

PLANNING & REGULATION COMMITTEE – 3 JUNE 2019

Policy Annex (Relevant Development Plan and other Policies)

Oxfordshire Minerals and Waste Core Strategy 2017 (OMWCS)

POLICY C1: SUSTAINABLE DEVELOPMENT

A positive approach will be taken to minerals and waste development in Oxfordshire, reflecting the presumption in favour of sustainable development contained in the National Planning Policy Framework and the aim to improve economic, social and environmental conditions of the area.

Planning applications that accord with the policies in this plan will be approved, unless material considerations indicate otherwise. Where there are no policies relevant to the application, or relevant plan policies are out of date, planning permission will be granted unless material considerations indicate otherwise, taking into account whether:

- any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits of the proposed development when assessed against the National Planning Policy Framework; or
- specific policies in the National Planning Policy Framework indicate that the development should be restricted.

POLICY C2: CLIMATE CHANGE

Proposals for minerals or waste development, including restoration proposals, should take account of climate change for the lifetime of the development from construction through operation and decommissioning. Applications for development should adopt a low carbon approach and measures should be considered to minimise greenhouse gas emissions and provide flexibility for future adaptation to the impacts of climate change.

POLICY C4: WATER ENVIRONMENT

Proposals for minerals and waste development will need to demonstrate that there would be no unacceptable adverse impact on or risk to:

- The quantity or quality of surface or groundwater resources required for habitats, wildlife and human activities;
- The quantity or quality of water obtained through abstraction unless acceptable provision can be made;
- The flow of groundwater at or in the vicinity of the site; and
- Waterlogged archaeological remains.

Proposals for minerals and waste development should ensure that the River Thames and other watercourses and canals of significant landscape, nature conservation, or amenity value are adequately protected from unacceptable adverse impacts.

POLICY C5: LOCAL ENVIRONMENT, AMENITY AND ECONOMY

Proposals for minerals and waste development shall demonstrate that they will not have an unacceptable adverse impact on:

- the local environment;
- human health and safety;
- residential amenity and other sensitive receptors; and
- the local economy;
including from:
 - noise;
 - dust;
 - visual intrusion;
 - light pollution;
 - traffic;
 - air quality;
 - odour;
 - vermin;
 - birds;
 - litter;
 - mud on the road;
 - vibration;
 - surface or ground contamination;
 - tip and quarry-slope stability;
 - differential settlement of quarry backfill;
 - subsidence; and
 - the cumulative impact of development.

Where necessary, appropriate separation distances or buffer zones between minerals and waste developments and occupied residential property or other sensitive receptors and/or other mitigation measures will be required, as determined on a site-specific, case-by-case basis.

POLICY C7: BIODIVERSITY AND GEODIVERSITY

Minerals and waste development should conserve and, where possible, deliver a net gain in biodiversity.

The highest level of protection will be given to sites and species of international nature conservation importance (e.g. Special Areas of Conservation and European Protected Species) and development that would be likely to adversely affect them will not be permitted.

In all other cases, development that would result in significant harm will not be permitted unless the harm can be avoided, adequately mitigated or, as a last resort, compensated for to result in a net gain in biodiversity (or geodiversity). In addition:

- (i) Development that would be likely to have an adverse effect on a Site of Special Scientific Interest (either individually or in combination with other development) will not be permitted except where the benefits of the development at this site

clearly outweigh both the impacts that it is likely to have on the Site of Special Scientific Interest and any broader impacts on the national network of Sites of Special Scientific Interest.

- (ii) Development that would result in the loss or deterioration of irreplaceable habitats, including ancient woodland and aged or veteran trees, will not be permitted except where the need for and benefits of the development in that location clearly outweigh the loss.
- (iii) Development shall ensure that no significant harm would be caused to:
 - Local Nature Reserves;
 - Local Wildlife Sites;
 - Local Geology Sites;
 - Sites of Local Importance for Nature Conservation;
 - Protected, priority or notable species and habitats,
 except where the need for and benefits of the development in that location clearly outweigh the harm.

All proposals for mineral working and landfill shall demonstrate how the development will make an appropriate contribution to the maintenance and enhancement of local habitats, biodiversity or geodiversity (including fossil remains and trace fossils), including contributing to the objectives of the Conservation Target Areas wherever possible. Satisfactory long-term management arrangements for restored sites shall be clearly set out and included in proposals. These should include a commitment to ecological monitoring and remediation (should habitat creation and/or mitigation prove unsuccessful).

POLICY C8: LANDSCAPE

Proposals for minerals and waste development shall demonstrate that they respect and where possible enhance local landscape character, and are informed by landscape character assessment. Proposals shall include adequate and appropriate measures to mitigate adverse impacts on landscape, including careful siting, design and landscaping. Where significant adverse impacts cannot be avoided or adequately mitigated, compensatory environmental enhancements shall be made to offset the residual landscape and visual impacts.

Great weight will be given to conserving the landscape and scenic beauty of Areas of Outstanding Natural Beauty (AONB) and high priority will be given to the enhancement of their natural beauty. Proposals for minerals and waste development within an AONB or that would significantly affect an AONB shall demonstrate that they take this into account and that they have regard to the relevant AONB Management Plan. Major developments within AONBs will not be permitted except in exceptional circumstances and where it can be demonstrated they are in the public interest, in accordance with the 'major developments test' in the NPPF (paragraph 116). Development within AONBs shall normally only be small-scale, to meet local needs and should be sensitively located and designed.

POLICY M10: RESTORATION OF MINERAL WORKINGS

Mineral workings shall be restored to a high standard and in a timely and phased manner to an after-use that is appropriate to the location and delivers a net gain in biodiversity. The restoration and after-use of mineral workings must take into account:

- the characteristics of the site prior to mineral working;
- the character of the surrounding landscape and the enhancement of local landscape character;
- the amenity of local communities, including opportunities to enhance green infrastructure provision and provide for local amenity uses and recreation;
- the capacity of the local transport network;
- the quality of any agricultural land affected, including the restoration of best and most versatile agricultural land;
- the conservation of soil resources
- flood risk and opportunities for increased flood storage capacity;
- the impacts on flooding and water quality of any use of imported material in the proposed restoration;
- bird strike risk and aviation safety;
- any environmental enhancement objectives for the area;
- the conservation and enhancement of biodiversity appropriate to the local area, supporting the establishment of a coherent and resilient ecological network through the landscape-scale creation of priority habitat;
- the conservation and enhancement of geodiversity;
- the conservation and enhancement of the historic environment; and
- consultation with local communities on options for after-use.

Planning permission will not be granted for mineral working unless satisfactory proposals have been made for the restoration, aftercare and after-use of the site, including where necessary the means of securing them in the longer term.

Proposals for restoration must not be likely to lead to any increase in recreational pressure on a Special Area of Conservation.

Vale of White Horse Local Plan 2031 Part 1: Strategic Sites and Policies (VLP1)

CORE POLICY 1: PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT

Planning applications that accord with this Local Plan (and where relevant, with any subsequent Development Plan Documents or Neighbourhood Plans) will be approved, unless material considerations indicate otherwise.

Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise, and unless:

- i. any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole, or
- ii. specific policies in that Framework indicate that development should be restricted.

CORE POLICY 44: LANDSCAPE

The key features that contribute to the nature and quality of the Vale of White Horse District's landscape will be protected from harmful development and where possible enhanced, in particular:

- i. features such as trees, hedgerows, woodland, field boundaries, watercourses and water bodies
- ii. important landscape settings of settlements
- iii. topographical features
- iv. areas or features of cultural and historic value
- v. important views and visually sensitive skylines, and
- vi. tranquillity and the need to protect against intrusion from light pollution, noise, and motion.

Where development is acceptable in principle, measures will be sought to integrate it into the landscape character and/or the townscape of the area. Proposals will need to demonstrate how they have responded to the above aspects of landscape character and will be expected to:

- vii. incorporate appropriate landscape proposals that reflect the character of the area through appropriate design and management
- viii. preserve and promote local distinctiveness and diversity and, where practical, enhance damaged landscape areas.

High priority will be given to conservation and enhancement of the natural beauty of the North Wessex Downs AONB and planning decisions will have regard to its setting. Proposals that support the economy and social wellbeing of communities located in the AONB, including affordable housing schemes, will be encouraged, provided they do not conflict with the aims of conservation and enhancement.

CORE POLICY 46: CONSERVATION AND IMPROVEMENT OF BIODIVERSITY

Development that will conserve, restore and enhance biodiversity in the district will be permitted. Opportunities for biodiversity gain, including the connection of sites, large-scale habitat restoration, enhancement and habitat re-creation will be actively sought, with a primary focus on delivery in the Conservation Area Target Areas. A net loss of biodiversity will be avoided.

The highest level of protection will be given to sites and species of international nature conservation importance (Special Areas of Conservation and European Protected Species). Development that is likely to result in a significant effect, either

alone or in combination, on such sites and species will need to satisfy the requirements of the Habitat Regulations*.

Development likely to result in the loss, deterioration or harm to habitats or species of importance to biodiversity or of importance for geological conservation interests, either directly or indirectly, will not be permitted unless:

- i. the need for, and benefits of, the development in the proposed location outweighs the adverse effect on the relevant biodiversity interest;
- ii. it can be demonstrated that it could not reasonably be located on an alternative site that would result in less or no harm to the biodiversity interests; and
- iii. measures can be provided (and are secured through planning conditions or legal agreements), that would avoid, mitigate against or, as a last resort, compensate for, the adverse effects likely to result from development.

The habitats and species of importance to biodiversity and sites of geological interest considered in relation to points i) and iii) comprise:

- Sites of Special Scientific Interest (SSSI)
- Local Wildlife Sites
- Local Nature Reserves
- Priority Habitats and species listed in the national and local Biodiversity Action Plan
- Ancient Woodland and veteran trees
- Legally Protected Species
- Local Important Geological Sites

The level of protection and mitigation should be proportionate to the status of the habitat or species and its importance individually and as part of a wider network.

It is recognised that habitats/areas not considered above (*i.e. Nationally or Locally designated and not priority habitats*) can still have a significant biodiversity value within their local context, particularly where they are situated within a Conservation Target Area and/or they have good potential to be restored to priority habitat status or form/have good potential to form links between priority habitats or act as corridors for priority species. These habitats will be given due weight in the consideration or planning applications. If significant harm to these sites cannot be avoided (through locating on an alternative site with less harmful impacts) it will be expected that mitigation will be provided to avoid a net loss in biodiversity or, as a last resort, compensation will be required to offset the impacts and achieve a net gain in biodiversity.

*Habitats Directive 92/43/EEC of 21 May 1992.

The Vale of White Horse Local Plan 2031 Part 2: Detailed Policies and Additional Sites (VLP2)

DEVELOPMENT POLICY 23: IMPACT OF DEVELOPMENT ON AMENITY

Development proposals should demonstrate that they will not result in significant adverse impacts on the amenity of neighbouring uses when considering both individual and cumulative impacts in relation to the following factors:

- i) loss of privacy, daylight or sunlight
- ii) dominance or visual intrusion
- iii) noise or vibration
- iv) dust, heat, odour, gases or other emissions
- v) pollution, contamination or the use of/or storage of hazardous substances;
and
- vi) external lighting.

DEVELOPMENT POLICY 31: PROTECTION OF PUBLIC RIGHTS OF WAY, NATIONAL TRAILS AND OPEN ACCESS AREAS

Development on and/or over public rights of way will be permitted where the development can be designed to accommodate satisfactorily the existing route, or where the right of way is incorporated into the development site as an attractive, safe and continuous route. Alternative routes will need to be made equally or more attractive, safe and convenient to rights of way users.

The Council will actively seek opportunities to improve the accessibility and the addition of new connections and status upgrades to the existing rights of way network, including National Trails. Proposals of this nature will be supported where they would not lead to increased pressure on sensitive sites, such as those of important ecological value.

Development will not be permitted where proposals remove, narrow or materially impair the approved line of the Thames Path or Ridgeway National Trails, key connecting routes, and/or public access to them.

Saved Policies of the Vale of White Horse Local Plan 2011 (VLP2011)

POLICY DC6: LANDSCAPING

All proposals for development will be required to include hard and soft landscaping measures designed to:

- i) project and enhance the visual amenities of the site and its surrounding including, where appropriate, existing important landscape features; and
- ii) maximise the opportunities for nature conservation and wildlife habitat creation.

POLICY DC9: IMPACT OF DEVELOPMENT ON NEIGHBOURING USES

PN7

Development will not be permitted if it would unacceptably harm the amenities of neighbouring properties and the wider environment in terms of:

- i) loss of privacy, daylight or sunlight;
- ii) dominance or visual intrusion;
- iii) noise or vibration;
- iv) smell, dust, heat, gases or other emissions;
- v) pollution, contamination or the use of or storage of hazardous substances;
and
- vi) external lighting.

POLICY DC12: WATER QUALITY AND RESOURCES

Development will not be permitted if it would adversely affect the quality of water resources, including groundwater, rivers and lakes, as a result of abstraction, or the nature of related surface or waste water discharge, or the disturbance of contaminated land.

POLICY NE7: THE NORTH VALE CORALLIAN RIDGE

Development which would harm the prevailing character and appearance of the North Vale Corallian Ridge, as shown on the proposals map, will not be permitted unless there is an overriding need for the development and all steps will be taken to minimise the impact on the landscape.

POLICY NE12: GREAT WESTERN COMMUNITY FOREST

Development within the Community Forest, as shown on the Proposals Map, must, wherever possible, make a positive contribution towards the creation of a diverse woodland environment appropriate to the landscape character of the area. Proposals which would prejudice the aims and objectives of the Great Western Community Forest will not be permitted.
