way as fire-fighters post-employment benefits.

Trading Activities

A trading activity is a method of matching income and expenditure for a particular activity or group of activities where services are provided on a basis other than a straightforward recharge of cost or on a cash-limited vote basis.

Where the County Council operates trading undertakings, the surplus or deficit on the trading operation is disclosed as part of Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement rather than as part of the Cost of Services. Where material, the following disclosures are made:

- The nature of the activity;
- Turnover;
- Surplus or deficit;
- Any reapportionment of the surplus or deficit; and
- Any details placing the financial performance in a context useful to the reader.

Property, Plant and Equipment

Assets that have a physical substance and are held for use in the production or supply of goods or services, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment. These include operational land and buildings, vehicles, plant and equipment, surplus assets, assets under construction and infrastructure.

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that future economic benefits or service potential associated with the item will flow to the County Council and the cost of the item can be measured reliably. This excludes expenditure on routine repairs and maintenance, which is charged directly to service revenue accounts as an expense when incurred.

Assets are initially measured at cost, comprising:

- The purchase price
- Any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management

- The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located (this only applies when the County Council has an obligation to carry out such activities when the item is acquired, constructed or installed)

The County Council does not capitalise borrowing costs incurred whilst assets are under construction.

Donated assets are measured initially at fair value. The difference between fair value and any consideration paid is credited to the Taxation and Non-Specific Grant Income line in the Comprehensive Income and Expenditure Statement, unless the donated asset has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Gains credited to the Comprehensive Income and Expenditure Statement are reversed out of the County Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Property, Plant and Equipment is subsequently carried in the Balance Sheet using the following measurement bases:

- Infrastructure, community assets and assets under construction – depreciated historic cost
- Other Property, Plant and Equipment assets (excluding surplus assets) – current value, determined as the amount that would be paid for the asset in its existing use
- Surplus assets – fair value (at highest and best use), determined as the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date

Where there is no market-based evidence of current value because of the specialist nature of an asset, depreciated replacement cost is used as an estimate of current value.

Where non-property assets have short useful lives or low values (or both), depreciated historic cost basis is used as a proxy for current value.

A *de minimis* level of £20,000 is applied for land and buildings and £15,000 for vehicles and plant, other than for schools local capital spend where a *de minimis* of £2,000 is applied.

Revaluations of property assets are undertaken on a five-year rolling programme as shown below. Material changes to asset valuations are adjusted in the interim periods.

	Date of Last Revaluation	Date of Next Revaluation
Secondary and special schools	2014/15	2019/20
Primary, nursery, junior and infant schools	2015/16	2020/21
Social care premises, libraries, museums and adult learning premises	2016/17	2021/22
Fire & Rescue Service and Community Safety premises, staff housing, central offices and highways depots	2017/18	2022/23
Other educational premises (including children's, youth and sports centres), surplus assets and other properties	2013/14	2018/19

Investment properties valuations are reviewed annually. Assets held for sale are revalued at the point of reclassification to that category.

Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Surplus or Deficit on the Provision of Services where they arise from the reversal of a loss previously charged to a directorate.

Decreases in valuations are accounted for as follows:

- Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant directorate in the Comprehensive Income and Expenditure Statement

Assets are assessed each year as to whether there is an indication of impairment. Where indications exist and the recoverable amount of the asset is materially lower than the carrying amount, an impairment loss is recognised for the shortfall. Where impairment losses are identified they are accounted for in the same way as decreases in valuations.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant directorate, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation of Property, Plant and Equipment

Depreciation is provided for on all Property, Plant and Equipment with a finite life, which is determined at acquisition or revaluation. Assets in the course of construction are not depreciated until they are brought into use. Depreciation is an estimation technique that is calculated using the straight-line method with the following asset lives:

- Buildings: 60 years (or less if specified by the valuer)
- Vehicles, plant and equipment: between 5 and 30 years
- IT equipment and infrastructure: between 3 and 5 years
- Infrastructure (roads and bridges): 35 years

Land is determined to have an infinite life and is not depreciated.

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historic cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Charges to Revenue for Property, Plant and Equipment

Services, support services and trading accounts are charged with a capital charge for all Property, Plant and Equipment used in the provision of services. The charge

covers the annual provision for depreciation and revaluation and impairment losses where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off.

The County Council is not required to raise council tax to fund depreciation or revaluation/impairment losses. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement (referred to as Minimum Revenue Provision (MRP)). Depreciation and revaluation/impairment losses are therefore replaced by the MRP contribution in the County Fund Balance by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement.

Disposals and Non-current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. To be classified as an Asset Held for Sale the asset must meet the following criteria:

- Available for immediate sale in its present condition
- The sale must be highly probable
- Actively marketed at a reasonable sale price
- The sale should be expected to be completed within 1 year

Assets Held for Sale are measured at the lower of their carrying value and fair value less costs to sell at initial reclassification. Gains in fair value are recognised only up to the amount of any previously recognised losses in the Surplus or Deficit on the Provision of Services. Decreases in fair value less costs to sell are recognised in Other Operating Expenditure in the Comprehensive Income and Expenditure Statement. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to Property, Plant and Equipment and valued at the lower of their carrying amount before they were classified as held for sale (adjusted for depreciation or revaluations that would have been recognised had they not been classified as Held for Sale) and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of, the carrying amount of the asset in the Balance Sheet is written off to Other Operating Expenditure in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals are credited to the same line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Any revaluation gains in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Receipts from the disposal of assets in excess of £10,000 are categorised as capital receipts. Capital receipts are appropriated to the Capital Receipts Unapplied reserve from the County Fund Balance in the Movement in Reserves Statement.

The written off value of assets disposed of is appropriated to the Capital Adjustment Account from the County Fund Balance in the Movement in Reserves Statement so that there is no charge against the Council Tax.

Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation.

Investment properties are measured initially at cost and subsequently at fair value (at highest and best use), being the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date. Investment properties are not depreciated and are revalued annually according to market conditions. Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. Gains and losses on disposal are posted to Other Operating Expenditure. The gains and losses are reversed out of the County Fund Balance to the Capital Adjustment Account (or Capital Receipts Unapplied for disposal receipts over £10,000) in the Movement in Reserves Statement so that they do not impact on Council Tax.

Heritage Assets

Tangible heritage assets are tangible assets with historical, artistic, scientific, technological, geophysical or environmental qualities that are held and maintained principally for their contribution to knowledge and culture. Intangible heritage assets are intangible assets with cultural, environmental or historical significance.

Tangible assets with heritage characteristics that are used by the County Council in the provision of services are accounted for as operational assets within Property, Plant and Equipment and not treated as heritage assets.

Where the cost or value of a heritage asset is available (subject to the *de minimis* levels set out below) the asset is recognised on the Balance Sheet. Where information on the cost or value of a heritage asset is not available, and the cost of obtaining the information outweighs the benefits to the users of the accounts, the asset is not recognised on the Balance Sheet.

A *de minimis* level of £20,000 is applied to the capitalisation of individual heritage assets and an overall minimum aggregate value of £250,000 before recognition on the Balance Sheet.

The main heritage assets held by the County Council comprise museum collections, history collections and archaeological sites. Information is not available on the cost of these assets, other than for a very small number of items, as the majority have been donated or acquired by excavation. The County Council considers that obtaining valuations for the museum and history collections would involve a disproportionate cost in comparison to the benefits to the users of the accounts and therefore does not recognise these assets on the Balance Sheet. The County Council does not consider that reliable valuation information can be obtained for the archaeological sites because of the diverse nature of the sites and lack of comparable market values, and therefore does not recognise these assets on the Balance Sheet.

Intangible Assets: Software Licenses

Intangible assets are non-monetary assets that do not have a physical substance but are controlled by the County Council as a result of past events and from which

future economic benefits or service potential is expected to flow to the County Council.

The County Council policy is to capitalise software licenses for major applications. For this purpose an application is a major application where the initial cost exceeds £20,000. Intangible assets are measured at cost. The cost is amortised and charged to the relevant directorate within the Comprehensive Income and Expenditure Statement over a period of up to 6 years using the straight-line method. Amortisations are reversed out of the County Fund Balance in the same way as depreciation, so that there is no impact on council tax.

Revenue Expenditure Funded from Capital Under Statute

Capital expenditure on non-current assets not owned by the County Council and grants given by the County Council for capital purposes are charged to the relevant directorate in the Comprehensive Income and Expenditure Statement. In accordance with statutory provisions this expenditure is transferred from the County Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement, such that there is no impact on council tax.

Private Finance Initiative (PFI) and similar contracts (service concession arrangements)

PFI type contracts involve a private sector entity (the operator) constructing or enhancing property used in the provision of a public service, and operating and maintaining that property for a specified period of time. The operator is paid for its services over the period of the arrangement. Where the County Council controls or regulates the services provided by the operator and controls the residual interest in the property at the end of the term of the arrangement the contract meets the tests for accounting as a service concession arrangement.

Properties used in service concession arrangements are recognised as Property, Plant and Equipment of the County Council. The original recognition of the assets at fair value (based on the cost to purchase the assets) is matched by the recognition of liabilities for amounts due to the operators to pay for the assets and deferred income where the operator part funds the assets from income from third parties. Once recognised on the Balance Sheet these assets are revalued and depreciated in the same way as other Property, Plant and Equipment owned by the County Council.

The amounts payable to the service concession arrangement operators each year are analysed into five elements:

- The value of services received during the year – charged to the relevant directorate in the Comprehensive Income and Expenditure Statement
- Finance costs – an interest charge on the outstanding finance liability – charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement
- Payments towards the finance liability – applied to write down the Balance Sheet liability towards the operator
- Contingent rents – inflationary increases in the amounts to be paid for the property arising during the contract – charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. Note for the County Council's current service

concession arrangement there is no inflation applied to the elements of the contract payments relating to the property build costs and therefore no contingent rents.

- Lifecycle replacement costs – recognised as a capital prepayment in the Balance Sheet and transferred to Property, Plant and Equipment when capital works are undertaken.

Deferred income is released to the relevant directorate in the Comprehensive Income and Expenditure Statement on a straight line basis over the service concession period.

(See also the accounting policy on debt redemption.)

Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a property lease covers both land and buildings, the land and buildings elements are considered separately for lease classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

Where the County Council is the lessee, property, plant and equipment held under a finance lease is recognised on the Balance Sheet at the commencement of the lease at its fair value at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred. The lease payments are apportioned between a charge for the acquisition of the interest in the asset – applied to writing down the liability, and a finance charge – charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. Once recognised on the Balance Sheet, assets recognised under finance leases are accounted for in the same way as other Property, Plant and Equipment, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life.

(See also the accounting policy on debt redemption.)

Where the County Council is the lessee, operating lease rentals are charged to the relevant directorate in the Comprehensive Income and Expenditure Statement on a straight-line basis over the lease period except where the contractual payment terms are considered to be a more systematic and appropriate basis.

Where the County Council leases an asset to others under a finance lease, the asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part

of the gain or loss on disposal. A gain, representing the County Council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal, matched by a long-term debtor in the Balance Sheet. Finance lease rentals receivable are apportioned between a charge for the acquisition of the interest in the property – applied to write down the long-term debtor (together with any premiums received), and finance income credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is required under statute to be treated as a capital receipt. Where a premium has been received, this is posted out of the County Fund Balance to the Capital Receipts Unapplied reserve in the Movement in Reserves Statement. Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future years, this is posted out of the County Fund Balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the capital receipt for the disposal of the asset is used to write down the long-term debtor and the deferred capital receipts are transferred to the Capital Receipts Unapplied reserve. The written-off carrying amount of the asset on disposal is appropriated to the Capital Adjustment Account from the County Fund Balance in the Movement in Reserves Statement so that there is no impact on Council Tax.

Where the County Council leases an asset to others under an operating lease, the asset is retained on the Balance Sheet. Rental income is credited to the relevant directorate in the Comprehensive Income and Expenditure Statement on a straight-line basis over the lease period (including any premiums received at the commencement of the lease).

Cash and Cash Equivalents

Cash is represented by cash in hand and bank deposits repayable without penalty on notice of not more than 24 hours. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. The County Council treats the following as cash equivalents:

- Instant Access Call Accounts
- Instant Access Short Term Funds
- Deposits with one working day to maturity from date of deposit

In the Balance Sheet and Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the County Council's cash management.

Financial Assets

Financial assets are classified into three types:

- Loans and receivables – assets that have fixed or determinable payments but are not quoted in an active market
- Available-for-sale assets – assets that have a quoted market price and/or do not have fixed or determinable payments

- Financial assets at fair value through profit or loss – assets that are part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking

Loans and receivables are initially measured at fair value and carried in the Balance Sheet at their amortised cost. Credits to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement for external interest receivable are based on the carrying amount of the asset, multiplied by the effective interest rate for the instrument. For the majority of the County Council's investments, the effective interest rate is the same as the actual interest receivable in accordance with the loan agreement. Short duration receivables with no stated interest rates (e.g. debtors) are measured at original invoice amount.

The County Council has made a number of loans to clients and other organisations at less than market interest rates or zero rate (referred to in the Code as soft loans). For the County Council there are no material differences between the fair value and the nominal value of such loans and no adjustments are made on initial recognition of these loans.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the carrying value of the asset is reduced through the use of an allowance account and a charge made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Any gains and losses arising on the derecognition of assets are credited/debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Available-for-sale assets are initially measured and carried in the Balance Sheet at fair value. Where the asset has fixed or determinable payments, credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the amortised cost of the asset multiplied by the effective interest rate for the instrument. Where there are no fixed or determinable payments, income is credited to the Comprehensive Income and Expenditure Statement when it becomes receivable.

Assets are maintained in the Balance Sheet at fair value. Values are based on:

- Instruments with quoted market prices – the market price
- Other instruments with fixed and determinable payments – discounted cash flow analysis

The inputs to the measurement techniques are categorised in accordance with the following three levels:

- Level 1 inputs - quoted prices (unadjusted) in active markets for identical assets that the County Council can access at the measurement date
- Level 2 inputs – inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly
- Level 3 inputs – unobservable inputs for the asset

Changes in fair value are balanced by an entry in the Available-for-Sale Reserve and the gain/loss recognised in Other Comprehensive Income and Expenditure (except for impairment losses).

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down through the use of an allowance account and a charge made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Any gains and losses arising on the derecognition of assets are credited/debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, along with any accumulated gains/losses recognised in the Available-for-Sale Reserve.

Financial assets at fair value through profit or loss are initially measured and carried in the Balance Sheet at fair value. Movements in fair value are balanced by posting gains and losses to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement as they arise. Any residual gains and losses arising on derecognition are also credited/debited to the Comprehensive Income and Expenditure Statement. The basis of fair value and the inputs to the measurement techniques is the same as for Available-for-sale assets.

The carrying amounts of individual financial assets are separated into their current (short-term) and non-current (long-term) elements for presentation within the Balance Sheet.

Financial Liabilities

Financial liabilities are initially measured at fair value and carried in the Balance Sheet at their amortised cost. Charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for external interest payable are based on the carrying amount of the liability, multiplied by the effective interest rate for the instrument. For most of the County Council's borrowings the effective interest rate is the same as the actual interest payable in accordance with the loan agreement. In respect of stepped interest rate loans entered into before 9 November 2007, statutory regulations require that the amount taken to the County Fund Balance is the contractual interest payable. The reconciliation between the amount charged to the Comprehensive Income and Expenditure Statement and the contractual interest payable is managed by a transfer from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

The carrying amounts of individual financial liabilities are separated into their current (short-term) and non-current (long-term) elements for presentation within the Balance Sheet.

Gains and losses on the repurchase or early settlement of borrowing are written-down to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement in the year of repurchase/settlement. However, where repurchase takes place as part of a restructuring exercise that involves the modification or exchange of existing loans, the premium or discount adjusts the amortised cost of the new or modified loan and the write-down to the Comprehensive Income and Expenditure Statement is spread

over the life of the loan. All early repayments of PWLB loans are treated as extinguishments rather than modifications, including where a replacement loan has been arranged from PWLB on the same day, and any associated premium or discount is written off immediately. Where premiums and discounts have been charged to the Comprehensive Income and Expenditure Statement, statutory regulations allow the impact on the County Fund Balance to be spread over future years. The County Council has a policy of charging all premiums/discounts to the County Fund Balance in the year.

Debt Redemption

The County Council complies with legislation to charge a Minimum Revenue Provision (MRP) to the County Fund revenue account for the repayment of debt by making a straight-line charge of the outstanding pre-2008 capital expenditure as at 1 April 2017 calculated over a 50-year period and making provision for repayment of prudential borrowing in equal instalments over the estimated life of the asset for which the borrowing is undertaken. In addition the provision for repayment of debt includes an amount equal to the amount that is taken to the Balance Sheet to reduce the liabilities in respect of PFI and similar contracts and for the prepayment of lifecycle costs relating to these contracts, and an amount equal to the amount that is taken to the Balance Sheet to reduce liabilities in respect of finance leases.

Provisions

Provisions are made where the County Council has a present obligation (legal or constructive) as a result of a past event that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed annually and are adjusted to reflect the current best estimate against the appropriate directorate in the Comprehensive Income and Expenditure Statement. When payments are eventually made they are charged directly to the provision.

Insurance

The County Council has a policy of self-insurance of claims across its main insurance categories. In accordance with the Code the insurance provision is set aside to cover insurance claims actually received and awaiting resolution that have been advised to the County Council and which it has been decided to be insured internally rather than externally. Subject to the contingent liabilities listed in Note 57, there are no significant unfunded risks.

Contingent liabilities and contingent assets

The County Council discloses contingent liabilities in the notes to the accounts. Contingent liabilities are possible obligations arising from past events and whose existence will be confirmed by one or more uncertain events occurring in the future and are not wholly under the County Council's control. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that there will be a transfer of economic benefits or where the obligation cannot be measured with sufficient reliability.

Financial guarantee contracts come under the definition of financial instruments and are initially recognised in the accounts at fair value. This only applies to guarantees entered into after 1 April 2006. Any entered into before that date continue to be recognised as contingent liabilities. If payment under the guarantee becomes probable the liability would be determined in accordance with the requirement for provisions.

The County Council discloses contingent assets in the notes to the accounts. Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the County Council.

Reserves

A reserve, whether capital or revenue, results from events that have allowed monies to be set aside, surpluses, or decisions causing anticipated expenditure to have been postponed or cancelled. These can be spent or earmarked at the discretion of the County Council. Earmarked revenue reserves can be used to set aside available monies for major anticipated capital schemes, for projects or service arrangements that the County Council may wish to carry out, business unit surpluses, funding to deliver savings or transformation and contingent liabilities where a provision is not required.

Reserves are established and used for different reasons. These include:

- Usable reserves - reserves that can be used at the County Council's discretion to fund either revenue or capital spend
- Unusable reserves - reserves relating to unrealised gains, such as the Revaluation Reserve, that are not "cash backed" and cannot be used to fund future capital or revenue spending and reserves relating to differences between accounting policy and statutory requirements, such as the Capital Adjustment Account.

Earmarked reserves are created by appropriating amounts from the County Fund Balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred it is charged to the appropriate directorate. The reserve is then appropriated back into the County Fund Balance in the Movement in Reserves Statement so that there is no net charge against Council Tax for the expenditure.

Group Accounts

The County Council is required to prepare group accounts where it has interests in subsidiaries, associates and/or joint ventures, subject to consideration of materiality. For 2017/18 the County Council did not have any such interests that are considered material and therefore prepared these accounts only as a single entity rather than as group accounts.

The County Council participates in a number of joint operations (e.g. pooled budget arrangements with the health sector). The County Council accounts directly (in its single entity accounts) for its part of the assets, liabilities, income, expenditure and cash flows held within or arising from such an arrangement.

There are a number of circumstances where the County Council exercises limited influence and these are disclosed as related parties. Under these circumstances, transactions with these bodies are charged against the appropriate service in the Comprehensive Income and Expenditure Statement, and balances owed by them or to them are included in debtors and creditors.

Schools

The Code confirms that the balance of control for local authority maintained schools (i.e. those categories of school identified in the Schools Standards and Framework Act 1998, as amended) lie with the local authority. The Code also stipulates that

those schools' assets, liabilities, reserves and cash flows are recognised in the local authority financial statements (and not the group accounts). Therefore the transactions, cash flows and balances of the schools maintained by the County Council are recognised in its financial statements as if they were transactions, cash flows and balances of the County Council. Revenue expenditure and income for the maintained schools is included within the People directorate in the Comprehensive Income and Expenditure Statement.

In accordance with the Education Reform Act 1988, the scheme of Local Management of Schools provides for the carry forward of individual school surpluses and deficits. These are held as usable earmarked reserves and are committed to be spent on schools.

Taxation

The County Council is exempt from income tax, corporation tax and from capital gains tax.

Value Added Tax is excluded from both revenue and capital in terms of both income and expenditure except where the County Council is not able to recover VAT on expenditure.

The County Council incurs landfill tax, which is charged on a tonnage basis to the County Council by its waste disposal contractors.

In addition, the County Council incurs stamp duty land tax on the acquisition of property freeholds and leaseholds, climate change levy on its energy bills and insurance premium tax on its insurance costs. Also, the County Council incurs employer's national insurance contributions based on a percentage of staff salaries.

Where the County Council incurs tax, this cost is charged to directorates in the Comprehensive Income and Expenditure Statement.

Pension Fund Accounts

The County Council administers the Oxfordshire Pension Fund that provides pensions and other benefits for former employees of the County and District Councils and other approved bodies (excluding fire-fighters, teachers and public health (former NHS staff), who have their own schemes). The County Council makes a contribution to the fund (in addition to employee contributions). An independent actuary determines the level of the contribution, following a review that takes place every three years. The accounting policies that are used in the Oxfordshire Pension Fund accounts are shown in the Notes to the Pension Fund Accounts.

The County Council also administers the Fire-fighters Pension Fund scheme for Oxfordshire. The notes to the Fire-fighters Pension Fund accounts include the accounting policies used for those accounts.
