Brunel - Infrastructure (Cycle 1) Commentary

As infrastructure outperforms all other alternative asset classes except Private Equity, investor appetite is growing. The proportion of investors planning to commit to four or more infrastructure funds in the next 12 months is up from just 3% a year ago, to 19% now, according to the Q3 2021 Infrastructure Quarterly Report published by Pregin.

Infrastructure fundraising is also becoming more competitive, with a greater increase in the number of funds raised by 28% within the year. The value of aggregate capital targeted by funds in the market in Q3 2021 is up 15% from the start of the year, with a record 337 funds targeting \$235bn in capital, according to the same Pregin report.

Energy prices spiked globally as a consequence of low wind in Europe and natural gas supply issues which resulted in historical record prices for natural gas. Natural gas is typically electricity marginal price setter, so that has translated in high electricity prices in many jurisdictions. We don't expect those price spikes to affect materially Q3 valuations. Many of the renewable assets are hedged by long term PPAs and spikes are believed to be transitory, with no material changes on the long term price forecasts used for the valuation models.

It is to be noted that the average number of telecoms deals remains above the pre-pandemic levels, with Q2 2021 the busiest quarter for the sector ever. Telecom is benefitting from a sectoral shift in demand, as the world embraces hybrid working, therefore placing new demands on communication networks.

As a reminder, Infrastructure funds typically report 60 to 90 days after quarter end, while Stepstone reports 90 to 120 days after quarter end. The update below is therefore provided in the absence of Q3 underlying fund reporting.

Infrastructure Cycle 1

The portfolio remains the same in terms of primary funds and it is continuing its deployment into tactical opportunities. Underlying managers remained active and acquisitive, with NTR, DWS and Basalt signing new investments. No new fund commitments were made during the Quarter as Cycle 1 is now fully committed to primary funds.

NTR acquired a c.20MW ready to build wind farm in Northern Ireland which is expected to deliver energy from 2023.

DWS formally signed Ermewa, a carve-out from France's SNCF, is the second largest wagon leasing player in Europe and the largest player in the global tank container market. Investment is expected to close in Q4 and Brunel will invest both through DWS Pan-European Infrastructure Fund III and as a tactical co-investment via StepStone.

Basalt made two acquisitions during the period: Unilode Aviation Solutions, a speciality aviation leasing business focusing on containers/pallets for baggage/cargo, and Goetel, an owner/operator of fiber networks in Germany, mainly in rural areas.

CD CEI VIIA continued to draw funds for the development of their portfolio and 72% of commitments have now been called.

In the tactical side, beyond the mentioned €25m co-investment in Ermewa alongside DWS (Project Ernest), a secondary acquisition of an LP position in Meridiam's first fund, which was signed in Q2 was funded and closed in Q3 (Project Legatus). Three other co-investments advanced materially and are expected to close in the following months.

€25m was invested in Project Alcazar alongside WSIP (West Street Infrastructure Partners managed

Oxfordshire Pension Fund

by Goldman Sachs) which is completing the "take private" acquisition of Adapteo and expects to close in early 2022. Adapteo provides the leasing of flexible modular buildings, such as schools, through the Nordics and Northern Europe.

Project Sonate was signed with Meridiam and is expected to close in Q4 2021. Project Sonate is an opportunity to co-invest €25m with Meridiam in the acquisition of an entity carved-out from the French water and waste conglomerate, Suez. Sonate's core business is water (including wastewater) and waste services (collection and treatment), with ancillary business units offering smart & environmental solutions. Sonate is a main fund investment of MSIE IV, a cycle 2 general infrastructure fund, so both cycle 1 and 2 clients will have exposure to this asset.

A further co-investment was approved into a UK smart meter business, alongside Equitix and closing is expected in Q4.

Only one more tactical deal, likely to be in the renewable space, is required to complete the tactical investment period of the Cycle 1 StepStone vehicle.

Brunel is very pleased with how the tactical portfolio of Cycle 1 is developing, providing Clients with access to some of the most highly sought-after transactions on very advantageous terms. This is due to a combination of Brunel being seen as a desirable coinvest partner, the GPs selected for the primary portfolio and StepStone's capabilities to access, analyse and execute transactions to very demanding time deadlines.

<u>Please note</u>:
The above figures were included at Clients' request to breakdown the performance of the fund. They are based on cash-adjusted, roll-forward NAV estimates, using underlying GP communications, which means they will differ from the main summary table owing to the lag in Brunel receiving the formal valuation report up to 120 days post Quarter end.

Brunel - Infrastructure (Cycle 2a) Commentary

As a reminder, for Cycle 2 Infrastructure, Clients were offered the opportunity to invest either by committing to the Brunel 'Combined' Infrastructure Portfolio (which allocates 50% of total to renewables, 50% to general (non-renewables) infrastructure) or via the Brunel 'Renewables only' Portfolio which allocates 100% of total to renewables. In order to facilitate these Client outcomes, Brunel established two funds of funds with StepStone for cycle 2; SS-B II Renewables and SS-B II General. The Combined Infrastructure Clients are invested 50:50 into each fund. The Renewables only Clients are invested 100% in the Renewables fund.

In addition to Vauban Core Infrastructure Fund III (CIF III) and Meridiam Sustainable Infrastructure Europe IV (MSIE IV), two additional commitments were approved after June 2021: Infracapital Greenfield Partners II and InfraVia European Infrastructure V.

The General Infra vehicle finalised a commitment of £25m into Infracapital Greenfield II which is Infracapital second dedicated European greenfield infrastructure fund. The Fund will aim to create a diversified portfolio of 10-15 assets over its 6-year investment period and 25-year term. The Fund already has a seeded portfolio of 5 assets.

In September, Brunel approved a commitment of up to €40m into InfraVia European Infrastructure V. InfraVia is a French independent investment firm mainly focusing on the infrastructure asset class. The Fund will follow a similar investment strategy to its predecessor fund employing a Core+/Value-add investment strategy targeting predominantly brownfield infrastructure investments in energy, transport, utilities, telecom and social sectors across Europe. Final confirmation of commitment to the fund is subject to satisfactory negotiation of fees by Stepstone.

The vehicle aims to execute two additional general infra primary commitments. At period end, four other fund opportunities were being appraised by StepStone with a view to commitments being made later in 2021 and early 2022. Frontrunners are Melody Communication Infrastructure Fund II, a telecoms focused US investor, and the new ICG Infrastructure team based in UK and France.

The cycle 2 Generalist infra vehicle is waiting for suitable tactical opportunities once Cycle 1 is either fully deployed or reaches concentration limits within individual sub-sectors.

Brunel - Infrastructure (Cycle 2b) Commentary

As a reminder, for Cycle 2 Infrastructure, Clients were offered the opportunity to invest either by committing to the Brunel 'Combined' Infrastructure Portfolio (which allocates 50% of total to renewables, 50% to general (non-renewables) infrastructure) or via the Brunel 'Renewables only' Portfolio which allocates 100% of total to renewables. In order to facilitate these Client outcomes, Brunel established two funds of funds with StepStone for cycle 2; SS-B II Renewables and SS-B II General. The Combined Infrastructure Clients are invested 50:50 into each fund. The Renewables only Clients are invested 100% in the Renewables fund.

The Cycle 2 Renewables Fund has committed to 3 primary funds and 1 tactical co-investment. Given the selected funds have limited exposure to Europe, the final two commitments will be allocated to managers offering European exposure and to further round out the geographic exposure, StepStone will tilt the Tactical portfolio towards Europe too. Performance is not meaningful at this time, given the immaturity of the Portfolio.

The funds made no new investments during the Quarter. Copenhagen Infrastructure Partners IV continued to work through the construction of three projects and are progressing several other projects to Final Investment Decision (FID), so they can commence construction. We expect Brookfield IV Renewable Sidecar to call in Q4 5% of commitments (c\$40m) to fund ongoing development/construction for existing platforms, including X-Elio, Polenergia, Shepherds Flat and Constellation. Conversations following the key man even in CD CEI X continue. The investment period has been terminated and uncalled commitments have been cancelled for redeployment in new opportunities.

StepStone continue to screen primary fund opportunities. Due diligence has started for London based Glennmont IV, a fund specialising in wind, solar, biomass and small hydro in Western Europe. Another fund under consideration is London based SDCL which focuses on energy efficiency and decentralised demand driven solutions.

Although Cycle 1 has priority on tacticals until fully deployed or exceeding concentration limits, due to its size and cashflow profile, Project Darwin was approved for Cycle 2 and is expected to close on Q4 or early 2022. Project Darwin is an offshore wind co-investment opportunity in Germany alongside Glennmont and Orsted.

Oxfordshire Pension Fund

Brunel - Private Equity (Cycle 1) Commentary

As of September 2021, the drawdown of Cycle 1 increased slightly from the previous quarter, a third of the committed capital has been drawn. Cycle 1 is still in the investment phase, but the portfolio has performed well in terms of multiple and net IRR. It largely avoided the J-curve since its inception due to investment in secondaries funds. This will change as other funds in the portfolio continue to draw capital to make investments.

Overall, the PE portfolio was relatively resilient, with some underlying portfolio companies affected in the short term while other portfolio companies benefit. With approximately 1/3 of the commitments drawn as of September 2021, Cycle 1 portfolio overall experienced less impact from Covid-19 and has significant dry powder to invest in the new environment. The GPs in Cycle 1 are active and currently funding their investments through fund credit facilities. Most are expected to make capital calls throughout 2021.

Overall, all the private equity funds in Cycle 1 are now successfully closed and in full deployment mode.

Oxfordshire Pension Fund

Brunel - Private Equity (Cycle 2) Commentary

Cycle 2 started in June 2020. As of September 2021, it had committed to nine funds, which represent about 2/3 of total allocation. Out of the nine funds, six funds (LGT CGS V, New Mountain Fund VI, Montana OSP V, Insight XII, Insight X Follow-On Fund, and Genstar X Opportunities Fund) have started investing. The remaining funds are either recent commitments or funds that just been activated. Nonetheless, the total drawdown of Cycle 2 stood at 11%. It is worth noting that the total capital deployed was higher due to funds using credit facilities to fund investments.

One year into the program, Cycle 2 had made great progress in terms of funds commitments made and the quality of the GPs that we backed. While still early, the performance was encouraging. The portfolio is well above cost at this early stage, with no j-curve since inception.

In terms of new investments in Q3 2021, Cycle 2 committed to Insight XII and Inflexion Buyout VI. Insight XII is a global software focused fund and Inflexion Buyout VI is a European fund with a strong focus in UK investments. Consequently, Cycle 2 was 2/3 committed to underlying funds.

Going forward, we expect more funds to start calling capital as they pay down the credit facilities that they used to fund the investments, which were made 6-12 months ago.

Brunel - Secured Income (Cycle 1) Commentary

The M&G Secured Income Property Fund's total returns over both the quarter and year are strong, driven again primarily by capital growth from the British Car Auctions' portfolio and from the office and supermarket sectors.

M&G SPIF achieved a GRESB ranking of 2nd out of 79 funds in its peer group, with a 4-star rating. Rent collection continues to normalise with a 99.5% payment rate expected in Q3 and Q4 2021, providing a distribution yield of c.3.8% (LTM, accrual basis). The fund has acquired a small Asda supermarket in Hemel Hempstead and is under offer on a Waitrose supermarket and a hotel in Edinburgh. With respect to disposals, they have exchanged on the sale of the Buzz Bingo portfolio (Q4 2021 close) and the Shiva Hotel (Mar 2022) at good valuations; these assets were both heavily impacted by the pandemic.

ASI LLP, like the M&G fund, had a strong Q3 performance. Unlike Q2, the fund was slightly quieter in terms of acquisitions, after a busy first half of the year. Rent collection is very close to 100% for 2020 and, so far, is above 98% for both Q1 and Q2 2021. The majority of tenants have now returned to paying rent as per the terms of their lease.

The fund achieved a much-improved GRESB score for 2021. This is largely a result of improved data capture from tenants following greater engagement throughout the pandemic. Positively, the fund has zero vacancy, following the Bury office disposal.

Over Q3, GRI held its fifth close for a total of £113 million commitments, admitting two new Limited Partners and additional commitments from three existing Limited Partners. Aggregate commitments to GRI following this close are £784.0 million. As at 30 June 2021, total commitments drawn were £341.1 million, leaving £329.0 million available for further investment.

No new commitments to investments were made by GRI during Q2; the total capital committed towards investments since inception is £378.3 million. GRI is looking at further offshore wind and biomass opportunities and anticipates a further drawdown for the Solar II commitment before the end of the year.

Brunel - Private Debt (Cycle 2) Commentary

At quarter-end the Brunel Private Debt Portfolio comprised four positions: ICG Senior Debt Partners IV, Neuberger Berman Private Debt IV, Crescent Direct Lending Fund III and Bridgepoint Direct Lending III.

In September, Clients received the first capital call for a combined £75.56m. This reflects strong deployment amongst the underlying funds. ICG had called ~30% of commitments, Neuberger Berman ~15% and Crescent ~5%. Deployment is expected to continue to be strong through to yearend.

Activity through Q3 focused on manager due diligence. Two new primary commitments were confirmed to Bridgepoint Direct Lending III (€150m) and Crescent Direct Lending III (\$125m). Due diligence was also substantially completed on Ardian Private Debt V and Barings Private Loan Fund IV. Commitments to these Funds are expected to be confirmed in October.

Bridgepoint Direct Lending III will primarily focus on providing financing to European middle market companies, generally in non-cyclical businesses with defensive characteristics. The Fund will invest in secured debt instruments and aims to be the sole lender (~70% of transactions) or one of a small group of lenders. The Fund will seek to deploy capital across a target of 30 to 40 investments, diversified across sector and geography. The Fund is led by Paul Johnson. Paul was previously Head of Direct Lending at EQT Credit and before that he worked in the Leveraged Finance department at Credit Suisse. There are 12 investment professionals from the broader Credit Team who are expected to dedicate all or a majority of their time on the Direct Lending series. Bridgepoint operates its Direct Lending activities across four European offices in London, Paris, Frankfurt and Stockholm. This regional network provides access to many transactions not run through London-based sponsors or advisors and local language and creditor law expertise are also critical for many transactions.

Crescent Direct Lending III will focus on originating and investing in senior and unitranche loans of private US lower-middle market and middle-market companies primarily in conjunction with private equity sponsored transactions. The Fund will seek to build a portfolio of 90-110 loans diversified by industry sector. Crescent has demonstrated a strong track record in the lower middle market with low loss rates. The Crescent Direct Lending team is headquartered in Boston and comprises 18 investment professionals. John Bowman and Scott Carpenter are Co-Heads of the Crescent Direct Lending team. The senior lending team has been active in the U.S. leveraged finance market for over two decades and has established itself as a credible platform within the lower middle market segment.

Oxfordshire Pension Fund

Brunel - UK Property Commentary

In June, £5m was committed, on Oxfordshire's behalf, to each of Octopus Healthcare Fund and M&G UK Residential Fund, with both commitments still awaiting drawdown. M&G UK Residential is widening its strategic remit to include retirement living and student accommodation and Brunel considers this broader diversification as advantageous longer-term, particularly given the UK's ageing demographic. An imminent purchase of a portfolio in the retirement living sector by the manager may well lead to a drawdown of Oxfordshire's commitment before the end of 2021.

The only other transaction during the quarter was a sale in September of £2.3m of Oxfordshire's overweight holding of Unite Student Accommodation (USAF), which has been followed by a further sale of £4.5m USAF to bring Oxfordshire's holding closer to the model target weighting. These transactions will appear in the next quarterly reports, as settlement has been agreed for October and December respectively.

USAF has returned to almost full student occupancy for 2021/22, but competition in the sector is more intense and USAF will need to spend substantial amounts on upgrading some of its assets before 2030, limiting performance returns.

The sector strength of UK industrials and retail warehouses over the last quarter is highlighted in the performance returns from LGIM's Industrial Property Investment Fund (>30% increase over 1 year) and the turnaround of Nuveen's UK Retail Warehouse Fund (up >20% in the last twelve months). The diversified balanced funds within the portfolio have also achieved double-digit returns over the last year, as UK property investment levels have recovered sharply, with transactional evidence and rental growth in some sectors supporting higher valuations.

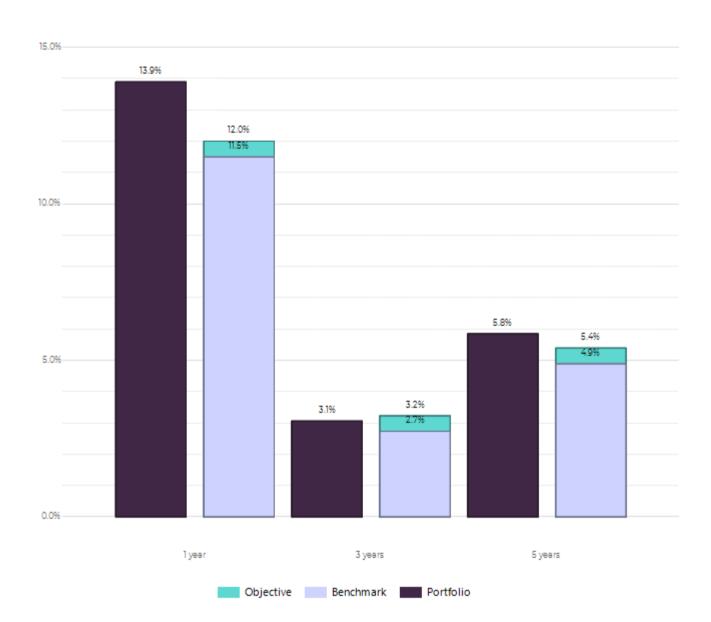

Oxfordshire Pension Fund

Brunel – International Property Commentary

Over the third quarter, mass vaccination has permitted the return of international travel, enabling more investors to physically visit potential acquisitions and boosting confidence to see transactions through to completion. In the office sector, reports of the death of the office seem exaggerated, with milestone office deals concluded this quarter in tier-one cities such as Frankfurt, London and Milan.

Logistics assets continue to act as an investment magnet amid the e-commerce revolution and the supply chain challenges thrown up by the pandemic. Appetite for hard-hit retail and hospitality properties is still relatively subdued, but bright spots are beginning to emerge.

Both retail and institutional investors continue to demonstrate interest in the residential and particularly the build-to-rent (BTR) sector. Political uncertainty could affect investor confidence towards the end of the year, with recent elections in countries such as Germany and the Czech Republic resulting in potentially lengthy coalition negotiations. The trajectory of the pandemic in the winter months is another potential area of concern. Nonetheless, the momentum gained throughout the year is likely to continue in line with the reopening of regional economies.

Brunel is finalising a commitment to a European core-plus, diversified fund which targets high-quality, substantially stabilised office, logistics, residential and retail assets located in major European markets and in gateway cities.
