## High priority capital schemes to which indicative funding is proposed to be allocated

Prioritisation Category	OCC Funding (estimates subject to business case)	Previously approved allocations
Statutory, health & safety & school placements     Generate revenue savings or cost avoidance/reduction	£27.7m £2.55m	£5.7m £0m
3: Climate action or active travel	£3.2m	£0m
Total Prioritisation Category 1-3	£33.45m	£5.7m
Highways Maintenance & Structures (2024/25 only)	£10.2m	
Other Schemes critical to council operations	£2.3m	
Total Schemes Proposed to be Funded	£45.95m	

## High priority capital schemes to which indicative funding is proposed to be allocated

Prioritisation Category 1: Statutory, Health & Safety and statutory school placements	OCC Funding (estimates subject to business case)	Previously approved allocations	Other funding sources	Current status/comments
Replacement Mortuary	£11.9m	£5m	Potential funding from partner involvement (to be identified)	Thames Valley Partnership approach is being investigated. Funding requirement is based on worst-case scenario of Oxfordshire County Council delivering without partnership involvement.
Oxfordshire Fire & Rescue	£6.3m			Investment in Fire & Rescue Service
Oxfordshire Fire & Rescue Strategy	£1.3m			Work to address Health and Safety issues (primarily focussing on decontamination zoning work) across Oxfordshire Fire Stations. Further funding will be required in future years to address the need.
Decontamination Units for Breathing Apparatus	£0.5m			Decontamination units will address the Health and Safety risks by enabling fire fighting crews to safely decontaminate breathing apparatus.
Public Switched Telephone Network	£2m			Retirement of analogue telehpone networks will impact services for which Oxfordshire County Council is resopnsible. Investment will be to mitigate the impacts of the switch off, addressing high priority areas such as Telecare devices for vulnerable people and reporting of traffic signal failures.
Gypsy & Traveller site improvements	£2m			Improvements to sanitary areas (ultility blocks which house kitchen and bathroom facilities) to bring them up to minimum standards. Investment will address the next phase of upgrades across the remaining sites. £1m was allocated in 2023/24
Fire compartmentation survey & remedial works	£2m			Next phase of remedial works required to address actions identified in the compartmentation survey of the council's estate. Work will complete in 2026/27
Repairs and Maintenance work at Redbridge Household Waste Recycling Centre	£0.7m	£0.7m		Repairs and maintenance work are required at Redbridge Household Waste & Recycling Centre. £0.7m has already been allocated to this project but additional work has been identified.
Investment in future capacity of Household Waste Recycling Centres	£1m		Alternative funding sources are being investigated.	Investment required to increase capacity at the Household Waste Recycling Centres in line with the Household Waste Recycling Centre Strategy
Total Category 1	£27.7m			
1				
Prioritisation Category 2: Generate revenue savings or cost avoidance/reduction	OCC Funding (estimates subject to business case)	Previously approved allocations	Other funding sources	Current status/comments
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household	(estimates	approved	Other funding sources	Investment will help to address demand management and security issues
or cost avoidance/reduction	(estimates subject to business case)	approved	Other funding sources	
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household Waste & Recycling Centres	(estimates subject to business case) £0.25m	approved	Other funding sources	Investment will help to address demand management and security issues across our household waste recycling centres.  Investment required to address accessibility issues and energy management issues. Programme of work will result in revenue savings
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household Waste & Recycling Centres  Asset Rationalisation Programme	(estimates subject to business case) £0.25m £2.3m  £2.55m  OCC Funding (estimates subject to	approved	Other funding sources  Other funding sources	Investment will help to address demand management and security issues across our household waste recycling centres.  Investment required to address accessibility issues and energy management issues. Programme of work will result in revenue savings
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household Waste & Recycling Centres  Asset Rationalisation Programme  Total  Prioritisation Category 3:	(estimates subject to business case) £0.25m £2.3m	approved allocations  Previously approved		Investment will help to address demand management and security issues across our household waste recycling centres.  Investment required to address accessibility issues and energy management issues. Programme of work will result in revenue savings and forms part of the commitment to reach Net Zero in 2030.
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household Waste & Recycling Centres Asset Rationalisation Programme  Total  Prioritisation Category 3: Climate Action or Active Travel  Decarbonisation Funding Phase 1  Electric Vehicle Chargers	(estimates subject to business case) £0.25m £2.3m £2.55m OCC Funding (estimates subject to business case) £2.6m	approved allocations  Previously approved	Other funding sources  Potential grant funding from	Investment will help to address demand management and security issues across our household waste recycling centres.  Investment required to address accessibility issues and energy management issues. Programme of work will result in revenue savings and forms part of the commitment to reach Net Zero in 2030.  Current status/comments  The required investment would be to match funds upon a successful bid. Result of bid is due January 2024. Programme of work will result in
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household Waste & Recycling Centres Asset Rationalisation Programme  Total  Prioritisation Category 3: Climate Action or Active Travel  Decarbonisation Funding Phase 1  Electric Vehicle Chargers Total	(estimates subject to business case) £0.25m £2.3m £2.55m  OCC Funding (estimates subject to business case) £2.6m £0.6m	approved allocations  Previously approved allocations  £0.4m	Other funding sources  Potential grant funding from PSDS3c	Investment will help to address demand management and security issues across our household waste recycling centres.  Investment required to address accessibility issues and energy management issues. Programme of work will result in revenue savings and forms part of the commitment to reach Net Zero in 2030.  Current status/comments  The required investment would be to match funds upon a successful bid. Result of bid is due January 2024. Programme of work will result in revenue savings.  Investment required to provide infrastructure to support One Fleet, specifically in depots for charging minibuses.
or cost avoidance/reduction  CCTV and Automatic Number Plate Recognition for Household Waste & Recycling Centres Asset Rationalisation Programme  Total  Prioritisation Category 3: Climate Action or Active Travel  Decarbonisation Funding Phase 1  Electric Vehicle Chargers	(estimates subject to business case) £0.25m £2.3m £2.55m OCC Funding (estimates subject to business case) £2.6m	approved allocations  Previously approved allocations	Other funding sources  Potential grant funding from	Investment will help to address demand management and security issues across our household waste recycling centres. ## **Proposed Additions to Capital Pipeline (Unfunded pipeline)**

Proposals which align to Priority Framework Categories	OCC funding required	Priority Category	Funding sources	Current status/comments
Expansion of Oxfordshire Special School Capacity (phase 3)	£40m	Category 2		2 new 150 pupil place schools. Need will be reassessed once new schools are open.
Additional Children's Homes	£6m	Category 2	OCC + external bid	In addtion to 2 small/1 larger home included in high External funding will be sought
Electric Vehicle Chargers	£1m	Category 2	occ	Investment required to provide infrastructure to support One Fleet, specifically in depots for charging minibuses.
Decarbonisation of the council's buildings - Phase 2	£20m	Category 3	OCC + potential external bid	(energy revenue savings of £0.5m per year) (Project inc installation of renewables (solar PV), Heat Pumps, Insulation)

Proposals where there is no direct alignment to priority framework categories	OCC funding required	Priority Category	Funding sources	Current status/comments
IT Strategy	£2.3m	-	OCC	Business critical systems
Highways Maintenance 2025/26 onwards	£188m	-	OCC + DFT funding	Cliff edge in existing funding from 2025/26 (DFT funding 2022/23 - 2024/25). Assumes DFT funding of £20m / year
Bridge Structures	£60m	-	occ	Estimated investment for programme of works to address structures.
Household Waste & Recycling Center (Design & Build)	£4m	-	OCC + potential s106 funding	Investment required to increase capacity at the Household Waste Recycling Centres in line with the Household Waste Recycling Centre Strategy
Household Waste Recycling Centres (replacements)	£24.5m	-	OCC + potential s106 funding	Funding for the implementation of the Waste Strategy
Household Waste Recycling Centres (condition survey works)	£3.5m	-	occ	Refurbishment of Redbridge Household Waste & Recycling Centre
