Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neeative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Very negative	About right	Yes	Make buses cheaper for all, Add public cycle parking		Very positive	This is a perfectly reasonable short term solution to what is an enormous problem for all road users.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on	I commute to the central permit area	Very negative	Very negative	There should be no charges at all	No	Other	Use the funds to sav out the Westgate shoppina centre	Very negative	I live in New Hinksey. For me as a resident. it is ludicrous to have to go round the rina road to drive to. sav. Jericho. I cannot		CLOSE THE WESTGATE CAR PARK!!!!!!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I absolutely object to this scheme, traffic is bad enough as it is and for those of us who even have to commute to the outskirts of Oxford using the ringroad which are not serviced by buses it's going to make it horrendous. It already got worse with the LTNs then worse again with botley road. This will add to it. 25 passes does not help when you are dumping all the cars onto an already too busy ring road. Aside from the obvious punishment for poor people and money grab, this is horrible for women like me who are stuck trying to get from childcare/school drop off to a job then get back in time to collect, not to mention actually have a life. Why should I take a wage cut when you as a council only fund pre-schools to be open from 8:45 (8:15 for breakfast club) then do such a poor job of traffic is takes me an hour to travel 8 miles or at least that to get two buses. Why should I not have a career or a full time job because you continually hold dogma and ideology above practical solutions and the opinions of the people who elected you.	Do not put them in, you're creating extreme hardships for people and it will grind Oxford to a halt.	Go back to the drawing board, remove the nonsense, fund the park and ride properly, stop building houses next to the ring road without appreciate crossings and stop adding houses rurally without genuine public transport links and suitable roads in place.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for young people, Make bus services more frequent		Very negative	My daily commute has become increasingly overwhelming and unsustainable. There is no direct bus route from where I live, and using public transport—even via the park and ride—takes nearly three times longer than driving. Navigating peak-hour traffic every day is already physically and mentally exhausting. Now, with the introduction of the new congestion charge, the situation is only set to worsen. Not only will this add a significant financial burden, but it also offers no improvement to the already limited and inefficient commuting options available to me. This ongoing strain is beginning to seriously affect my well-being, my ability to perform effectively at work, and my personal life. The time and energy consumed by commuting leave me drained before the day even begins, and I return home too exhausted to properly rest or spend meaningful time with family. It's becoming increasingly difficult to maintain a healthy work-life balance, and I'm genuinely concerned about the long-term impact on both my professional performance and personal health.	While I appreciate the goals of reducing congestion and improving air quality, I have serious concerns about the practical implications of introducing temporary congestion charge zones—particularly for residents and essential workers who rely on private transport due to limited public transport options. As someone who commutes daily from an area without a direct bus route, the proposed charges would significantly increase the financial and logistical burden of getting to work. Public transport alternatives are not always feasible, often requiring much longer travel times and multiple connections, even when using park and ride services. This not only adds stress but also reduces time available for rest, family, and personal responsibilities—ultimately impacting work-life balance and well-being. Moreover, the charge does not address the root issue: the lack of efficient, accessible, and reliable public transport for many parts of Oxfordshire. Implementing a charge without first improving these services risks disproportionately affecting those who have no viable alternative to driving. I urge the council to consider more equitable and supportive measures—such as investing in better public transport infrastructure and offering exemptions or support for essential workers—before moving forward with the congestion charge.	1. Priority Travel Schemes for Healthcare Workers Why it matters: Healthcare workers often work long, irregular hours and need reliable, timely transport. Suggestion: Introduce permit-based exemptions or discounted travel schemes for NHS and healthcare staff, allowing them to bypass congestion charges or access priority lanes during peak hours. 2.Hospital Access Passes for Essential Staff Why it matters: Healthcare workers are essential to both emergency and routine care delivery. Suggestion: Provide hospital-issued access passes that allow essential staff to travel through congestion zones without penalty, especially during emergencies or on-call duties.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I think it is right that car users have to pay a levy to drive into/out of Oxford. But I would make it only at peak times in the AM and PM on working days, and possibly higher than the £5. I would suggest also extending the charging zone to include the Banbury and woodstock road, so all users of the roads in Oxford have to pay a congestion charge. I would consider granting residents of Oxford a shorter period to drive without paying the charge - maybe 50 days per year?	I think congestion charging is a better solution than traffic filters.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent		Very negative	I live in Grandpont we should be exempt as have been so negatively affected by proximity of Westgate car park. I have an EV like in London EV should be exempt	Ridiculous idea we have suffered enogh	Close Westgate or alter where enter to top rd where only buses go
an Oxford resident	weekly	Unpaid carers, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	About right	Yes	Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Very positive	I think it will have a significant positive impact and help reduce traffic in Oxford.	I am concerned that cars avoiding Marston Ferry Road because of the charge will make Banbury Road much busier. It seems to me that a charging point on both Banbury and Woodstock roads would be beneficial. I think you should make this scheme permanent and not go ahead with the traffic filters.	Better and more frequent bus routes to the railway station from north Oxford. There are none on Banbury north of Marston Ferry Road and only infrequent ones on Woodstock Road. Some of the 2 and 6 route buses could go onto the station, for example. Buses in Jericho and Walton Street. Speed up opening the railway line from Cowley and build something from Witney to Oxford, such as a tram or a train to make the A40 less congested. Open the park and ride in Eynsham. Separate pedestrians from cyclists better - it is a dangerous activity walking on pavements at the moment. Enforce parking and speeding resolutions to make money and make the environment safer for pedestrians.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Very positive	There should be no charges at all	No			Very negative	I disagree with the introduction of a congestion charge. Public transport is unreliable, slow and inconvenient. Drivers already pay substantial amounts in parking charges and taxes and the addition of a congestion charge would be totally unnecessary.		Conduct works at night time so they are not disruptive during peak hours.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very positive	This is a well thought through idea. It won't be popular with all but it is a sensible proposal given limitations.	Good and pragmatic idea given the ongoing Botley Rd disaster.	Replace the LTN barriers and bollards with ANPRs. Actively use the ANPRs to fine people who drive through which doesn't seem to be happening at the moment. Make bicycle lanes more prominent and reduce occurences of road sharing with cars/buses etc.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		No impact	I do not drive in Oxford very often and when these charges are implemented I will find alternative methods of transport.		Free park and ride buses for the hospitals.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Instead of using my electric car I will buy a van	The continual attacks on car drivers are misplaced and highly objectionable. Misguided local gov interference. Try interfering in the ridiculous fiasco of the botley road works instead. It also disproportionately effects the poorer in the community	Open the Botley Road, make it compulsory to work 24/7 on road works. Move the council offices out of Oxford city centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	The poorer the household the greater the cost effect It will have an negative impact on centre of town businesses and public transport infrastructure needs improving first to make travelling by public transport more accessible and cheaper and more routes	N/A	Improve public transport bus routes and reduce cost - incentivise public transport
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	FREE Park N Ride with Free bus too	Very negative	Gant has created the congestion in Oxford and now expects us to pay for his incompetence. Hollow way should not have a Bus gate, HE created congestion putting in cycle bars at the bottom of Hollow Way. All Hollow Way needs is for NO on street parking the full length, this would allow traffic to flow.	Years ago all bus stops had pull in area's, this allowed the traffic to continue past the bus. Today they are ALL on the road, so hold up traffic. Personally Oxford has too many buses, that run less than half empty. There should be enough buses between 6-9 am and 3-6pm but could be cut to half during the day. With the stupid 20MPH everywhere, if you took all cars off the road, buses will still only run at walking pace.	Leave Hollow way and Marston Ferry road alone. Remove the stupid cycle poles and reopen the lane at the swan. Don't allow on street parking in hollow way. This is a hospital route, especially if there is an accident on the bypass or someone attempting to jump off the bridge, which happens alot. Banbury rd/ Woodstock road made alternate on way, with alternate one way side streets. Cowley rd/ Iffley Rd one way with alternate one way streets. The inside lanes can then be used for Buses and cycles. This should make cyclists feel safer. Schools/parents should be educating children about the highway code and how to look and listen. All the congestion in Oxford has been bought about by LTN's, the public know it. If Gant doesn't want traffic in Oxford the first thing he should BAN is all the delivery scooters that congregate on Carfax. They look insightly and are polluting. As an Oxford Resident for many many years Gants schemes are killing Oxford. Time the CC started listening.
an Oxford resident	daily	Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Community health or care workers who need to visit multiple locatid, e.g. travel urgently, Emergency service vehicles, Firefighters	I don't	Neutral	Very negative	Too low	No	Make buses cheaper for all, Add new bus routes, Other	add public cycling in protected lanes, protected by wands, not just paint.	Neutral	blue badge holder	it will cause more congestion and chaos, because the charging points are too central and there are too many exemptions. why let cars drive all the way into oxford and then try to restrict their movement. charging points should further out and van and lorries should be restricted. also, there are no natural turning around points. if someone arrives at a charging point and wants to turn around, they will have to do a 3 point turn. this will cause chaos and slow traffic down.	congestion charge located at points further out - closer to the ringroad or just past park and rides. e.g. botley rd and abingdon rd, charge point should be after the park and ride, to encourage park and ride use. fewer car parks and frees parking in oxford. e.g. high street has free parking, so why would anyone park in park and ride and then pay for bus to high st. they can park there for free.
an Oxford resident	daily	Unpaid carers	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	This is another stealth tax by the libdem and Gant It is another ideological policy that is not practical	This is the most disgraceful proposed decision the OCC has ever put forward. It will kill the city, cost jobs, hammer working people	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Negative	I live in a village in west oxfordshire and have no choice but driving to work in the John Radcliffe. This scheme is designed to move more cars out of the centre of Oxford which will push more cars onto the overcrowded ring-road so we will spend longer sitting in traffic.	The large number of cars being exempted means is appears like a lose-lose. With so many cars / vans / lorrys being exempted it doesn't seem like central traffic will be substantially reduced, but there will be a few more cars who do use the ring road adding to the congestion. When you get on the buses they are frequently too hot in the summer, too cold in the winter, and if you're transporting a patient who is poorly, it does not feel good to be sharing the space in these conditions. Proper cycle lanes which are not shared with buses / taxis, which have clear priority across junctions, and cover designated routes (for the whole way)	Small, fast and frequent hopper buses from the Park and Rides - something like a small 10-seater bus which go every 5-10 minutes directly to places like the John Radcliffe / Churchill / Westgate Centre. Commuters and patients alike do not want to be waiting up to 30 minutes for a bus, which then takes another 30 minutes to get there... if i need to allow an hour each way to get to the hospital by public transport (on top of the actual drive to get to the Park & Ride), I am going to drive all the way to where I am going.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Other	Remove the charge zones all together. As a comprise increase Oxfordshire(out of Oxford city but still live in the countrv) to 100 oasses oer vear.	Very negative	Oxford is surrounded by rural communities and small towns. Please provide more support residents in these areas. Buses can not do that job. Oxford runs the risk of losing local(ish) visitors to other areas such as reading and Milton Keynes for shoppina, leisure and work.	Oxford is surrounded by rural communities and small towns. Please provide more support for residents in these areas. Buses can not do that job. Oxford runs the risk of losing local(ish) visitors to other areas such as reading and Milton Keynes for shoppina, leisure and work. I belie as a minimum comprised allow all Oxfordshire house holds 200 permits.	It's and old city and the congestion isn't too bad.
a resident of Oxfordshire living outside Oxford	daily		I don't	Positive	Positive	About right	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Positive	Oxford congestion means it is impractical to use a car inside the ring road. I normally cycle or walk. Reducing the congestion and being able to use a car in Oxford by paying the congestion charge will be useful for journeys when a car is essential.	I hope the traffic modelling shows differently but have concerns the Botley Rd will become very congested to the ring road once the railway bridge is reopened and the bus gates installed at the end of the congestion charging scheme.	Look at car use for recreational activities in and around Oxford. Providing practical bus route alternatives could remove a lot of car miles from within and on the ring road.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative		There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very negative	As my mobility is limited, and the nearest bus stop is over 1/4 mile away I rely heavily on my vehicle. I live on a very low single person's pension and would find any charge very difficult to afford I do not have a Blue Badge	This scheme will cause severe distress and isolation to people like me I rely on friends for help (unpaid carers) and for services like mobile hairdresser and podiatry visits every month.	The proposed scheme is likely to cause more congestion than already exists in East Oxford. Traffic should be able to move across the outskirts of the City freely for Hospital visits and appointments. Consider instead Red Routes for public transport and invest in the infrastructure before punishing motorists who have no other option. Create more Park and Ride carparks and make parking and travel free. Consider an inner ring road circular route. Consider one way traffic flows. Do what some European Cities do and have a scheme where permit holders can drive into the City just twice a week, forcing car sharing for school runs, and reducing the commuting traffic by half. A badge on the car would identify which days the vehicle would be able to drive in. Make buses smaller and more frequent. There are too many large buses following each other around the city dampening the roads.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative	I think this is all about raising money for a cash-strapped council. There are an increasing number of empty business premises in Oxford because of the anti-driving policies implemented by the council over a long period of time. The fact of the closure of the Botley Rd for such a long time must be by design, even if not acknowledged. We've put on hold our plans to open a business in Oxford partly in response to the unfriendly environment for shoppers that makes this an increasingly risky enterprise. Oxford is a city I love that has been badly served by the council for a long time now - Reading looks like a better option for shopping and business now.	No, but please re-think this backwards step.	Get the Botley Rd opened. Consider the benefit to all of a vibrant, accessible city.
an Oxford resident	daily	Blue badge holders	I don't	Negative	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Negative	Destroy trade in that area, u can't carry heavy shopping in hands.	Bus fare should be £1 everyday so more people can travel plus control on the flow of busses.	Make roads one way system. Bus bays on the bus stops so the traffic behind keep flowing or start the Tram.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Other	have a proper overall plan and implement it together, not just make up some assumptions and hope they happen in the future (like assuming bus companies will improve services). If the things like buses aren't there on day 1 people don't have an alternative	Negative	The proposed solution neither means less traffic going into Oxford (there are routes to most places that avoid it, so is just displacement), and ineffective - a charge that is less than a return bus fare for 1 person (well you can't get returns so 2xE3 singles) is just going to be accepted, especially by the better off who have more/bigger vehicles.	There only seems one location that makes any sense - St Clements. The rest are pointless. One is even on a road built specifically as a relief road that has separated pavements - blocking this to add traffic to the North-East bypass is stupidity beyond measure.	There needs to be actual options provided, not the hope that people will choose to do something else. There needs to be a proper integrated plan that encourages people to change behaviour. At the moment buses are hot, overcrowded at peak times, unclean, smelly, and have limited routes - how are more people going to choose them at peak times - just hoping or assuming at this stage is idiotic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Positive	Faster buses with some car exemptions should improve traffic and make cycling safer. However, £5 is too low to significantly change the actions of the richest (eg. private school parents) or for occasional city centre visits (such as parents picking up students). More spaces in the centre should be designated for blue badge holders. More punitive ticketing should be enforced for illegal parking in cycle lanes, on double yellows, in bus lanes and blocking t This slows Cowley Road	There should be a joined up single charge tap-on-tap-off bus pass that allows transfers between Stagecoach and OBC for multiple journeys within a fixed time, eg 1 hour. There should also be additional 'around Oxford' bus routes that do not require interchange in the city centre.	Cycle routes should be opened on car free connections; eg. across Christ Church from St Hilda's connecting Meadow Lane, widening the Thames path and canal towpath , additional pedestrian bridges at Magdalen and Hythe Bridges.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Negative	The scheme would affect me driving to take primary school age children to swimming lessons across the city, and also access to our church during the week.	The scheme seems to penalise some areas and routes into the city more than others. For example residents in north Oxford are relatively unaffected compared to those in Headington. I would much prefer to see a congestion zone around the city centre that was active irrespective of the route taken into the city. I appreciate this requires more cameras potentially to enforce. but would be a much fairer approach.	Safer cycling - e.g. safer ways to merge with traffic, rather than current cycle lanes that stop abruptly and require cyclists to cut into moving traffic.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Positive	Something needs to be done about congestion. At this point I will accept any action other the nothing that has been done in the last 8 years I've lived here.		Ban cars from certain roads that travel into central Oxford and make buses more frequent on those routes. Grow a spine.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Positive	At last, something is being done about congestion. Very pleased to see this happening.		Get Thames Valley Police to do some enforcement of the terrible driving in East Oxford. Recent news stories about the speeds on Morrell Avenue, plus the young men who race up and down Cowley Road emphasise that there is no meaningful enforcement at present, which is endangering life. Those bad actors need to be banned from the roads.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice. Frequent hospital patients	I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative		We all are very aware this WILL END UP BEING PERMANENT.	Sack Mr GANT, open up LTNs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes		Very negative	You are making Oxford a difficult place to live and work at the behest of the bus companies. You should be telling the bus companies what services to provide, not taking orders from them rather than from residents of Oxford. There are very few "through" buses so any journey between Oxford inner suburbs always involves a change of buses and a walk, sometimes very long, through the city centre. It is not therefore possible for Oxford residents to travel between Oxford suburbs in a reasonable amount of time. You are killing off Oxford businesses all over the city by reducing access, thus making the city a poorer place with fewer services and amenities. And if the purported aim is to reduce congestion, why are HGVs, coaches, traders' vans etc etc excluded? Why should they have better access to Oxford than everyone else?	Oxford is not congested outside rush hours so there is no reason for any scheme to last from 7am to 7pm. The Marston Ferry Road is not "mediaeval" and is obviously intended to help divert traffic away from the city centre so why now block it? Why are Oxford residents' taxes constantly spent on unnecessary traffic schemes while the council pleads poverty?	Improve the Park & Ride schemes and leave Oxford alone otherwise. Spend all the money on making the P&R schemes free, and reinstate dedicated limited stop buses eg from Oxford Parkway. Insist on all private schools running buses to P&R locations. Oxford is no more congested than other cities and you will kill it off by making it such a hostile environment for cars. Provide carrots, not sticks!
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	If this goes ahead my job will be at risk, I work in Headington and we have already seen a dramatic loss of customers since the LTN's in Cowley as peopled don't want to go around the houses to get to us.	Yes don't do them, think about the impact of businesses.	Get rid of the LTN's they have made the congestion worse

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very positive	St Clements is too frequently snarled up with traffic. We need free-flowing traffic at all times to stop buses getting delayed and improving the quality of life in the St Clements neighbourhood.	This charging system is superior to the original traffic filter scheme. It should not be temporary. The original traffic filter scheme is essentially a £35 per day charge (the penalty fare with the 50% quick payment discount) rather than a £5 per day charge. There would be useful car journeys taken at a price between £5 and £35 that still allows traffic to flow. We should take this money to fund improved buses. Introducing a reasonable charge that motorists can choose to pay is far more flexible and fits with people's lives better. The charge should be optimised to raise revenue and keeping the roads traffic-free 24/7. We are a small city, so let's use that to advantage and be agile. Experiment! - Vary the operating hours the charges are active to optimise traffic flow. e.g. We still get a lot of congestion on St Clements after 7pm on Fridays. - Try peak and off-peak charges. - Discount or suspend the charge on days like Christmas Day when traffic volumes are predicted to be low. The 100 free passes for Oxford residents are too generous and will still allow a lot of traffic to be generated. Practically it will only cause behavioural shift amongst daily commuters. If this scheme is a success, let's consider a complete congestion charging system applied to all entry points from the ring road into the city.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	I believe this scheme would have a very positive impact on my experiences travelling throughout Oxford. Particularly by bus or bicycle as it will reduce the number of cars on the road, enabling me to cycle more freely and safely with my kids and would lead to me taking the bus more if they were more reliable.	It seems to me that the *only* thing to improve congestion is for there to be fewer cars on the road. Any scheme with this intent I would be for. I do live within the proposed area so would expect that I would not have to pay for going out of oxford and back to my house but I would be willing to pay a small fee if I needed to use my car within Oxford (for example, if I was driving between two of the proposed zones)	Work with the bus companies to make bus tickets pricing much clearer and the payment experience more seamless, I find myself on buses waiting at bus stops for prolonged periods of time while new passengers debate with the driver the best ticket for their needs, this holds things up quite often. Work to reduce the price, and increase the reliability, of the park and ride schemes. Connect up some of the cycling routes that exist already and enabling low traffic routes for cyclists in Headington. Designing out complicated, confusing intersections like the one on Windmill road/London road where I'm never sure where I'm supposed to be on a bike. Providing comprehensive bike parking on the Cowley Rd and St Clements. Reducing the number of exemptions from this scheme for everyone other than the people mentioned above (carers, traders and blue badge holders). I'm not against this scheme because within the ring road I almost always cycle or get the bus (or walk), if I need to use the car its because I'm picking up or dropping off something large, and for that I'd be willing to pay a small fee
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Make buses cheaper for all		Very positive	I look forward to less traffic in central Oxford and streets leading to it	There should be fewer exemptions from the charge. Commuting should be by bus or bike, no one needs to drive into the city centre there are plenty of viable alternatives.	Parking charges around the city should be higher for larger cars. Better enforcement and reduction of free parking spaces on Cowley Road. Parkins at the Westgate seems to be a bis source of conaestion. Parkina charaes need to be hiaher
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Add new bus routes, Add public cycle parking		Very positive	It will help reduce motor traffic, which is needed.	The number of exemptions seems very large. I would be in favour of fewer permits.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	Too low	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking, Other	Build more segregated bike routes which can also be used by electric wheelchairs.	Very positive	No-one benefits from the gridlock on roads entering Oxford. Essential journeys are limited due to this gridlock. Given all the revenue would be reinvested this would be incredibly fair to those of us who can't afford (money and time) to travel by car.	There should be more camera points ideally with one on Abingdon, Iffley and Cowley Roads. I am concerned about the proposals for privileged people with central locations to get exceptions. This is the case in my wife's home-city of Verona and causes a lot of resentment. It makes more sense to make the congestion charge applicable to all then not do measures like Workplace charging etc.	The city needs more safe cycling routes with Warneford Road being the template. Many people need a high safety threshold to persuade them to cycle instead of drive. To any novice cyclist going down Cowley or Iffley road would be a nightmare. The network is very good in places but through not being joined up completely the good parts aren't be fully utilised. It's clear to most locals that the traffic frees up when the independent schools are on holiday. This is not a surprise given much of their catchment is not locally based so travel by car. There'd be a lot of benefit if these schools were able to run shuttle buses for their children from the ring road to the school. This would require a form of school-presence at the ring-road locations so that parents would feel reassured to leave their children there.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	Too low	Yes	Make buses cheaper for all, Add new bus routes, Other	More bike lanes	Positive	Good for public transport times, cycling safety, pedestrians(less fumes from cars)	There should be less exemptions	Improve public transport and cycling alternatives, especially safe cycle routes. Cowley road needs massive improvements. A multistorey car park could be introduced on the current Tesco Cowley road car park and then parking spaces on Cowley road could be reduced to a minimum, making space for safe cycle lanes and extended sidewalks. Pedestrians need better connections, e.g. by having more traffic poor connections into the city. For the Cowley/Iffley area, a bridge from Aston eyot to the Thames path or Christ church common would make walking into town much easier and people could avoid the busy main roads. Cycle routes in neighbor towns need to be improved to be competitive with car travel. One example could be a cycle highway to Wheatley and potentially bevond on the old railway /extension of shoreris trail).
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Neutral	If you are exempt from the charge of you work around the John Radcliffe then I'm neutral however if you have to pay the charge then my answer would be very negative	I don't have another option to get to work at the John Radcliffe other than driving. There is limited park and ride routes that go to the hospital and the ones that do are frequent enough. I have to drop my toddler to nursery before I start work at 8, I have to leave home at 645 to get to work. The traffic is horrendous around the hospital and penalising people driving down Marston ferry road is a really stupid idea. The traffic queues really badly off the A40 and this will further exacerbate the problem.	Improve the park and ride to the hospital. There aren't enough options for people coming from Witney to easily park and get a bus to the hospital. The buses aren't reliable either.
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't			There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	My concern is that this is an extra charge for people going about their daily business without giving people enough advance warning to adjust their lives. As a charae it has come from nowhere.	I favour deterring through traffic for visitors encouraging use of the ring road, not making life costlier for residents at short notice.	Until Botley Road opens and it is possible to trial the whole system, open the LTNs at rush hour and emergencies.
a resident of Oxfordshire living outside Oxford	daily		I don't	No impact	Negative	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Negative	This will restrict residents in Oxford to a certain number of journeys through a city they live in, this will add to the congestion on the already congested ring roads and encourage drivers to use new 'rat runs' to bypass the 'charging zones'	For many years Oxford has been called a city of bicycles but the cycle routes are clearly not consider as part of a solution, as there is no joined up plan to improve and enhance them	Improve parking at the park and ride locations, look at Tram solutions from these locations, cleaner quicker options to access Oxford city centre both for work and leisure
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Other	Improve protected cycle routes	Very positive	There are simply too many unnecessary private car journey in, and through, Oxford. Bus travel is stifled almost into uselessness. Motor traffic reduction is absolutely essential.	There are far too many exemptions, and the number of permits are *way* too high. I say this as someone who would qualify for the full 100.	Introduce traffic filters once possible, but keep the congestion charge even then. Charge more for unnecessarily large private vehicles. Have less free/cheap parking, including workplace parking. Make alternatives (cycle/bus/train) faster and more convenient.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Other	More bus routes and stops from outlying villages and towns	Very negative	This will have no impact on congestion it will simply be an economically inefficient exercise in bureaucracy. It will harm local businesses.	There is little thought for actually improving congestion. This council needs to stop treating Oxford as if it is a village. It is a city which needs people coming in to, working, spending and doing business in the city centre. The bus services are laughable.	Employ some experts in traffic flow to look at what can be done on reducing bottle necks and traffic flow. Look at the phasing of traffic lights which has some terrible black spots. Stop reducing parking spaces meaning cars and delivery vehicles are having to pull in with hazards flashing, blocking the roads and causing yet more congestion. Work WITH local schools to see if anything can be done - NOT closing down roads at peak times but perhaps allowing planning applications for parking on their sites or considering one way streets in certain areas. Stop this anti car sentiment. Put more considered thought and planning into the staging of roadworks on routes into the city - eg the constant sequential works to the areas past the mini plant cause havoc which has huge knock on effects. To traffic flow in the morning.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Registered car clubs	I don't	Neutral	Neutral	Too low	Yes	Make Park & Ride buses cheaper, Add public cycle parking		Very positive	Congestion charges are always unpopular before they are introduced but also always have a positive impact. There is no reason to believe Oxford will be any different.	I am worried that there are so many exclusions that it won't have a significant impact and so the gains for public transportation will not be realised which will make extending the scheme or replacing it with filters more difficult	The congestion and traffic filters make radial travel in Oxford more difficult. More needs to be done to address that, i.e. more bus routes. The 700/100 is a good start but it's ludicrous that it takes over an hour to go from Summertown to Templars Square. You are trvina to cover too much with a sinale bus
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	No impact	There should be no charges at all	No	Add new bus routes		Negative	I cannot see how a restriction in Hollow Way effects central Oxford traffic flow it will instead increase congestion in Temple Cowley.	In my opinion the congestion in Hollow Way is caused by the amount of traffic coming off the ring road down the Horspath Driftway. The proposed bus gate will result in even more traffic coming down this road to access Headington etc and so the proposal is counter productive.	Create more bus routes. For instance there is no direct bus service from Hollow Way to the Churchill Hospital
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	The impact of the closure of Botley Rd has been hugely impactful on local businesses and residents of the area and further afield. To now introduce a charge on the route into the city centre could, and quite possibly will, have a negative impact on Oxford city centre / businesses. I believe people will avoid Oxford centre completely if they have a choice.	I believe that if businesses pull out of the city centre, as a result of a downturn in footfall, there will be no coming back from that	Consider reopening old train lines in/around the suburbs. Investment in more efficient and cheaper public transport is key. Cycling would have to be much safer before it will become a first option for the majority
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Negative	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Reducing traffic, particularly on the Abingdon Road, will significantly improve journeys for bus and park and ride users (who currently have to sit in traffic with all the cars).		More segregated cycle lanes that link together along key cycle routes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Will have a very heavy and negative impact on Cowley and Iffley Roads which will become even further overburdened by heavy traffic as the only means for huge numbers of residents and shoppers to enter or exit the area. These streets are already over used due to the LTNs.	An enormous amount of congestion in east Oxford is actually caused by buses. They frequently get stuck on Cowley Rd due to their being insufficient space for them to pass each other in their bunched distribution.	Remove LTNs.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Add new bus routes		Very negative	increased congestion on non charging roads making road travel to the hospital impossible. It will be impossible to commute between hospital sites. There is no direct bus service from park and rides especially Redbridge to make the contemplation of using them enticing	Very bad idea if you would like to grid lock the roads	Just leave it be, cars don't have any rights and are vindicated just because we need to get to work from outside the area. Bikes have many rights and benefits afforded to them just let us get to work and home again in peace.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	Too low	Yes	Make buses cheaper for all		Very positive			
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the damn roads. Life threatening holes everywhere.	Very negative	Extra cost and hassles, driven by the inability of the Council to deliver Botley road on time. Now pushing the burden onto residents even more. Totally unacceptable. Howabout davinv me £5 a dav for the inconvenience vou caused.	Absolutely not to be consented to. More Council dreams which will end in disastrous implementation. And PUBLISH the results of the "consultation". The public no longer believes vou.	Remove the LTN's.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Other	You shouldn't be generating income this way	Very negative	I stay 3-4 days/week at my partners house off Holloway and commute around the city for work and cannot cycle due to a long term injury	Dont do it it will create grid lock in the city.	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	About right	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	It will help limit car use/traffic in the center of Oxford, allowing better public transport options		
an Oxford resident	daily	Blue badge holders, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Remove LTNs this will reduce the traffic. It is proven that there was less traffic when all roads were accessable. Or make the roads one way	Very negative	Common sense says that the current traffic will be moved elsewhere. I am talking from 40 years of living in oxford.	This is a scam from the people who dont live in the area and want to profit from hard working people.	Make the Ltn roads one way. This will reduce traffic and improve the bus service.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	I am looking forward to less congested roads and better bus services	I think the scheme has more exceptions than necessary and should charge higher fees to larger cars, but I am still supportive of it overall	Consider making some roads one-way and replacing the other lane with a fully separated cycle lane. Consider making more roads bus only.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Neutral	About right	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	I mainly cycle by myself or with young children, less traffic will make it safer		Make new bus routes that don't mean you have to take two buses changing in the town centre. For example Summertown to Headington/Barton. As soon as vou need two buses the car is a better option.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Other	Improve coverage on existing bus routes, eg there is a large gap on London Rd (east of Headington) where the 400 does not stos. Forces residents to walk into Headinaton.	Positive	I would have been more positive but I think the way this has been conjured out of nowhere is very regrettable. And it should have been done a year or two ago. Headington has been very poorly served by buses for several years now due to St Clements congestion. Often quicker to walk into town if vou are lucky enough to be fit enough to do so).		Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car			There should be no charges at all	Not sure	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	This would make commuting to London by train even more expensive. If I leave my workplace in London after 1830 the wait between buses to Farmoor/Eynsham is more than 30 minutes which makes a lona commute lonaer.	Exemptions for Blue Badges are essential. The commuter permit should be extended to rail commuters.	Tackle the cause of the problem: John Lewis and investigate solutions with John Lewis such as electric shuttles from the car park opposite, valet parkina etc.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for young people, Add public cycle parking		Negative	I live in North Hinksey close to the A34. My grandchildren attend North Hinksey Primary School which is next to the southbound A34. I am concerned about increased pollution from the Oxford ring road as many more cars will have to travel on the ring road because of the proposed congestion charge and the traffic filters once implemented. There are no proposals to monitor pollution levels in this section of the ring road despite the fact that there are frequent occasions already when the traffic is very heavy or at a standstill.	The definition of unpaid carer you are using is too narrow. It will not help informal carers providing care to someone who needs support because of a shorter term care need eg someone living on their own who has had a hip replacement. There needs to be much more flexibility in the system to support informal carers and to facilitate them giving help. It is not reasonable to expect them to have to travel miles out of their way to avoid the congestion charge as well as provide often daily support.	Reduce potholes on roads leading into central Oxford. I am nearly 70 and a cyclist and having to avoid deep potholes can mean I have to veer suddenly out into traffic. It can be hard to see how deep potholes are especially in the dusk/dark or when it is raining. This makes cycling feel increasingly unsafe.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Improve infrastructure for cyclists	Neutral	I do wonder whether we will see any difference! Too many exemptions; too many passes.	Another charge point is needed on Horspath Driftway or The Slade - see below.	Another charge point / filter on Horspath Driftway; this route already shows a high level of traffic and congestion and will be unaffected by the filter / charge point on Holloway; if anything it will make traffic worse and more dangerous for cyclists. Additional filter / charge point on Morrell Avenue. Reduce the number of exemptions / passes. More LTNs: Headinaton. Quarrv.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Positive	I get get up being stuck in traffic, while coming in on the 35 bus from Abingdon		
a resident of Oxfordshire living outside Oxford	less than weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fixing your terrible roads	Very negative	I use the train station to commute to London multiple times a month.	This is a complete farce, not only is this going to impact more businesses in Oxford who are already struggling, but it also is completely flawed. I commute at times of day where there is no congestion yet your pathetic proposal will cost me directly. If congestion is the REAL motive here, then why are you proposing on charging people who leave Oxford station at 18:30 when there is no congestion on the 6 impacted roads?!	I couldn't care less, that's why we pay you to manage the city. Stop resorting to direct impact on business and residents and get your act together
an Oxford resident	daily		I don't	No impact	Negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	It will reduce the amount of motor traffic, making cycling safer and buses more reliable.	The proposed charge of £5 is far too low – a return bus from East Oxford to town centre for one person costs more than this! – and there are too many exemptions (since all vans are baffingly exempt, this will just incentivise everybody to drive more dangerous vehicles!). If drivers get 100 free passes for a whole day of car travel in the city, will bus users also get 100 free daviider bus passes?	Reduce parking in the city centre (and actually enforce any parking restrictions ever).
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Give the money back to residents	Very negative	I travel to visit my elderly mother everyday, This will effect my journey and pocket every day	It is impossible to drive to the train station or bus station without being charged. WE have NO choice until the Botley Road is open.	Open the LTNs in Cowley and stop penalising the residents in East Oxford.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	Very negative	About right	Yes	Make Park & Ride buses cheaper, Add public cycle parking		Very positive	We all know there are far to many private cars driven in Oxford during the rush *hours* Any option to discourage their use must be a positive for everyone, many will not like it but they are the ones causing the problem.	A good (all-be it slow) start	Extend the scheme - any private car passing any park & ride in to Oxford the morning rush *hour* and then same car driving out of Oxford passing any park & ride afternoon rush *hour* then they should be charged the same daily cost of using the park and the ride that they just drove oast - so either way the park & ride aains.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		No impact	I cycle everywhere and only use my car infrequently at the weekend.	I think it is a good idea to get people out of cars and onto bikes - if people can park for cheaper at the park and ride and then get into a bus or on a bike to cycle into town that would relieve conestion.	Regular shuttle buses from the park and rides to the hospitals would massively ease congestion on the residential roads leading to the Churchill and the JR every dav.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Putting restrictive measures in place makes oxford feel obstructed and will make traffic so much worse as cars will be forced to use even less roads (reduced since LTN's put in place), causing more congestion and more pollution		Remove the LTN's that are in place around Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	I look forward to faster bus journeys. However I am concerned that thethe large number of exemptions and loopholes should make it acceptable to Oxford residents, local tradespeople, and people who need to use their cars to take care of vulnerable residents. The number of exemptions and loopholes may be greater than strictly needed and could possibly result in there beina little improvement in conaestion!		Make the buses more frequent and keep bus fares down. Have a bus service that travels around the ring road linking the different park-and-rides without the need for travel into town.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Negative	divert significant traffic to ring road which will cause air pollution for my residence		Traffic filters for private school drop offs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice. Registered car clubs	I don't	Very positive	Very positive	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	It is great to see a bold scheme by Oxfordshire County Council to reduce the awful traffic in Oxford. There are far too many unnecessary car journeys being taken, that are clogging up the roads for public transport users.		More bus routes north to south across the city centre; park and ride buses should stop at more points on Abingdon Road.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Very positive	About right	Yes	Make buses cheaper for all, Add public cycle parking		Neutral	As a resident, the cost impact will be neutral to me. I do not anticipate a significant enough reduction in traffic to impact my experience diving in Oxford.	I would hope that the scheme for resident permits is simple to use and it is easy to activate a permit and transfer a resident's permit between vehicles. I say this because as an expat with a work visa, I hire cars rather than own a car.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Occ just are grasping at straws again tax the poor so the rich can travel in freedom.	Security at park and rides are poor and I would not leave my car at any of the sites, Oxford is a duster with Botley, the LTNs and managed by Cyclox and Gant, God help us all.	Remove all illegal, scooters, E Bikes , mopeds, enforce the laws for all, no more blind eyes, for the universities to allow cycle lanes on there land,, widen towpath, sort out the terrible road layout and situation at St Clements, ban cars from Rose Place, put a barrier up, ban Magdalen College buses from Magdelin Bridge and St Clements.
other	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Other	Fix pot holes	Very negative	The council constantly look at impacting the tax payer introducing further hardships with no benefit & this is also to appease the minority of people most people who work in Oxford commute as it's to expensive to live there	It's dissapointing that regardless of the outcome of the survey the council has a track record of ignoring the outcome & implenting it anyway It's not practical for the working people	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Positive	My daughter attends school in N Oxford, we live in Abingdon. She takes the bus to/from Redbridge Park and Ride. Abingdon Rd is basically a car park - anything that can improve journey times into town for people taking sustainable travel methods should be encouraged.	It feels like there is a massive focus on East Oxford in terms of locations? Could more be done in South Oxford?	There is a lot of 'stick' about Oxford travel - the county council really needs to start thinking about the carrots too! EG free parking at P and R sites?
an Oxford resident	daily	Blue badge holders	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	You'll push traffic out of one place and put it somewhere else, it won't improve emissions, it will make traffic conditions worse in other parts of Oxford.	Scrap them, this is a knee jerk reaction to a much larger issue. charging Oxford residents to use the roads they live around won't help or fix anything, people drive, families drive, businesses drive and even with electric vehicles slowly becoming more common not everyone can afford one. I believe a better use of these funds would be to improve Oxfords road infrastructure for all road users	Investing in Oxford road infrastructure. Oxford suffers from being a small city that doesn't have the roads to meet the demands of it's citizens,
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It will cut us off and will be forced to find a job outside the city. The LTNs already cut littlemore off, now this forces me and my family to look outside Oxford. In addition I will lose a lot of staff and this will put more pressure on me as a manager and stress so I will have to leave.	Why is North Oxford not included and only the poorer areas of Oxford!	Get the Littlemore line up and running. Get the Botley Road bridge sorted as quickly as possible. Free bus travel - its obvious isn't it!
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	No charges should be levied and this no income would be available.	Very negative	I use the car almost solely to go to Church to worship, once a week and on Holy days.We on a few occasions visit a family member in St Clements.Charging us for this is morally wrong, particularly during a cost of living crisis.The alternative is rerouting which will add to fuel costs and lengthen the journeys by a huge degree.We should NOT be punished for worshipping or visiting/helping family members. The car is essential for many, particularly the elderly and infirm.The council should not have the authority to make such decisions that effect the welfare. wellbeing and mental health of residents.	Kennington is in the OX1 area and thus is part of Oxford.If this goes through Kennington residents should receive the same allocation as other Oxford areas.It is shameful that we will receive the same no as Wallingford and Thame for example when we are only 2 miles from Oxford.Wolvercote is nearly twice as far but will receive the maximum allocation.This conculation will without doubt ratify the plans despite huge opposition as there is with the proposed six barriers.When this is done, Kennington should at least be given the max allowance of permits as all other Oxford areas.	Scrap the LTN's which have created many of the traffic congestion problems.All they do is move traffic to boundary roads, which we know is a fact. Stop working for cycling lobby groups who put their extreme ideology up against the interests and welfare of the vast majority of Oxford residents.
a member of the public living outside Oxfordshire	weekly		I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive	As a park and ride user, it will make my bus journey times faster.		Further incentivise use of park & ride
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Registered car clubs	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Very negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I live in Summertown, have three kids, and no car. The pollution and congestion from other people's vehicles has a negative impact on my kids and my family. There are good bus routes which could be used by people coming through this busy part of town, and this will encourage the cyclists to pay	I think it is an excellent idea.	
a resident of Oxfordshire living outside Oxford	weekly	Business cars used as goods vehicles	I don't	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride buses cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	We already pay out to much in Taxes!	It's a very bad idea just like the LTN!!!	Open up the LTN's they don't work and kill trade!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Living cost is high and it will effect resistance who are already struggling. Make one way the streets instead of any charge	Yes, take bollards off and make them only residents to pass by on these Roads like other Councils	Make one way system like other Councils in Thames Valley areas . Stop lorries to use local areas, only deliveries or emergency services should use residential Streets
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	Too low	Yes	Add public cycle parking		Very positive	Oxford needs to get rid of private cars as much as possible from the city centre. Less cars equals a better city. This will make buses run faster and be more quite and less polluting solution than the current car-infested centre.	my only concern is that with less cars on the roads, the remaining ones will speed up - i.e. there need to be more speed cameras in order to slow down the traffic	make cycle paths wider, bright colour, special cycle-only signs and traffic lights, etc. Make driving as hard as possible. I would cancel the right turn from the Magdalen college towards the University main campus - i.e. only bicycles could go. Cars could go through Marston ferry road / North only. Also I would add some bus gates / cyclelane to Littlemore where I live
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Negative financial impact		Free park and ride
an Oxford resident	daily		I don't	Very positive	No impact	About right	Yes	Make Park & Ride buses cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive			
a resident of Oxfordshire living outside Oxford	daily	School students with special educational needs	I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Get eynsham park and ride open and working. Commuting into Oxford from the west is awful with very few public transport options	Negative	I think while we, as workers in the city may be eligible for a pass and less affected it will be incredible limiting to anyone commuting into Oxford from the west, driving up their costs and with no viable public transport alternative for many including the elderly, vulnerable or SEN children. The negative impact on business is also likely to be a result of less people coming in, causing pressure on jobs etc.		Improve public transport. Open eynsham park and ride to encourage other options. Accelerate botley road
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The most obvious thing is that we wouldn't be able to drive to the Westgate car park without paying. This would preclude us being able to take my partner's immobile mother who lives in Abingdon into Oxford without paying an extra £5 on top of parking charges. So basically infirm people are being penalised if they can't public transport (which she can't). And no, she's not eligible for a disabled parking permit. Another obvious problem is not being able to pick up friends/relatives from the railway station without paying. If they've got lots of luggage a bus is not possible.	The proposal should be amended to make EVs exempt from being charged. Pushing drivers onto the ring road is ridiculous. It's an Oxford bypass. A bypass. So people trying to pass by Oxford will get caught up in even worse congestion than they already do. Not only that, but drivers being forced to go out to the ring road and round rather than through parts of Oxford will produce much more pollution. I'm very much against the churning out of yet more pollution into the air. Not particularly nice for cyclists who use the ring road either. Charges should only be administered during rush hour. There's no need to charge people when there's little congestion (eg mid morning), unless of course it's just a money grabbing scheme! So altogether it's a poor solution.	First of all do a survey to find out where car drivers are going to and coming from. Without that information I don't think it's possible to find reasonable solutions that will help these drivers. Make bus prices much lower. And stop making it cheaper to get the bus for visitors (using the P&R) than for residents (not using the P&R). It would be cheaper for us to drive out to a P&R and get the bus into town than to get the bus from near our house - totally ridiculous!!! Stop building more and more houses, thereby increasing the number of cars!!!! Free shuttle buses going VERY regularly (every 10 minutes) for hospital staff. More police patrolling the town centre to watch out for bike thiefs. Likely theft of my bike is the reason I don't cycle to town, or anywhere else for that matter where I'm going to leave my bike for a long period. Get investment and build a tram system. There you go, lots of things that could all contribute to reduce pollution.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Add public cycle parking		Very positive	I fully support more methods of encouraging less people to drive into Oxford. The proposals do not go far enough however. Worcester Street car park is within the central Oxford permit zone; this should be closed and converted into Worcester Street riverside park. Having a large car park in this location is antithetical to the aim of the conestion charge.	The filters should be at additional locations, including Iffley Road and Cowley Road at the approach to The Plain, and Woodstock Road and Banbury Road on approach to St. Giles. Otherwise, they will simply get people trying to deliberately drive around them.	More dedicated cycle lanes separated from traffic, and a light-rail system in the long term.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Negative	Neutral	There should be no charges at all	No	Make bus services more frequent		Very negative	This will cause hardship for poorer people around oxford. People use these roads to get to the ice rink , westgate, and jr hospital. Oxford parkino is a joke with the cost now.£5 more for westaate totally not right.	Marston ferry road should never be blocked by this hairbrained scheme	Open the LTNs which the majority didn't want but was bulldozed through against all the objections and no notice was taken
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	The proposed system isn't what people want.	Withdraw the proposal.	Make larger vehicles pay more.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for young people, Add new bus routes		Negative	This will impose a lot of distress on the elderly as presumably these permits will be online , not everyone can do this.	These locations have been selected to make the most money for the OCC with no respect for all those stuck in the traffic iams they will cause. it's immoral.	Open up some of the Lit's so that people like me don't have to travel through St.Clements or Holloway to get to Cowley.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Add new bus routes		Negative	We will no longer be able to access either the train or the bus station for travel and we would have to consider going shopping elsewhere (Reading for instance) which is a real shame as the new Westgate Shopping Centre is brilliant and one of the few things worth negotiating the one way system for. Parking at the Westgate is still reasonable, unlike other Oxford car parks but adding an additional £5.00 to that would make places like Reading a far more attractive option (The Oracle Centre has cheaper parking anyway).	I just think it will be detrimental as it will deter tourists and shoppers alike - I don't know why Oxford councils dislikes drivers so much -it's a real shame but I think it will be the final nail in the coffin.	Stop buses going up Queen Street - it's supposed to be pedestrianised afterall, but, otherwise, implementing a 'congestion' charge will be a sure fire way to not only reduce traffic but probably stop it altogether.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	It is a worst plan to going to happen in Oxford. The main reason is congestion charge will not improve the travelling congestion. Residents who drives into city , or using park & ride and travel on bus into city. cycling or by walk. Those are the options that people can choose to enter city center. I can't found any reason why we have to suffering for paying congestion charge to enter city for all Oxfordshire residents. It is bad plan ever so far. Big issues based on Botley road and railway upgrade plan do not finished on time and delay until 2026 which causes everyone are suffering. This is very bad indeed! I think if this congestion charge happen to all traveller outside of oxford not the residents in Oxford. It might be an option to help and to improve traffic around Oxford. Please take more time to discuss with residents .	It is a worst plan to going to happen in Oxford. The main reason is congestion charge will not improve the travelling congestion. Residents who drives into city , or using park & ride and travel on bus into city. cycling or by walk. Those are the options that people can choose to enter city center. I can't found any reason why we have to suffering for paying congestion charge to enter city for all Oxfordshire residents. It is bad plan ever so far. Please take more time to discuss with residents .	"You might take into account: - congestion fee for outsider (travellers) - bus fee discount - park & ride discount - more buses operation during weekdays - more buses routes - work closer with railway & bus companies - Pay more attention on the Botley road & oxford railway working timeline - more meeting with railway and Botley road work to making sure everything is on schedule
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	Oxford needs a traffic system not a car ban. The last 30 years of "improvements" are nothing short of disgraceful.		More parking at places like the Radcliffe. Proper cycle lanes, off the roads to prevent cyclists and motor vehicles using the same carriageways, funded by cyclists. OPEN THE BOTLEY ROAD even if it means closing the railway station, which could be reclaced by extending Parkway.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	Introducing the congestion charge will reduce traffic and encourage people to cycle, walk and take the bus. It will encourage me to walk and cycle because the roads will be less grim. I think there are too many exceptions though! The congestion charge isn't enough of a deterrent because few people will actually pay it!	There are far too many exceptions. Please tighten up exceptions and make more people eligible to pay the congestion charges. It won't work unless people are likely to pay it. At the moment there are too many people that are exempt. Consider reducing the number of passes or increasing the charge, especially for large cars. At the moment pick-up trucks are exempt as vans are. This is not right!	'- Improve the timing of pedestrian crossings of roads. At the moment request buttons can result in LONG waits to cross. e.g. Abingdon Road near Chatham, Donnington Bridge Road/Iffley Road, at the entrance of Westgate, across Donnington Bridge Road near Townsend Square. It takes far too long for the lights to turn red to cars when the button is pressed, which means you are prioritising cars over pedestrians. - Pavements are too bumpy and uneven, particularly for prams, wheelchairs and old people. Introduce Dutch kerbs. - Far too many cars on pavements. Ban pavement parking! I have to walk in the road in East Oxford because there is no room to walk on the pavement! It's wrong. - Improve ticketing of bad parking, particularly along Iffley Road and Cowley Road. - Please add more congestion charge locations. e.g. at the top of Iffley Road, Cowley Road, Donnington Bridge Road, Abingdon Road, Botley Road, Woodstock Road, Banbury Road. At the moment the six locations aren't sufficient to reduce driving. - Encourage people to use car-sharing like co-wheels (these should be excluded from the charge). - Ensure buses run logical routes. e.g. the 3/3A should run all the way to the train station. - Widen the Thames Path south of Folly Bridge so that more people can cycle and walk in from south Oxford, Iffley, Cowley, Littlemore and Rose Hill. At the moment it's too narrow for the number of people who want to use it. - Add a one-way system so that there is room for walking and cycling. Pavements are too narrow along High St, Iffley Road, Cowley Road, St Clements, etc. - Widen pavements and cycle lanes, and narrow roads. Particularly along High St, Iffley Road, Cowley Road, St Clements, etc.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Other	I drive because I have a chronic condition that makes cycling/walking to work impossible & fatigue makes bus undoable too. I don't claim benefits but fight to work - adding £5 a day to get to work will make this impossible. Remove LTNs problems solved!	Very negative	Don't charge local residents like me to fix what you created (congestion) with LTNs! You cannot take away free road access to my home! I love off holloway so should be allowed to drive it freely! (I won't use any other road as don't need to - just want to get from home off holloway to work nothing else!	The holloway filter is at the wrong end - you will force all traffic down the wrong/more difficult to pass part of road. So you will charge people for nothing - it won't improve bus times!	Remove to LTNs that created the problem on Holloway in first place. Take parking away on cowley end of holloway (or at enforce restrictions that are already there, which you don't) as his would allow better traffic flow. Stop hating drivers and put east Oxford back to how it used to be. YOU CAUSED THE PROBLEM YOU FIX IT AND LEAVE US ALONE YOU ARE CAUSING SO MUCH DAMAGE TO RESIDENTS

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I am strongly against the congestion charge scheme. It was not discussed during the election period & is being imposed on the Oxford & Oxfordshire residents. The fundamental problem is not being addressed but is only being replaced with an easy additional tax on the Oxfordshire residents. The deployment of the LTNs has only made the traffic in Oxford worst than before by engorging specific routes. The bus & other alternatives are way too expensive to justify taking them as soon as you are a party of more than 1 person.	This proposal should be scrapped if it is not supported by making the alternative significantly cheaper & therefore more cost effective. For example, a "free" family pass to go to Oxford & back 25 times a year rather than a permit to use the car.	Scrap the LTNs, reopen Botley road. This will ease the traffic currently focused on certain routes. Lift the 20mph assist limit on the e-Bikes (raise it to 32km/h) & ds significant maintenance on the cycle lanes (shared with pavement for example). Provide "family" passes that make going to Oxford by bus more economically viable as soon as you are more than 1.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Add public cycle parking		Very positive	I think this will help reduce congestion on our roads and will be a positive thing for this city to implement		One way systems on major roads with one lane of the road for traffic and the other as a 2-way cycleway
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Unpaid carers, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	I work at the JR no one wants to take jobs there as getting to work is terrible. Equally terrible on public transport this will NOT be fixed by this scheme. Buses do not tally with staff rotas - this is an awful idea. Transport will still be affected one off of these roads - it will be worse! No desianated bus lanes - oooh! thought out again x	Poorly thought out / bad idea. Staff made to feel awful for driving your work x	Stop messing around / unblock LTN's
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make bus services more frequent		Very negative	Will cost me money!	Simply I frankly don't believe they will be temporary in the slightest. They will become permanent by stealth.	No.
an Oxford resident	daily	School students with special educational needs, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure			Very negative	Our 10 year old son is a an adopted SEND child and we have to rely on using our car to get him to a wide range of things. This includes school, alternative provision to his mainstream school, therapy sessions and extra curricular activities. Cycling to the vast majority of these is simply not an option, due to his cognitive and behavioural instability (He was diagnosed earlier this year with Foetal Alcohol Spectrum Disorder and ADHD) My mother in law lives in OX3 and is disabled with rheumatoid arthritis, complications with diabetes and is in poor health. She cannot access public transport and relies upon on us to take her to numerous medical appointments and help with her shopping. We live in the OX3 area and the existing LTN's are already causing serious issues, with local traffic much worse than before the LTNs were implemented. Adding a congestion charge, one that was not tabled before the recent elections in May, is simply one step too far. We both work in the public sector and struggle to make ends meet as it is. Adding a proposed congestion onto households who are already coping with the cost of living is simply unfair. It feels cruel, mendacious and will have far reaching consequences on families like us if implemented.	Take this to a public vote	
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people		Positive	Oxford cannot cope with the current number of cars passing through the city, so action is required to reduce both congestion and pollution. Traffic congestion must also be reduced to allow buses to travel to schedule. It is however essential that any charging measures are offset by improved and cheaper public transport.	Charges for electric vehicles should be cheaper and charges for petrol/diesel SUVs should be higher.	Better provision for cyclists, with more cycle lanes.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I'm currently a car owner and walk or cycle into the city centre, and take buses to other parts of the city. Improving the flow of buses is essential and should be encouraged by any revenue from a congestion charge, reduced parking & ride bus fares etc. is this guaranteed?	No	Ni
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	The roads are already a mess. You can't get in and out of Oxford without huge delays due to the Botley road closure. This level of traffic won't change after introducing a congestion charge, it will just make already frustrated commuters and residents even more frustrated and out of pocket. Focus your time and energy on speeding up sorting out the botley closure!		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all		Very negative	I work at the JR Hospital and the the proposed change will add at least 30 minutes each way to my daily commute. You will lose hosotial staff of this prooosal does throuah.		Until the take up of electric cars is greater you could extend the ZEZ which would improve air quality by reducing Petra's/diesel cars in the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	About right	Not sure	Make Park & Ride parking cheaper, Add new bus routes, Extend hours of operation for buses		Very positive	Traffic in central Oxford is a serious problem This proposal should reduce through traffic helping buses run to time.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	About right	Yes	Make bus services more frequent		Positive	There is currently too much car traffic in the city.		Build better and safer infrastructure for cyclists.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all		Other	Should build facilities outside the busiest area so that diversify the traffic and resident	Very negative	You are discriminating the residents who live here	You should build facilities outside the boisterous areas to that diversifying traffic and residents	You should build facilities outside the busier areas so that diversifying traffic and residents
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	You are cutting off the ability to use these roads and forcing more traffic on to already congested routes. This will make our traffic problems worse not better. You've allowed multi-storey car parks and developments on old road campus and we literally have to queue for 30 mins sometimes to get out of our estate	Yes, move the border to the ring road and exempt all residents living inside. Increase the park and ride spaces and reduce the cost	See answer above
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Living in Oxford is expensive. The congestion charge adds another burden to households that aren't wealthy to just exist in the place they want to live. In addition, bus routes are poorly serviced and the congestion charge will not solve the congestion, as wealthy households that exist in Oxfordshire will pay it without issue, when considering the amount of travellers that come to the city everyday via tourism and shopping. Meaning those who truly are penalised are those that live in the city.	The congestion charges are being suggested because of the Botley Road works. Why isn't the city approach those responsible for the delays to front costs to relieve congestion?	For a city that's prides its self on being a cycling city. The cycling infrastructure is extremely poor outside of central Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Add public cycle parking		Very negative	Though I applaud the initiative in general. I can't support it while the Botley road is still closed. This can't be done while the main western arterial road is closed.	Please allow the roadworks at the rail station to end before any trial is done.	Look at the LTN area is east Oxford. Some should be removed.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, School students with special educational needs, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	You are further restricting travel in and around oxford & will possibly prevent people with less income from travelling to work/education or medical care	It would be a better impact on congestion if LTNS were removed/reopened as these are what has led to traffic congestion more than the botley rd closing.	Re Open the LTNS this is the cause of congestion in Oxford & is having low impact on pollution levels as traffic is now often at a standstill & travellers have to travel further for longer.
a resident of Oxfordshire living outside Oxford	daily		I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very positive	We are at the stage where there are no other sensible suggestions or ideas to reduce congestion in Oxford. It's reached staggering levels and is unsustainable. Inefficient use of road space comes at a cost, and that cost is currently borne by everyone which is unfair.		Reduce or remove parking charges at park and ride sites. At present, for someone visiting the city for an evening, it is cheaper to park using commercial (e.g. Westgate) car parks in central Oxford.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No			Very negative		I do wnot for a second believe this is necessary nor do I believe it will end as stated. I strongly believe that if this scheme is allowed to commence it will never end and instead will expand further. No traffic schemes should be allowed in Oxford before the debacle that is Oxford station / botley road has been resolved (ie the road is back up and fully open).	
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	It's just another money making scheme!		
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	As old people living in a rural area without public transport to Oxford, we have not visited the centre of Oxford since 2019. Mandatory visits to hospitals etc are a nightmare, taking long hours with a car, and impossible by public transport. Much of the traffic could be removed by adequate provision of buses from rural areas into central Oxford, instead of over-generous bus services inside the city, many of which, often empty, simply serve to worsen congestion.	These proposals will kill commerce and business and much tourism in Central Oxford, reduce income from business rates and lead to financial black holes for the City.	Cheaper park and ride buses and parking. True visionary thinking about tramways and river transport.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	People are already struggling with cost of living. It is going to put extra expenditure on struggling family. Make Streets one Way system and no barriers to visit residents	I struggle to get to my several medical appointments to various hospitals. Even buses are taking ages to get to destinations like local hospitals and health centre.	One way systems where you don't idle the car in long Ques.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	About right	No	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	If the charges are introduced, I will no longer be able to take my children (nor myself) to the Ice skating rink. We all have family lessons and this clearly has health benefits. Lessons start at 0830 on a Sunday morning but no buses operate from the Redbridge Park and ride at this time, leaving us no option other than to drive. As it is, I have to pay at least £9.30 once in town to park for the time of our morning session. We live in Garsington and no buses run from our village to the city centre at this time either. We would instead stop ice skating which would be a shame for my daughter's career but I cannot commit to spending at least another £20 per month on just getting her there. We would cycle but the road from Garsington to the city centre is too treacherous to take a child on. I also often have my younger children with me. This further makes the ice rink inaccessible for any other practice sessions we may choose to enjoy. This completely contravenes the council's policies to encourage health and Wellbeing	We would stop visiting the city centre completely and instead choose alternative places top go.	Better services from park and ride. Speak to the ice rink and match their schedules. Better bus services to villages, especially earlier in morning and late at night. OX44 villages could just go to Temple Cowley and transfer to a city bus from there (reducing the number of buses needed to go to town). Better connection between Garsington and Wheatley. Residents could then utilise the better bus services from Wheatley. Cycle route from Garsington to Cowley. I love the bus gates but need these to only be at peak times. If we share lifts with friends it is to reduce congestion etc. We drive where there is no other option when taking children to clubs. We have to travel MUCH further now to drop friend's children back home late at night.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Neutral	There should be no charges at all	No	Other	Make roads car worthy. Fill all potholes properly	Very negative	I book after my mother in one of these areas. I have enough problems getting to her with all the LTNs you have introduced. This is another way of segregating this side of Oxford from certain areas that are a little bit more up market.	You want the east side of Oxford to use the by-pass and A34 to get anywhere. How absolutely disgraceful this is. Try looking around these areas and see the volume of traffic on them now, before you implement this ridiculous plan. North of Oxford won't be having much problem as us mere mortals won't be able to go to your side of Oxford. You may as well put a class divide wall us like the Cultesilver wall 🤬	Get rid of the LTNs and the traffic congestion on Iffley, Church Cowley, Between Towns, Oxford and Cowley Roads will disappear.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative	Businesses are already struggling. This diabolical closure of Botley Road is unforgivable. The cost of parking at the Westgate is already expensive, an extra £5 will encourage people to go to Cheltenham or Swindon. The public transport system is not good enough to start punishing drivers.		Get rid of all the unneeded sets of traffic lights, fix / re-open Botley Road?
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	When I travel to Oxford in the evening I use the Multi Storey at Westgate. Why if you don't want Cars in the Centre of Oxford did the council build this facility.	See answer to Q11	If you don't want cars/other vechicles in the Centre of Oxford you need more and Cheaper Park & Ride Facilities.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Other	Shouldn't be used for anything as there should be no charge	Very negative	beleve this proposal will have a very negative impact on me personally, as someone who commutes into Oxford for work by car. I do so because it is the most practical and reliable option for my circumstances. The introduction of temporary congestion charge locations would create additional financial pressure, especially during a time when the cost of living is already high. It feels like I'm being penalised simply for travelling to work. Public transport is not a viable alternative for me. Services from my area are either infrequent, unreliable, or would add a significant amount of time and inconvenience to my daily commute. I'm also concerned that the scheme will just displace traffic to other routes, making my journey even longer and causing further delays and congestion in other parts of the city. This feels like a short-term measure without addressing the bigger transport issues Oxford faces. Overall, this proposal creates barriers for ordinary working people who rely on their vehicles through no fault of their own.	Yes – I'd like to add that introducing these temporary congestion charge locations feels like a rushed and piecemeal approach to a much larger issue. Without significant improvements to public transport, park and ride services, and road infrastructure, this will simply punish drivers rather than solve congestion or pollution problems in any meaningful way. Temporary schemes like this also create uncertainty and confusion, especially for those who rely on consistent routes for commuting. I'm concerned about the lack of clear communication around how these locations have been chosen, how long they'll last, and whether this is a stepping stone to permanent charges without proper consultation. Ultimately, it feels like working people are being asked to shoulder the burden of change without being given realistic options. I'm not opposed to improving traffic and air quality in Oxford – but I believe it needs to be done in a way that's fair, transparent, and supported by infrastructure that actually works for everyone.	Yes – traffic in Oxford is noticeably lighter outside of term time, which suggests that school traffic, particularly from private schools, is a major contributor to congestion. This should be looked at before penalising regular commuters.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I am a teacher, and this would severely lessen the likelihood of others joining the current workplace as the traffic filter sits on the main road.	Please could teachers be exempt?	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	IT WILL EFFECT DIRECTLY TO US, WHO DRIVE FROM NORTH ABINGDON TO JR HOSPITAL, DRIVING THROUGH St Clement's Street, MOST OF THE DAY, AS YOU KNOW EASTERN BY PASS TOADUA#142, IS ALWAYS HAVE TRAFFIC BLOCK, ONCE IT IS PLACED, IT WILL BE DIFFICULT, AS WE HAVE ONLY A DIESEL CAR TO TRAVEL.	PLEASE EXCLUDE St Clement's Street, Marston Ferry Road AND, Hollow Way.	NA
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't	Positive	Positive	Too high	Yes	Make buses cheaper for all		Neutral	I do not commute, but visit clients, and I avoid crossing the city in a car. I use an E-bike now in my business	We should not waste time and resources on a congestion charge, but move on and implement the bus filtering experiment as soon as possible.	Implement the bus filtering project as soon as possible, and implement the Woodstock road full program to zigzag the road so buses have proper bus stops that do not interfere with traffic flow.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Registered car clubs	I don't	Negative	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I think it is a good idea, but it does not go far enough. The charge is too low. To act as a deterrent to driving into the city, it needs to cost more than the alternative modes of transport (for example, a return bus ticket is likely to be £6 per person, so the convenience of driving is still there). It also has too many exemptions.		A much bigger and more permanent congestion charge area!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	This will greatly impact my life in a negative way and cause me financial hardship in an cost of living crisis and causing the traffic on the ring roads to be even worst	I would cycle more but I have had multiple bikes stolen from my house and it has put me off locking up my bike.	Significantly reduce the price of the bus and park and ride parking. In Brisbane, Australia, they reduced the price to 50cent per trip and I started using the bus and public transport all the time. Also stop cycle theft as I do not want to cycle into town and risk my exsensive bike being stolen.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	All this will do is push huge congestion and pollution out of Oxford and onto the ring road,split Oxford into separate ghettoes,no provision for the self employed plumbers etc and they'll refuse to service boilers in the congestion area.The same no go zone for delivery drivers, builders, electricians, builders etc.The centre of Oxford will deteriorate and become more grotty as residents will go off to the retail parks around Bicester to shop and we will get more boarded up shops and restaurants. Less business rates will be collected and council tax will rise. I travel all the time by bus to the centre of Oxford and sorry but I see no congestion. The bus companies have a vested interest as a congestion charge means more fares for them. The whole scheme is a complete waste of money and very unwelcome in a time of financial hardship for residents. Nobody in their right mind would create through traffic by driving through Oxford. Please stop destroying our city	Marston Ferry Road will just create a ghetto and is unnecessary.	All you are doing is killing the centre of Oxford and creating huge problems around the city on the ring road with this idiotic congestion charge scheme. The solution is to shelve the scheme and listen to the residents.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice. Frequent hospital patients	I don't	No impact	No impact	There should be no charges at all	Not sure	Make bus services more frequent		Very negative	I live in Garsington just outside Oxford with a poor bus service I use one of the proposed charge area's a lot	Outrageous for people who live in the nearby villages whose needs are never taken into account	Better bus services and cycling routes out to the surrounding villages as it is very dangerous to cycle on roads without a footpath or cycle track
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Emergency service vehicles, Firefighters	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	Limiting access/more stress for everyone travelling in oxford. fully reliant on busses and cycling. But cycling is only available for those who are fit enough and able enough	Making busses free would pull more people to busses rather then cars especially residents of oxford and would not need to 'punish' any other types of transport	As stated above with free bus travel as it then makes cars more exspesive without punishing drivers
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Negative	Parking in Oxford is already too expensive and now you propose a 'congestion' charge (regardless of whether there's congestion or not) on top. I will frequent more car-friendly towns such as Swindon or Newbury.	Another hair-brained scheme from the Council	
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Positive	We know that we have too much traffic and in particular that it affects public transport viability and reliability. You cannot physically get unlimited amounts of traffic through a single point like the Plain. We need to curb volumes.	I think I prefer the idea to the bus gates. It may also allow you to tweak some of the more contentious LTNs if the routes people previously tried to skip through to do not go anywhere!	Density. We must have a way, like land value tax instead of council tax, of economically incentivising higher density urban form the closer we get to the city or urban centres. Most of our cities are unsustainably land wasting. We need to change that.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Other	remove the idea of bus gates and us the money for pot hole repair.	Negative	regardless of this charge the plan remains to setup bus gates and charge local people to use roads for the benefit of the environment. For my self when I can no longer use Marston Ferry road my additional journey will be an extra 5 miles each way and an extra 20 minutes on average. A relief road I might add that was made for the benefit of local users.	as above	

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	less than weekly		I commute to the central permit area by car	Negative	Neutral	There should be no charges at all	No			Negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very positive	I am a resident living in Grandpont. The congestion on the Abingdon Road is often horrendous, driven largely by visitors to the Westgate, and steps need to be taken to take cars off the road in order to allow better bus travel from the park and ride.	This is a welcome proposal given the lack of options the council has while Botley Road remains closed. I would like to see more justification for the relatively high number of permits being allocated to Oxfordshire residents as the currently proposed 25 permits would in practice enable anyone in Oxford to drive into the city centre on almost half of all weekends in the year (for example). Given traffic on the Abingdon Road is often at its worst on weekends (driven by Westgate visitors) this seems short sighted and risks undermining the effectiveness of the scheme.	Where I live (Grandpont) the main issue is Abingdon Road traffic, a very significant proportion of which is people travelling to park in the Westgate. I appreciate options may be limited but serious consideration must be given to a significant reduction in parking availability at the Westgate. There will always be a need for some disabled parking etc at the Westgate but for able bodied visitors there should be a default that the park and ride is used. It is clear every weekend that many drivers simply ignore notifications and signage saying the Westgate car park is full and choose to sit and crawl up the Abingdon Road rather than take the park and ride - unfortunately for his (significant minority) the only answer is likely to be to stop them being able to park in the Westgate altogether.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	I travel across Oxford most days but as I live just outside the Oxford city boundary I would only be eligible for small number of permits. This would make life very expensive or makes my journeys much more time consuming.	They should not go ahead	
an Oxford resident	daily	Driving instructors	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	It will cause a absolute chaos in terms of getting any where or the amount of traffic on top of the observed LTN	They should not happen why try fixing something that's not broke try fixing the fact private schools are the reasons	Take away the LTN and then just allow traffic to flow as it needs it hasn't been a issue before why try fix it now
a representative of a group or organisation	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Neutral	Neutral	About right	Not sure	Make buses cheaper for all, Make buses cheaper for young people, Other	I think some of the funds generated from the congestion charge should be allocated for Oxford's Hackney carriage trade. To help the trade on their transitional path to change to electric cabs.	Very positive	As Oxford city licensed hackney carriage drivers, we think that the traffic filters will have a positive impact on the reduction of the level of traffic we see daily.		To aim to reduce the level of traffic in Oxford, public transport needs to be accessible. As a representative of the Hackney carriage trade, it will be very beneficial if the authorities were to promote our trade just like they are doing for the buses and making people aware that we are also a viable solution to their transport needs.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Registered car clubs	I don't	No impact	No impact	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive	I cannot use buses around the city as the traffic is too heavy and congestion to severe, this limits my ability to travel about the city.	I'm very pleased that this is being considered. Public transport needs to be more convenient than it currently is if people are to give up their cars. Short journeys by bus in the city are too expensive to encourage people to swap and are held up by traffic too frequently.	Make the P&R buses free if you have parked.
a resident of Oxfordshire living outside Oxford	daily	Driving instructors	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Road surfaces and road markings	Very negative	Increase traffic on other roads which will cause more congestion and hold ups	Marston ferry rd has a massive cycle lane next to the rd.	1) all Oxford tube and airport buses to stop at park n ride not centre city 2) LTNs roads change to 1 way streets 3) ntra staff free bus travel 4) red routes 5) camera bus lanes, bus stops, to stop cars parking in them. 6) sort out the bmw road to stop the cut through. 7) tourist buses to drop at the ice rink not city centre. I am more than happy to sed down in person to talk about these
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It will direct cars through only a few roads, therefore increasing congestion, making this area a less pleasurable area for residents. Cars will be idling for longer therefore increasing pollution. In an already expensive city this makes it less accessible and therefore reducing the diversity of Oxford. There are not enough adequate bus services to implement this. More accessible public transport needs to be available first. It currently takes me less time to cycle the 20 miles to work in Oxford then it does to take public transport which takes 30 minutes longer		Make it easier for children to get to schools e.g. school buses and school bus incentives so parents do not have to do the school run as well as commuting. Make buses more accessible and run more frequently. Ensure that if you park at the Park and Ride ensure that you can get everywhere within Oxford, not just the city centre.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Positive	About right	Yes	Make Park & Ride buses cheaper, Add public cycle parking, Other	Improve cycling infrastructure (paths, segregated areas)	Very positive	I am a cycle commuter; reducing the amount of traffic and pollution will make my commute safer, healthier and more pleasant. It will also encourage those who are worried about cycling in Oxford to be more confident as it will be less congested.	This is extremely important, and I want to encourage the Council to not be put off by reactionary responses by those who have not fully understood the scheme or those from outside Oxfordshire who seek to make this political.	Keep on improving cycling infrastructure along with public transportation options
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No			Very negative	This proposal will kill so many businesses within central Oxford.	Utter madness.	If you have to generate income by penalising motorists then look at one car, one occupant charging.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too high	Yes	Make Park & Ride buses cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative			
a parish, town, district or county councillor	weekly		I don't	Neutral	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for voung people. Add new bus routes		Negative			
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	This will stop us coming in to Oxford from Abingdon.		Fix the bridge, remove the LTNs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	Not sure	Add new bus routes		Neutral	The temporary £5 daily charge seems a sensible interim measure. In fact, it seems like a more sensible scheme overall compared to the planned traffic filters with their excessive penalty fees. I hope it will be used to expand bus service for residents in the Walton Manor area, who are currently very poorly served by buses into the city centre (at 1 mile to our nearest bus, we are among the worst off of city residents in terms of bus service).	The exemption for commuters seems counterproductive. Surely someone driving into the centre of Oxford, which is very well-served from every corner by park and ride buses, is contributing far more to the overall congestion of the city than someone who takes an occasional trip in. I strongly oppose that particular exemption.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	About right	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	The congestion currently is ridiculous. Taking the bus takes hours and is very discouraging. We need a way to get less cars on the road in Oxford and the LTNs alone are not doing it. We need more action and this charge will be a step forward.	I would be happy to pay the charge despite living in the permit zone. It would encourage me to use my car less.	More bike racks in the city centre would be very helpful
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Other	Extend roads where possible. Improve poor dangerous road markings. This is where the council should prioritise on.	Very negative	What happens to people like us commuting a few times a week to train station and park at the station? It is unjustifiable that anyone travel to a train station — which is public transport—needs to pay the congestion charge. This is absolutely unacceptable. There should not be any charge point or filter near the essential routes to the train station, in particular now Botley Road is closed.	As mentioned above, it is impossible to justify for charging people trying to access train stations (public transport). There should not be any charge point or filter on the essential routes going to the train station, in particular when Botley Road is closed. If the council want people to be open to more charges and less travel, they should at least do the basic improvements (as mentioned in the next section) first and see how it goes. I am not sure why it takes several years to repaint the roads? I am afraid I have to question the professionalism of Oxford council in terms of traffic planning. The incompetence of your work such as the Botley Road failure, the ridiculous ideas of the traffic filters, the poor road conditions, and now this congestion charge proposal are appalling.	The congestion in Oxford is due to narrow streets indeed, but road markings and possible extensions — even a small one such as to cut some wide pedestrian pathway to make separate bike lanes— are those would have positive impact without asking people to pay more and reduce travels. Some congestions were due to narrow opening or exits before and after split lanes. These can easily be addressed with cheap road work. It is questionable that the council keeps focusing on things not suitable for already packed traffic in Oxford whereas ignoring basic and cheap improvements — The road conditions and markings in Oxford are of the worst. The cyclists should be protected via separate lanes instead of encouraging without protection. If separate lanes are impossible, then the council should instead focusing on bus frequency.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Other	Move all essential services (NHS) out of "mighty" Oxford and then we'd never have to visit the centre again. A city only for tourists and students. That'll keep shops open.	Very negative	Oxford county council need to try driving anywhere out of oxford to appreciate just how little funding roads get. The worst county roads in the country.	Do you have to pay if you are on horse back! circa 1645?	Fund roads and not bus/cycle lanes.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	Yes	Make buses cheaper for young people, Add new bus routes, Other	New car parks and easier access for cars.	Very negative	I am 68, in poor health, and help my autistic daughter get to places by car. She is not entitled to a disabled car badge and neither am I. We don't quite meet the criteria for them, but still depend on my car to have any kind of life.	Where I live in Littlemore, I am really cut off now. I had very much looked forward to using my bus pass, but haven't been able to since the 5A changed routes and I am now left dependent on my car as I have limited mobility and now can't reach a bus stop. I am convinced that this county does not want people like me and my daughter to live in this city, but where are we supposed to go?	Remove the LTNs, build more car parks in the city centre. Have some dedicated bus routes, but make the alternate routes obvious. Free park and ride buses. Fix the roads so that buses don't have to refuse to drive down them. Eg Herschel Crescent. More smaller shopper buses, extending the bus network. More doctor's surgeries (I have to drive for 15 minutes to get to one. This impacts my health.) Remove bottlenecks in roads, have more Turn Left lanes and filters. Stop cyclists from using roads like Cowley Road. The priority should be the buses, which can't get past them. Give bikes alternate routes to use. Ban parking on busy through routes. Give free bus passes to all children and to those living on roads with no parking allowed. Lots of ideas there for you.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Many many people live or work in the Oxford area that is not covered by your 'central Oxford' area, and these people too are reliant on their vehicles for commuting, due to Rota shift pattern or large amounts they are having to transport which means the buses are not satisfactory. In essence what you are proposing will actually increase traffic and pollution on the remaining routes into Oxford as people are havinv to double or treble their commutes.	It's a ridiculous idea. Public transport is not the answer for all circumstances and reducing people's ability to access shops/hospitals/work places/friends and family will only mean the demise of Oxford as a place in general that people will want to spend time as it is easier to go elsewhere. Some of the schools in the centre of Oxford are already seriously struggling due to the crossing traffic filters and parents concern about being able to access them.	Stop trying to stop people from driving and allow free flow on all the roads. Since the LTNs and other measures traffic has got worse not better
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	What we need are smaller, cheaper, and more frequent buses that can navigate the narrow streets of Oxford. Adding a congestion charge simply links the pockets of the suppliers/service providers of this charge. We need to see a costed plan from the bus companies, as at the moment, the costs to car drivers are pretty clear, however, the benefits of this scheme to Oxford residents are all in vause oercentaaes.	We need a costed plan of how the money raised from this activity will tangibly improve commuting within Oxford.	What we need are smaller, cheaper, and more frequent buses that can navigate the narrow streets of Oxford. If we focus on the carrot of making public transport more efficient and accessible, we don't have to keep beating people with more charges. The stick has never been a solution to anything in the long run.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive	Much cleaner air and safer for pedestrians when I'm in Oxford	Please don't be scared away from progressive policies like this, by the loud minority.	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very positive	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	Reduction in congestion by discouraging transit through the City by 'casual' traffic will improve the quality of life, reduce pollution and improve bus travel reliability. The system should NOT penalise or monetise the need for those with legitimate work travel requirements especially those in public services.	They must be suitably sited to avoid penalising access to facilities such as sports centres or schools.	Reduce bus fares or introduce graduated fares dependent upon distance. For example £3 for a journey to Banbury from Oxford BUT charging the same for a journey from Kidlington to central Oxford or even Summertown does not seem equitable. To encourage more bus travel the difference in price HAS to significantly outweigh the convenience of using a personal car.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking, Other	"Magdalen Bridge closed in both directions, but no closure at St Clement.	Very negative	Every day, many cars FROM OUTSIDE OXFORD come in via Iffley Road to drop children at private schools all the way to the city centre — and they're allowed to enter. So why don't you close Magdalen Bridge to city-centre traffic? Or Iffley Road in both directions? Meanwhile, those of us who live in Marston can't even get out. Why not close the A4144 and Banbury Road too — or would that be too inconvenient for the private school run?	This is discrimination. If you want to close the city centre, then do it properly — close the actual centre, Sr Giles, Magdalen Bridge and Abingdon Road.Why no? Since when is Marston Ferry Road part of the city centre? Or is it just that you don't want people from Marston going to Summertown — while those in Summertown can still go all the way to the city centre? It's clear who you're protecting. MONEY, MONEY, MONEY...	Close Iffley Road, St Giles, Magdalen Bridge, and Abingdon Road — why not? Take a walk down Iffley Road at 7:40am on a school day (a private school day, of course) and see how many big cars with just one adult and one child are driving into Oxford from outside the city. Look at the traffic jam. As I said before — close Magdalen Bridge. Why not? Close the A4144 and Banbury Road too. Why not? If you're going to close the city centre, then do it properly — stop targeting Marston. Because that's exactly what you're doing. If I lived in Summertown, I could drive all the way into the city centre. Why? Do they pay you?
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	Additional costs to get into oxford would mean I would come into the city less overall and therefore spend less on shops, cafes and restaurants than at present. I would be penalised collecting prescriptions from the Churchill Hospital. It will also force people into lesser routes to get into the city which is crazy when the Botley Road closure has already lead to less routes being available. creating more congestion not less.	The root cause of the issue is the closure of the Botley Road which has lead to greater volumes of traffic elsewhere. To further penalise people by charging for access is outrageous behaviour and will cause financial issues for retailers, Theatres and restaurants in the city. If Oxford City Council didn't want cars in the city then why did they build the Westgate and its car park.	Re-open the Botley Road sooner than currently envisaged. I no longer have a convenient bus service because of its closure Open the Eynsham Park and Ride that is built and available but with no access road Create proper cycle paths from Eynsham and elsewhere Incentivise people to use park and ride - discount vouchers to use in Oxford, free parking Move the Westgate Put a charge on tourist coaches Stop buses going down the pedestrian route past Bonn Square to the High Street
a resident of Oxfordshire living outside Oxford	daily		I don't	No impact	No impact	Too high	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	See below	How are medical staff supposed to get to and from the hospital? As a critical care nurse, I have to be at the John Radcliffe for 7.00am. Currently I am using marston ferry road (the ring road is not an option for me) to ensure I can get to work on time - are you suggesting I pay an additional £20 per week to do my job?! This is ridiculous. Let alone all the other hundreds of staff members trying to do their job. This is going to impact staff numbers at the John Radcliffe, pushing an already tight work force to the breaking point. The park and ride is not an alternative for front line nurses because the buses are not adequate for the end of a shift or feel safe enough to use at the end of a shift Furthermore, what about the teachers all working just inside marston ferry road at all those schools? How are they supposed to be commuting to work - an additional £100 per month on a teachers salary is going to be impossible for many of them. Are there going to be permits available for key workers??	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Positive	As an Oxford resident will make travel more convenient on public transport. But my elderly relatives will still be able to get around with their own car.	No	I think ebikes and scooter use should be restricted. They are too fast and weave in traffic. Bus services should be not for profit.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative	I live outside central. (Purple) area but in Jericho. I would commute through central area so would have to pay once my 100 day trip expires. It would be better for me if the number of passes was 200.	I would think system would work better if more than 100 passes for role within Oxford ie within ring road. 100 day passes is insufficient. I would think 200 is a more reasonable number	Improved bus services.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper		Negative	Many visiting tourists will be unaware of the proposed congestion charge unless large, clear signage is erected on all access roads to the town centre. Oxford is just a tourist town now so once the tourists have been made unwelcome with these measures and the camera traps there will be nothing left!	Do not implement them.	Make Banbury Road & Woodstock Road and Cowley Road and Iffley Roads one way.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't	Very positive	Very negative	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Extend hours of operation for buses		Negative	Increase of traffic on other routes	Why will oxford residents only have permits for 100 days. Why have the bus companies stopped return tickets in oxford, it is unsustainable to be Paying £15+ for my family to go to the city center and back, they are cashing in on restrictive travel	How about focusing on the estimated 13000 commuters and encourage them to P&R as it feels like you are targeting the city residents, I use my bike as much as I can but I can't carry ladders or drills on a bike or bus, why am I being punished for working within the city
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for young people		Very negative	Nobody will go into Oxford unless absolutely necessary. A lot of businesses have already left the city or had to close down - it will be even more. meaning nothing left other than laboratories and student accomodation		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all		Neutral	I think the 100 permits per year mean that it will have little effect on my own car use.	I don't quite see the point of calling this scheme temporary. Won't it just merge into the traffic filters trial? I think you need to add a camera at the bottom of Iffley Road otherwise all the MCS parents will just drive down Iffley Road and then back up again. The scheme appears to be punishing car drivers. Why not give all Oxford residents 365 passes and then incentivise them to not use them by giving them rate rebates or similar. Carrot and stick instead of just the stick.	The congestion charge is generally a good scheme, but don't punish people for living in Oxford. The current scheme appears to the public to have been conceived by people who won't be affected by the scheme and who have no sympathy for those who are affected. I'm sure that isn't true, but it is how it seems.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	As a full time cyclist around Oxford the congestion charge would force more cars on the already busy main cycle routes in and around Oxford. Already there is a huge divide and anger from motorist to cyclist and it will make it worse.	Just don't do it. Do you not want Oxford to generate income by coming into the city	Work with the colleges and private schools for busses to be put in place around the ring road/park and rides and subsidies them along with the schools. If you travel around Oxford in the school holidays there is a huge reduction up to 90%
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very positive	Reduced congestion will mean more reliable buses.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	There should not be a congestion charge		Remove the the LTNs and return the roads to their purpose-which is to carry cars

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disabled tax cars	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Add new bus routes		Very negative	Will extend journey times. Will create further congestion on ring road. Will cost more in fuel. Will create chaos on ring road leading to Marsh Lane, Marston due to people going to the John Radcliffe and Headington hospitals.	This is a total catastrophe waiting to happen. The residents of Oxford neither want nor need these ridiculous constraints on their right to travel. Motorists already pay to drive on roads. The council is in existence to represent the residents of Oxford, not to promote their own short sighted doxma.	Remove all LTNs .. get Botley Road open and fine the companies that are dragging their heels in the so called 'improvements'. Start listening to what residents want.
a member of the public living outside Oxfordshire	less than weekly		I commute to the central permit area by car	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very positive	It will make travel into the city by bus faster, reduce the cost of running buses and maybe therefore reduce bus fares	Great idea	More bus lanes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	Neutral for me due to where I live (off the Botley Road, so currently can't drive into Oxford centre anyway.	I think a congestion charge is arguably a better plan than the traffic filters - I have concerns that the filters, as proposed, will worsen congestion on the Botley Road as it will be the only route in to access the Westgate and station - an effect that has clearly been seen with the closure of the Botley Road on levels of congestion on the Abingdon Road. Having a congestion charge will not concentrate Westgate-bound traffic on one road, so seems much preferable from the point of view of Oxford residents. As with the filters, I'm sceptical of the blanket exemption for vans - would prefer this was focused as unlimited permits for traders' vehicles. resardless of type (and charge/restrictions on private vehicles of whatever type).	Subsidise park & ride and buses - carrot instead of stick! Charge SUVs more for congestion charge AND for residents' permits - they are overlarge for most Oxford streets (don't fit properly in parking bays) and take up more room which will worsen queues, as well as being much more dangerous for pedestrians and cyclists. Walking and cycling is more attractive without such behemoths on the street. Congestion charge is a better proposal than the filters
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Neutral	About right	No	Make bus services more frequent		Negative	Your new central Oxford permit zone does not cover where I live and I have no choice but to pass through a filter after leaving my house. You neglected to add the development off of Rewley Road. We can exit via Hythe but will be fined when we re-enter!		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I use one of the roads where the ANPR will be regularly and 100 passes would not be adequate, leaving me with no choice but to paydlay.	I am a long-term resident of Oxford and feel that there was no need for LTNs, which in my opinion have made areas of Oxford considerably more congested than they were before. The buses have also had to slow down and fewer services are consequently available. A lot of traffic will move our to the already crowded ring road. With the plan as it stands, it looks as if it won't be possible to access the carpark for the Westgate shopping centre.	There are too many cars collecting children from various schools at the start and end of the school day. The private (and possibly state schools) could be expected to run school bus services from the towns and villages around. Cokethorpe School is worth talking to, as they have a very good system.
an Oxford resident	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Remove all LTN obstructions and traffic will soon improve.	Very negative	The anti car council is selfish and doesn't consider the impact on citizens.	I fear this new scheme will also turn out to have unforseen consequences. Don't do it. Fine the company for every day the Botley Road is closed. Move Archer Cort to a site where he can do less harm	Remove LTN'S
a resident of Oxfordshire living outside Oxford	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	We don't need a congestion charge. The cost of life is already expensive	Very negative	Because we are already paying Road tax, the cost of living is expensive, and your brilliant idea is to put £ 5 per day, how does that work every day like working in Oxford and don't come with you, you can use the bus because I don't work for you.	This is nonsense	Remove the ltn
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No			Very negative	You should have freedom to drive into Oxford should you choose	There will be an impact on the economy	There is already high car park charges, this will increase the ring road traffic which is already congested.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs	I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make buses cheaper for all		Very negative	You do not want cars in Oxford. Every road in and out of Oxford has roadworks on it and you do not open tnis to ease congestion.		Have departments talk to each other when deciding to put up roadworks
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs	I don't	No impact	No impact	Too high	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Reason 1: You won't meet your aim to make bus journeys faster and more reliable. Detailed reason: I work outside of Oxford which means commuting through a charge zone. There is a bus service I could take but due to weight restrictions on Donnington Bridge, the bus HAS to go via the ring road which is already over congested thanks to the Botley Road closure. With the introduction of this scheme, the ring road will become even more congested (it is already over congested) and the public transport journey times will increase. Furthermore, the service is already quite unreliable (buses not showing up on numerous occasions) and this extra journey time I envisage will lead to a less reliable service. Overall this means you cannot meet your aim of making bus journeys faster and more reliable. the cost of a return bus fare is higher than the charge (£6 for the bus) Reason 2: You won't meet your aim of of improving the health and well being of the community. Detailed reason: As a resident of Marston, we have not very many local amenities such as doctors surgery, local gym etc. For myself to get to any of these facilities I would have to go through a charge zone (my GP is off of Cowley Road) and I use the council gym in Summertown. Introduction of this would have a negative impact for me and my family, but this will also impact many other local residents. If I cannot get to the gym without going through a charge zone then i will likely cancel my gym membership, going	1. Given the bus filters will not be introduced until AFTER the Botley Road has re-opened, I cannot see the justification for doing this now. The ring road and A34 are already over loaded due to this closure and this scheme will make a very bad situation worse. We need to re-open Botley Road AND improve Donnington Bridge so that public transport can use it before we ever consider this scheme being introduced. 2. I worry that cars will be turning in the road as they approach gates. E.g. I could envisage Magdalen college school parents driving up the St Clements charge zone, dropping their child off and then turning round in the main road. This will be dangerous. There needs to be a monitoring of this also and fining of people who do it, otherwise you'll end up with a bottleneck of vehicles which goes against the aims of the scheme.	1. As I previously mentioned, there is a bus I could use to commute to work. A return fare costs £6. It would be cheaper to drive through the charge zone. We need to look to reduce the bus fare to make it a financially more attractive option. 2. Suggestion; do not allow parents to drive their child to school from outside of Oxford. Lay on bus services. As a frequent commuter in and out of Oxford I am quite familiar with the traffic hotspots and locations. I regularly drive on Iffley Road at rush hour and there is frequently a long line of cars coming into Oxfords on that route in the morning. This is due to parents driving their child from out of town to Magdalen College School (and other local public schools). When the private schools have broken up for their holiday BUT the regular schools are still in term time, the difference to traffic in and out of Oxford is staggering! If you find a way for children to be bussed in (e.g. from the park and ride) and for a way to stop parents making the commute (not sure how this could be "policed") then the traffic in these areas would significantly improve.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disabled tax cars, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Other	make oxford liveable for humans not a jail. There are alternate solution rather than implementing a financial congestion charge . First the LTN(east oxford only) and now congestion. It is not way forward. Think of some better solutions. Do not impose.	Very negative	school run will become harder going to work will be longer than usual going to your desist and GP appointments will take longer than normal people working in school has to pay more than normal cost of driving	make one ways (like summertown)	Free bus service (at least for schools and elderly bus) cheaper taxi rates cheaper train tickets start shuttle service
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Extend hours of operation for buses		Very negative			The way traffic lights in the area don't work in an effective way. For example the crossing at Folly Bridge changes too frequently and for too long. This is siomficant.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	This will drive even more traffic to the ring road which is already very congested. The impact of the frequent road works also has a very significant effect on ring road traffic as does the frequent impact of accidents on major roads such as the A34 and A40	The main issue causing congestion is the imposition of LTN's. This drives all traffic onto a few major roads. Has the council undertaken a traffic survey of the removal of LTN's? (No because you are afraid of the results) For many people walking/cycling is just not feasible, and the use of buses for journeys across is not practical as it takes too long if you have to change buses. For us with a 1hour timetable, it could take 2 hours or more to reach the JR hospital - not ideal for aged personnel.	Remove LTN's Eliminate parking on major roads - Iffley Rd, Cowley Rd, Holloway. Try contraflows - one way for Iffley Rd/ Cowley Rd With one way connectors - Howard Street /Bullingdon Rd etc
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I don't want to be sat in a bus or park and ride to work or to visit Oxford. Work life balance is stressful enough and doing this adds extra commute time to my day and extends my time away from home and my family as a carer for 2 elderly parents and my own family as well as working thanks unacceptable. Even if I sit in traffic my time away from home is still less than sitting in a bus that's stops every two minutes!!!	I think this will have an overall negative effect as not everyone is mobile enough to walk or get to bus stops or cycle! People just don't have time for this in their lives if they live in the suburbs of Oxford !	Traffic is way worse now than it's ever been since the introduction of traffic filters already in place and feel that this is only going to get worse! There is not a need for any filters anywhere.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very positive	Fewer motor vehicles in central Oxford better for health and the planet		Make congestion charge permanent for all of central Oxford
an Oxford resident	weekly		I don't			Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I live near Abingdon Road. I would expect the scheme to reduce the high level of traffic along it, and to improve air quality; also to speed up the bus services.	Many of your question seem aimed at car owners. This gives the impression that the views of those of us without cars are of less interest to you.	
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Do not do it and allow freedom of movement to enable people to continue to work.	Very negative	Working at the hospital is hard enough with it taking over an hour to get to work. I work around being a single mum so need to drive. Using the bus is not an option. It's already hard enough to attract staff to work at the hospital. This will make it even less attractive place to work. I do not understand why I need to pay more to drive to work on top of my car tax. This is an awful plan for Oxfordshire to just charge residents more. I can't tell you enough what a bad impact this will have on the hospital, staff and patients.	This is a totally awful idea, driven by making money of people just trying to get to work. This doesn't support residents at all. You are grinding an amazing city to a halt. Why would anyone want to work here when the council actively try's to prevent you getting to work.	Stop closing roads ... allow exit from the rear of the JR so the traffic isn't all going one way. You have closed so many roads it creates the traffic.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Negative	I live in Kidlington and take the bus into Oxford. The buses from Kidlington have already been reduced to 4 per hour and they often bunch up so there are considerable delays both getting into Oxford and then getting from one side of Oxford to the other (the service to the hospitals is woeful - 1 bus per hour is not enough). All buses from Kidlington have to go through Summertown. A huge amount of traffic in Summertown doesn't go further into the City - the traffic is to the schools where children are dropped off and parents return home or go back to the ringroad to go on to work. This traffic congestion will continue and worsen as all the schools in Summertown will only be accessible from the Cutteslowe roundabout and the Banbury Road. This will also mean that the Banbury and Woodstock Roads are more dangerous for cyclists.	There should be a congestion charge point in Summertown.	More buses including free shuttle buses up and down the high street and further hospital routes. Also some action needs to be taken about school run traffic in Summertown which will not be affected by this proposal and which it will make much worse.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	No	Make Park & Ride parking cheaper, Make buses cheaper for young people		Very positive	It should mean faster and more reliable bus journeys in the city and 100 passes is more than enough for times I need to drive.	I think this is a better solution than the original proposal to fine vehicles moving through the bus gates.	Improve the ring road and the ring road junctions. The ring road is not a good free-flowing road and needs significant improvements and a minimum speed limit of 50 mph.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	My family and I will no longer visit oxford to shop or to look round	It's an absolutely ridiculous and unfair proposal which will have a negative impact on the businesses in the city when shoppers go elsewhere.	Get rid of the LTNs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I think politically this is a serious mistake and will in the long term undermine efforts to introduce greener transport policies. As with the LTNs and filters, this is being done the wrong way round. A better and cheaper public transport network should have been introduced before these measures. Otherwise you will not carry the public with you. It will just alienate voters and make further chances difficult. It is short sighted and makes the council look increasingly out of touch.		Make buses cheap to use with routes that make sense (eg, connecting the various parts of Oxford without having to change buses in the city centre)
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	You're destroying this city and you are destroying businesses. I don't want to have to go to the hassle of having to 'apply' for passes just to be able to visit people or businesses.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Positive	I live within the city and commute by bike. If the scheme reduced traffic within the city ot would make cycling safer for me. I occasionally use buses and improvements to services through reduced traffic and increased investment would be a benefit to me.	I would argue that the scheme does not go far enough, and a congestion chrage should be introduced for all traffic entering the city (with similar permits schemes for residents as are already being proposed). I live on Banbury Road and cycle down through Summertown to get to work and the current levels of traffic are already awful. It makes cycling through Summertown particularly dangerous and unpleasant given the lack of cycle lane. As Banbury Road is one of the routes not covered by the proposed filters or charges, I am concerned that more traffic will end up on this route and make the situation locally worse, even if overall traffic levels around the city are reduced.	I strongly support removing the parking in front of the shops in Summertown to make space for wider bus stops and a cycle lane. Cars cutting into and out of that lane constantly hold up the traffic and make cycling much more dangerous - I have near misses multiple times a week on my commute. There is ample parking available at Diamond place for those wishing to visit Summertown by car - the short-term spaces directly in front of the shops take up valuable road space and are not necessary. It is also incredibly noticeable that the majority of the traffic on Banbury Road and through North Oxford is due to the private school drop-off traffic - the roads are noticably quieter when those schools are on holiday, even when the state schools are still in term time. I would strongly support measures to reduce this population of cars entering the city, such as enforcing school bus usage where possible or charging more for larger cars.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Neutral	Positive	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	Without cheaper park and ride facilities ie. a combined park and ride fare the scheme won't encourage current car users to switch to using the park and ride. This may have a detrimental effect on tourism, business and retail in the city centre		a blanket stop at the current park and rides which should be cheaper to use
an Oxford resident	daily	Business cars used as goods vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other		Very negative	Running a dog walking business in oxford we pick up and drop home dogs of people who otherwise couldn't have dogs without us! We wouldn't be able to pay a charge like this and make any kind of living dog walking. It would be a disaster, we would need to be exempt from paying like we will be if and when the traffic filters come in. I know I speak for all the dog walkers in oxford that I know of.		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car			Too high	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more freeuent		Very negative	The gates on marston ferry road and hollow way are not necessary the congestion is in the city centre also this would prevent amone carkino in the westaate		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Negative	I expect this to reduce our desire to visit Oxford for casual visits or shopping. Depending on how easy the permits are to access and use will have an impact on if they are used to offset the disincentive to visit. Putting the Westgate Centre and its EV charging out of access without the congestion charge being added seems targeted to penalise their investment in building out that infrastructure.	I will be very interested to see if the audited usage and revenue from this scheme matches the projected costs and benefits. I'm not yet convinced it will be a net positive even though I'm well aware that there are too many cars (and other vehicles) trying to travel through Oxford's tiny streets.	Buses are not a great answer. A true rapid / mass transit solution is needed that can effectively replace the need for cars to enter, park, and leave Central Oxford. If there is a desire to maintain commercial / shopping activity within the city centre (rather than move it out to the edges where it can be more easily accessed by the region) then the access to that shopping provision needs to accommodate the movement of goods with people; cramped (and worse, double decker) busses are not a practical answer here other than to limit what can be bought.
other	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	The proposed scheme discriminates against Oxford undergraduate students who need collecting and dropping off with possessions at least 6 times per year. This is not possible to do on public transport	Very negative	It discriminates against undergraduate students and their parents and other university members who simply don't have the funds to cover this	The area includes charging to go to the main shopping centre car park which is already expensive. It does not make any logical sense.	Introduce a light rail scheme and make most of Oxford accessible on it. Park and ride using buses is a third work solution.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Very negative	Expensive & inconvenient - not everyone has the time or ability to avoid car journeys. For a family the buses are too slow & expensive and cycling infrastructure totally inadequate. The ring road will become even worse. This will kill the already struggling Oxford city centre and probably any business in Oxford- we will travel elsewhere for shopping and entertainment. Schools will lose teachers esoecially Cherwell on the Marston ferry road.	This idea is being proposed by people with the time, money and health to use alternatives to the car - the people who will suffer are those who are not so lucky.	Add proper bus stops so traffic not stuck waiting. Add proper bike infrastructure - paint on roads does not make you safe! Make buses cheaper. Lower parking charges at city car parks so people don't have to travel through Oxford to get to the Westgate (the only cheap place left!)
an Oxford resident	daily	Blue badge holders	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Other	Remove cycle paths	Very negative	No point, you will ignore it anyway.	You have created congestion, now you want us to pay for it! Unbelievable.	Remove ALL Ltn's
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	The miss management of traffic in Oxford has been ongoing for decades. Now your answer is to prevent people coming to Oxford or charge them if they do! What ever happened to this being a free country! Why don't you save the money on these ridiculous surveys and just make the park and ride free. That way more people Will use them. Currently if you have a car of 4 it's cheaper to drive into Oxford and park (and still will be with your proposed tax) where is the encouragement to get people out of their cars????? Or I can bring my motorhome into Oxford for free!!! Yet my efficient car I have to pay to bring it in! No thought has gone into this scheme.	Yes, don't have any! Daft idea with no thought process behind it! Why would you send all the Westgate parking traffic down botley road too? If I have read the zones correctly.	Yes as above. Make park and ride free. One charge for parking. Free bus. Also move the bus station to seacourt tower park and ride - use the car park you wasted millions on the empty and unused carpark! Or water Eaton! Where you have the train station....Then you'll have less buses going into Oxford. (The long distant type with diesel engines)
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	You would be denying free access at all the zoned area (Purple zone) to car users who pay their taxes and Road Fund Licence. This would completely ruin access to the Westgate Centre, Railway station and loe rink and this is taxing people unfairly who need to use those facilities.. In addition the northerly "Gates" would seriously affect hospital staff and patients as these charges would impact hospital shift change times and patientes visiting the JR. This will simply push traffic onto the ring road and clog that up instead. This entire project appears o be about raising money and appeasing the Bus companies - who are not the council's electors.	This is a draconian and undemocratic measure for which councillors have no mandate having not mentioned it during local elections. This war on the motorist is making traffic worse in the city not better.	How about considering the general populace who work hard, pay their taxes and simply wnat to get on with their life without being taxed and inconvenienced further for simply going about their daily life
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Neutral	About right	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very positive	Any reduction in traffic will mean better cycling experiences for me and my family. Faster bus journeys and more frequent buses along with new routes will encourage car drivers to use buses or cycle/walk	I think this is a good idea. Something has to be done about the traffic and I have not seen any alternative proposals and I can not think of alternatives myself! Ultimately I would like to see Oxford centre closed to all cars and it become a pedestrian zone with mavbe some allowance for cvcles.	Taxi fares supported by council so people could travel by taxi when accessing the station or healthcare, restaurants etc
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Improvements to roads	Very negative	This will harm the junior ice hockey club as they start at 4:30 for there Wednesday night training there kit and sticks are very heavy and difficult to transoort on busses.	This will almost certainly closes down the junior ice hockey club is Oxford as parents will go elsewhere.	Increase parking charges between 9am and 4pm.

Survey Response												
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on davs of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neeative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative		There should be no charges at all	No	Make buses cheaper for all		Very negative	Housebound mother lives in one of the zones, I take her to appointments. My children's school is also in a zone but I don't live near by. Trying to get 3 children into the same new school is pretty much impossible so moving them is not an option. On top of that I help a family member with school runs when she has hospital appointments or her son has hospital appointments		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Very negative	very negative making residents pay to navigate their own city, where they already pay extortionate council tax, bus fares and parking charges. You are just moving traffic to other areas of the city. It will make no difference to Cowley Road/Iffley Road , traffic where buses are held up the most as you need to travel the length of one, via the plain roundabout, to access the other.	why is the Crowell road bus gate not included in this? This is the most ridiculous road block ever for anyone travelling from Littlemore to Cowley shops. Why are there no restrictions from North Oxford into the city?? Once Botley Road is reopened, if ever, you also need to look at the road layout so that there is a dedicated lane for traffic going into the Westgate carpark. Another cinch point for traffic.	to remove traffic on Cowley and Iffley Road, make Magdalen Road and Bullingdon Road one way to filter traffic, then Divinity Road and Bartlemas Road one way to also filter traffic to Headington. Left turns only. All you have done so far is make the Plain roundabout 100% more dangerous for all vehicles including cars, bikes and pedestrians.
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Disabled tax cars	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	My family membership will no longer visit or shop in Oxford and travel to another town or city.	This will have a detrimental effect on the Oxford shoppers, people will simply spend their money in other towns.	Control road works and closures better, remove th areas.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	Too high	No	Other	Don't bother with a temporary congestion charge	Very negative	The idea is absolutely ridiculous	This is a disgrace. Absolutely ridiculous idea	Fine companies for over running road works and closures. use this money to reduce bus fairs.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	100 permits won't last me very long as I have to travel to work. It would mean I can go one way to work in the morning because it's before 07.00 but can't come home the same way thus pushing me onto the ring road which is always busy. This will add more traffic.	The LTNs are the problem which caused more traffic in the Oxford area	
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	Too high	No	Make buses cheaper for all		Very negative	I visit cowley from witney. There is no park and ride for that journey and 2 buses are too much for my husband to deal with	Very anti visitors to Oxford	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	a better way to reduce congestion is to get the Eynsham Park and Ride open. Will shift traffic to the ring road. Is a regressive form of taxation - hitting those who can least afford it the most. Sounds administratively expensive.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Negative	I will be forced on to the A34 and A40 - already overcrowded and dangerous. My journey will be longer, creating more emissions.	This appears to be a face-saving and cost-generating exercise for the county council who spent all that money on the cameras while believing Network Rail and Thames Water about the Botley Road re-opening. Now that there is no way for the next two years to make that back on income from the bus gates "trial" (which I don't believe would ever have been decommissioned even were the results to show an increase in traffic through the city centre), creative ways are being sought to neutralise that outlay. There is no consideration for people trying to drop off at or pick up from the railway or bus stations. Ultimately traffic will not be reduced if delivery drivers, taxis, contractors and carers are exempt as these are already the majority of the drivers going through the city centre. It simply enables more data harvesting about locals' travel patterns. I say all this as someone who commutes by bus or cycle into the city centre and only drives in between 7pm-7am anyway.	More park and ride sites - including access to the car park from the main road - with more buses and more rewards inside the city centre for using them, e.g. loyalty / reward scheme where stamps can be exchanged for drinks / other benefits. Smaller, more frequent shuttle buses from the P&R sites which don't take so long to load up / drop off and can service some other major areas e.g. Jericho, Marston, Wolvercote, more of Cowley, the hospitals (without having to go to them all) and Littlemore. Some actual co-ordination between City and County councils about the Westgate car park and the Botley and Abingdon Roads - the mixed messages are unbelievable. Some bus services across the city which aren't simply radial. Some integrated thinking about LTNs and journey times increasing - this isn't always because of more traffic but sometimes because of poor traffic management.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Registered car clubs	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of operation for buses		No impact	I mostly use the Park and Ride, and journeys to the Churchill can avoid the charge.		Sorry if some these already exist... 1. Create mini food yards with kiosks at Park and Rides and nice seating so people can grab breakfast etc and it's more appealing and an added service 2. Have a taxi pickup area at Park and Rides for people who Don't Do Buses. 3. Resuscitate the rickshaws? 4. Have a dedicated NHS minibus service doing loop routes in Oxfordshire and the city for the hospitals. 5. Make it cheaper to register electric taxis than others. 6. Increase the frequency of Park and Ride buses at rush hour. 7. Loyalty points scheme for Park and Rides 8. More frequent buses so each bus can have more space for bikes 9. Other local electric minibus loop routes 10. Negotiate planned staggered starts for Oxford schools 11. Encourage businesses to support WFH. 12. Build another Park and Ride! 13 Create 'Family day in Oxford' trails for younger children with the trail starting at the Park and Rideslon the buses. A QR code treasure hunt sort of thing.
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car			Too high	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	The improvement of the bus services need to take place before imposing the charging, as daily users will find it incredibly expensive. Daily users of the ice rink have large amount and heavy kit for which current bus service are unsuitable. Not starting early enough ~5:30 am		The public transport services have to be available, frequent for people to use them, possibly from the larger Oxfordshire which should reduce traffic from the larger county
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Make P&R free	Very negative	Losing free of movement where I live.		Remove LTNs and traffic will improve. LTNs force residents to use main roads adding to the congestions.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Very positive	There should be no charges at all		Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	It is not possible for everyone to use public transport daily to get to and from work. If you have dependants or you need to be able to leave work quickly, waiting for a bus is not an option. The Botley road closure (for far more time than it should be) is already impacting people's travel time to and from work (even on a bus) limiting routes into the city centre. If you make it difficult for people to travel for work into the city, and more so, charge hard working people, you will see people leaving these places of work. Schools, universities, offices, shops etc all generate high incomes to the city. If people cannot work there you will just see a mass of people choosing not to come to Oxford to serve the tourists and students etc. STOP MAKING IT SO HARD TO LIVE HERE!!		Open the Botley road!!
an Oxford resident	daily	Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Hearses and funeral cars	I don't	Negative	Very negative	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very positive	Something needs to be done about too many cars in Oxford. This is not a perfect solution, but it is the only feasible solution currently offered. Furthermore, cycling to the train station from East Oxford (where I live) can be very difficult due to cars on Hythe Bridge St driving towards Hollybush Rd (due to avoiding Queen St during hours when cycling is banned. I am aware that Park End St is an alternative, but it is not still stands). It is ridiculous to be potentially miss a train because of individuals choosing to drive across Oxford. This needs to be massively discouraged, and should cost more than a return bus trip.		Please bring in the passes and traffic filter scheme as soon as possible. Reduce parking spaces and increase parking costs, if people don't think they can park they're more likely to use the park and ride. Make buses cheaper than driving and parking. Continue to improve cycle safety and have more bike (secure!) parking (also for mobility scooters, we need to encourage older people to stop using cars, and mobility scooters could help), could Oxford follow Cambridges lead and get a multi-storey bike park (possibly where Worcester St car park is? 2 birds with 1 stone)
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	No	Add new bus routes		Negative	I live on Marshall road. To leave my street I need to go thru Holloway. 100 days it's not enough for someone who can't leave their house and doesn't have another route but ludi Holloway.		Take out the LTN's
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	No	Make buses cheaper for all		Very positive	It is currently a pain to get into town despite living close to several bus routes, because the bus is always stuck in traffic. It is impossible to be in time because the road is taken up by hundreds of posh individuals thinking they are so important and have to be in a car and don't want to sit beside us peasants on the bus. It is ridiculous that they are making everyone late. This has to be stopped. I see Landrover after Landrover with a single person in them!	I think it's a great idea, we seriously need to improve the bus service to make it a reliable way to get into town. It is wild that because of all the cars, it would take me an hour to get home by bus even though I lived near Redbridge Park & Ride and worked in the city centre. And yes I have a car but only a moron thinks it is acceptable to drive into Oxford! Clearly we have to force people to do the right thing because at the moment, posh idiots are hogging our streets!	Yes. I think that some people have good reason to actually need workplace parking, especially people who work early mornings or late nights and therefore cannot rely on public transport. I am thinking of actual hardworking people like the college porters, or museum security, or people cleaning our cinemas. But most of the time, the people who are offered workplace parking instead are just rich and arrogant individuals who think they are better than everyone else, like directors and professors, even though they have flexible work hours and work during normal daytimes. I think businesses should have to justify why their staff should have parking and cannot take the bus like the rest of us.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Positive	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Neutral	It will make me drive less and cycle / bus more.	I support the proposals as an important way to reduce traffic congestion and pollution.	More must be done to ensure safer use of e-bikes, (eg delivery cyclists) hire e scooters. Moped users frequently ignore road rules and abuse cycle only routes and protected boxes at traffic lights.
a resident of Oxfordshire living outside Oxford	daily		I don't	Very positive	Neutral	Too low	Yes	Add new bus routes, Make bus services more frequent		Very positive	Reduced travel times, reduced pollution		Cheap easy and frequent park and rides. More direct buses to headington for the hospitals from surrounding towns. Scrap Westgate car park as this contributes to huge amount of congestion and pollution on roads such as the Abingdon road
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Can't get to the Westgate without paying the charge	The buses are not reliable enough and are too expensive.	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Neutral	I don't believe this will make much difference to my frequency of travel into Central Oxford	No further comments	Ideally an electric tramway system but the geography of Oxford City would make it very difficult and expensive to implement. Reinstalling railway services to Witney and Cowley would be a step in the right direction.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Add public cycle parking		Negative	Would have to look for the new school and possibly work place	N/a	Separate roads for cyclists and motorists. Just bicycles or just motor vehicles
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice. Blue badge holders	I don't	Neutral	No impact	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for young people, Add public cycle parking		Very positive	People need to choose the right mode of transport for each trip, not just take the car. A congestion charge will hopefully cause a virtuous cycle with bus and other transport reliability improvements		
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No			Very negative	You will force traffic onto A34 and ring road which are both over used now with the burley road closure. The access to the JR will become intolerable. Also getting to the west gate from the other side of Oxford will become very difficult and lead to a drop in trade for the city.	The A34 is often at a standstill from Peartree and the Abingdon Road junction. You are also making access to the train station very difficult.	The traffic in Oxford runs fairly well most of the time except at morning and evening rush hour. Change back the bus lane change on the Woodstock road it is now much worse. Stop coaches parking in St Giles there are too many now.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't		Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	It will deter visitors and shoppers coming into Oxford and therefore will hit businesses and the hospitality industry.	No	Cheaper and more frequent park and ride. Cyclist training so that they obey the Highway Code.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	I work at st clements as a health care worker 3 days a week . It is a nightmare to get to the office there as it is let a lone having to worry about congestion charges and permits! I see elderly people in Oxford in their own jsmodifying those days and have staff who will need to come to the office reoularly for PPE and meetinas	How many permits are a care company allowed ? Per person	No I don't. I only go in to Oxford for work and shopping. How is this going to affect the business Ed once again???
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Other	Make access easier for all, including cars, rather than just excluding them like they don't and won't always exist	Very negative	The war on cars has to stop. There will always be the need for cars. If you want to make money. Introduce a tourist tax instead.		Sort the Botley Road out. Look at how to make car routes easier.
a representative of a group or organisation	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	Too high	Yes	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative	We have prided ourselves for setting up a central oxford community REDACTED (organisation). We have supported Oxford based charities with this for around 20 years. We have worked hard despite rising costs of venues to maintain a central location for rehearsals and events (where possible) to promote this Oxford community. We have continued to do this and maintain a low cost for the members and support those with a budget to still be able to attend. This will discourage a number of our members attending who often travel in after work in the surrounding areas giving us a great reach and increases inclusion and diversity. It will also prevent some of those running the REDACTED (organisation) from getting there in a timely fashion. We will seriously have to consider moving out of central Oxford - which will change the group forever and will be a massive shame after so many years.	I'm glad to see the end time for some is 6pm. However previous documents did not suggest this which conerns me for the future. Also some of those routes are not at all busy at the 5-6pm time (such as marston ferry) so an earlier end time would be significantly beneficial. There should be some consideration for those working in frontline services for Oxford such as workers at JRH, to be considered under the exemption rules of "residents". We put many many hours in to support oxfordshire residents and this is likely to negatively impact some peoples ability to support their wellbeing with post-work activities. We have no choice to work from home, we have no choice to move to an employer further out of the area, we have little choice over the hours we work. We love what we do, but we also need something outside of work to keep us sane. This significantly impacts the ability to work in any of these jobs that instil happiness in the city.	Create multiple direct buses from park and rides to the JRH and other headington hospitals. I wouldn't mind getting a park and ride. But not if I have to get on a bus that then drives in the complete opposite direction, travels through the city centre, waits 10 minutes and then travels out again. There are so many staff and patients that their must be enough demand for a regular direct service.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	If the level of non-essential vehicle movements around the city is reduced, I hope to enjoy safer walking and cycling routes AND quicker bus journeys. I am concerned that the level of restriction will be so slow to be felt (ie. most people will never 'trip' the 100 journeys threshold) that there will feel little discernable difference in the time period you have allowed.	I do understand the permit system for city residents and county residents once the bus gates come into force properly, but for the period until that happens, I do not believe you should use a permit system at all, and for the time until that can come into force you simply apply the £5 congestion charge for everyone from Day 1 until the Botley Road access route re-opens. The University colleges generate a lot of (unnecessary) commuter traffic, and are proposing to circumvent the bus gate arrangements by allowing staff- through reciprocal arrangements - to park at colleges on either side of the gate and walk through to their own college - this will mean they are still commuting into the city centre and slowing down buses and making roads less safe for everyone else. Please consider ways to tackle this selfish approach in developing your proposals further. The focus on cars (over vans etc) does concern me, in that it is possible that people with access to a van will use that to drive for social and domestic purposes rather than for work related need, and with vans often being larger, and with poorer visibility than cars, this could be less safe for the oeople these proposals are intended to help.	Develop completely segregated safe cycle routes, so that parents and children feel safe to cycle whole journeys together, and do not 'drop cycle infrastructure' where it gets busy - as this is the most dangerous of locations for cyclists. Implement LTNs in Headington to prevent rat-running to the hospitals. Work with the hospitals to drastically reduce staff driving to and from the hospital sites - for example have dedicated 'airport style' shuttle buses from just outside the ring-road. Take the bus companies into TfL style ownership - to allow for one ticketing system, with considerably reduced fares for regular users. Provide much better bike parking and improve the public realm for pedestrians.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	I don't elieve there should be any charge	Very negative	This is a further restriction on my ability to move around the city by car in addition to the ones that are already in operation, e.g. LTNs, School Streets	I do not believe the temorary congestion charge should be introduced	Remove the LTNs that have been implemented. Investigate improving the 'pinch points' for vehicles. For instance the Westgate parking queue tends to block Thames Street and the Abingdon Road.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders	I don't	Very positive	Very positive	About right	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Hoping that buses will run to timetables.	The impossibility to get to the westgate car park without going thru a charging point (whilst the Botley road is closed) problematic given that the shopping centre is a destination centre for those outside Oxford. And would discourage visitors to Oxford. Would it be possible to exclude one of the charging points to allow access to westgate. Whichever would have the least impact on congestion for buses. It is not clear which this would be but bus companies must have mapped their pinch points. The placement of the st clements charge point is before the car park entrance. Is this because it is assumed it would mainly be used by Oxford residents who would use their 100 permits to access. Or is it to drive traffic down Iffley or Cowley Road rather than through Headington and st clements	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Neutral	I understand why this is being done and accept the changes are positive to decongest Oxford as it has too much traffic and pollution.	They should become permanent.	Ban all traffic except for residents of Oxford.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Open eynsham Park and ride , it's a crime this is not open, what a waste of tax payers money	Very negative	Holloway is a residential area that does not link oxford city centre so why congestion charge at all, marston ferry link Road is a main road to the hospitals so will cause great misery for those trying to get to hospital appointments	Open eynsham Park and ride	Roads on cowley and iffley roads could of been made one way every alternate road a different direction that would elevate traffic on these roads the same could be done on St Clements instead of ltns which have just pushed all the traffic onto three roads, increasins traffic and pollution on these roads and imaacina bus services
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Very negative	Life is difficult enough but this could impact my family visiting me. There is not enough time in the day to see family and friends when you are juggling work, getting children to and from school and any after school clubs.	I think it's disgraceful to levy a charge that will obviously impact people on reduced incomes whereas the better off will gladly pay to pollute as what is pocket change to them could be a basket of groceries to another.	Better planning of roadworks so the do not all coincide at the same time and also better contingency plans suck as opening up LTN's and bus gates in the case of an accident which causes gridlock
a resident of Oxfordshire living outside Oxford	weekly	Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	Unfortunately I have regular hospital appointments at the John Radcliffe and Churchill hospitals, both involved in congestion charges. I live 26 miles from Oxford, with congestion charges and car parking fees it makes a necessary journey very expensive. (cl	Waste of time and money, typical Lib/Dem green thinking ideology.	The City Centre is overrun by buses covering a lot of the same routes A new strategy on traffic in general is needed.
an Oxford resident	daily		I don't	Very positive	Very positive	Too low	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Very positive	I am strongly in favour of charging motorists for using roads in the city. Fewer cars will make cycling safer and buses journeys quicker. Allowing free access to motorists is effectively subsidising car journeys.	As a cyclists I'm delighted that the County Council is finally tackling the crisis of far too many cars being driven into Oxford, slowing buses and clogging-up the roads. £10 would have been a more-appropriate charge, but at least this is a start.	This initiative will attract massive opposition from vociferous motorists who rage against anything limiting their free access to city streets. The County must be steadfast and listen to the quieter majority of cyclists and bus-users.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make bus services more frequent		Negative	I don't think we as oxfordshire residents or oxford city residents should pay any congestion charge it's just another tax on the motorist which I midht aav enouch in road tax and insurance		Yes get rid of the LTNs
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders	I don't	Neutral	No impact	About right	Yes	Make Park & Ride buses cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative			

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who "need" to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Too many residents feel that they have no choice but to travel by car as there isn't adequate and affordable public transport as alternative. For instance, the County Council refused to subsidise a minibus service around Greater Leys to connect with Cowley Centre. They have also refused to put in safe crossings of the dangerous Grenoble Rd for residents to get to/and from bus stops out there. Of the group of people who feel they cannot use public transport, those on the lowest incomes will suffer the greatest impact of a change		Subsidise a minibus route around Greater Leys to join with Cowley Centre. Add segregated cycle lanes to Watlington and Garsington Roads
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	Th reality is that I will stop coming into Oxford and instead shop in Reading and Newbury. It looks as if it's not possible to access the Westgate shopping centre car park without paying for the congestion charge. This seems like a huge own goal. The centre of Oxford is already visibly struggling with empty shops and shops being replaced by poor quality alternatives (e.g. cheap souvenir shops and candy stores. To further restrict access feels pretty stupid. Surely it would be better to focus on completing the Botley Road work? I also note that the congestion charging times do not allow sufficient time for visitors to travel into Oxford in the evening e.g. to go to the theatre. It is also worth noting that outside of the immediate Oxford area there are very limited and infrequent public transport options. This should be addressed before the option to travel into Oxford by car is further reduced		Make park and ride free to park at and use the buses. Increase the frequency of the service
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Will force cars into much longer journeys and cause increased pollution for little or no benefit.	Remove the ltns, they have increases traffic unnecessarily on the roads around the lane areas	Remove all impediments to traffic eg lens and other blocked roads. Make roads one way where possible alternating direction to allow for effective efficient travel minimising pollution and stopping unnecessary queues
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Very negative	This will reduce my inclination to visit Oxford for shopping and leisure purposes. We are a family of four adults each with their own car and accessing Oxford for different things and at different times. There should at least be passes for EACH car driver and not limited to 2 per household. We live in a rural area outside of Oxford, where buses are frequent and stop too early for our daughter commute in Oxford for work in the hospitality Industry. Often the buses for the park-and-ride have stopped by the time she finishes work and so frequently this isn't an option and she parks in the Westgate. If you want such businesses to continue in Oxford, you need to support their staff	I have an adult son with autism who drives but finds public transport very difficult. Whilst he benefits from Pip (currently) he does not receive the mobility element. The threshold for receiving the mobility element of Pip does not take into consideration sufficiently those who struggle with the anxiety of using public transport. You need to make yourselves more aware of this benefit and not assume that only those with the mobility element requires support I have health issues which are not sufficiently bad to meet the ever increasing threshold for a disabled badge but having to use the park and ride, and for buses, etc would be difficult. Reading is therefore a better option.	More regular bus services from rural locations going late into the evening.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very positive	I do not own a car and this will make it easier for me to walk, cycle and use the bus in Oxford.	Additional charging location in Cowley Road to reduce private vehicle traffic and speed up buses	Junction improvements to make them safer for people walking and cycling. Reduction in waiting times at signal crossings for people walking and cycling.
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	As I commute to and from Oxford, these chargers are putting a huge financial strain on my expense which are spread out over living struggles that is directly effects my metal wellbeing	It's a very bad idea	Enforce times when vehicles can access Oxford for business and more cycling lanes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Negative	About right	No	Make buses cheaper for all		Positive	The proposal will reduce congestion on key bus routes and enhance Oxford's public transport system. My only reservation is that the permit system is too generous. Were it less generous I would have answered "very positive".	Wider roads for easier access	There is an urgent need to slowdown 'quickway' arterial routes like Henley Road (Rose Hill) and Morrell Avenue (East Oxford). In the absence of effective speeding enforcement, traffic calming devices strike me as the most sensible option. This would make cycling a safer and more attractive option.
a resident of Oxfordshire living outside Oxford	weekly	Public transport	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I strongly object to the proposed temporary congestion charge in Oxford. There is no clear-cut need for it—congestion in Oxford is not severe by national standards, and this feels like a politically driven move rather than a response to real transport issues. It appears the City Council wants to push this through for ideological reasons, not because it's genuinely necessary. Charging people to access roads that have always been freely available is fundamentally wrong. It restricts personal freedom, penalises ordinary citizens, and sets a dangerous precedent. Oxford is the county town—I should be free to access it without being charged for the privilege. Public transport is simply not a viable option for many people due to personal, medical or practical reasons. The policy also harms local businesses, many of which rely on car access. Those pushing this idea are often public sector employees, insulated from the economic impact their policies cause. This is not good governance—it is coercive, anti-democratic, and feels like "sweating the assets" rather than serving the public. I urge the council to abandon this misguided and unfair proposal.	The consultation process appears to be inherently biased and structured in a way that favours the council's preferred outcome—introducing a congestion charge—rather than genuinely seeking the views of the public. The framing of questions often assumes the charge is necessary or desirable, subtly nudging respondents to accept its premise. In some cases, the options available make it difficult to register outright opposition without also appearing unreasonable or uninformed. Furthermore, the background material provided often emphasises the supposed benefits of the scheme, while downplaying or omitting legitimate concerns such as cost of living impacts, personal freedom, or economic harm to local businesses. There is little to no mention of alternative approaches, nor is there space for critical voices to be heard on equal footing. This approach undermines the credibility of the consultation and suggests the council is more interested in manufacturing consent than in engaging in open, democratic dialogue. A consultation should be a neutral tool for gauging public opinion—not a mechanism for justifying a pre-decided policy.	A major contributor to peak-time congestion in Oxford is the school run. A far more effective and fair solution than a congestion charge would be to invest in a comprehensive, council-supported school bus network. Many parents currently drive because no safe, reliable or practical alternative exists. Dedicated school buses—serving both state and independent schools—could significantly reduce car journeys, especially during the morning and afternoon peaks. This approach tackles congestion at its source, without punishing people for simply accessing the city. It's better for traffic flow, the environment, and parents' time. It's also far less economically damaging than a congestion charge and would have broad public support. Additional steps—such as improved park-and-ride, better traffic light sequencing, and encouraging flexible work hours—can complement this, but school transport reform should be the priority. Penalising drivers won't solve Oxford's issues. Offering practical alternatives will.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	It will prevent me as a teacher from getting to work in a timely manner as the only route available will have heavy traffic moved from the routes where vou are charging.	This is a poor thought out solution that won't cut traffic, just move it onto congested roads. I strongly urge OCC to reconsider this scheme as it will cause problems not just for myself but also colleagues.	Cheaper busses and more frequent journeys. Also parking is incredibly expensive.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	My family work very hard and need our cars to carry our tools in and my case to get to work (NHS worker) and what you have been doing in Oxford is destroving our quality of life and our mental health!	These proposals are going to cause more congestion on the other roads of Oxford; causing more traffic, delays and stress on the workino class, and the pollution will triple as your previous retarded ideas have!	Yes listen to residents, as the majority voted against your proposals and you ignored. Respect our Human Right of freedom of move and lead a happy life as the privileged residents of North of Oxford!!!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	I hope that there may be a reduction in traffic queueing on the Iffley Road, and on the weekly occasion when I do need to drive via The Plain I hope it will be less congested.	My only concern is that with all the permits the effect may not be sufficient. However, I think it's worth a try - very clearly continuing as we are is not an option, and I don't believe removing traffic restrictions (e.g., LTNs) should be considered - although we don't live in an LTN, we are surrounded by the and they significantly improve our experience of living in Oxford. (Plus, I remember that the queues were there even before the LTNs!)	I think there is a sense at the moment of too much stick and not enough carrot. If money raised from this really does go to subsidise bus tickets, that might help. More bus routes, especially radial routes (rather than into the city centre and out again) would also really help to make bus use viable for people who need to come in from Abingdon and get to Headington for work (a somewhat random example drawn from my acquaintance).
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Other	It won't be temporary, none of those suggestions are acceptable or come remotely close to undoing the issues this proposal will create.	Very negative	I visit my retired parents one of whom is disabled each day. A once 10 minute journey will now be greatly increased. Unless of course I pay £5 PER JOURNEY (!) which I will eventually have to pay once the 100 free trips run out.	The whole proposal is an absolute disgrace, I'm filling this out so I can live with myself knowing I've done my bit but truthfully it's a futile exercise. We all know you're going to force this through whatever the consultation says. I can't remember the Lib Dem's making this proposal public when they were looking for votes during the last election? The decision makers do NOT represent the majority. I've not spoken to a single person that actually lives in the city that are for yet more restrictions. Funny how those implementing them won't be affected due to the fact they don't even live here. And yes, that does matter. What on earth qualifies that charlatan Andrew Gant, a choir master to be in a position to force through such proposals? First it was to make the air healthier, then the next minute it was road safety and now it seems the priority is funding the bus service? Which is it? Recent studies have shown the air quality is fine. Finally, the practicality of the whole thing is comical. LTN's were introduced to move cars off residential roads and onto arterial roads (and those residents that live on them apparently - air quality and more congestion), now the goal is to remove cars from there? Where are people meant to drive? I like many work outside the city, I'll still be punished trying to leave and come home. What do you suggest?	Remove the LTN's and bin this proposal entirely.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Add new bus routes		Very negative	Anti car policies are regressive and will have a negative impact on those who cannot afford to live in Oxford but work for employers such as the university. Only wealthy Oxford residents will be able to afford to work in career jobs in the city, those who live in the wider Oxfordshire area will have to make do with working in less prestigious jobs in their home areas, with a highly negative impact on social mobility, entrenching inequality.	This will have a negative impact on Oxfordshire residents and businesses and will discourage visits to the city for the purposes of work, shopping, socialising and eating out. The anti car vendetta will eventually kill Oxford.	A continental strike team network serving west Oxfordshire villages via the A40.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Marston to summertown and access to JR will be severely impacted by the marston ferry road filter. The resulting traffic will be queueing on marsh lane next to residential properties. The marston ferry road has no residential houses plus a v good cycle lane and is not busy other than school drop off times. Particularly on the school holidays and Saturdays this measure is completely unnecessary and will cause people to drive a lot further than they need to to access summertown and/or kidlington		School bus for schools on marston ferry road
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make buses cheaper for all		Negative	People who have the money will pay, you are making it "haves" and "have nots" rather than a 'fair' system. You are also putting people off who use the theatres - I go to the theatre in Oxford 3-4 a month, most start at 7.30pm. I will just wait until 7pm and get there just on time rather than using any restaurants etc. Coming back late at night on the bus as a lone female is not pleasant and will just mean people don't go into Oxford. I'd suggest a 6pm cut-off, especially for going back into the town.	You have not considered the ice rink and ice rink users in your thinking AT ALL. Ideally, the ice rink would be located out of the city centre but it's not. No rink user WANTS to drive to the rink or WANTS to drive into Oxford. However, (not talking casual skaters), rink users are there 4-5 times a week at least doing figure skating or ice hockey practice. You HAVE to drive in most cases in order to get your kids (or yourself) from work or school on time - buses do not help. My daughter trains for ice hockey at 4.45pm on a Wednesday, I pick her up from School at 4pm in Abingdon. Apart from the fact that the bags for hockey are too big to transport on a bus (often turned away!), no-one can get to the rink on a bus for that time. The sessions can't be later as the kids train in age groups all evening and finish at 10.30pm as it is. Figure skaters start at 6am in the morning to past 7am and then straight to school - how do they avoid this and get to school on time? You need to have an exemption for rink users that could be agreed by the clubs involved - they could verify members. You are just going to have kids and adults stopping doing sport - I thought that was meant to be encouraged? We also have away teams from Cardiff, Sheffield, all around the country trying to get to the rink on a Saturday. They cannot use the Park and Ride after a 3-4hr drive - the buses don't let more than one or two (if you're lucky) on [bags and sticks again - they are massive]. How are they meant to get to the rink?? As for long term, the bus gates and ZEZ zone will do the same - commit to moving the rink then no-one will have to drive there or give regular rink users a pass for their cars. I am at the rink 5-6 times a week - the charge will probably make the sport non viable for myself and my son and daughter. When ZEZ is in, I won't be able to train at all - as I train at 10.30pm as a lone female and there are no buses home on a weekday and it's not safe (or possible) to carry a bag that heavy or that late from a bus stop (even if there was a bus at that time!!). When you get rid of the Dopers carpark this will worsen - £5 congestion and £10 weekday parking PER SESSION. That will mean most are forced to give up. Ridiculous.	Remove the LTNs. Make buses cheaper. Don't penalise those trying to take part in sport (ice rink) late at night or early morning when there is NO TRAFFIC.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Our only bus route stops well short of the city centre at Osney now and it non viable for shopping in Oxford or evenings out as it is too far to walk and doesn't run late or regularly - it also doesn't feel safe for solo female travellers. we are now being penalised again by having to pay to get into Oxford - as a family 25 trips to Oxford a year will mean we have to limit going into the city and travel elsewhere with better travel options for entertainment and retail as we do not have a viable bus option.	Don't penalise people coming from the west even further - we have had a sub par service for too many years now.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I'm very against; it's discriminatory against local residents especially those with health issues and elderly family who are likely to need to drive without causing the extra pollution by using the A34 and contributing to the already busy Abingdon Road and other relevant local roads. Please don't make thinas even more difficult for local residents.	It will add £80 per month just to get to work; as a single person in their 60s on a low income this is a lot of money. My own employers charging me to get to work!!	Make P&R car parks free; buses from P&R very cheap. Force North Oxford's public schools to put on buses from P&R to stop the congestion they cause in term time.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Other	It is understandable that making public transport cheaper would be beneficial but not for someone like myself who needs to travel to work by car within a time frame to ensure I am back to pick up my child from school. Driving makes this possible.	Very negative	This is a negative impact as would mean more money being spent on travelling through a city that I have grown up in, live in and work in.	I believe that this isn't something that should go ahead and oxford traffic is already affected by LTN's. Introducing zones or a congestion charge is causing a divide in the community and many families will struggle with the impact of more costs.	Removal of LTN's to allow traffic to flow smoother which would then result in less build up of traffic in itself
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	Too high	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	This will affect Oxfordshire residents who are not wealthy enough to live in the central Oxford area as it will have a negative impact on the already congested arterial routes surrounding Oxford such as the A40 and A34. These roads are already getting worse due to the rush to build new houses outside of Oxford to meet the Oxford city's unmet housing need. The closure of Botley rd and in particular the disastrous introduction of LTNs in east Oxford has all added to the issue of congestion on the arterial routes such as ring road, A40 and A34. Many people using these roads live outside of central Oxford and are using them to try and get to destinations outside of Oxford., but are stuck in traffic that is already being pushed outside of central Oxford trying to navigate across Oxford. It seems that as usual, to create a low traffic central Oxford, wider Oxfordshire has to suffer. Most people who live outside of Oxford (usually for cost reasons) have no choice or time other than to use their cars to travel. If you live in Oxford, it is fine to use bikes and buses, but for those of us who live in the wider Oxfordshire areas but have to travel to Oxford, this is not a viable option - either financially, or logistically. Making roads that are outside of the central zone that should be arterial routes / ring roads worse should not be the price paid to remove traffic from central Oxford. This is a scheme that is most unfair for people who live outside of Oxford.	No - quite simply, this is a stupid idea and only considers the well being of people who live in central Oxford, not residents of the wider Oxfordshire region whose lives are already negatively impacted by the congestion that is the direct result of too many houses being built combined with poor road traffic decisions and schemes (LTNS!) that have been implemented in recent years.	Make Park and Ride free. Reopen the routes impacted by LTNs to free up traffic flow at peak times.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	Negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Other	Public tram system. Buses are privately owned - why isn't the onus on them to fund improving their services?	Very negative	I am a self employed health worker who travels to multiple sites, through (rather than to) some of the proposed congestion charge areas. I take the quickest route possible so I can see my patients on time. I do overall support the need to reduce congestion but request the council to make permits for self-employed locums easy to self-attest to with proof of a professional licence to practice (there is no 'employer' and I don't think practices will thank you for the administrative burden of having to testify to all their locum staff's status).	Suggest 150 day passes for Oxford blue zone residents, instead of 100 - equates to thrice weekly which seems more reasonable as still under half.	Reduce bus fares Tiered bus fares (eg £1 within Oxford). A £5 return fare is unaffordable. Reduced fares for local residents eg an Oyster card equivalent for Oxford residents only, with discounted fares, and to streamline payment systems across different bus companies. We have so many tourists, why not encourage them to use public transport or have a small tourist tax that is ringfenced to improve local transport? The trickle down effect doesn't seem to be noticeable Please don't forget those who might not be disabled enough for a blue badge but who really struggle without being able to use their car. Major pavement repair works. I try to walk everywhere but since having an injury I've noted how terrible the pavements are for walking. Extremely uneven surfaces. Most of Oxford notably north oxford. Also not sure your end point is justifiable if, say, all traffic were electric vehicles? E-scooter and e-bikes are also traffic and are becoming increasingly dangerous. Pedestrians should be the most protected, as they are the most vulnerable, but as a pedestrian I feel increasing danger from bikes and e-scooters, not cars. What about neuter people not to use their cars?
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Neutral	There should be no charges at all	No	Other	The improvement of road surfaces pot holes etc	Very negative	This is an abuse of power. This wasn't in your information before election and hollow way isn't city centre in case you didn't notice. A tax on the less well off imademented for people who live elsewhere	Hollow way is a farce to charge people. Might as well charge people on st Giles far worse but that would affect north Oxford	Lose the ltns . You are trying to fix a problem of your own making. I will not be dictated to when I can or cannot drive as I need to ado various locations for work and family.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Other	Fix the roads.	Very negative	You created congestion with LTNs, and the punish the public by charging them to drive in areas that are busy due to LTNs. Traffic filters are a terrible idea let alone congestion charge which will not be put back into road based services and will instead be absorbed by the council.	Absolutely dreadful idea and an idea proposed by a council who are not serving the residents. Where was this policy in your recent election manifesto? Remove LTNs. Remove traffic filters.	Open up roads for driving on. Remove LTNs. Consider in times of accident on the ring road, open up the LTNs. Charging people is just paying for a mistake the council has made by installing LTNs.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Neutral	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	There is too much congestion across Oxford within the ring road, making it dangerous for cyclists and pedestrians. I do not think cars have an automatic right to drive through or onto central Oxford		I do like camera-controlled LTNs, and I think most residents do too. I think the negative rhetoric comes from external disruptors
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all		Very positive	I cycle or get the bus into the city centre. Either way I use an arterial route which is often clogged with car traffic heading towards St Clements. Reducing car traffic will make this faster and safer for me.		Close more roads in the city centre to car traffic, there really is no need for most private cars to drive into the historic centre. Further pedestrianisation will make the centre more appealing for visitors and give more space for people to get around. Longer term other forms of transit like trams or train routes from further out could be of benefit. Working with business that contribute to traffic, such as private schools, would help. Give favourable business rates to shops that have cycle delivery. Work with places like the Ashmolean to offer a discount on ticketed exhibitions for visitors who arrive by public transport.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	stupid idea, reduces freedom. Buses are way too expensive for substandard service so people have to drive. Oxford has been ruined already by LTN's and this will only ruin it further.	Bad idea. It is cheaper for two people to drive in and park in Oxford for a couple of hours than it is to get the bus. The solution is not to make drivino or parkino more exoensive!	make buses cheaper and more frequent.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive		There should be no charges at all		Make buses cheaper for all, Other	Remove LTNs. Improve car charging facilities and their maintenance.	Very negative	Why waste money on various traffic initiatives, when it would be much better spent on improving availability of housing and infrastructure required for the community (better drains, water supply, schools)?		Remove LTNs and do not make new ones.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	No impact	There should be no charges at all	No	Other	Improve the state of the roads themselves, for drivers and also cyclists! Dangerous potholes for both	Negative	Seem to keep throwing "ideas" at the wall with no joined-up thinking. Will impact visitors to the city the most, creating more reasons why would go to ie Witney or Reading instead of Oxford for leisure, and once again interesting none of this impacts those in rich north Oxford and has the biggest impact on poorer east Oxford. Maybe if you'd used your powers as part of government to manage the external contractors managing Botley you wouldn't have to do this, but you seem just as ineffective and doing that as everything else within Oxford city centre.		Remove ltns. Build fewer houses. Open botley road.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all		Very negative	Will be forced to use the ring road which is already operating at capacity particularly during peaks.	It will have a seriously detrimental impact on business within the the city centre. Businesses including shops, restaurants and bars will consequently suffer. Given air quality appears to be the main driver for this then why are EVs not exempt.	Leave it as is, good cycle, pedestrian and public transport are good enough 'carrots' without the need for the 'stick'.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Extend hours of operation for buses		Negative	I can't see that traffic will be in any way reduced, as people will either pay the charge or simply use more roundabout routes and clog up the other roads nearby. In fact, I'd even suggest that traffic around the outskirts of the city would increase, such as how it did when the first LTNs and bus gates were implemented.	I'd be very supportive of a charge for non-oxford residents to promote the use of public transport into and out of the city, for which the raised funds can then be put into continuing to improve transport. I just don't believe that charging those who live in Oxford to drive through their own city is a good or moral decision, especially for those who live in areas where the best 'direct' bus route can take 45 minutes to get to the city centre even without traffic. I also believe this scheme would only really effect the less fortunate; a £5 charge will hit a lot harder for someone struggling then for someone who wouldn't even notice it, in essence making it a charge only on those who are not that affluent.	1. Increase bus frequency and prices to encourage the use of public transport; give motorists a carrot, not a stick. 2. Go ahead with the proposed Cowley branch line reopening, to give the south of the city a train connection. I could walk to one of the proposed station sites, but currently have to travel into Oxford or to didcot (which actually takes less time). 3. I'd look at the viability of introducing a new kind of bus lane that allows traffic into the city centre only in the morning and then only out of the city centre in the afternoons/evening. This would mean that buses flowing in the direction of the rush hour traffic could skip it with inly the need for one bus lane total (of course, buses travelling the other way would be travelling opposite to the rush hour traffic and not require a bus lane).
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	You should implement some of these schemes anyway, without charging motorists any charge for driving around their own city.	Very negative	We should not be charged anything for driving around our own town. This is ridiculous, and the congestion has been caused by the LTNS. Remove those, and the Congestion were miraculously reduce. As will the pollution from cars having to go the long way around.	This is all been caused on the back of the LTNs which never should've been implemented. Remove them now.	Incentivise, do not force. There's nothing wrong with subsidising bus routes or increasing routes, or making it easier to cycle or walk. But not at the expense of the motorist, either in their freedom to move around their own city, or additional charges.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I do not think there should be a congestion charge now or in the future in Oxford	You really need to start giving electric car owners more freedom.	Take away the LTN's and traffic filters that will reduce congestion and traffic
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Other	Remove LTNs and traffic will flow	Very negative	Already have at least an hour extra on my journey due to LTNs, remove them and congestion will disappear	Stop punishing hard working people of Oxford, and think outside the box for a change	The removal of the current highways chief would help and listen to residents ideas, make certain roads between LTNs one way to ease congestion
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Oxford residents wishing to drive to see family members or to shop in the west gate centre will be adversely affected. Those from outside Oxford considering coming in to shop at the westgate will opt to go to Banbury, Reading, Didcot or elsewhere. Businesses will close. Many people are already considering leaving Oxford. Save the administrative costs and subsidize buses. Cheap or free bus travel would move many cars off the streets and people would feel rewarded, not penalized. Oxford would become a happier, more positive place to live. At the moment the city is divided, with many people deeply unhappy with the Liberal Democrat cycling ideology.	Please see previous answer. The streets of a city are its life blood. If you cut off its life blood, it will die.	Please see my answer to question 11
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking, Other	Improve cycling provision down Woodstock and Banbury Roads, which ludicrously seem likely to see an increase in traffic and danger to cyclists. Wealthy North Oxford residents exempt? Privat schools exempt?	Very positive	Traffic reduction is essential. Get people parking at Park and Ride in Eynsham or Woodstock, not coming by car to Seacourt or Peartree	Why direct all the traffic down Woodstock and Banbury Roads - lethal for cycling and walking already and the added infrastructure planned is not going to make safer without fewer vehicles	Make it safe and normalise cycling. Central London has much better segregated lanes, even Washington DC. Every time I come past the 'cycling city' signs I laugh - and I am a cyclist
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative			Remove all and makes streets one way. Also this survey is extremely bias!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I travel by public transport and live on a busy road. A congestion charge will make my life easier, healthier and more pleasant. Most of the time I don't feel safe to cycle on Oxford roads but this may help.	Please consider making the congestion charge on Marston Ferry Road 7am to 7pm, instead of peak times only. Otherwise traffic will increase significantly during the interpeak period and reduce the benefits of the scheme.	Improve bus service (higher frequency, lower cost). Better enforcement against cars parking/stopping blocking the road. Offer seoreated cycle lanes so oeople feel safe cycling.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Will make the bypass a car park. Temporary means will become permanent. Cutting off east Oxford to hospitals making it harder to get to early appointments. Not all can use a bus when not well! Problem with traffic jams caused by LTNs. Didn't que on Barns rd between towns rd or Oxford / cowley rd until LTNs. You made this so could blame vehicles by creating a funnel	This won't be temporary. If so with Botley Rd why do this and bring Oxford to a standstill! Why allow the Westgate to have a carpark!! Will kill Oxford. I already shop elsewhere!	Remove ltns. Turn side roads into one way system. Go up one come back they over. Why only east Oxford hit with ltns!!!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Extend hours of operation for buses		Very negative	It would make me think twice about coming to Oxford for visiting relatives, shopping, eating out, theatre trips etc. No evenings bus services and limited Sunday service. Car essential.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I would have to pay to get to the Train Station as a bus doesn't go there directly. If I have a parcel to pick up at Beckett street, I would have to pay as no buses go down there.	If you want to bring the congestion charges in why not just do it for peak times. The roads where the proposed cameras will be are pretty good otherwise.	Make sure the bus routes are in place to everywhere, not just some places. Stop cutting bus routes or making them longer by adding a longer route. Put roads to Park and rides that have been built but have no leases. Make the buses 24 hours to ALL places and makes sure it's safe at night. A bus stop should bee 5 to 7 minutes away with well lit streets.
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Buy Andrew Gant and all of the other LibDems at County a private jet.X I'd also like to see burley men in balaclavas with machetes and machine guns monitoring where people go around the city too. I would also LOVE to see millions more LTNs.XXxx	Very negative	I work in Children's Social Care, moving a child from A to B is hard enough with those fu(k!ng LTNs imposed on us. Pushing us onto the ring-road (as will be necessary sometimes) and be stuck with all of the rest of Oxford's traffic is unacceptable.	Yes, bin them. You didn't consult properly on the LTNs - i have zero faith you will take on board the comments this time.	Oh! I would love for Cyclox, Gant and the transport planners at County to get in the bin. That, i feel, would help immensely with the traffic issues we now all face. Also, free roller-skates for the elderly.Xx
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Add public cycle parking		Very positive	Less congestion and pollution on Abingdon road		
other	less than weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all		Other	I have paid my road tax and expect to pay further tax to bolster your own failed finance control.	Very negative	You are an elected body to help the public, your job is not impacting further financial burden on the public who are struggling badly at this time.	Yes CANCEL this before it progresses further.	Yes spend the revenue collected to provide for your citizens instead of claptrap hare brained schemes. Stop raising revenue from people who simply stop to buy a new paper or do their weekly shopping. Employ less people unqualified to control traffic's conestion. They create more problems than solve.
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other		Very negative	The war on car driver continues !	Very long winded to take part in the survey and I bet views of all will not be taken into account as always with this country council!	Provide better park and ride at free prices to all!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Firefighters	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative	I do not want these charge locations or any other traffic filters / bus gates etc to happen.	I do not want these charge locations or any other traffic filters / bus gates etc to happen.	Remove the LTNs so cars can move about more freely and thus reduce congestion for buses. It might then make buses actually useful again.
a parish, town, district or county councillor	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for young people, Add public cycle parking		Very positive	Congestion stops buses and therefore impacts those who need buses most, who are usually the poorest. Other people who really need to drive will also benefit - carers, blue badge holders, taxi users.	It would be good to improve cycle and active travel facilities as part of the spend, as the more people who switch to walking and scooting and cycling from car driving also benefit. I would like to see improved cycle parking at the P&Rs, for example. A focus on school travel would also be another way to reduce congestion and possibly more funding should go to this.	Congestion is particularly bad during the school run, so I'd like to see more focus on (and funding put towards) switching the school run away from cars. Improved facilities for those who walk (benches, public toilets, water fountains etc) would also be beneficial. And a switch from parking spaces to better kerbside facilities (including switching space from car parking to cycle and hire cycle parking) would be great.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	I never drive to work in Oxford. Prefer to cycle or catch bus (if weather too bad)	What's the difference between congestion charge and bus gates ?? Just go for ONE solution throughout Oxford. replace LTNs with bus gates / congestion charge.	A. See 12. Have ONE consistent solution for Oxford - ie bus gates throughout. Include ALL areas inc Summer town, Headington (where I live) B. Increase road capacity on ring road and A34 C. Make Eynsham P&R usable D. Invest in Cowley branch line
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Positive	There should be no charges at all	Not sure	Make buses cheaper for all, Make bus services more frequent		Very negative	I'm worried about how this will affect my work as a healthcare worker primarily in hospital but with some community based work	I think it is also discriminatory against people with limited mobility living in the county who cannot easily use other forms of transport.	Work should be done to improve flow round the a34 and ring road as currently these are too clogged to be useful or a meaninful diversion for city traffic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	This proposal will significantly harm the vibrancy, character and growth of Oxford! The costs to residents and motorists far outweigh the potential benefits. And there is no rigorous analysis or forecasts of what the costs and benefits are in terms of the preferences of Oxford residents, as opposed to those of a few Oxfordshire councillors. Quite authoritarian.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	I love in Marston, my autistic children go to Cherwell school. I regularly have to pick them up due to there condition. This proposal would make it difficult		
a resident of Oxfordshire living outside Oxford		Blue badge holders, Disability benefit claimants, Disabled tax cars	I don't	Positive	Neutral	Too low	No	Make Park & Ride buses cheaper, Add new bus routes		Positive	I think Oxford is a beautiful city with a wonderful heritage. Like many cities it faces challenges with regard to public transport use and vehicle volumes. I think limiting vehicle access is a priority. Similarly to discourage vehicle use pricing schemes such as proposed are one element of what should be a larger strategy to improve access to the city for all via alternative transport means.	I am disabled - and recognise that this affords me a huge benefit of continuing to be able to access the city by car. I wish personally that were not the case. I do feel that more can be done to encourage electric vehicle access rather than polluting diesel and petrol driven vehicles. I'm also at a loss to understand why the initiative to charge vehicles only applies to cars. I do feel that business should also have to contribute when their vehicles access the city.	Iraffic congestion is a pervasive problem in many urban areas, leading to delays, increased pollution, and frustration. Tackling it requires a multi-faceted approach involving infrastructure improvements, technological solutions, policy changes, and shifts in individual behaviour. Consider: I. Enhancing Public Transportation * Expand and Improve Public Transit Networks * Park-and-Ride Schemes: * Integrated Public Transport * Transit-Oriented Development (TOD) II. Smart Traffic Management and Technology * Adaptive Traffic Signals * Real-time Traffic Monitoring and Information * Incident Management Systems * Smart Parking Solutions * Connected Infrastructure and Vehicles * Autonomous Vehicles III. Demand Management Strategies * Congestion Pricing/Road Pricing * Low Emission Zones (LEZ) * Parking Pricing and Restrictions * Carpooling and Vanpooling Incentives * Promote Cycling and Walking * Telecommuting/Remote Work IV. Behavioural Changes and Enforcement
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative		You are no able to fix a pothole, and the charge not be temporary	Improve streets and build more routes
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I live in an area where buses don't go directly to JR hospital. I work shifts and never have a known time of finish. I like to go to the gym after work too. I cannot get buses from gym to home. But would have to get a bus from work to gym if this charge is introduced. I absolutely need to car commute to work. This is ridiculous. You'll be losing key workers.	RIDICULOUS. You have not considered the people that live here and work here.	
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	There should be no charge so no improvement I guess	Very negative	You talk about the central zone. This was previously just the city centre and Marston ferry road but now it goes as far as Hollow Way. Does the charge include people living in Cowley? We already have trouble getting builders do any work because so many live outside of Oxford and refuse to drive in. I hardly ever use my car and thought 100 permits a year was ok but your proposals are unclear who that applies to so I assume it doesn't apply to me. You already charge for parking permits, £80 for the brown bin and some things at the Redbridge dump. On top of high council tax and expensive housing Oxford is becoming unaffordable. Not everyone can cycle (which I do a lot)	Everyone knows it's not going to be temporary. It's permanent by stealth and you should be honest about that with people. I heard that nurses have to pay because the NHS won't. That's ridiculous. Make it just the city centre and not as far out as Hollow Way. Ban tourist buses like York does. Make tourists pay, not residents. Don't get me wrong, I am totally anti car and pro LTNs and I cycle everywhere I can. 100 access permits a year would be fine but I heard that that's no longer on the table for everyone. You have to be much clearer and honest with people about who it affects because rumours circulate amongst the haters. We all know that this consultation is a farce and you will implement it anyway.	So there was standstill on the Cowley road the last 2 weeks because of roadworks and single line traffic. Why did you not divert one of those directions elsewhere? You could make P&R more affordable and provide one at the bottom of the Cowley road in the field opposite the hotel by the ring road. I have a work colleague who has to drive to work and comes from the south but works in east Oxford. That's 2 buses from Redbridge and takes forever. Disincentivise households owning more than 1 car and ban people paving over their front garden to park 3 cars. That is linked to environmental factors too (not just flooding but also heat reflection). And it's ugly. There should be really steep charges for owning more than one car, whether parked on or off road or just bam more than one altogether. Exempt nurses and delivery drivers. Crack down more on HMOs. Crack down on employers who provide parking for their staff except for disabled people. And make town and road planners live in Oxford for some time to experience what it's like. I would just restrict car ownership within the ring road (plus Barton and Bli,)to 1 car per address and give those residents a number of free permits for builders and other visitors. Ban tourist buses inside the ring road.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	No impact	Too high	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	You will cut off anyone in Marston from accessing Summertown. I visit Summertown regularly to shop and also for exercise classes. Similarly, Oxford is already so cut off by the LTNs, by also now blocking St Clements, you're making it impossible to get around the city and forcing much longer journeys. For example Marston to Florence park for baby groups used to be a short drive, up Morrell Avenue and along Road a little. Now this would force someone all the way around the ringroad - doubling journey times and pollution	The LTNs should first be reversed in order to stop clogging up traffic in the city. Oxford is quite literally being ground to a halt. Forcing longer journeys, blocking ambulances - short cuts are short cuts for a reason - as they make journeys shorter. It is in no one's interest to increase the length of time cars spend on the roads. Where there are designated cycle paths on pedestrian walkways, we don't also need to double that with encouraging cycling on the roads as we have on Cherwell drive. It should be either or. This is just dangerous and problematic to pedestrians and cyclists alike.	The LTNs should first be reversed in order to stop clogging up traffic in the city. Oxford is quite literally being ground to a halt. Forcing longer journeys, blocking ambulances - short cuts are short cuts for a reason - as they make journeys shorter. It is in no one's interest to increase the length of time cars spend on the roads.
an Oxford resident	daily	Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Positive	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Negative	I think it will make it very difficult for people that live and work in the areas particularly if you live in an area and you want friends or family to visit or your vulnerable and you need extra support. I actually think people that don't need to drive through our property don't actually drive because it's not worth the hassle. I worry you are zoning off the city.	There should be buses for the private schools outside the city such as park ride sites.Again that needs to be better infrastructure for hospital workers to help the hospital workers park more remotely but getting on a quicker and easier transport system.	Buses for private schools in and out of the city. Better links and places for park for hospital with direct buses.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Other	What happens when people have severe travel sickness and can only drive to work, do you want us to lose our jobs? Not work and go on the dole?	Very negative	I have travel sickness and if you put these in place without giving people permits then I fell you will make people victims. It's never been a problem before.	The roads you haven't will be impacted and the new westgate will be derelict within a year	Oh I have plenty, you are more than welcome to contact me and arrange an appointment and I will sort Oxford city out.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	The introduction of these charges will force even more traffic onto the already congested ring road, barns road, and all main routes in East Oxford. The introduction of these charges LTNs has already impacted getting in & around East Oxford this will now also impact the City Centre further with Botley Road being closed for another 18months. This proposal means that people will be charged another £5 to drive to park in the Westgate car park & this will impact those city centre shops further, it seems that you want Oxford city to be a no go area for the car driver	This idea once again impacts the car driver in & around Oxford East, no LTNs or charges in North Oxford? Why is that? The emission levels around the ring road must have risen massively recently & these 'temporary' charges will increase those further. We pay car tax, we pay fuel tax give the car drivers in this city a break or the centre will die. I will be taking my shopping & leisure time elsewhere in future if these charges do come !	Remove the LTNs, open the Botley Road back up, schedule the roadworks that have been taking place on the same roads for the last 2 in the same areas at the same time & DO NOT introduce these congestion charges
a member of the public living outside Oxfordshire	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	The congestion charge would increase the distance of my journey to work by 5 miles. This would mean my car is on the road, in large traffic jams, for much longer periods of time. Putting more fumes in the air, adding to the traffic going around the ring road, and addins time and cost in fuel to my journey to work.	I think charging people penalises the less well off and allows the rich more access to the roads. Surely this is elitism.	By closing roads you are just putting the congestion problem out on to the ring road. Not solving the problem.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for young people, Make bus services more frequent		Very positive	The only way to speed up buses is to remove cars from the roads. Oxford has incredibly good park and ride systems so there is no reason why people (especially visitors) should not use them. I mostly get into Oxford by bus from Abingdon and the longest delays are always on the Abingdon Road. Alternatively, I cycle and having less traffic in central Oxford would make this a lot safer.	I think the fact that the areas most affected by the charge include the Westgate car park etc. is a very good thing!	'- Electrify the Oxford-Didcot line. This would mean better integrated rail services and mean more people would use stations like Radley, reducing car traffic into the city. - Cycle path improvements (in particular Woodstock Road ones being cut back was a mistake, speeding up of Radley cycle path to make active travel/commuting easier) A bit tinaer term. but Oxford would be ideal for trams... (botley rd-cowley rd. abinadon rd-woodstock rd)
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	the impact will result in increased traffic on the ring roads around Oxford to the detriment of users such as myself.	it is likely to have a negative impact on people from outside the centre especially who would normally use the retail outlets in Oxford	speeding up the work on Botley Road would be very helpful
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	Too low	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	It will make buses a more efficient method of transport and reduce car numbers making it safer to cycle		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Very negative	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	Traffic in the centre of Oxford has huge externalities, making the negative effects extend far more widely than the factors considered by the individual choosing to drive. Air quality, noise, safety and comfort are all significant factors that would be vastly improved for the pedestrian, cycling and scooter riding population by the reduction of private vehicular traffic in the centre of Oxford. Additionally, the reduction of car traffic will synergistically improve the rapidity of bus transportation, making it significantly faster, more viable as an alternative mode of transport to and through the centre. Any exemption to the congestion charge for commuter cars will fundamentally undermine the effectiveness and the intent of the congestion charge.	Currently, my impression is that lots of car drivers in Oxford do not feel that buses provide a viable alternative. It is important that car traffic is reduced as far as reasonably possible to improve the rapidity of public transportation within the city, and exemptions should be made only for users who have no alternative (disabled people, carers, residents within the zone etc.) and NOT for users who merely feel that they would be inconvenienced by it. Reinvestment of any funds should go into the improvement and the promotion of public transport as a real alternative - subsidising fares and improving services. I do not use buses myself (I travel almost exclusively by bike or on foot in Oxford), but I strongly support the use of any gained funds to subsidise bus services.	There must be some sort of "carrot" to go with the "stick" in general. My perception is that there is backlash whenever prohibitions or charging of driving are made in any form. This can only be overcome if there is a clear and credible demonstration that there is some other benefit being provided - otherwise the belief from drivers will always be that this is profiteering or some sort of witch hunt against them. Investment into improving public transportation, and making the provision of buses a real alternative to commuting by car is vital; measures such as investment and subsidisation of car parking at the park & ride sites should also be considered.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Remove the LTNs, congestons charge and permit nonsense.	Very negative	I am going to continue to sit in major traffic jams and my commute from outside of Oxford to my place of work inside East Oxford is going to continue to be stressful and COST ME MORE MONEY! This is a dire decision and one that cannot go ahead. The council have absolutely no clue how much of a negative impact these charges will have on working people of Oxford. I feel for the small and large businesses of Oxford who have stores in and around the city, who will end up having to close down due to this ludicrous idea. The Westgate will receive less people through its doors by a margin and could lead to it having to close or stores leaving the city. Remove the LTNs/congestion filters from the agenda. It is going to kill this city. There will be a recruitment crisis in many sectors if this agenda is carried out. I am concerned that my place of work would lose many teachers due to this issue and the quality of our education system here would therefore suffer. It is crazy that all can be said by the council is that this agenda is received positively by the people of Oxford. Every single person that I know in Oxford finds the LTNs and idea of charging people another 'congestion charge' (TAX) absolutely absurd. All that is happening to traffic is uprooting it and placing it in another place. When LTNs were not in place, traffic was better than now! Often, with the LTNs in place, it can take 3x the amount of time for me to get to work, this is due to funnelling everyone through one street. Think of the traffic chaos this will cause.	It's extremely interesting to see this being rolled out to everywhere but North Oxford. Why are there not proposed congestion charges elsewhere? I assume that many councillors live there, hence why they will not impose the charges/LTNs there. Concerned that many people who live on the outskirts of Oxford are being overlooked. I cannot bike 30 miles daily to my place of work and it is not appropriate to use a park and ride as this adds unnecessary time to my commute. What about these people? What about people who car share to a place of work?	Train line, trams, add additional lanes to roads in the city. Accept that people want to drive to places! Stop forcing everyone to use a bike. Allow people to use e-scooters without having to pay a company to hire one. REMOVE THE LTNS!!!!!
an Oxford resident	daily	Blue badge holders	I don't	Negative	Negative	There should be no charges at all	No	Add new bus routes		Very positive	Shocking and Drs	You should not be making us pay to drive around Oxford	Open up LTNs
a member of the public living outside Oxfordshire	less than weekly		I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Neutral			Please provide toilets at Peartree park and ride. Please also have express buses rather than spending 50 mins on the bus to aet to the park and ride as the bus stook at dozens of stops.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Very positive	The number of cars needs to be reduced so buses and cycling are the most attractive options (and on the rare occasions we need to drive, the congestion isn't so bad).	Commuters to central Oxford should not get free passes unless it is impossible for them to get in by other means (e.g. due to disability). The proposed number of passes for residents is too high. 25 for city residents and 10 for county residents is plenty per year.	Increase parking costs in the city (or even better, reduce capacity) to encourage Park and Ride use.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	People will stop coming to Oxford if they have to pay high congestion charges and parking charges when public transport is not reliable and it is expensive. Direct neaative impact on local business for sure.	Until public transport improves we should not implement negative changes for drivers.	Better and cheaper public transport for residents like in many European cities.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	I don't drive into Oxford during the day. I take the bus in every day and am often stuck in traffic behind cars going into/out of the city at rush hour. Adding permits for people to drive into work in Oxford seems like it won't mitigate rush hour traffic. So it doesn't seem to me this will affect me much.		Permanently close the Westgate car park. This creates traffic jams onto Abingdon Road and causes delays to all buses going to the city centre. Make park and ride cheaper, make buses cheaper.
an Oxford resident	less than weekly		I don't	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	You're strangling the city. Your constant failure of traffic management is killing the city.	I listened to the member for traffic management on bbc radio Oxford making reference to the about of cars coming into the city for the westgate shopping centre. Didn't the council approve this building and car park ? And now you're complaining about it !	Cheap bus travel at peak times and free parking at the park and ride.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	Too low	Yes	Make buses cheaper for all		Very positive	I frequently cycle around Oxford. Dense, congested traffic makes cycling slower and less safe, so any measures to reduce congestion are welcome.	I think that 100 free passes per resident is significantly excessive, and would limit this to 10 free passes per household per year. This would be sufficient to cover the few times a year when it is truly necessary to drive (given the broad range of permits available).	Require school pickup/drop-off to be exclusively by active or public transport for all schools, including private schools. Ban coach parking at the Plain and on St Giles. Provide fully segregated cycle lanes on all main roads into town (Abingdon, Botley, Woodstock, Banbury, Marston, Headington, Cowley and Iffley).
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	You as a council, have a very low opinion of motorists,when in fact you should be charging the law breaking cyclists that use the roads as well		Yes, get cyclists yo obey the law and not ride two or three abreast and get rid of the LTNs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	All roads should be open and free to use by any vehicle, these restrictions are just punitive to the motorist most of which have no other feasible option of transport for their journey.	Don't introduce these or any other restrictions that involve closing roads to motorists.	Remove the tins, bus gates and other planned restrictions for motorists as these have all added to congestion and made daily life considerably worse, they were initially brought in as a trial which has clearly failed so why not "trial" removing them and see if the situation improves
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days all your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	This is the first time I've seen the suggestion that commuters get a free pass, which is the single most sensible idea made since this the start of this proposal. However, as it goes all of the against the espoused objectives, its unlikely to be implemented. I live on the edge of Oxford and commute into the city center daily, and have done for over 20 years. Your plans for 100 free days cover 40% of a standard working week, so that means my costs would go up considerably just to get to work. Buses dont go from my house to where I work without 2 changes adding over an hour to a single journey. I would have to drive in via Woodstock or Banbury roads, to avoid a charge, which is x2.5 longer than my current commute, adding more cost to me and polluting the wider city. None of this makes logical sense so its very hard to support the proposal.	This is a hearts and minds scenario, where you are looking to change peoples behaviour and perceived attachment to cars. Restricting person choice is rarely successful in winning people over. Electric cars don't pollute, so your arguments about air quality dont add up, this looks to be aimed at stopping car owners driving. I assume you are expecting van ownership to increase?	Reducing traffic is an unrealistic objective. LTNs made things worse, traffic management systems promote free flow not restrictions to enable better journeys for all. Try that!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't			There should be no charges at all	No	Other	To remove the LTNS	Very negative	It' restricts my access to parts of Oxford i work I.E North Oxford. It also will put extra time to and from hospital appointments by at least two hours.	The ring road around Oxford will become gridlocked and add extra time people's journey to and from work and Dentist appointments and hospital appointments. It will restrict parents taking their children to school and back. Why is Holloway and Marston ferry road in the congestion zone , when neither are busy ,plus Marston ferry road was built to ease traffic goind throush Lono wall.	Remove the LTNS it would improve the flow of traffic
an Oxford resident	daily		I don't	Neutral	Negative	There should be no charges at all	No	Make buses cheaper for all		Neutral	As I and my family don't drive into central Oxford this would have limited impact but I query why commuters driving into central Oxford would be allowed a permit as surely this is the kind of car use you are trying to limit? Other than raising some money from those wealthy enough to pay to drive into central Oxford I am skeptical that this measure will actually reduce congestion.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	No impact	There should be no charges at all	No	Other	Make the roads better. Clear lanes for cars, bikes, buses & pedestrians. The road system is chaotic & has been designed that way. Take bike off the road, & allow 4 wheels - cars, buses, etc ti navigate properly, then there would be less issues.	Very negative	Oxford is becoming a poorly planned city. It's focus is students, tourists & buses. As a resident, & a car owner (we are after all in the majority) we are being singled out & it's making life miserable. There are too many tourists, look at how residents are reacting in other countries. Put a heavier levy on tourists & that will reduce congestion. Stop pandering to bikes. The city was built on progression, not on this lazy thinking of it being built for the past & we should do likewise. That's plain wrong. Businesses are running away from Oxford & if I was BMW, I would close the factory & then see the impact on residents. Stop the silliness & focus on making life better for residents & helping all transports coexist, like they do everywhere else.	Bad idea. Please drop the Marston Ferry link road one. It's a very important link road & was designed to ease congestion & facilitate traffic. It'll have the opposite effect.	Stop focusing on the above. Buses can work but shouldn't be the focus. Support everyone. Please.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	This will largely push cars that would have used the ring road on to the Woodstock road, which is already congested	I don't think increasing the price by size of vehicle is fair ie why should someone in a a 25 plate AMG a35 pay less then someone driving a Dacia? A better system would be based on the value of the vehicle, therefore people would be paying more proportionally	Mandate cyclists use cycle laces where available, the number of cyclists in the road next to a cycle path is ridiculous
a resident of Oxfordshire living outside Oxford			I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	No charges should be be taken	Very negative	The Oxfordshire council is just trying to find another source of income to boost their business revenues and profits. Also, they best represent their main sponsor, the Oxford Uni, and do not care about the residents. By introducing charges, the Oxfordshire residents who rely on travelling to Oxford by car either because of the time it takes to get to the city centre by bus or because of the inconvenient location from the nearest bus stop, will be penalised with an additional charge. Those who drive to Oxford and park there already pay extortionate prices for parking, but instead of improving and increasing parking options in the city centre, which would also improve traffic, the council just wants to add to the price, remove the traffic and still get the same money they earn now.	No congestion charges should be implemented at all.	The council needs to improve and extend the available parking in the city centre - instead of queuing and chasing for a free parking space at Westgate or Oxpens, if there were more free spaces, the cars would be moving around quicker without blocking the roads. The council should invest into the multi-storey parking at Oxpens at least - that would significantly improve traffic conditions there.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Other	No income should be generated	Negative	Like LTNS create more traffic in Other area's e.g ring road.		Get rid of the car industry that the British economy depends on.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	Too high	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all		Positive	As someone who cycles as much as they can but also at times needs to use a vehicle this scheme will benefit my safety on my bike, and the 100 day free pass should hopefully be enough to cover the limited times I do use my car in those areas.	The potential influx of people using the park and ride and buses must be looked at carefully. I often choose to cycle, even in awful weather, as buses are usually overcrowded, late, or potentially don't arrive at all. If this system is to succeed the buses must be improved, in terms of punctuality and cost. The proposed £5 charge is less then 2 bus return tickets to travel into the centre, the enticement to avoid using your vehicle in the permit areas must be the optuon to use a cheaper and reliable bus service.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I'm a single mother living in Marston who relies on the Marston ferry road to get my son to his state school and myself to work on time. He has an EHCP and is well settled in his school and cannot be moved and he cannot ride a bicycle. We are not eligible for the special needs permit because he doesn't receive support from the specified programs. This CRAZY SADISTIC proposal will add £1325 to my annual expenses that I absolutely cannot afford. You people are bastards for even proposing it.	This CRAZY idea will just cause more congestion on routes to the ring road and the ring road. You people should f*ck off.	Make buses free, more frequent, and with more routes between summertown, Marston and Headington. If you are dead set on imposing this madness, allow permits for all children with EHCPs.
a representative of a group or organisation	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	just allow cars to use the roads	Very negative	I drive across the Marston ferry road at peak times daily and there is no need for conxestion control. We are a special need club and most of our members cannot use public transport or walk or cycle. We want to promote healthy living and having restriction on the Marston Ferry Road seems to be at total odds with getting people healthy and using soorts facilities	More emphasis should be put on solving the Botley Road issues rather than penalising road who want to access the city sports facilities	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Other	Use it to remove all LTN's in Oxford. Thus reducing the congestion created because of them and the god awful mis management of the Botley Road saga!	Very negative	As a resident already cut off from Oxford due to the lack of planning skills by network rail and Council officials in charge of the failure that is the Botley Road, it will undoubtedly restric me further from accessing properties for which I have to visit in each and everyone of these zones daily. My company will expect me to still visit these areas at my expense as there is now way they will cover the costs. Eventually, making it impossible to sustain my job and employment.	Stop calling them temporary for a start. We all know they will become permanent once the trial is over. Why yourselves and a certain someone in charge of traffic are he'll bend on bring Oxford to a standstill and pushing more and more people away from our beautiful city is beyond me. Charging people to enter the city will not improve the poor management of the bus companies and their dire service. Neither will it aid it magically stop the pollution. It will merely move from one place to another, as it has because of the LTNs. Net2ero is a myth and an expensive lie.	Slack all officials in charge of Oxford transport. Employ people who actually understand how traffic works and it's pollution. Remove all LTNs as these are the main cause for the delay in buses reaching their customers who pay a premium for a sub par service. Actually force cyclists to use the expensive cycle lanes provided instead of allowing them to do as they please. They are another reason so many buses are delayed, as they have no regards for any other road user or members of the public. Stop allowing private hire vehicles the luxury of bus lanes and gates. As time and time again I see them holding up buses and other traffic by hogging them for no reason, not to mention parking up in them. Add in to the fact 9 out of 10 cars doing the school run these days is a parent using their taxi to enter these areas because they can do/vids their whole purpose. It's a serious abuse on their part. Also try and regulate private hire a bit better, I mean how may taxis and providers does this city need? Hold the bus company's to account for poor service. As Oxfords traffic issues are not always to blame for their poor and untimely service. If your greed still persists in pursuing these ridiculous charges them only have them in place between 7.30am and 9.30am and again at 2.30pm and 4.30pm as these are the most common times for heavy traffic due to shool drop offs and most people's working schedules. This way people who wish to come into the city to shop will be more inclined to between these hours as it would not effect them or others who live within the city. Or those like myself who have to drive into these areas at certain points of the day for work. Ban or regulate the amount of fast food delivery mopeds allowed within the city. They are becoming a plague to the city. Many I am sure do not hold the relative permits or licences to do so. Not to mention the weave in and out of traffic with no regard
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Extremely restrictive	Extremely restrictive, unnecessary	Offer more e-scooters at a lower cost in a higher variety of areas alongside their charging stations
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add public cycle parking		Very negative	I don't drive into Oxford to often but when I do I have a very good reason for why driving is the only option. As a citizen of Oxfordshire I am telling you, my elected representatives that I do not support this proposal in any form and it would be		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	About right	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	I tend to travel by bike and bus, and this would make the buses more reliable	I would make a through route along divinity road, to relieve congestion at the Plain, so I would remove the LTN here.	I wonder if there should also be some restrictions in North Oxford / Summertown as this also gets congested. The buses from north Oxford also need to be improved. And I would add more buses along Marston road
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Very negative	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	It is important to discourage car use in Oxford so that more people are able to cycle safely around the city and so that bus use is encouraged.		

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I'm based in Marston, the kids go to school in Summertown, they swim in Summertown, they football train in Cowley, they play football in Headington. Anywhere we want to go other than Headington or out of the city will be restricted. They are not going to cycle in the dark and all weathers on Oxfords dangerous roads with all their kit, it's more likely some activities will be sacrificed. I sympathise with the sentiment, but don't believe charging is the answer. Good news for van and motorbike sales though.		If you want cars off the road then public transport has to be affordable and the buses actually have to be on useful routes and frequent enough to be viable. The s13 through Marston is awful now, infrequent, so can't be trusted. Get a proper bus service linking Summertown and Marston and things would be better.
a resident of Oxfordshire living outside Oxford	weekly		I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all		Very negative	The proposals will not reduce traffic, it will increase traffic as it's pushed onto an already stretched road network. This alongside LTNs will make commuting to work take longer as you drive cars onto already busy roads. I would like to see the removal of all LTNs which will allow a despersal of traffic across available roads. I think businesses will suffer further and footfall will reduce even more.		Open the road network with the removal of LTNs and other restrictions, this will improve traffic flow and reduce congestion.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I am person with mobility problems who relies on my car for everything from commuting to work, through everyday errands to social interactions. You are making my life too difficult with these proposals. You are pushing me into applying for a blue badge and disability claims even though I can live my life without it, as long as I can use my car. There is no bus service in my area so you're just making my life harder without offering any alternatives	This is a terrible idea of ableist people and it is disgusting.	Get a decent bus service as a first step. A 15 minute walk just to reach a bus stop is not an acceptable bus service.
a resident of Oxfordshire living outside Oxford	daily		I don't	Very positive	Very negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	Less polluting traffic. Not just ICE pollution but brake and tyre dust.	No need for commuters, like myself, to be exempt. They, like me, can use park and ride.	Sorry, no, this is a good idea though
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other		Very negative	I am a head of faculty at a school within the bus gate. We are already losing colleagues due to the high volume of traffic coming from the north down the Banbury Road in my village. There are two buses on a Tuesday and Thursday between 10 and 12 noon and my two children go to Cherwell school as well. I will be unable to get to work on time and my children will be unable to get to school, the congestion of the Banbury Road has not been thought through and we are losing talent due to these proposals. Several staff will be hugely impacted by this and should be included in having a pass to be able to get to work on time and leave	You need to make teachers part of it as otherwise we will lose these key workers who cannot afford to live in Oxford and do not necessarily live on bus routes. You should also be encouraging the private schools to have shared buses as when they are not open there is far less congestion.	I have already stated that you need to encourage the private schools in North Oxford to have buses and car share because when they close two weeks before the end of term for state schools and often late start they make a huge difference. Additionally this one school should go back to starting at their originally proposed time of 9 am. Since they opened and move their time back to the same as Cherwell that has increased congestion changing the picture...
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative	I do not think the policy is needed	I don't think the traffic in Oxford is that bad, it gets busy during rush hour, as it does in every city. Closing main routes and forcing people to use the ring road will cause back ups on the ring road which is probably where traffic is the worst currently. This will also discourage people from going to the centre and spending time and money at local businesses. There will be no winners	As I said, I don't think traffic is that bad and I drive every day. If you want less cars then the buses need to be far cheaper, for a family of 4 it is the same price as a taxi for one way and a taxi is far more convenient and pleasant. The roads are so bad cycling is not comfortable, if you want more people cycling fix the roads and create more cycle paths
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative	Congestion in Oxford isn't a problem when I occasionally drive in (evenings and weekend daytime) and it would be a negative impact on me to pay to occasionally enter Oxford. Car parking costs are already high enough without adding additional costs.	This is a money making scheme. Congestion isn't a problem in Oxford.	
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	About right	No	Make buses cheaper for all, Add new bus routes		Negative			
an Oxford resident	daily		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Repair the roads	Very negative	A free society should enable people to make their own choices. The introduction of filters and zone charging amounts to bullvna.	I have no faith in the authority to take any notice of the Consultation	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Absolutely ludicrous. Will bring oxford to a halt on all surrounding rounds particularly the a34 and ring roads.	Businesses will close. There will be nothing left in oxford	Expand A34
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice. Blue badge holders	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It will be impossible to drive to Westgate without passing through a permit area. Expecting everyone to take the bus with their shopping bags etc is ludicrous when you consider the capacity of the buses.	It's quite obvious that this scheme will be introduced regardless of the feedback received, much like every other 'proposal'. So it seems a waste of time typing out my comments when they will be completely disregarded anyway.	The amount of time Botley Road has been closed for is an abomination and has caused unparalleled disruption to those who need to use it. People need to be seen to be held to account for the chaos that has ensued as a result of this ridiculous situation. Surely the reopening of the road should be the absolutely priority in terms of restoring the traffic flow around Oxford.
an Oxford resident	daily	Frequent hospital patients	I don't	No impact	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral			Tell the ltns away
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Other		Very negative	Having to pay to use local roads is wrong		Open side roads Widen the rino road on Elsfield way to 2 lanes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses, Add public cycle parking, Other	Buses need to be safer and people need to feel safe traveling on public transport. Bike parking also needs to be safer with CCTV due to high theft rates.	Negative	The ring road is already to congested.	It appears to be dividing Oxford into two cities. If you truly wanted less traffic people who live in Oxford should be allowed to drive in the city free of charge and not restricted to 100permits which does not even cover 2 days per week for a year. The charge locations should be for anyone living outside of the city venturing into the city charges on every entrance to Oxford from the rino road.	The university and hospital creates the most traffic have designated university or hospital shuttle buses free of charge for people who have no option but to drive into the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	I commute daily for my job in the public sector - 100 passes per year still leaves me paying £800 per year just to get to work (based on working 5 days per week). This is too expensive - non-central Oxford residents need more permits per year, per car. So few permits will lead people to leave the city to get clothes shopping, go to garages, etc as it will be cheaper - businesses will suffer. Bus services currently are very poor with limited services being very expensive, particularly for those of us living in Botley, and therefore it's cheaper and easier for us to drive to places like Abingdon.	Shutting off roads just pushes traffic to other roads - the LTNs in Cowley being a perfect example of this: the LTNs have pushed all of the traffic on to Cowley/Oxford road where the traffic queues and creates severe air pollution for the residents unfortunate enough to live there. This will do the same.	Make buses cheap, regular and reliable. A big push could help convince people to start using them and then traffic will reduce. E.g. 4a in Botley is not frequent enough for it to be a useful service despite serving a large residential area. It takes me 1h45 mins to commute to work via bus (3 buses and 20mins walking), vs. driving which takes me 40 mins - until the buses are sorted people won't use them. A single bus ticket for £3 is extortionate when you are only doing a 1-2 miles in that journey - driving is far more efficient from a passengers persoective.
a resident of Oxfordshire living outside Oxford	daily		I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all		Very negative	I commute to oxford to work at a hospital. I cannot use park and ride as the bus times do not match up with my shifts and childcare responsibilities. I cannot cycle because of a joint problem but i do not qualify for blue badge. The proposed scheme would shunt all traffic via marsh lane and london road which are already heavily congested. With other routes having the charge it would price myself and others out of working in oxford. Staff at the OUH hosoitals should be exempt	It will cause economic ruin for oxford.	Invest in the park and ride so that the buses run more frequently say every 10 minutes to key sites like the hospitals. Help reduce the costs of living in oxford so more people would not need to live outside and commute in. More often than not people use cars as there is no other choice.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make bus services more frequent, Add public cycle parking		Positive	I seldom use the roads where a charge will be incurred so I'll be able to use one of my free resident permits when I do. It would be nice if the system does actually reduce car usage in the city.	How about congestion charges on Banbury and Woodstock Roads, in vicinity of the private schools? If they got some of those children on bikes or buses, that could really improve things.	Abolish private education, Or make independent travel a compulsory subject at these schools.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I look forward to this reducing traffic in Oxford		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	integrate buses so that tickets valid across all services	Very negative	It is a tax on locals using cars to get around. It will have no impact on traffic. Rich people will pay and poor people will be penalised.	It is a money making scheme and will have plenty of unintended consequences. Much like the LTNs which have made traffic worse and public transport a less attractive alternative.	Park and ride needs to be boosted to remove cars going to hospitals. School buses need to be supported to ferry kids in from outside in coaches rather than all these parents driving their kids in.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't do it	Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	No impact	Too high	No	Make bus services more frequent		Very negative	It would stop me coming into Oxford at all. To shop, Vistula restaurants ir other amenities	I think it's wrong	
an Oxford resident	weekly		I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Positive	I hope they will improve traffic flow.	No	No
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	No charges to be implemented	Very negative	No charges should be implemented. Open LTNS that has caused the congestion	Scrap the congestion charge.	Scrap the LTNS. Introduce one way systems. Traffic calming.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very positive	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very negative	I am special needs teacher in Oxford city college. I am a military veteran who has mobility and ptsd issues. I live in a small village 12 miles away with no bird service I cannot walk more than 5 mins so can't even use park and ride I would have to leave the iob I love and work elsewhere	Instead of stopping motorists repair the roads, increase mandatory bike lanes and increase bus services to smaller villages outlying Oxford	Instead of stopping motorists repair the roads, increase mandatory bike lanes and increase bus services to smaller villages outlying Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	I wholeheartedly oppose the policy. and consequently do not have any interest in the results of any proposed income generation	Very negative	This is yet another short-sighted move, which will have a disastrous effect on local industry for no discernible purpose beyond serving the limited ideological perspective of local government.	See above.	Removal of existing traffic calming measures, expansion of the ring road, reduction in housing built on the outskirts of the city
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice. Blue badge holders	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	We need 24/7 buses in all areas to enable people on shifts un sociable hours to travel	Variable speed limits depending on times more bus routes listen to the public who respond to this survey.	
a member of the public living outside Oxfordshire	less than weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	We have to deliver our daughter to the university. We already got stung in the ZEZ when she was at St Peter's, now we're going to be fined every time we deliver her to her accommodation. How do you propose we do this without a car? Shall we bring our helicopter instead?!	I just can't believe the good folk of Oxford vote for this nonsense.	Run cheap and frequent buses. There was no bus my daughter could trust to get her to the JR when she was ill - she had to pay for a taxi. Both ways. You should be ashamed of how your running the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Emergency service vehicles	I don't	Negative	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	I'm a paramedic and commute through the city, I don't understand why you choose firefighters but ignore all other emergency personnel.	All frontline emergency services personnel should be free of charge and exempt.	Stop people coming in who don't live in the city.
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Disabled tax cars, Unpaid carers	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	You can't take ice hockey kit on a bus, so you have to go by car. This will have an impact on people using the rink.		
a resident of Oxfordshire living outside Oxford	weekly	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative	Oxford is so anti car and this is another ill thought out scheme	Like the LTN you will have a survey not like the results and just go ahead. OCC don't serve OCC residents.	Get rid of the scooters and crush all ebikes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	I have no choice as a voter this is not what I voted for but now have no choice as to what mode of transportation I decide to use -I feel like I am being dictated too and that councillors do not listen to the electorate and have their own personal agenda	Both City and County councils are not listening to car drivers who have no choice but to use their car for whatever reason - so you get 100 passes and then have to pay / so I work full time pay my bills and how and what mode of transportation I choose to use should be my choice and I should not be dictated to by anyone -you have gone about this the wrong way and have totally got voters offside - it's a done deal and I am not sure why I am even bothering to complete this survey as you only listen to the minority and not the maiority	You will never tackle this issue -you will just push traffic and congestion onto other roads and buses will still not run to time and will get caught in traffic so still run late
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent		Very negative	I travel into oxford every day by car, the buses are very slow and not frequent enough, there are no trains from witney!	Congestion is bad enough as it is, drivers will use other routes to get into work and cause traffic elsewhere, not a good solution	Get trains or trams in place from neighbouring towns, we have no choice to get into Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	I drive an electric car. That does not cause pollution. The charge should apply to diesel vehicles and possibly petrol cars after a phasing in period		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	No	Add new bus routes, Make bus services more frequent, Other	Remove LTNs	Very negative			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice. Blue badge holders	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	This will dissuade me from visiting Oxford for evening events (theatre, sports etc) and I will prioritise other cities. It will also make me less likely to visit during the day for shopping and museums. I already have to drive to another part of the city rather than use the A420 Botley Rd or Seacourt p&r as I would normally, this makes visiting the city harder. I've not noticed exceptional hotter volumes of traffic nor open issues situation hus times when using the park and ride		Close routes to through traffic, but designate nearest parking to access routes in for city centre access.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other		Very negative	I work at oxford ice rink, this will impact my hours I can work there as I will not be paying £5 per day. Shifts often finish in the early hours of the morning such as 2am. I am not able to get a bus there! I also play ice hockey, I cannot get my kit on a bus.	This is very sad, will discourage lots of people from playing sports in the city centre and can end up with teams being destroyed!	A pass for ice rink users
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No			Very negative	Will reduce many people wanting to visit	DO NOT DO IT	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all		Very negative	I have been a charity volunteer for over thirty years as are many of my friends and now your asking us to pay to do voluntary work with children if you want to reduce traffic sort the roads out a blind man could have designed a better system if you want more people to use the bus make them cheaper and charge network rail there the problem not us If you want to reduce traffic stop doctors from amalgamating there services so you have to drive half way across Oxford to see a doctor	We already pay road tax fuel tax we've already lost the city centre to the university and now they want the rest of Oxford	If you want a long term solution it's going to take investment if Oxford had two underground lines from the four park and rides crossing the city centre making travel for those not living in Oxford but wishing to visit the city centre for work or pleasure quicker and easier
a resident of Oxfordshire living outside Oxford	daily	Business cars used as goods vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Remove ALL LTN's this will help ALL of Oxford!	Very negative			
As a medical student, I have to commute via car, often to other areas around the City, in addition to Oxfordshire and other nearby towns. This is so I can attend medical placements at rural GP's and district hospitals. Public transport to these locations will be much more expensive than driving, very time-consuming, and often requires many transfers. I commute with fellow students whom I pick-up and drop-off, most of which live at a point whereby I will have no choice but to drive through a congestion charge point (otherwise face a very long and polluting diversion). For example, I live on Magdalen Road and pick up my friend on Cowley Road. To avoid the congestion charge I would have to use the ring road, circle around headington, and drive back through the other side of St Clements. This diversion would take significantly longer than just driving through the congestion point. As medical students, we have no income, and our financial support is very limited. Unfortunately, once my "passes" have ran out, I will have no option other than to face a significant delay to my already-long commute, or suffer by paying a £5/day charge (which would otherwise be spent on food). The scheme fails to assess the impact this will have on those at a financial disadvantage, especially students, by introducing a blanket charge in which those with comfortable income will just pay. I am bewildered at the oversight to this, and am disappointed that future Doctors' will have to accept this at the risk of financial turmoil, just because they have to go to a place of study at a specific time.	Reducing Congestion via removal of LTN's, Making car parking cheaper and more accessible (especially for students without an income), ensuring roads are fixed of potholes.	Very negative		You are not encouraging the reduction in traffic, merely moving traffic whereby other areas will become congested. This will involve an unsustainable amount of traffic being forced on to the ring road. Instead of introducing dystopian restrictions on the basis of disliking the motor car, instead consider those who like the freedom and convenience of owning a car. These measures will only encourage professionals to move away from Oxford. Congestion can be reduced by opening up many of the roads that you have closed due to the introduction of LTNs.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Other	None of the above	Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative	Oxford city centre is dying as it is. This charge will be the final nail in the coffin for businesses.	No	Free park and ride!
an Oxford resident		100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	How about improving the the road infrastructure and repairing all the god damn pot holes that are present on every single road in the Oxfordshire county. There have been zero improvements to the county falling roads for years now.	Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Another reason not to visit Oxford		A34 make it a 3 lane motorway
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	Making it difficult to access Oxford is not a good thing. Not everybody wants to use a bus to go to Oxford. Oxford shops and restaurants will suffer as none will want to on there.	If everyone paid the 5 pounds how would that reduce traffic? And as such it proves this is only to make money. You will kill the hish street.	Sort the roads out. All the changes you have made changing the streets and one way systems etc (which have cost millions) do not work. You simply cannot remove cars and hope people will visit Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very positive		I would also like to see a peak time levy on the Westgate car park, and perhaps other city centre car parks. Demand should never be so high that the queue blocks all other traffic. There need to be cross city centre bus routes but the Westgate queues prevent it.	Oxford is currently being choked by cars and there is no incentive to use buses instead North-south and east-west park and ride bus routes that stop at other locations. (Fantasy next) An underground with a central station below Gloucester Green and stations at the Park & Rides, with long term plans to extend to Abingdon, Witney, Bicester and Thame.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No			Very negative	As a resident of OX4, I am appalled by the proposed congestion charges that would unfairly penalise local residents like myself. The areas targeted by these charges are where I access essential services, including my GP surgery, local businesses, and charity work. These areas have already suffered significantly since the introduction of LTNs, and adding congestion charges would be a devastating double blow. I am not just talking about inconvenience; I am talking about the real-life impact on people's lives. Forcing residents to pay to access basic necessities is not only unfair but also cruel. It is a regressive tax on those who can least afford it, and it will only serve to further isolate and disadvantage our community. I urge the council to reconsider this proposal and prioritise the needs of local residents over revenue generation. We need solutions that promote sustainable transportation, not punitive measures that harm our community. I demand a better approach that considers the welfare of residents, not just the council's coffers.	Furthermore, I am also concerned about the potential impact on social mobility and equality. The proposed congestion charges could disproportionately affect low-income households, who may not have the means to afford the charges or alternative modes of transportation. This could lead to further social and economic segregation, exacerbating existing inequalities in our community. It's essential that the council considers the broader social implications of this proposal and ensures that any solutions implemented are fair, equitable, and benefit the entire community, not just a select few.	Make buses free, give people a real alternative. Open all LTN routes, and impose a 20mph limit on those roads instead with speed cameras and speed humps
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	I love off ifley road and will be learning to drive so I can visit my parents in marston where am old. I will sometimes pick them up to take to places. This will make it impossible to learn to drive without going on the busy over congested ring road and also it will stop me from visiting my parents. I can't walk for myself as have arthritis in my knees do even walking to a bus and standing up on a bus went work. There are also no direct bus routes, do it would take hours when it can take 20 mins now. I feel like I'm being oushed out of the city I orew up in up in and my family built.	I think it's disgusting to segregate communities even more and on-site more tensions between communities. It's ok for all the council mps as most of them Live in north Oxford and have no traffic gate. This is aimed at poor parts of oxford. When there are no shops left then it won't be a 15 minute zone. Badly done oxford cc.	Open up some of the LTNs for people who Live in Oxford. You are ruining people's lives!!
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Disability benefit claimants, Disabled tax cars	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		No ulez because it will push people to bigger town like reading and Bicester and Banbury and hig Wycombe.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Negative	In principle i am for reducing traffic however, the public transport is shocking (often we have waited for a bus only for it not to turn up) so those of us that don't live on a major route will be disadvantaged when the bus companies decide our bus route is no longer viable (this has happened before). In addition, i don't see how this is linked to the delayed and quite frankly shambolic Botley road mess. Bus filters were already planned so this is starting that process by stealth by pretending it is due to the Botley Road which seems very convenient. Make the parking at the park and rides free or reduce the cost considerably and maybe more people would use them. And give people in the outlying areas a viable alternative to cars which the current bus network just isn't providing.	No	See above. Cheaper P&R, more reliable bus service outside of central areas. I used to cycle but some areas feel so unsafe, for example the slade where the cycle lane bounces between the pavement and the road.
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	Not sure	Other		Very negative	The University students are REQUIRED to move in and out of College 6 times a year. Sometimes they also need visitors who can't cope with the park and ride. If 10/ 12 free permits are available each year to each student to use on their own car or to give to their chosen "visitors", this is reasonable. Otherwise it seems there has been absolutely no consideration of them and their needs.		
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	There should be no charge at all		May need to explore adding new roads
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all	Open the ATM roads around Oxford, that is what is making traffic worse , you have been putting traffic all in the main road whiles when was no ATM there was no traffic. Stop doing road works all in once, as looks like it's being done in purpose, thank you	Very negative	Financial penalty to me.	Oxford ring road will become a grid lock and the Woodstock and Banbury Road roundabouts will come to a standstill especially with all the housing being built between Banbury road roundabout and Kidlington.	Remove ALL the LTNs
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Other		Very negative	Need to go to work with no worries, paying enough road taxes and other taxes all together. OCC should open the ATM to make Oxford like it use to be. Not happy with anything what's happening in Oxford .	This definitely shouldn't happen	Yes , open the road that have been closed with ATM-s , stop doing road works all at the same time, to make it worse , or do road works during the night. And make a law for electric scooters to not stay in the middle of the road, that's not right . Thank you
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Other	As I cannot agree with the scheme, I cannot discern or suggest any improvements.	Very negative	I will no longer be able to support Oxford shops or restaurants. It is a great sadness. The city is being destroyed by these acts.	The proposed congestion charge will make Oxford empter and nicer for all the rich people who live in North Oxford. The poor of the city who live in less rich areas will breathe in the fumes of the traffic that will have been moved closer to them by these proposals.	Get rid of the LTNs.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I commute to the John Radcliffe and putting the charges on the Masters Ferry Road will just cause more congestion on the already busy marsh lane as this will be the only route to the JR from North Oxfords. This is going to cause problems for staff and patients oettino to the hosoitals		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Community health or care workers who need to visit multiple locations or travel urgently, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	Any traffic congestion control measure is welcome.	No	
an Oxford resident	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	The traffic in Headington is already absolutely awful, after the introduction of LTN's. What used to take us around 15-20 minutes to get from the estate next to Brookes, to St Clements roundabout, now takes at least 45 minutes in rush hour, usually longer. It's gotten so bad that we aren't able to have visitors come to see us as often, as they can't cope with the traffic levels. To now be penalised for driving to see those visitors, particularly my elderly dad and other family that live in Didcot, is disgusting as it considers local residents last. This seems to be a repetitive problem over the last few years. The residents passes will not be enough to cover the trips that I have to make out of the city, to help my dad and visit family. I also strongly urge you to consider looking at the traffic caused by the private schools in Headington and St Clements. There is a noticeable difference in traffic levels when these schools are on school holidays. People that can afford to send their children to private schools will have more disposable income than local residents on average, meaning that they will be able to just pay the charge, and this won't affect them. This will therefore still impact the traffic levels in this area.	Please remove the LTNs and do not introduce a congestion charge that will affect local residents even further.	Hugely reduce the public transport costs for local residents. Other cities in Europe have much cheaper bus travel, and they don't suffer traffic problems such as we have here. The buses we have used in Europe are also always on time without fail, and provide a much better and cheaper service. Prague is a very good example of this.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	We live on REDACTED, and more often than not the route we would be forced to take would take us to the ridiculously busy A34 which more often than not has had an accident on it increasing traffic even more. We are emergency service workers, working long hard shifts this congestion charge will force us to add 20 minutes to our already long journey to work - the congestion charge should be inddemented on non residents of Oxford.	Why punish those already living within the ring road of Oxford by charging them to use one of the routes out. We have no problem with a congestion charge for non Oxford residents but the A34 is our only other way to work. This cannot be allowed to happen and if it does it is beyond appalling.	If the congestion charge goes ahead - please consider the needs of emergency service workers who finish 12 hour shifts - unfortunately at rush hour. Consider charging non permit holders (non residents of Oxford).
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Other	Fix existing potholes and road conditions	Very negative	A very negative impact on the fact that I live with inside one of those limits and the restrictions my daily commute to, and from work is going to be hampered, even more so due to the congestion charge	Why is this a continuous war on motorist we pay road tax have insurance have MOT is on my car and no road infrastructure is put in place for vehicles, but you will put in ridiculous cycle, lanes, bus lanes, continually congested roads by blocking off side street to ensure the drivers will go through these bus gates or congestion gates, so you collect the revenue or sending everything out to the Ring Road or it could take hours just to go from one junction to the next because you're blocked off all the roads with inside Oxford	Re open the roads blocked by enforcement cameras, and LTN bollards allow motorist to move freely round the city that will reduce congestion
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	This is not a good thing to do, buses should be free in the ring road to under 18s and buses should be £1 per ride inside the ring road	Shocking, typical anti car cycling mafia	Cheaper buses
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, School students with special educational needs, Community health or care workers who need to visit multiple locations or travel urgently, Emergency service vehicles, Firefighters, Hearses and funeral cars	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Neutral	Unlikely we would be impacted much as our visits to Oxford aren't that frequent.		
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders	I don't	Neutral	Neutral	About right	No	Make Park & Ride buses cheaper		Neutral	Only drive in that area for shopping with disabled relative		
a resident of Oxfordshire living outside Oxford	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		This is not needed, stealth taxation.Oxford is an expensive place to live for the average person. I've lived inside the Oxford ring road for more than 60 years and have recently moved due to what the council has done. The council is killing Oxford.	More options to access the city. Cancel LTN's Buses will run on time.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Very negative	There should be no charges at all	No	Other	No charges at all. This proposed scheme is a DISGRACE	Very negative	Roads are for transiting through. This is a disgraceful attack on our civil liberties	Improve the roads and traffic flow without introducing more of these disgraceful restrictions, which we all know are to cater for militant cyclists	Make cyclists obey the rules of the road and penalise those they don't Look at private investment and govt funding for big projects such as tram systems Reopen the cowley branch line Incentivise people to give up car use rather penalise (carrot approach rather than stick) eg through coupons for every proven bus journey, or every proven time a car isn't used, which can be redeemed on
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I play and coach ice hockey at Oxford ice rink and have family that live in central Oxford. There are multiple implications with this proposal both for myself, my team mates, all other teams at Oxford and also away teams who need to get to the ice rink for games. Parking at the ice rink is already ridiculously expensive and often at weekends it is also impossible to find a parking space. Now addina an additional £5 every time we ao to the ice rink is ludicrous.		E
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs, Personal cars used as goods vehicles for business purposes	I don't	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Other	Remove LTNs or allow Oxford residents more access. It is a nightmare living on cowley road. Extra traffic and car fines. Terrible allergies this year.	Very negative	More traffic outside my house as traffic will use other routes. It will affect businesses.	Can you spend the money on re looking at the LTNs and how they could be more efficient in terms of opening up some to local residents to alleviate traffic pressures in non LTNs areas.	As above. Why not subsidise electric cars or other vehicles. Esp for parents of neurodivergent children who cannot travel on hot crowded buses! And who are dysparaia and cannot ride bikes!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Other		Very negative	I am a community worker and need to travel to numerous visits throughout the day, often unplanned - the impact on capacity to complete visits due to traffic, LTNs is already extensive	IF any congestion charge is needed you need to concentrate this in the CENTRAL area, the proposed locations are not ONLY used to reach the city centre. This will negatively impact on provision of services, recruitment for jobs (which in the care sector is dire already), capacity issues for community workers, lower income families being penalised, reducing desire for local people to access our city centre and surroundino areas	Remove LTNS, provide better bus services and other public transportation which is cheaper. Understand that these policies are negatively impacting on my sector of work, the service users, low income families, small businesses, ensuring our city is accessible to all
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper		Negative	I like to use the Westgate shopping car park for up to 2 hours when I shop in Oxford. I used to come to shop in Oxford regularly but now only come occasionally I think anymore charges to come into town would be very detrimental to the traders etc. I certainly would only come to Oxford very rarely. The Botley debacle must have damaged the businesses in town and this scheme will drive even more shoppers etc away. Also I hope all routes to the hospitals will not be affected by these schemes.		Free park and ride parking and lower fares
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent. Extend hours of operation for buses		Very negative	It will be harder as a paid carer to reach them. The traffic will also go up on other roads so I will not take on people inside of ring road.	It is very sad what is being put on people and taken away.	Open lms widen ring road. Put in smaller busses running more often. Get the botley road open and do not put in bus gates.
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders, Disabled tax cars, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Hearses and funeral cars	I don't	Negative	Neutral	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Negative	Employees of the ambulance service will be impacted getting to their place of work at the Churchill Hospital site as NOT being able to use Hollow Way as an example will increase their commuting times, which then leads onto impact on their mental well being, fatigue at the end of shift due to an increased commute time on the ring road and using Windmill Rd and the Slade instead. Similar applies to the firefighters in Rewley Rd. The ring road will become a car park as more traffic will be on this route instead, again leading to additional congestion and longer journey times, impacting the environment with fumes and affecting those that live on the ring road route. Emergency service response times will be impacted as well depending on the direction you approach the John Radcliffe Hospital. For those trying to access the hospitals for appointments, again, will add to their stress and well being and will make it even harder to attend hospital appointments on time, especially in an urgent health situation. Would you be re-timing traffic lights at key areas, such as Redhill and Littlemore roundabouts as well as those on Windmill Rd to improve traffic flow? Overall, I see this as a money making "test", not benefitting those that live in the area or those that need to get there in a timely manner.	You have picked the wrong areas in some. You should be targeting Thames Rd and Oxpens road on all approaches to the Westgate shopping centre, as even before the Botley Rd closure, they are the roads that have the congestion from people failing to use the Park and Ride. Agree with Hythe Bridge Street.	Why have you let the Botley Rd closure go on for so long? Fine the developers of the rail station as well. Get the road reopened and THEN look at how traffic performs before you introduce or consider any charges.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	It will stop me and many others from coming to Oxford at all, ridiculous plan. All traffic will be pushed to the ring road which is also conested	What part of Marston Ferry LINK road will be a link road if charges are introduced	Listen to the residents!

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on daws of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	There should be no charges at all	No			Very negative	This is an attack on Oxford families. For myself I enjoy cycling in the city, but with my family I this is not an option. For a child that needs to attend an after-school music or sports event I need a car; to take a family member to the doctor or to hospital I need a car (and putting a congestion charge on the main road to the hospital is a particularly cynical move); just to bring home food for a family I need to use a car sometimes. Bikes and buses are not the only answer. Regardless of whether one is an exempt resident or not, this proposal would make all our lives worse compounding the previously failed policies and funnelling more traffic onto the already congested arterial roads: Banbury Road, Woodstock Road, Abingdon Road, etc. If the councillors were serious about improving traffic flow they could make some simple changes: putting a stop to the City Tour buses crawling around the city centre; moving the coaches mindlessly stopped on highways and cycle-ways that reduce our roads to single lane traffic; and opening up some redundancy in our road network so that one stopped car on the bypass doesn't bring the whole city to a standstill. But this is not about congestion: it is a proposal borne of narrow interest groups and political ambition that targets family life in the city, and it needs to be stopped.	The council should be devoting all its resources to sorting out the Botley Road fiasco (because it is the council's responsibility just as much as the rail company's) rather than compounding the problem with more ill-thought-out plans.	You will not legislate away traffic in Oxford because people still need to get to work, get children to school and get to the doctor. The way to reduce traffic is to move these functions outside of the city centre. The council should practice what they preach and start by moving their own staff and offices out of the city. Then we might take their proposals seriously.
a member of the public living outside Oxfordshire	less than weekly	Blue badge holders, Community health or care workers who need to visit multiple locations or travel urgently, Emergency service vehicles, Hearses and funeral cars	I don't	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very positive	I'm a regular visitor to Oxford (I have family who live and work in the city) Far too much traffic gets too close to the city centre. Even with a decent bus service and the park and ride system, too many people drive - it's as simple as that. I welcome those who are causing the problem to cav more to sort (or at least try to sort) the terrible congestion out.	Make it permanent as soon as possible.	Increase parking charges and introduce a workplace parking tax scheme.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, School students with special educational needs	I don't	Neutral	Neutral	There should be no charges at all	No	Extend hours of operation for buses		Very negative	Ferrying my special needs (disabled) daughter to Oxford Brookes University, I will be massively inconvenienced.		I favour an expanded Zero Emissions Zone. I drive an electric car which is not polluting. A ZEZ will deter other cars and reduce congestion.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Very discriminatory against people who live in Kennington who only get 25 passes. I don't know why Thames Street has to be 7 am - 7 pm. As a single woman I often use the Westgate when visiting the theatre in the evening etc.. I prefer that to waiting for buses on dark evenings. It will be a great nuisance to have to leave late to avoid a charge before 7pm. If you bring in the ZEZ as well I just won't bother anymore. It is also discriminatory on religious grounds as buses are less frequent on a Sunday morning	Have you modelled whether Redbridge P &R can cope with the extra cars? It always seems very busy on a Saturday afternoon for example.	More signs saying city centre parking was full might help on weekend afternoons/ half-term etc in particular. It is ridiculous seeing the line of traffic trying to get down Abingdon Road on a Saturday afternoon.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I cycle or take the bus into Oxford city centre		
an Oxford resident	daily	Business cars used as goods vehicles	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Get shot of LTNs	Very negative	I wouldn't be able to escape the congestion on my commute to and from work. I do not want to be penalised for leaving my house. I already live in a locked in area due to the LTNs nonsense why am I being penalised just for my postcode	There are many ways. For example instead of closing roads make them one way instead. Don't pander to tourists and students actually talk to the people who live and grow up in these areas	Sack Gant
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Unpaid carers, Frequent hospital patients, Taxis and private hire vehicles, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			Remove the Low Traffic Neighbourhood road blocks without delay. Dismiss the church organist masquerading as a traffic manager.
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I live near Thame, but I am 300 metres from the Oxfordshire border so technically I live in Buckinghamshire. However I work in Summertown & my daughter attends school in Summertown. There is no practical & useable public transport from my village to Summertown. There are two buses per day from my village to Thame and that is the only public transport. Even if I were to drive to Thornhill there is not an easy way to get to Summertown. The congestion charge will mean I lose money because it will cost me money in order to get to work.	These congestion charges are at locations that were outlined for bus gates. However the bus gates have been delayed whilst the Botley Road is closed because the impact of the bus gates would be too negative. Therefore introducing the congestion charge will surely have a negative impact whilst the Botley Road remains closed. So why introduce this before those rail works are complete. It is true that there can be severe traffic problems. But this is because that Botley Road route has been shut for such a long time. The real impact of bus gates or congestion charge can't be quantified until Botley Road is open again.	The congestion charge is impractical whilst the public transport is so poor. My daughter's school provides a minibus service to and from our village. But if she stays late at school for extra tuition or a club there is no option for her to get home other than in the car. We need a European style transport system of lots of bus routes and connected travel. If we were in Germany or Denmark we would easily be able to navigate from Thame to Oxford without a car. We could really benefit from a system of interconnected trams. Imagine if we had tram routes running out of all the park & rides that easily connected to all areas of the city. We need many more options to connect areas. It is impossible to get from Thornhill to Summertown. Travelling from Littlemore to Summertown or Headington is extremely difficult because there are no routes. Finally the A34 needs attention. If there is a problem on the A34 the whole city is paralysed as people try to divert around. The carriageway is too narrow. It should be 3 lanes. The entry slip roads are too short and extremely dangerous.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	LTNs have been proven to be negative despite councillors saying otherwise, why would this work?		
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	I won't enter into Oxford anymore. There is nothing there that makes it worth the £5 charge of taking the car or the faff of catching a bus with a pram, toddler and any shopping.	The congestion charge is ridiculous. The people of Oxfordshire are already being rinsed by council tax increasing with nothing to show for it. It's assumed we're all made of money in the area, and that's just not the case. As usual you're only penalising the working/middle earners of the community. The wealthy will continue driving in. We shouldn't have to pay to enter any town or city in the UK, these areas are for everyone to enjoy and shouldn't be "owned".	Make the roads better for a start. Provide proper cycle/walking routes through parks etc. So these methods of transport are safer and away from flowing traffic. Other countries cater to pedestrians so much better without impacting cars, so everyone has a safe choice.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Other	I can not use the bus for work or taking my family out. All your survey is designed to confuse the public and implementing we should choose any of your questions, witch in fact are all negative or not relevant to our daily commute	Very negative	These proposals will have a huge negative impact on our daily life. My family for one relies on using the car daily. We drive the kids to school and then theme head straight to work battling this chaos traffic that YOU have created around Oxford with these nonsense LTN's. I was under the impression that we live in a democratic country where our councillors should represent us in the best way possible and facilitate where possible better options to benefit us all. So far they done just the opposite. We shouldn't be forced to jump on buses, or cycles because someone else thinks this is better for us. We used to have a life before the LTN's and now Bus Gates, now we dread to actually go out. We reduced the after school activities for our kids as after school you can not drive anywhere anymore. We can not even take our kids to any of the many parks around oxford as there's nowhere to park. Basically we are "locking " our children home because some councillors decided they know what's best for us. We stopped going around visiting friends and family, the thought of getting stuck in traffic is enough to put you off going anywhere. This is outrageously irresponsible behaviour and the amount of stress and depression is causing us is unacceptable. Not to mention the effects of the business all across Oxford will suffer dramatically. If we're not going out as much as we should… how on earth are businesses supposed to continue their activities!? This proposal could only benefit the rich class as for the middle class will simply be a nightmare. Life is tough as it is, with us paying taxes left right and centre, so simply put, this will be you putting the last nail on the coffin. Dear councillors, is not too late to fix your wrongs, listen to your people.	Scrap this idiotic scheme	I'm not even sure if OCC will actually read my full comments, we have previously seen clearly how the public consultation have been held in the past, however this is what I think. Traffic was fine before you actually messed it all up. Yes it wasn't perfect but it was fine flowing traffic. You have created a huge problem with the LTN's and without knowing how to fix it you're about to create a bigger problem with the proposed bus gates. However to save your ego, there ways you can improve the real issue with the Oxford traffic. I've been lucky enough and I have travelled my fair share around the world, mostly Europe. I've been in some cities way bigger then Oxford and they have ONE WAY STREETS where possible and works like charm.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
an Oxford resident	daily		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Service villages outside of this area so they can access the centre of Oxford. I live in Noke and we have no way of getting into Oxford without using the car for work and school. The A34 is too congested to get us there on time.	Very negative	We leave the house from Noke at 0720 and return at 4.45. We travel through Woodeaton to the marston ferry road then Banbury road. Those times of day there is very little traffic because we go early. By enforcing charges, fliers etc we are forced to use the ring road or A34 both of which are solid traffic and add to our already very long, tiring work and school days with young children. We have no public transport options and cycling with young children is not an option. I am genuinely very concerned about the very negative impact this is osing to have on our lives.	Please do not go ahead with this.	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Positive	There should be no charges at all	Yes	Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes		Negative	I don't believe people are using Oxford as a through route simply because it's not quicker! I don't think this is going to change the makeup of the cars who are driving in Oxford. They're driving there for a reason. But I also don't like the sweeping statement that the buses are slower because of the cars. I live 15 mins drive from the city, but by bus, door-to-door, it's over an hour. Buses "running faster" makes no difference to my choice of driving. Either increase bus routes, more stops, make park and ride completely free - or I will eat the cost and continue to drive in.	Just what I said in point 11. Sorry I got carried away.	Remove the LTNs. Let the cars figure it out. The air quality is bad because of cars idling around the city and the ring road because you've forced all cars into less road space. You cannot put the stick before the carrot here. Make buses free. Make park and ride free. Improve the areas serviced by buses. We are a reasonably rich city, people will eat the cost of this and continue to drive. (And quite frankly, if the people want to do that and live in a congested city - that's their choice!)
an Oxford resident	daily	Blue badge holders	I commute to the central permit area by car	Very negative	Positive	Too high	No	Make buses cheaper for all, Make buses cheaper for young people		Negative	I personally won't be affected as I'm a blue badge holder but my family live in Oxfordshire zone and travel daily into oxford as part of the nhs this will affect them, I'm also part of youth football and know that children's sports will be affected by this as aettina to aames or venues will be harder if not impossible for some	People who have to visit the hospitals regularly will be affected also, no way to the John Radcliffe without paying the charge if your not exempt or out of passes	Open the LTNs that have been put in, this is the whole reason all the roads are so congested every day.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Neutral	I don't commute into Oxford	It seems insane to build a huge shopping centre, with a huge underground car park, and then not only charge people to park there but on top of this charge people to even access it. Commarket is dead on its feet, the Westgate has empty units, how is this going to help? I was and still am broadly in favour of LTNs but this is crazy.	Just fix the bridge. Put some money into it, hold the contractors to account.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I am working on Mansfield Road and driving in daily , if the charge will come in force will not be able to afford working in Oxford	Think of working people please, this scheme will have a negative impact on everyone living outside Oxford but working in Oxford. We will have to leave our jobs	Don't allow lorries to drive into Oxford or around Oxford between 7am-7pm
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all		Very negative	Makes no sense, just open the roads you have but have blocked off and congestion is removed. You are literally just pushing traffic to another area. Also, why are Holloway, st Clements and marston on this list it makes no sense and as a resident close to Holloway you are about to make my commute even more horrific	Terrible idea as a whole but Holloway and Marston are no where near the centre makes no sense!	Open up the roads you have blocked via LTN's it is blocking up Oxford for no reason, and now you're trying to cure this by charging people to use roads when you made this congestion mess.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Repair the poor state of the roads in oxford, mainly St. Giles and the Woodstock road.	Very negative	I am a train driver at Oxford station and commute in and out at various times of the day, 7 days a week. I dont not want to paying £5 a day when I have no choice but to drive into work.	Yes, what a ridiculous idea by Andrew Gant and Cylox. Just a money making scheme just like the Bus gate "trials" will be. preying on people from outside of oxfordshire not knowing these stupid restrictions will he in place. All you will end up doing is forcing all traffic onto the Botley road once this reopens making commuting to Oxford train station a joke 7 days a week.	Invest in the railway and get the line open back go witney/ Carterton and beyond and get more Oxfordshire residents onto the rail network and off the A40

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	This council has already crippled businesses across the city, this will further deter those visiting the city centre	Your proposals mean that families will now have to prearrange and reduce visits! Great work Mr Gant another disgraceful suggestion.	Quite simply you are killing the city. You have increased bus fares and now you are persecuting car users. Park and ride used to be free to park and low bus fares. Gone. Affordable bus travel. Gone. The ability to visit and support restaurants and shops in the Cowley Road. Gone. The ability to visit elderly family within these restrictions. Gone. You are inadvertently pulling families apart. Killing businesses on high streets and making Oxford a don't bother city. As I have said before make public transport attractive the traffic will reduce. Stop and listen to your residents.
an Oxford resident	daily		I commute to the central permit area by car	Positive	Neutral	There should be no charges at all	No			Very negative	The LTNs have Caused Chaos and really ridiculous closing main road you have Basically cut off most of littlemore with the ill thought out introduction of these and now adding a congestion charge for the city. This is turning Oxford into a cycle only place Absolutely ridiculous	What about people who have to work early morning. Outside of the health sector. And can't cycle to work. As too far and with the rubbish expensive bus services in Oxford you are excluding people coming into the city. But these consultations are a waste of time as the council disregard what people want or think and just do what they want. This is why I ha well given up voting in local elections	
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	A travesty for Marston and north Oxford. You are sending all the traffic for Marston down one route (cherwell drive) and sending all the traffic into central Oxford down Banbury and Woodstock road. This is chaos.	Do not do this to a once great city.	Get rid of the LTNs and reset with proper policy around traffic management.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Better and cheaper car parks	Very negative	Closing Marston ferry road is a travesty. We will no longer be able to travel into Oxford socially. Oxford businesses will suffer. Having a long term health condition but no blue badge means this will be worse for me	Until the Botley Road is opened , nothing should be applied on that route	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	With LTNS already in place this is just another change that will push traffic onto other roads. No data was collected prior to the LTNS being put in place so the excessive traffic it causes now cannot be compared with how the traffic was before they were put in.	I hope that comments made are taken into consideration and the congestion charge does not just get implemented because you want to do it. Local residents need to be listened too which doesn't appear to be happening or happened in the past.	Remove the LTNS, this would elviate the traffic that these have caused. In some streets you cannot drive during school hours (drop off and pick up times) which I think is a good idea and leaves the roads accessible the rest of the time. Why is this only applicable to cars, those that drive taxi's will use these to take kids to school when this shouldn't be allowed if a paying customer is not in the vehicle
other	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	As a service we have over 2000 clients. Anxiety can impact travel so multiple staff have to complete home visits all over the city. This would impact the level of care they receive also the cost of living has increased in all areas and its already taking its toll. The poor will be impacted the most	It feels like a war on cars and yhat effects people with little money the most. Very unfare	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	Repair the roads, fill in potholes	Very negative	I need to commute through one of the locations to work to provide for my family. There is not suitable public transport.	I am against the scheme. Restricting when and how people travel around the city they live in is not the answer. People need to drive to work!	I would be in favour of a ULEZ type scheme that reduces the most polluting traffic, especially older diesel cars and vans. That should be the priority.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all		Negative	I have lived off the Slade for over 10 years, and the traffic levels are not at emergency levels either there or on the Holloway during rush hour. Traffic has increased since the Cowley LTN was put in place though but hardly critical. If you do close off Holloway at certain times, the boundary roads (for all traffic, including public) will have a negative impact. All traffic (including buses) has to use the main roads eventually, so I'm not clear on what this will achieve apart from irritating people more? The other issue you have is that this wasn't included in the election manifesto. I am not sure that this is entirely ethical, honest or showing integrity. And how do you expect to take people with you when you don't nail your colours to the mast? It results in a lack of trust which could ultimately backfire. Not healthy in this current climate. I would recommend making a few of the Cowley LTN roads one way with traffic calming measures to build resilience in the network, and alleviate pressure on boundary roads where they're affected by LTNs. Then put congestion cameras at the entry points to Oxford which you don't need outside of rush hour, improve school bus services for children. I think most people would be prepared to be reasonable about change but the council has not led the way in listening and treating people who disagree as human beings with a right to be heard (rather than as a nuisance). Many of us multi-modal, but we do use cars for legitimate reasons - taking animals to the vet, visiting elderly relatives that live outside of Oxford and so on, that make cars necessary.	I understand and support the efforts to make the city car free, but don't forget vulnerable travellers who need to use the car at night - single women, the elderly and need safe car parking spaces after 7pm.	2/3 of current LTNs become one-way with traffic calming measures. Keep in place LTNS only where necessary and stop penalising local businesses that are a vital part of our economy. Look to improve school bus provision. Don't add congestion charging at existing pinch points that push traffic onto boundary roads causing inequality. Instead, add at entry points and during congestion hours only. Don't you want to take people with you? It seems to me the way you are handling things, you will just make people angry.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	There is nothing anymore for people living in Oxford.	We are paying allredy high taxes	Rod work can be done at night time.can be done faster.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too low	No	Make Park & Ride parking cheaper, Make buses cheaper for young people, Make bus services more frequent		Very positive	Should improve my journey into Oxford	No	No
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	Road tax is already paid by all car owners. This is in essence another stealth tax for drivers.	Perhaps this would have been better received if you hadn't battered car owners year on year, with one thing and another.	Nationwide there should be heavy taxes on second, third, fourth... vehicles registered at each residential address. Congestion is so bad owing to the number of cars on the roads across the country, not just in Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	I cannot see how giving so many permits supports your stated benefit of reducing the amount of traffic on the roads.		Open up the LTNs to reduce traffic on the main arterial roads in East Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	I don't agree with the charges being implemented	Negative	I will no longer travel into Oxford to shop, socialise or travel from the train station.	This is just another money grab from people that will impact the city centre traders. Why would people come into Oxford if you have to pay. Just like the LTN issue this is another wav of aettina money out of drivers.	Yes lift the LTNs to improve traffic flow. LTN are causing congestion
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Not sure	Add new bus routes		Very negative	You are driving us out of our own city. You provide no useable bus service from surrounding villages and then punish us for needing to drive our cars into the city. Disaustina. The poor and elderly will suffer most.		What buses? We have one bus a week, where you can spend a couple of hours in Oxford before having to catch the return. Ridiculous.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't			Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative	Living just outside in Kennington will mean access to the station, westgate a very long journey. Therefore we won't be spending in Oxford if we can't get there ie theatre, cinema or eating out. The bus adds £6 to your evening but stay a little late and a bus missed so more cost for a taxi. All round it is pushing people away from Oxford.		
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Other	Makes west gate car park cheaper	Very negative	In a cost of living crisis the council should not be able to steal more money from commuters. Get network rail to pay, or the university for once.	A competent authority would no need for these ridiculous proposals.	Get rid of the electric scooters in Oxford they are not safe
a member of the public living outside Oxfordshire	weekly	Disability benefit claimants. Frequent hospital patients	I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all		Negative	My daughter has been an inpatient several times for many months at a time at one of Oxford's hospitals and I live in South Bucks so travel very frequently to Oxford.		
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative	I would not enter Oxford at all but go somewhere else to shop and socialise	Oxford is an affluent city because of the Motor Car and now you what to ban it. Make life more difficult. I could not get to work from where I live on a bus therefore I would have to consider stoppina work	No I think you are doing a great job killing off trade in Oxford on your own
an Oxford resident	daily		I don't	No impact	No impact	Too low	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking, Other	Make cycling and walking infrastructure safe, separated from cars, inclusive of children travelling independently and those with mobility issues.	Very positive	The congestion in the Oxford area makes bus journeys slow and unreliable. Air pollution is unhealthy, dangerous to many Oxford residents and unpleasant. Noise pollution from the constant hum of motor traffic is unpleasant and unhealthy. Quality of life, especially at rush hours, is negatively impacted by heavy, slow moving congestion caused by private cars. Businesses pay a high financial price when stuck in congested roads. The city of Oxford needs a congestion charge to make it a more healthy, efficient and liveable. At the moment it feels calcified, stuck. Congested motor traffic journeys produce far more carbon emissions. See Mike Berners-Lee book - How Bad are Bananas. The Carbon footprint of everything	SUVs should pay more, large cars cause more congestion / take up more road space. Please remove car parking spaces in central Oxford to discourage driving	Remove parking, reduce public transport fares, redesign pedestrian access, especially dangerous splayed junctions and safe crossings
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	None	Very negative		Outrageous	Open Botley Road
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't do it. You are already charging the residents of Oxford too much and making driving and owning a car here too difficult.	Very negative	You have already made it incredibly difficult and expensive living in the city. Having two young children and being a single father living in Headington, another change and additional charge is ridiculous. I work at a large secondary school in the city and the fact you're looking at this as an option is disgusting. I try to cycle most days, but I want the option of driving without facing another charge.	Don't do it.	Finish the Botley Road work and actually finish the Witney park and ride on the A40, before you cause more carnage. Please.
other	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	none of these help us as family	Very negative	We have to clear and set child up every term we have no option than to go by car! Do this is a huge negative	It is just a way to get more money not to help anything as we have to do the trips in a car regardless!	Let us pick up and drop uni students after 8pm
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Other	get rid of all LTN's in the City as they are causing congestion throughout Oxford	Very negative	Prevents free travel by car around Oxford		Open up the LTN's as they are the main cause of congestion forcing traffic to use only certain routes
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very positive	I use buses and due to the very high levels of congestion, they are regularly late and the journeys take longer. Reducing the number of cars on the roads will create more room for buses, so their journeys take longer times will get quicker. A member of my family has disabilities and is a Blue Badge holder. Being in a car causes him great physical pain, so the longer a car journey takes due to congestion, means that he is in more pain and for longer than necessary. Reducing the number of cars on the road, would make his journeys much quicker.	I would like to suggest that drivers with vans, are vetted as to why they use a van. Many people have been looking at getting a van in order to be exempt from the Congestion Charge - they will not be using it for any work reasons, but purely as a way to not have to pay. I do think that the number of permits could be increased, Oxford Residents could increase to 150 and Oxfordshire Residents could increase to 50 or 75, as many of those residents do have to travel through a Congestion Charge Point, traffic filter for work.	Although increasing the fee for larger cars does make sense for many reasons, it would not have any positive effects on congestion as a whole. I would like to suggest that the Council look at schemes which penalise those drivers who only have themselves in the car. If more people were given incentives to car pool, more people would car pool. On the Cowley Road a short while ago, while I was waiting for a bus to pull out, every car on the other side of the road which passed us, only had the driver in it. We had three people in our car, so that took two cars off the journey. People can easily car pool, for school runs, for work, for shopping, there are so many initiatives that people could start, but they do not - simply as they cannot be bothered to organise such initiatives. My family does, for other family members, friends, and neighbours, and it is so easy. It would be great if all schools could start car pool and walking group schemes. In areas of the U.K. where I have family or friends, one schools have them. Pupils addresses are plotted out on a map, and parents volunteer to car pool for the children who live further away. The pupils who live nearer the schools, have parents who volunteer to walk them in groups. Some schools have school buses for the pupils who live further away. Schools have fundraised for the buses, or some as I understand it, are provided by Councils at a reduced rate for pupils of the school. There are so many schemes which people can do. Unfortunately, many people want to take part, want their child to be taken to school, but no one wants to organise them, or be the drivers, or the ones who walk children to school. It is the same if adults want to take part in car pool schemes, everyone wants to be a passenger, no one wants to be the driver or do the organising. If there were incentives for such schemes, for people to car pool, it would have a positive impact and would see them start. For example, if there were five people in a car, they could be exempt from a congestion charge fee.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent		Very negative	I have a young child who has to be taken to school. This will be a huge inconvenience and will add hours to our already busy days making my child tired and damaaina our ability to do a full days work		Take bikes off the roads and give them separate lanes over half the pavements. Put lay-bys in all bus stops to allow cars to pass. Fix potholes which mean whole lanes of traffic have to stop.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I will no longer shop in Oxford, at all. Reading is equidistant and a far more accessible place. The council have succeeded in reselling another customer from the hiah street.	What's the point, Gant will do it anyway as he is on a power trip.	Remove the alarms so there is more road capacity.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	There should be no charge or bus gates	Very negative	I work in special education & my job is quite demanding. I also have a heart condition & although I may be able to cycle to work at the start of the day, there is no way I could cycle home again at the end of the day. If I take the bus to work it is an hour and a half journey each way, turning what is currently an hour round trip into a three hour round trip. Burdening people who already struggling in the current financial climate with an additional stealth tax, especially those in education, where support staff's wages have fallen sianificantly in real terms. seems unnecessarily punitive.	I predict that any rejection of this scheme will be ignored, as has been the case with other consultations.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make buses cheaper for all, Other	Get rid of LTNs	Very negative	Oxford is becoming more difficult for the residents of Oxford to move around - living costs continue to soar		Open LTNs - let the traffic free flow
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Very negative	Too low	Yes	Make buses cheaper for all		Very positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Spend it on opening the LTN's which are adding to congestion and pollution	Very negative	I live in an area where you will restrict the way I can travel to and from my home. If I run out of permits, it will add a significant amount both in miles and money. I should not have to pay of I need to make more journeys. The LTN's you inepity installed jabr failed and are causina conaestion and pollution.	DO NOT CHARGE THE RESIDENTS OF OXFORD BECAUSE THE COUNCIL ARE CLUELESS. GANY NEEDS TO RESIGN NOW. TOTALLY IGNORANT TO THE VIEWS OF OXFORD RESIDENTS	Stop vehicles from the outlying towns and villages travelling into the city for work etc. Make them use the park and rides. Stop parents dropping off children at schools. Make them use the park and ride where buses can take the children to school
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	Do not introduce the charge. We know that it will not be temporary, and the revenue will not be reinvested into public transport.	Very negative	I have mobility issues but they are not sufficient to get me a blue badge according to my GP. Andrew Gant is obsessed with making Oxford out of bounds for those of us who come into Oxford frequently to socialise etc but do not live in Oxford. As someone who funds the local councils via my taxes, I find this a very poorly thought out scheme, just like the LTNs which have ruined local businesses. When will the council wake up and listen to local and Oxfordshire residents who aren't able to cycle or walk everywhere? Our public transport is a total joke, most journeys by bus take threefour times as much as driving, are too infrequent, and stop way too early. There isn't adequate provision to encourage people to take public transport or listen to those with reduced mobility.	Do not introduce them	Not everyone can walk for twenty minutes between home/bus/additional bus or cycle.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Very positive	Too high	Yes	Make Park & Ride buses cheaper		Positive	I work in the central Oxford area. As long as the commuter permit is introduced I believe this will be a net positive for the city. Without the central permit I would not be able to continue to work at my current role.	The commuter permit must be put in place. I work within the central area and would need to pay £5 daily which is unsustainable. I need to use my car to be able to sick us my vouna child after work.	
an Oxford resident	weekly	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral		There should be no charges at all	No	Make bus services more frequent		Negative	It will annoy everyone who has to use a car because they're transporting a disabled person or shopping.	It's absurd on top of the astronomical parking charges and the route limitations already imposed by LTNs.	Reduce the number of LTNs and unblock some of the streets that used to provide useful routes.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all		Negative	It's jusg another poor man's tax	Why not completely stop vehicles from using these road why is it ok to make congestion If you pay	
a business	daily		I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	Yes			Very negative	I work in a city school and we offer outreach provision to our students and other schools. This charge would impact on us being able to deliver this service, support home visits for non attendees, as well as impact our ability to recruit	Having worked in Oxford for the last 16 years, I believe the congestion has gotten much worse, not because of more traffic, but because of the closed traffic routes. This would make this even more difficult. We have already lost good job candidates who have pulled out due to the proposals around restrictions, this scheme would further impact on the recruitment of quality staff. meanina students of Oxford would miss out.	Give all young people free travel around the city
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	Very negative	About right	Not sure	Make bus services more frequent, Other	Bus from Kennington should go to the train station. It's enough paying £78 retrn trip to commute to London twice a week. I live just on the border of Oxford top of Kennington.----------	Very negative	I live at the very top of Kennington. I commute to the train station car park. I do this twice a week, it would be an addition £10 a week on an already incredibly expensive train fare to London (£78!) I live about 100m outside the blue one they would give me 100 passes a year, where as in the yellow I get 25. I would take the bus, but it doesn't go to the train station. Why can't the Kennington bus go to the train station? The commute from Oxford to London for me is 1hr30 mins and with the bus not going to the station it adds another 20 mins each way, extending my commute to almost 4 hrs a day when I go in. If both road was fixed I'd on around that way and park. This decision has already been made and will go ahead regardless. OCC councillors are at a loss and couldn't make a successful policy if they tried. Open up LTNs return the streets to what they were designed for, moving traffic around, not playgrounds. Cars do not pollute like they used to. A congestion charge will not deter people using their second highest investment cooperation. Fine cyclists for breaking the Highway Code and twice the income stream will be collected I work at the John Radcliffe hospital, I work shifts and bus travel isn't viable. This is going to cost me a lot of money which I cannot afford. I may need to chanae iobs because of this.	Cost of living, commute time, theivery of train prices to London make this additional charge unjustified. Exept electric cars maybe (which I have) I just can't keep up anymore. I personally, will not be using the train station. I'd be more than happy to pay the congestion charge, if I was guaranteed a parking space at the train station. I'd be more than happy to pay the congestion charge, if I was guaranteed a parking space at the train station.	Bus route to train station. I'd be more than happy. Or include Kennington in the 100 passes a year. I principal, it's the people that live far out Oxford that just don't use park and ride. Also the shopping centre car park, coming in from the abingdon road, when the parking is full it just absolutely cooks the traffic. Seriously the biggest problem is that car park, out of towers don't take the park and ride. If maybe we shock everyone with charhes it would encourage them to use it. But I think Kennington (top of it anyway) is closer then other parts of inner Oxford to oxford city centre.-------
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative		Using motorists, again, to plug over spending by ICC on pet projects that don't work.	The travel chaos has been caused by LTNs. Removal of on road parking spaces has only achieved making roads more dangerous for all users
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative		Hospital and other key workers should be exempt	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No			Negative	It will restrict movement in and out of our residential area, the charges are too high and it will negatively impact people who rely on cars to get around, where the bus is not suitable.	It looks like a desperate attempt to make money, whilst the Botley Road remains shut as the bus lane plan can't be used until Network rail finishes the railway works. There are better ways of managing traffic without punishing local residents. £5 might not seem like a lot, but given we are still in a cost of living crisis it will restrict people's movements. Pollution levels look to have already dropped thanks to the roll out of electric buses.	Sorting out the traffic in and around private schools should be a priority. There will be an accident on the Magdalen bridge given one of the private schools coaches parks on the bridge blocking the cycle path. Redesigning the entrance and exit to the Westgate Car Park should also be looked at. Given drivers ignore the messages when the car park is full and the traffic gets congested by drivers trying to park at the Westgate. Some end up parking illegally in Turn Again Lane and other streets in the area.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Hearses and funerial cars	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Positive	The buses into Oxford are very slow because of people driving into the city or thought the city unnecessarily. If buses ran quickly in ans out then the park and roses are a great option to get into Oxford.	No	Full bus and cycle lanes so buses to not have to queue with all the cars. For example there is little point using the park and ride and then to sit in the bus queueing down the Abingdon Road. I would rather sit in my car in a queue and park at Westgate.
a resident of Oxfordshire living outside Oxford	less than weekly	Emergency service vehicles, Firefighters	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	No charge at all	Very negative		It will kill Oxford businesses.	Remove LTNs you are killing Oxford business.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice. Frequent hospital patients	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Very negative	I am a GP working in Oxfordshire but have young children who can finish school (in Oxford) late and I travel from work to them. It is not safe for them to travel alone on the public bus and so I would need more than 25 passes per vear for this.		Remove the LTN's , then congestion will be reduced in the city centre and get botley road open quicker.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Very positive	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive	I think a congestion charge is more useful than longer term proposal		Need more bus stops for villages just outside Oxford. Some villages have no service or a very infrequent service so that residents have to drive and teenagers and young adults rely on others rather than using public transport.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes		Very negative	Will need a pass for all days, or what do you think I'm doing the rest of the days after I've used the 100 days pass? Not go to work? 200*5 is 1000 GBP!! I already pay too much taxes and council tax for me to be able to go to work!	Ridiculous idea. Stop playing to know how to address and direct traffic, you have no idea and are only making things worse!	Get a traffic manager. Getting restrictions and make it impossible for people who live here are only making you to leave the city. We are paying taxes and council tax!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	The charge points and gates aren't going to stop people driving into the city centre. They'll keep doing it regardless		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes		Very negative	This proposal adds extra and unnecessary expense to the public when we are already struggling financially. This will add yet another expense for people trying to get to work. Residents Parking permits and buses are too expensive.	The cost of living is becoming more and more tough and these extra costs implement unnecessary added costs. Charging people £5 a day to get to work just adds more pressure.	Remove the pointless LTN'S that didn't work around Oxford and created more traffic. The roads you're proposing to charge for wouldn't be as busy as traffic can move around more freely and allow buses, taxis, emergency vehicles etc to get to where they need to be quicker and provide a better service.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	This is a typical anti motorist proposal from a "green" wealthy elite. It is not needed or welcomed by the overwhelming majority of residents.	DO NOT DO THIS!	Free buses
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Remove LTN	Very negative	It will another nail in Oxford coffin	Our opinion will not be valued	Remove LTN
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	Too low	Yes	Make buses cheaper for all, Add public cycle parking, Other	Improve cycle lane safety (i.e potholes)	Very positive	Cars are a constant safety issue when I commute by bike. Drivers are not driving safely and when there is a lot of traffic they block cycle lanes and it makes it dangerous. Buses are held up by the sheer amount of traffic making those who want to commute by bus become frustrated.	I am very much for this and think it will make oxford safer.	Change some double yellow lines to double red lines (especially on the plain roundabout). Add traffic light control to the plain or implement yellow boxes. Magdalen school buses should not park on the plain roundabout.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice. Blue badge holders	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	If you push more traffic on the ring-road, which in peak time us horrendous now. We take our grandchildren to school to school. presently we leave 60 mins prior to school opening because of traffic build-up. More traffic total nightmare.		Open up the LTN's
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Neutral	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Positive	If it results in less congestion, and enables buses to more easily, it will have a positive impact. Hopefully, people will leave their cars at home and travel by bus.		Make buses cheaper, especisly for families with children. Students shouldn't have cars.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Negative	There should be no charges at all	No	Other	Improve bicycle access through city centre [eg Queen St]	Very negative	it is only a year until the traffic filters can be implement once Botley Rd reopens - just wait till then!		If you made it more attractive for cyclists and people to [safely] use e-scooters in the city then I think there would be a lot less overcrowded buses and less traffic! Why not permit [even by registration] privately owned e-scooters within the city bounds? The Council really need to be forward-thinking and coming up with new ideas... otherwise they will just be accused of trying to simply sart people from their money!!!
a member of the public living outside Oxfordshire	less than weekly	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Negative	Positive	Too high	No	Extend hours of operation for buses, Other	Pick up / drop off points and access for Oxford students.	Negative	When taking young people to and from the Oxford uni colleges they have a lot of luggage to transport. Parents have no choice but to get as close to the colleges as possible. These students contribute massively to the Oxford economy as do parents when visiting.	There should be exemption times for Oxford uni start and end of term dates.	
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	Too high	Yes	Make Park & Ride buses cheaper		Very negative	I am the parent of an Oxford student who has to clear her room every term so I travel into central Oxford 6 times a year which is £30 to you!		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper. Make buses cheaper for all		Very negative	It will mean we are financially affected. Multiple people in house suffer from chronic back pain and are not eligible for a blue badge. Getting the cars and ride would have a detrimental effect on the hvino standards	It would be more fair to charge the congestion charge for cars that only travel without passengers. It should be free or reduced if the car has 2 or 3 people in the car or at least 40% full capacity	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Positive	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking, Other	Improve cycle lane safety- this is the most important issue	Very positive	Cars are a constant issue with my commute in by bike. Not only are they the sole cause of traffic and the blocks on the roads. It then becomes and issue of safety when they then decide to drive in or block cycle lanes because they can't go anywhere. Removing a large number of vehicles from inside the ring road will increase cycle safety and reduce pollution.	Yes, if these proposals do get implemented please do use the comments and feedback to best make those who are gain at the policy aware that they are the minority and these schemes are supported by residents	Change some double yellow lines to double red and ban the pick up and drop off of taxi and private coaches on main thoroughfares. Change the plain to traffic light control or implement yellow boxes to prevent it being blocked. Force Magdalen school to have a car park or do not allow any vehicles to that school until they do. This f it is not implemented already a free flyer bus from the P&Rs for all NHS staff to the JR and Churchill directly. Also just sort out the cycle lane layouts which cause chaos for cyclists and drivers alike when lanes randomly end or chuck you into the road from a path with very little warning.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Very positive	Relieving congestion would be good		
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	You haven't mentioned any details of how this will apply to me as an Oxfordshire resident who doesn't work in Oxford. The proposed filters have 25 days free per year per car. We only have 1 car so why can't we have 50 free days , the same as what we would have with 2 cars.	You mention commuters being allowed to register 3 cars, will there be a stipulation that only 1 car can be used per day. Otherwise the commuter's family could also drive in and out as many times as they like. Why is it only car drivers that are being penalised? HGVs cause a lot more pollution, Why can van drivers drive in and out as much as they like? You seem to be penalising the wrong people. Eg London Ulez charge bigger vehicles more, my eco friendly car does free. Whv the other wav round for Oxford?	Open the roads back up first and then access it, not now
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Other	Shouldn't happen	Very negative	It's a horrible decision why should we have to pay to drive to the places we have to go when we already pay for so many other things	It is stupid and should not happen traffic is bad already because of stupid tins and this is going to make it worse	Open up all roads and remove tins and stop forcing people to use busses or to cycle or walk people buy cars as they want to drive them so don't be stupid by closing and charging people to drive down roads
a parish, town, district or county councillor	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes		Very negative	It's doing to cause so much traffic and conestion worse than it all readi is who ever thought of this idea is stupid We live in a disadvantaged rural parish very close to Oxford, but have no significant bus service to connect us to the outside world, other than a shopping bus twice a week in the middle of the day. Accordingly, private licensed vehicles are a necessity, particularly for the more elderly, disabled and those with young families, otherwise it's a two and a half mile walk on busy roads without pavements to get to the nearest bus hub in Wheatley. For those who need to travel to Oxford on a daily basis; for schools, business purposes (while not working in Oxford), or necessary shopping trips, there is an absolute necessity to be able to drive, much more so than for those who live in the City, where a thriving bus service is available throughout the entire year.	The issues of congestion are entirely self-created by Oxfordshire County Council on top of the closure of the Botley Road. With no traffic able to enter or exit from the West, it has meant that those travelling in have to travel further around Oxford to enter it from the North, South and East. By then closing so many of the linking routes to the East and funneling the traffic down the three main arterials OCC has created additional congestion and bottlenecks. Road survey studies will back up that there is no more actual traffic travelling into Oxford since pre-Covid times, indeed it is less. However, that traffic has been funneled into a more limited number of roads meaning that there is a false sense of congestion. Once the Botley Road has reopened, the situation will improve dramatically.	Overall, there is no more traffic in Oxford than pre-Covid times, it has just been funneled onto fewer roads. A situation which will dramatically improve once the Botley Road has reopened.
REDACTED	REDACTED	REDACTED	REDACTED	No impact	No impact	There should be no charges at all	No	Other	Fix the numerous pot holes and roads in Oxfordshire. Make driving easier for car commuters!	Very negative	This is discriminatory towards individuals who are wealthier and do not rely on car transport to get into and out of Oxford. Public transport from the wider Oxfordshire area into Oxford is not reliable, is expensive, and does not get many people where they need to be. This scheme is exactly that- a plot devised by a council who are so out of touch that they don't care that they will be negatively impacting numerous people's daily lives by these charges and limitations on where people can drive.	Don't ignore this public consultation even if it doesn't agree with the scheme that you already plan on doing anyway. Actually listen to the comments on this consultation and maybe think about the negative impacts this will have on people who must drive and cannot afford a daily charge. If you really must have a congestion charge, consider allowing people to purchase a year pass that gives them the ability to travel freely through the congestion areas for a one time fee of £100 instead of the daily charge of £5. This will be more affordable for those of us who travel daily into the conestion areas for work that cannot be avoided.	REDACTED
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	don't implement it	Very negative	Will make no difference to traffic flows. It is a stupid IT thought out scheme	As above	For some users outside these groups you proport to help will be far far worse off. The buses actually slow traffic far more than the cars
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Buses from Thame do not get me to work on time, or home, at weekends. Holidays or late at night. I work at a college.	Just don't do it. We know you hate cars. We hate buses. They never go where I want or when I want and they take ages and do all around the houses and they're full of badly behaved people. You want a city to be like a hamlet.	Get rid of Bus Lanes. That would widen roads.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Buses would have to be free for me to use them	Very negative	This council is ruining the county with there completely against cars attitude. Other areas have either very cheap or free parking. Oxford is the dearest place to park outside London and now you've got to pay an extra £5, I can see a lot of business's closing as people won't bother coming here as it'll cost a fortune to visit the city Cycling isn't an option as Oxford is the worst place I know for cycle theft	The tins have had a major impact on the travel time in the city with even buses taking twice as long for the same journey. Adding insult to injury we've got to pay an extra £5 to come into town. Will this council not be happy until all the business goes to reading and banbury and the city is just for the university and tourists. Oxford was once famous for its car industry, now its anti car all the time. How about a link road from Osney mead to the ice rink and have 1 2ay into oxford under the train bridge and 1 way out through Osney mead	Open up the tins and bus gates so the traffic can actually move freely like it used to before them. The polution levels must be much higher now the tins and bus gates are in effect as its put all the vehicles onto the ring road and main oxford routes. Where before, traffic moved more freely
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Another money making scheme that adds more cost for drivers. Public are not listened to the LTNs are an example of that	Should not happen	Fine network rail for the delay in reopening botley road. Get rid of the LTNs and traffic will be free flowing again. More buses are needed and the cost needs to reflect that so that people have more choice in how they commute in
a business	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	This is just the icing on the cake for business in Oxford. Road closures and a totally anti car campaign convinces me to take my company out of Oxford and move to a country where business is welcomed like Ireland or the Netherlands. This will mean that probaly most of my employees (over 400) will be laid off when the company here is closed. I am fed up with a council that takes massive business rates and just continues to make life difficult for employers and employees. Gold riddance Oxford. I will copy this to every employee as they are laid off so they know why we are moving the business abroad.	Utter rubbish	Open all the roads you have closed and all the other restrictions you have imposed.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	A negative impact as I live in a village with one bus service which sometimes doesn't turn up or is very late.	A lot of the congestion is due to the Botley Road being closed which is not the fault of the cars being punished. Have you noticed that the congestion is far less in the morning when the schools are on holiday? Where are the congestion charges for Woodstock Road, Banbury Road and St Giles? It feels like only part of the city is being punished.	Encourage parents to walk, cycle or use public transport to get to school. Free parking at the park and rides. Close all the city centre car parks.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		No impact			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	Too high	No	Other	Make cycling in the city safe, with proper, safe cycle paths free of tree branches, potholes and sunken drains, free of parked cars, off roads wherever possible, and with barriers between the cycle paths and the main flow of motorised traffic.	Very negative	I live between the Hythe Bridge Street and Thames Street charge points. My partner lives in the Oxfordshire countryside, nowhere near a bus route, and even if he did it would take him over and hour and a half to get in on the bus. Once his permits run out, if he wants to come to my flat for dinner and to stay over, it will cost him £10 per visit, or he'll have to get up super early to get to the park and ride. He has expensive carpentry tools in his car (for clients outside of Oxford) and parking his vehicle there isn't safe, unlike my gated car park. He earns less than the minimum wage. How would you feel in that position? How is that fair? In this area, we've put up with the Westgate build, the Geoffrey Arthur building works, the pipe bridge closure and repair, and now we've got the new bridge being built, and the huge new development behind the ice rink coming. It's been pretty rubbish living here for years, through no fault of the residents, and now you're making it even worse.	What review have you done on the impact on housing prices in the central area? If these fail, will you be providing compensation? It's really hard to take your plans as authentic after you approved the super cheap Westage carpark and created years of traffic congestion and fumes, and when cycling in this city has been and continues to be so unsafe. You could do so much more to make cycling safe. More buses and faster buses will make it worse, as the city bus drivers are the worst in terms of not passing cyclists with a safe distance. You also seem to take no account of the needs of families, and the sustainability of after school clubs and community centres.	Close the Westgate car park for everyone except the disabled. Stop putting commercial gain and the wishes of people outside Oxford to buy new clothes over the air quality and quality of life for residents. Have a sensible plan to stop the ringroad becoming a 2 hour queue. Create more bus routes which cross the city in different ways. Include express routes from the park and rides and cowley centre which only stop at key points (e.g., the hospitals, Oxford Brookes University).
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't			There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Negative			Open up the roads so traffic can flow again within the ring road. The ring road is supposed to be for cars going past Oxford, or going from rose hill to Summertown, for example. It's turning into a car park now with all the delays being caused.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Other	Remove LTNs	Very negative			Yes, remove all LTNs. Stop advertising this cycling and walking. People need cars, Oxford is not a small village where you can walk in 15 mins everywhere
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very positive	As a resident of the proposed new central permit area, the current effects of heavy traffic, in particular queues for Westgate at weekends have become intolerable. As a result, buses are late and fumes from traffic are a concern. The proposed exemption for residents in the central permit area (and 50 visitor permits) is fair.	I think that £5 charge is too low as it is less than the current cost of a return bus journey of £6 (£3 per single). I also think as congestion is caused by lack of capacity on the road network that larger vehicles should pay more than smaller city cars.	Accelerated implementation of the proposed ZEZ expansion. Tiered parking tariffs so that larger/heavier vehicles pay more to park. More ANPR enforcement of bus lanes. Car free city centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	This scheme will be deeply damaging for local residents and businesses. And it is seeking to address the wrong problem. The best way to solve congestion in central Oxford is to CLOSE the enormous westgate shopping centre car park. By making central Oxford parking only available for disabled badge holders and certain types of worker (eg health and emergency workers on duty), then the number of cars coming into and out of Oxford city centre would be hugely reduced. Park and ride buses would then flow smoothly.	Only that the whole scheme is ridiculous and should be completely abandoned.	Per previous comment: The best way to solve congestion in central Oxford is to CLOSE the enormous westgate shopping centre car park. By making central Oxford parking only available for disabled badge holders and certain types of worker (eg health and emergency workers on duty), then the number of cars coming into and out of Oxford city centre would be hugely reduced. Park and ride buses would then flow smoothly.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Other	Make the buses cheaper and clean them on a daily basis!	Very negative			
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive	Traffic is crazy and people are lazy. I drive to work because I have too, because my works location changed, before this I would walk	Marston road needs improvement too many cars are speeding	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	Too low	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	The less polluting traffic the better, Oxford wasn't built for cars.		
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	Mainly travel to Oxford to collect or deliver family members to the train station. This has been a NIGHTMARE since closing of Botley rd. this further increases the cost of travelling by rail. Buses are too infrequent and too long journeys to be practical.	Please allow people to access the rail station - this will be expensive and add to the inconvenience of using rail travel. Please allow free access for frequent hospital visitors also.	Much more frequent and more direct bus routes.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative	This is very clearly money grabbing. You were told to delay the filters (that no one asked for) until the railway station was ready, so in place of that passive income you are adding a new penalty system!?! So obviously not about minimising traffic, more about maximizing lining your pockets. Why are you staying the £5pp/mmyrs will be used to fund the filters?? Surely you had funds set aside for this previously?? What did you do with those funds? You forget people travel into Oxford for work from outside Oxford, this is due to useless buses and schedules. There is only 1 bus route I can get and they always get cancelled without notice. I have been stuck at home waiting to travel into Oxford many times and I have even been stuck in Oxford because the bus company cancelled all buses homer!? Now you wnatbus to rely on buses to get us to and from work or pay fines? There also no evidence these filters will work. No need to have them in place early on to have them run 7am -7pm!		More attractive!?! How is this one of your justifications!?! Also you forget not everyone can ride a bike for many reasons.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who **need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs	I don't	Very negative	Negative	There should be no charges at all	No	Other	Traffic was never this bad before ltns	Very negative	My daughter is autistic but can't get blue badge she can't cope with busses so we will be forced to pay the charge	As usual attacking car drivers was never this bad before the ltns where introduced and it seems like an attack on east oxford	Remove ltns
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too low	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	I never travel into Oxford at peak times and I park and ride from Redbridge for day visits or use the Westgate car park in the evenings for theatre and cinema trips so there may be a bit less traffic with the charge but any benefit is negated by the fact that I will pay extra in the evenings to drive in and also I cannot drive to my Oxford dentist or hairdresser appointments without passing a gate which makes it either expensive or time consuming if I use a bus and walk instead. I do however believe it needs to be more expensive a charge to get drivers to change their habits and the alternative needs to be reliable, convenient and cheap.	I think in theory it sounds a good way to raise the funds to improve bus and cycle options whilst deterring some car trips but if people pay nearly that much for a coffee or pint now I think some will pay for the convenience of the car so a higher charge would be more effective.	Park and Bike would be an interesting set up if we had hire bikes and properly separated bike tracks into the centre. I'm too old for a scooter! Bring back the express bus service that used to take us directly up A34 from our village to the city centre. Journey time was almost as good as driving in car so if fare capped too it would be good alternative. In Broad Street the pedestrians need protecting from the fast cyclists now. The bike path there needs to be marked out and signposted clearly and cyclists need to slow down or be cordoned off in a proper lane. It has become more dangerous as it is now. My ideal for the city would be trams which seem to work so well in cities here and abroad
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent		Negative	The 25 day permit needs better explaining so I know for sure what entitlement I have. Otherwise my concern is that my most common reason for travel into Oxford is for cancer care, and I don't think I should be additionally penalised. I have tried public transport from both ends and it's awful, taking many hours. There should be buses to the churchill from the bus station. There should also be a direct service from banbury to Ir.	Train service between Oxford and banbury is one of the worst I've experienced with frequent overcrowding	Tram style service - particularly to common points of travel like hospitals. Or provide better services outside of Oxford, it seems there has been a policy of centralised services and now there is congestion as people travel to these services
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add public cycle parking		Very negative	It will force me to take only one possible route to work, which will be the busiest route as it's the only free way into the city from that direction. I would be travelling over Donnington Bridge to Iffley Road, which is already horrendous to the neighbourhood road closures previously introduced.	I would like to see if details of economic impacts have been considered in this proposal. If traffic enforcement measures continue to be added, less people will inevitably want to work in the city and some services will close as a result.	Actually consider designing priority routes into the city for cars, rather than aiming to reduce cars at all costs on every road. It won't be long until nobody outside of the ring road can commute into the city (in a reasonable time) at all and Oxford's economic, workforce and recruitment for local businesses will all suffer as a result.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Negative	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I have either lived in or commuted to Oxford for years, the traffic has increased to levels where my journey is getting longer all the time.		More buses, more bikes
an Oxford resident	daily	Blue badge holders	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses		Very negative	Because I live in one of the areas affected, you block Holloway, how are the buses suppose to get through from Holloway onto the slade and Holloway onto Gainsington rd, the traffic is going to be backed up on both these roads so totally pointless. Motorist shop and others on that side of road should have the road taken in with parking bays, this way no cars are blocking the main Holloway Road	Yes, you need to rethink the LTNs open every other street especially those from Iffley road to Cowley road and Cowley road to st Clements. Let the traffic flow a bit easier.	To many buses going up and down Holloway to Brookes. Need more number 10s to JR You are gearing Holloway to student use only.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disabled tax cars, Unpaid carers, Frequent hospital patients, Emergency service vehicles, Firefighters, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the damn pot holes!!!	Very negative	This will force even more traffic onto the Oxford Road and Eastern bypass.... This is madness... Sending the increased pollution elsewhere.	STOP.....AND REMOVE THE LTN's.	Absolutely, sack all Executives of Oxford City and County Councils..... DEAREST COUNCIL TAX IN THE COUNTRY.... WASTE.... AND BADLY RUN... PEOPLE HAVE HAD ENOUGH OF THESE COUNCIL TAX INCREASES!! THE SITUATION HAS BECOME INTOLERABLE FOR THE TAX PAYER...AND NEXT YEAR, IT WILL RISE 5% ALL OVER AGAIN..... A TOTAL DISGRACE!
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	Too high	No	Other	Parking for university parents to access colleges	Very negative	I only come in for university drop off and pick ups and it feels like accessing the university which can only be done due to the amount of luggage is getting harder and harder. I have already had two fines that have since been rescinded.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	There are many people who struggle with mobility who are ineligible for a blue badge. Getting around in Oxford is already extremely difficult for these people as the council already disincentives driving to a large extent with and bus gates. Adding a congestion charge in addition to a traffic filters is going to make it a nightmare for people to get to where they need to go. Everyone already hates driving in central Oxford and avoids it at all costs. If people are not already taking a bus, it is because there is no suitable bus route for where they need to go, or because the price of buses is too expensive. we need a comprehensive bus network that connects all parts of the city, not only outskirts to the city centre. If you improve the bus network, traffic will naturally decrease without putting further pressure on people financially when they are just trying live their life. It's just not good enough to promise that the money from these measures will be put back into transport. Invest in transport now and then the traffic will decrease anyway.	You need to consider the impact on disabled people with mobility difficulties who are not eligible for a blue badge. I am acutely aware that if, at my next assessment, my bike badge is taken away, I will be entirely unable to access large areas of the city due to these measures.	Improve the bus network first and make it affordable. There is no bus service connecting the outskirts of Oxford to eachother. It would currently require two buses and 50 minutes to make a journey that would take around 10 minutes to drive
a resident of Oxfordshire living outside Oxford	never		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Other	Stop cycling in bus routes	Very negative	I loathe driving to Oxford anyway, when I thought it couldn't get any worse you are suggesting this	Make the delayed contractor pay?	Create a third lane on the a34
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Add new bus routes, Extend hours of operation for buses		Very negative	I want to be able to jump in my car and drive to central Oxford without having to worry about using up a permit or paying £5 for something that I currently don't need to. At the end of the day, even with traffic it is quicker for me to drive than get the bus. Because I can leave whenever I want, I don't need to wait for a bus, and the bus stops everywhere. Schemes like this reoresent a rearression in our society.	I don't think there has been enough work done to reach out to people to explain why these schemes are needed with evidence how they help and after they've been introduced reassess whether they've actually worked, whilst taking into account the negative impacts they have as well.	
an Oxford resident	daily		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	The people that will be most impacted will be the poor and the elderly which is a disgrace	I think it is a poor idea	Remove things that block roads such as LTN's and poorly planned road works
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	About right	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very positive	As a bus passenger I'd like as few cars in Oxford as possible.	Just get on with it.	Restore a frequent bus route across Donnington Bridge, if necessary using long wheelbase minibuses to circumvent weight restrictions. Penzance operate 20-seat examples. Also a new north south route from the Abingdon Rd to Summertown or the Woodstock Rd.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make bus service for free from park and ride	Very negative	I travel daily into Oxfor as I work at one of the colleges and my partner as well , and most of the times I travel between colleaes to pick us me partner , this kind of situation doesn't helo at all the workers in city centre	Shouldn't be propposed at all	Yes , buiff more roads (mid ring road) and leave the connection roads oppen between near by areas
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No			Very negative	I'm an older lady going to work early hours in Mansfield ich which I've done for 25 years, I take my car for safety and convenience. Having two jobs I need car to get to both. I'm only a cleaner so not paid a lot £12 an hour. So paying out £5 a day will put my income	Ridiculous	Get rid of ltns
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Other	Park and ride parking should have zero charge for parking and not more than £2 for return ticket. Winchester shows how outrageous oxfords pricing is.	Negative	Makes Oxford even less attractive as a leisure destination. I occasionally have to transport a disabled relative in my vehicle, having a mix of blue badge and ticketed use sounds like a pain to manage.	The council didn't cover this at election time and don't have a mandate to implement it. To pretend otherwise is showing contempt for the electorate.	Get a grip on managing roadworks as TFL seem to manage, Botley road has been a one and off joke for a decade between Thames water and network rail.
a resident of Oxfordshire living outside Oxford	daily		I don't	Very negative	No impact	There should be no charges at all	No	Other	Build roads and remove cycle lanes. Maybe fix pot holes?	Very negative	We need more capacity for cars, and we need to stop building houses. There are too many people in Oxford, and stopping driving is not a solution to this. Further, Oxford needs to serve the areas around it. The only reasonable way for me to get in is by car or motorbike. Finally, motorbikes should be exempt from anv charaes that are introduced.	It should not happen, and the whole consultation is a waste of time and expense.	Shared above. Could also remove LTNs, and perhaps have fewer buses. Make cycle lanes available for traffic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	The introduction of LTN's in East Oxford has increased pollution, congestion and travelling times. This proposal will exacerbate the problem.		Provide people over 60 years old with free bus passes. A number of this group are still working and reduced mobility means that they need to drive as bus services are poor and expensive. Reinstate the bus from W.ext Oxford to the railway station and add a direct bus to Headington and the hospitals
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Remove cycle routes from main roads and move them onto side streets or generate new off road cycle routes.	Very negative	You will simply push the traffic onto specific routes in the same way the LTN's have. You people have got absolutely know idea how to manage traffic. This is nothing more than an anti-car/driver and revenue generating campaign. Stop making matters worse! I avoid coming it Oxford as much as possible. It's a horrid unwelcoming city - because of this council.	Scrap this silly plan.	Remove roadside parking along these routes, especially Hollow way where it is the primary cause of preventing traffic flow. Remove LTN's. Increase the number of one way routes - this will improve traffic flow.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		No impact	I currently use my moped to commute to the JR from Botley. At the moment 100 permits will be enough, however this may change as my parents in summertown require more care.	I live in Botley and it should not be more difficult than it already is to go into town by car when I have passengers. It is not feasible and cost effective to get the bus when you have to walk from Osney mead. The LTNs in east Oxford should be removed to ease congestion before charging people to access the city centre. It is also time the council really listened to people's views instead of just implementing unpopular policies. Lambeth should be used as an example.	Remove the LTNs. St Clemente is a nightmare on 2 wheels.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	Why isn't network rail and those responsible for the need to charge the congestion charge held to account????		Get the Botley Road sorted!
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative			
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make buses cheaper for all, Add public cycle parking		Very positive	Reduction in overall congestion would have a positive impact as I and residents I know travel around Oxford almost exclusively by bike or bus. The option of day permits is a reasonable option for rare occasions when I may have to drive into central Oxford.		Physically separated bike lane infrastructure
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Negative	If I don't get any passes, it will cost me money to drive to main shopping areas in the city. The same journey by bus would take nearly 3 times as long in each direction	It is an absolute disgrace that the incompetent way the Botley Road works have been handled by all concerned has led to Plan A being "charge residents to use the only available route". It is literal highway robbery. Network Rail should be charged for improving any bus routes or cycle lanes rather than the poor residents who have had to put up with absolute rubbish for years.	Dedicated cycle lanes which are not "share with the buses". The Banbury Road is an accident waiting to happen and it's needless because of the width of the pavements. Buses swerving round cycles and into the other traffic is nerve shredding Remove the LTNs or make them dynamic based on demand - if opening them up removes gridlock elsewhere, open them as a relief road until traffic normalises. Other cities do this with tramways etc
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I hope this will reduce traffic and pollution and permanently change travel habits. I hope this is the start to improving space allocated to active travel rather than motor vehicles	I think it would be better if it wasn't temporary. Also I think there are too many exemption categories. Healthcare and care providers is fine but people should not receive blanket exemptions just because of where they currently live otherwise nothing will chanae in the lona term.	Improve segregated cycle routes. Prioritise bike parking. Provide safe overnight cycle storage at park and ride sites and provide safe routes from them to the city centre.
a member of the public living outside Oxfordshire	less than weekly		I don't	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Negative	Doubtful I'll visit Oxford again but if I do I'd only use Park and Ride		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	Too low	Yes	Make buses cheaper for all		Very positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice. Blue badge holders	I don't	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make buses cheaper for young people		Positive	Reducing bus travel delays	Use this scheme rather than filters	Get cyclists to be traffic lights
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		Stupid idea. Will only push more people away from Oxford which will reduce traffic but will hit the shops very bay	
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	Too low	Yes	Other	make the park and ride buses FREE, and when the council punishes the car users, the council has the responsibility to to provide FREE alternatives	Very negative	The people will simply cut the expense during visiting Oxford. just like skipping a meal or a coffee finally, don't those shop suffer	The congestion at Thames Street are created by the Westgate car park. The council should force the shopping centre to implement pre-booking system for the parking lot instead of waiting at both ways. But sadly, the council did nothing on it.	FREE park and rider buses and less than £10 for family buses tickets can attract people to give up driving. The bus fare must be much cheaper than fuel + parking because the bus operation is so inefficient. More passengers mean more delave on the ticket machines.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients	I don't	No impact	Positive	About right	Not sure	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Positive	Safer streets and air. I will have to make a lot of hospital visits this year and grandparent-as-childminder visits that require a minimum of 2 buses to cross town. These journeys will remain difficult and unreliable journeys by bus at present. But 100 permits introduces this scheme gradually and should be sufficient for my needs I trust.	I think the needs of teachers and hospital NHS workers should be carefully considered. The extra costs of fines may mean they become reluctant to work in Oxford and are probably living outside the city because of housing costs. Should they not have 100 permits rather than just 25 if coming from outside Oxford to allow for days when they have to transport kit into work that cannot necessarily be carried on a bus or Park and Ride scheme?	Better cycling routes. e.g. Woodstock Road - loads of money spent on some inessential work but the cycle tracks either side of this road are not fit for purpose. In winter, dark, wet or frosty conditions the poor state of the cycle route means that cyclists divert onto the better road surface and are then sometimes bullied by impatient drivers behind them to get back on the pavement. Traffic slows as a result. More congestion. Cycle lanes should be separate from the roads please. Pot holes and pot holes over drains can be fatal to cyclists. Cowley Road's excessive road furniture means this feels very unsafe for cyclists when all sorts of vehicles are travelling at all sorts of speeds. Pay money to the police to arrest and charge illegally modified electric bike owners or scooter drivers driving above 15mph. Confiscate their bikes/scooters if using illegally.They are lethal to fellow road-users and themselves sometimes. (Perhaps JR A&E data could tell a story about this?)
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	This will kill the city centre - short-sighted, expensive and we know you have already decided to do this		Why do you think it is so bad? It's perfectly manageable and if people want to sit in traffic, let them.
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I work in a small school located in the congestion zone, this will impact numbers as parents can't get to school. We have already seen parents pull their children out as they are worried about the bus gates. Job losses could happen if we end up losing more.	I live in Carterton, I would get the bus but it takes 1 hour and 20 mins to get there in the morning and more in the evening, by car it is 45- 1 hour. There is an express service but it doesn't get me in on time. If there were more express buses I would consider this. Also invest in the road infrastructure on the Eynsham park and ride!!!! It is such a waste sitting there not being used!
an Oxford resident	weekly	Frequent hospital patients	I don't	Negative	Negative	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	Not always possible to go by bus or to cycle. I live in Haddington and cycling back from Oxford is very difficult as it's route is uphill. Also the city Council have limited the number of buses and where they go from my area so I have to use my car.		Reduce the number of buses going through Eddington particularly the London buses they're only full of commuting times. They could put more on there and then reduce the number. The number of London buses in the city causes congestion in the high as well.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't implement temporary congestion charge	Very negative	It will prohibit my free movement in the city I live in. 100 days free are ridiculous	None. Don't want this scheme	Open the ltns
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	No	Other	Do not do this. LTNs have been a disaster. Stop penalising drivers.	Very negative	Too much interference by OCC without voter support, as per LTNs.	Do not do it please.	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes		Very negative			Make more cycle lanes to avoid road sharing. Make streets one way only. Remove parking from some streets. Remove LTNs.
an Oxford resident	daily		I don't	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Very negative	This scheme would be extremely detrimental for residents, visitors, and students, and indicates an outrageous level of "out of touch' from the council. Central oxford shops are already struggling due to a fall in visitor numbers, and this would be the nail in the coffin. The best way to ease congestion is by prioritising reopening the botley road, and increasing bus services, including discounts for local residents (e.g. travel tax)	Student discount on buses and trains	Reopen botley road and get more buses
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very negative	It is practically impossible to employ school staff at Cherwell and Swan school -teachers live 10 or more miles away -they allow 1.5-2 hours in the morning to get to school on time.	There are so many schools and hospitals in the Marston/Headington area. Staff don't want to drive in-but often have no choice. I would have a free park and ride with a shuttle bus for hospital staff somewhere near Barton Park. I would have free bus travel for all secondary school children to stop their parents driving in. I would also have a park and ride for school staff with a free bus service. I am mainly a pedestrian and have had so many near misses with bikes on the pavements-it would be great for pedestrians to be considered too. Cycle tracks on footpaths are dangerous for pedestrians and cyclists	Free park and ride and bus travel for school staff, hospital staff and secondary school children.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Just pushing all the cars into one place, bloody nightmare driving in Oxford, if there's a accident or breakdown it comes to a stand still! 😂 😂 😂		
a resident of Oxfordshire living outside Oxford	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Won't be able to visit friends as frequently due to cost, being a pensioner and no viable public transport.	Driven by greed and bad governance.	Close the City completely so no-one can go in or out except by bicycle or on foot.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LYNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Oxford is amongst the most expensive areas in the country to live, and people are struggling with a cost of living crisis. This is yet another temporary solution to congestion which will end up becoming permanent, just like the LTNs. This is not fair on the residents of Oxford, particularly those in east Oxford who are already struggling with the impact of the LTNs, or those in west Oxford who are having to deal with the motley road closure.		Open up the LTNs. This prevents pushing traffic in east Oxford onto two arterial roads which are not sufficient for the traffic. Look at a joined up bus system. Make rose hill buses go to the station. Reopen the Cowley branch rail line.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Make park and ride free, you can't keep charging more it's closina down business and ruinina life's	Very negative	It going to close down business the LTNs have already started this and it's going to make it worse		Use of a monorail or additional over pass to service Oxford
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Very negative		Yes	Make Park & Ride parking cheaper		Negative	The council are not targeting the biggest issue of congested roads in Oxford during peak times. 1 The LTN'S have pushed more vehicles into fewer roads around East Oxford. 2 Parents taking their children to and from school in their own cars instead of using public transport. 3 Pecole who are able bodied aoina to the hosstals for aaointments cloaaina roads to the hosstal sites.		
a business	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Traffic is only bad in terms time, looks at a way of getting children in and out of school at peak time.	Very negative	The scheme makes no sense and there is not remit to do this so already looking at options to move company out of Oxford.		Congestion is only bad at school drop off and pick up in term time. Look to tackle that issue rather than make it making it hard to have an office in Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Other	Stop this nonsense charge fee. You are stressing people and they are going to work under stress or dropping their kids to school in stressful conditions -what is that? This is not good care not good treatment for people of Oxford.	Very negative	Negative on the family who are dropping their kids to school or going to work under stress and in the end who care about us .... It should be the people from the council, right. I don't feel anymore that care although I'm living in Oxford more then 10y and I was extremely happy to stay here and raise my children. So sad to say that but unfortunately the councilors will push out decide to leave Oxford.	Not adequate and serious to set them out of Oxford center. Is it Hollow way Center area? Well looks like it is. Not a good idea at all.	Although I'm not happy at all of the theme about conjunction fee and bus barriers or cameras I know I won't stop you to do it and I would suggest to look in a more appropriate timeframe easy for school run and coming back from night shift home.
an Oxford resident	weekly		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Other	Don't implement the charge	Very negative	Having to change job and likely move, it's too expensive as it is		Think of something else
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	Marston Ferry road is the most efficient way to move from east to central. It feels like you're trying to cut off poorer parts of the city. That road is never really that busy anyway		Make busses far cheaper (driving and paying for parking is still cheapest option). Work with bike hire companies like Lime and Voi to make them cheaper and more accessible. I don't understand why the scooters need a driving licence and the bikes don't! Build another car park near Westgate
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Yes	Other	None of the options affect me.	Very negative	I travel from Basingstoke so my daughter can train with the Oxford Junior Stars Ice Hockey team. I'm already paying about £20 for a round trip. This extra charge would make it uneconomical for me to continue to come. I cant use P&R, because it would add an extra 50% to our journey time, and we have to carry a larae baa of equipment plus sticks.	Why do Oxford residents get preferential treatment? It looks like we're going to have to move clubs because of this extra charge, as the travel costs will soon be greater than the club fees!	Tax dirty diesels, not EVs
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	It will cost money that we are all struggling eith	Not only do people have to pay £5 a day they are also going to be charged for parking at there work	Get rid of l t ns
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I commute to a rural location an hour's drive away 5 days a week. My place of work is only accessible via car. This charge will force me to extend my journey by 15-20 mins each way by going around the ring road. This will add more stress and I'll be polluting the environment more. My usual route takes me along St Clements and then Iffley Road - the traffic that I see is heavily caused by school drop offs and pick ups - the drop in traffic during school holidays is huge. Therefore I think more should be done to encourage parents to car share or use public transport to get their children to school. It's assumed that everyone drivina into Oxford has other options of transport, but with my work location I do not		As said above, look at the school areas and what can be done to encourage parents to not use cars to drop off and pick up children that doesn't then impact people who need to use a car for work
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very negative	I have to get around Oxford to different sessions and it would make my life harder	Stop making working class people lives harder	Get rid of the LTN'S to take pressure off the bus routes, which will improve journey times
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders	I commute to the central permit area by car		Very positive	There should be no charges at all	Yes	Make Park & Ride buses cheaper		Negative		Temporary in Oxford means long term	PIR buses should be direct to city centre,not picking up passengers every few hundred metres.
an Oxford resident	daily	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative	This will have a negative effect upon workers, especially businesses in Oxford We already have a negative effects on outer roads outside Oxford City Centre due to the LTN's	Definitely not a good ide	Take out the LTN`s Traffic will run smoothly
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Due to the closure of Botley Road at the station bridge, access to the Westgate and Oxpens car parks requires crossing a charging zone. Residents of Botley currently have no direct bus services into the City Centre, and for many elderly individuals, the walk from Osney is simply too far to manage.	Move the Thames street congestion charge location to the Station side of the Oxpens car park, this would allow access to the carparks via Abingdon road. A better option would be to remove this charge point altogether, the Hythe Bridge street point would 'catch' motorists on through journeys. Provide a bus service from Botley into the City centre via the Abingdon Road.	
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	We travel to central oxford to drop our kids to school. We live outside of Oxford and bus service is rubbish or unreliable. We have no choice but to travel by car.		Introduce bus lanes .. add more routes and buses. At present, it is a deadlock situation. People will happily pay £5 charge per day, as it is still cheaper than return ticket to oxford (£6) .. And infact, people who change buses, they end up paying even more.. This is like penalising genuine people without providing them proper facilities or options.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Extend hours of operation for buses		Very negative	The congestion is Oxford has been made worse by an anti-car policy pursued by Oxford city and Oxfordshire County councils. Remove the LTN's and bus gates and allow traffic to progress freely along all roads capable of taking vehicle traffic. Secondly do not build large new housing estates without allowing for off-road parking at these houses and building the extra road infrastructure to cope with the demand caused by the new housing developments. The idea that these residents can go about their daily routine on cycle tracks is complete fantasy as much of Oxfordshire is commuter belt for London and beyond.	Don't do it.	Remove LTN's and Bus gates as these channel traffic along a smaller number of routes causing congestion, whereas without these traffic would spread out more naturally.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Other	Improve roundabouts at wolvervote and ensyham and lights at cassington to reduce congestion of vehicles attempting to leave Oxford. Queues of hundreds form every single day, creating unnecessary pollution	Very negative	I have no choice but to commute into Jericho by car. This will simply add further congestion via Woodstock road making an already hideous journey unbearable. I already avoid shopping and socialising in Oxford because of the woeful parking and dismal public transport options. This makes me even less likely to come and spend money. The council seems hell bent on destroying what little retail and hospitality venues exist in Oxford. If commuting by can gets even worse than it already is then I would even insist on working from home - depriving even more businesses of the money I spend on lunch, occasional drinks after work etc. this scheme is all stick and no carrot- I fully expect it to be forced through with the clueless Andrew Gant imposing his will on the people regardless of what the consultation says, mick like the LTN's and 20th schemes that are designed to make life miserable for anyone who has no choice but to use a car and which cumulatively are killing countless businesses in Oxford	That are nothing but a tax on working people and businesses that can ill afford it, and an absolute disgrace.	Improve roundabouts on the ring road, especially wolvercote where the recent bus lane changes mean even few cars leave via Woodstock road each cycle. If traffic could leave Oxford easier we would all benefit. When the lights failed recently the queues at 8.30am were almost non existent! Park and ride needs to be much, much cheaper and more frequent. Busses from villages need to be more frequent, more direct, and actually turn up with proper compensation when they don't. At present they are simply not a viable option. Sort the public transport and the traffic will take care of itself!
an Oxford resident	daily												
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Yes	Add new bus routes, Make bus services more frequent		Very positive			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	Add more direct routes from park and rides to each individual hospital: Current 600 bus route takes too long going around various estates and each hospital to be considered worthwhile. I'd rather drive, pay the £5 charge, and then pay for parking at the hospital than spend over an hour to get from my home to the hospitals ... From first hand experience I know that people who have just finished at the hospital are going to be exhausted and feeling unwell after spending hours in a hot and noisy hospital waiting for an appointment or treatment. Once done, they will just want to get home as quickly as possible, not spend another exhausting hour on a hot, noisy, and often overcrowded bus. I can count over 40 times in the last 5 years that I was glad to be driving back home after a stressful and painful appointment/treatment at the hospital in a quiet air conditioned car. I would consider using the bus if it were to just go directly between the park and ride(s) and the hospitals without meadering through multiple housing estates. The 300 bus doesn't stop along the Abingdon Road so why can't the 600?	no	I feel there are other more long term solutions that are beneficial to reducing congestion in and around Oxford. For Example: Add a dual carriageway between the a34 (Adding a new junction between the Hinksey hill and botley junctions) and the a420 near the westgate centre (through oxpens meadows?). This would significantly reduce traffic on the Abingdon Road and Botley Road once reopened. Additionally, another dual carriageway from the a34 either just north of Abingdon across to the m40 near junction 8. It would greatly help divert traffic heading to the M40 away from the eastern bypass, reducing congestion.
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Emergency service vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services		Very negative	Disaster for the area , shoppers will go elsewhere		Leave well alone
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Very negative	Positive	Too high	Not sure	Make Park & Ride parking cheaper		Very negative			Open botley road !
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Remove LTNs	Very negative	Its expensive and unnecessary, the root cause of the problems are the LTNs. Remove them.		Remove the LTNs and fine the construction company in charge of the railway bridge work on Botley Road for the late delivery of the project. Use those funds to improve park and ride and reimburse the local businesses that have suffered
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	Yes	Make buses cheaper for all		Very positive	Why should people living in Oxford have to pay these charges, people visiting oxford should be the ones that need to pay	Yes, it's a waste of money. What about people living in central oxford who need to get to work across town	Yes, get rid of grant and the rest of his party
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	About right	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive			
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	We need to get cars off the road to allow buses to move more quickly and reliably	Do it!	The tunnel of doom is dire. Needs to be widened, with marshalls actually helping people rather than just standing around.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Negative	Too low	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Positive	There should be a modest improvement in bus services - speed and reliability.Make walking safer		Make walking safer to minimise the 'school run' especially the private schools.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	No impact	Too high	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Negative	I think the scheme could potentially be very confusing for those who need to use it. Would need to be exceptionally clear about which roads and when. May negatively impact those who may not be able to interpret the scheme. Would need guarantees that this would not negatively impact on those orovidina health care services. carers. social workers etc...	I do not feel this should be being introduced at all in any form while the Botley road remains closed. It is already impacting negatively on small local businesses - don't give people another reason to not use the city.	Reliable park and ride with adequate parking is not always available or convenient.
a business	daily	Business cars used as goods vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	There should be no income at all. I totally disagree with a congestion charge dressed up as the traffic filters	Very negative	The option I chose is your option provided. No explaination should be needed	I oppose Oxfordshire County Council's proposal for six temporary congestion charge locations, which appear to be traffic filters rebranded as a congestion charge. This scheme is unnecessary and lacks public support. It represents yet another attempt to penalise private vehicle use under the guise of environmental concern. The policy is inherently unfair: it will hit working-class residents the hardest, while wealthier individuals will simply pay the charges and carry on. Vehicle owners already contribute significantly through VED, fuel duty, and other charges — this is an unjustified extra cost. It's effectively "Robin Hood in reverse", taking from those who can least afford it. The plan reflects an increasingly Orwellian attitude toward transport policy in Oxford, where restrictions are imposed top-down with little genuine democratic consent. Instead of punishing drivers, the Council should focus on improving public transport options and road infrastructure in ways that benefit everyone, not just interest groups that are biased in their opinion and have infiltrated OCC	Title: The Case for a Bicycle and E-Scooter Congestion and Emissions Charge in Oxford, A Matter of Fairness and Urban Sustainability Abstract Oxford, like many historic cities, grapples with complex transport challenges rooted in its medieval layout, high population density, and growing environmental concerns. While much policy attention has focused on reducing private car usage via congestion and emissions charges, little scrutiny has been applied to the increasing environmental and spatial burdens posed by bicycles and electric scooters. This essay argues that in the interests of fairness, urban order, and environmental integrity, Oxford should introduce a congestion and emissions charge for bicycles and e-scooters. Drawing on environmental data, urban spatial analysis, and principles of equitable policy-making, the paper demonstrates the growing externalities of these modes of transport and offers a framework for integrating them into Oxford's broader traffic and sustainability strategy. :: 1. Introduction Oxford has been at the forefront of low-emission and traffic-reduction strategies, including the implementation of Low Traffic Neighbourhoods (LTNs), Zero Emission Zones (ZEZs), and proposed congestion charges for private vehicles. However, the near-universal exemption of bicycles and electric scooters from these regulatory frameworks has produced unintended consequences: emissions from battery-powered mobility, pavement congestion, and an inequitable distribution of regulatory burdens. To address these oversights, a new policy model is required—one that includes cycles and scooters in congestion an :: 2. Environmental Impact of Bicycles and E-Scooters While traditionally regarded as "green," bicycles and e-scooters are not without their environmental costs. 2.1 Emissions in Manufacturing and Disposal
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The hassle of applying.	Yet again drivers are being penalised for the incompetence of a big company (Network Rail) they should be the ones footing the bill	
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Open up ltns none of this would happen if this wasn't put in place destroying Oxford	Very negative	People are already punished enough on a daily basis living in Oxford it used to be a great place to live but to council have ruined it who would want to come here	This is not being done for the people of Oxford this is all about control and punishment making people and business suffer may as well put us all back into lock down	Open the roads stop blocking everyone in and stop putting cyclists first they put me in danger on a daily basis (I'm a non driver and am tired of them)
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very positive	I made the decision to sell my car a couple of years ago. Since then I have cycled round Oxford or gone by bus. The huge amount of traffic is getting worse, but your scheme will help to start to turn the fortunes of bus users and cyclists around. Buses in particular have been impacted hugely and although I don't work on hospital sites anymore, the huge number of cars with one person in each used to hold up my commute on the bus by a long time. Good on you for doing the difficult thing. Keep strong. You are standing up for people who need to used the bus and need it to be quicker, and for cyclists who need it to be safer.		'More education of motorists about: - safe passing distances - speed limits Almost every journey now a car scrapes past me with a dangerously close pass. When possible I try to gently speak to drivers afterwards (e.g. often they do a crazy fast close pass near my legs, and having overtaken to save 4 seconds, then end up at a traffic light side by side with me. I tell them in a calm voice how frightening these experiences are, and they are usually friendly and understandina. But I think a police education drive in this would reach more people than I can)
a resident of Oxfordshire living outside Oxford	daily		I don't	Very negative	Negative	There should be no charges at all	No	Other	Get rid of the LTNs that are already there and let the traffic flow freely	Very negative	People who live there will have to pay to get to their home or be given a pass which doesn't cover the year. What if there is an accident the traffic is stuck all going the same way. People who cannot afford to live near where they work are being penalised.	I am teacher. I cannot afford to live in Oxford so I live in Didcot. With the bus gates that are already in place, it is a nightmare to get to and from work, heaven forbid there is an accident. It takes well over an hour to get home which is ridiculous. The people making this decision should be ashamed of themselves and spend a commute doing the journey - leaving Headington anywhere between 4 and 6pm and trying to get to Didcot. It is such a joke! You cannot expect people to work where they live. As a teacher. I cannot get multiple busses and trains to get to work	If you get rid of the LTNS traffic will flow much quicker and people will spend less time in their cars and less pollution. For the people making this decision to actually do a commute during rush hour and see just what it is like when you cannot go a different route.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Very negative	Park & ride free buses (pay to park) No concestion charges at all.		
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	I live in Roger Dudman Way, exactly affected by the Botley construction. When my mum visits, with poor mobility, I normally go get her at the train station or bus station by car, as it's cheaper than a taxi. I will now HAVE to pay to get my mum to my place?? On top of gas and her transport, or a taxi, despite not being able to avoid going into that area. Bus and train stations are there! Picking people from there can't be helped! Specially with low mobility. Are you making people with low mobility pay last because they don't live here or have a disability badge?	I doubt it'll be temporary... Give a 100 passes to ANYONE living in Oxford, within the ringroad, and not specific to their car, as I sometimes use a friend's, because I can't buy my own.	Better parking areas just outside the ringroad, free, and free buses
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders	I commute to the central permit area by car	Positive	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	This proposal will not help with reducing traffic, same as the LTN's. You will simply displace traffic to other already congested areas and make the pollution issue even worse. Please think carefully about what you are doing and stop with this arr car dogma.	No	Stop private school parents dropping off their children in pinch points like Iffley Road - this causes chaos. If you are to implement this then make those who commute to central areas (I am about to start as a family liaison officer at Cherwy School, and I will have to consider giving up the job before I start as I will be visiting vulnerable children in the affected areas and I won't be able to afford it.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Neutral	You know as well as me it won't be temporary congestion charge it will be acted on and said it worked well so we will keep it.	Yes don't waste the money and look after the pensioners instead.	More frequent buses.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Neutral	There should be no charges at all	No	Other	Remove NTLs	Negative	moving the problem from one area to another by pushing traffic onto dual carriage way. This will cause congestion	The areas were not congested like this until the LTNs you are also penalising the public for the over run of the Botley Road works. The train company should be fined not the public. Oxford is a small city that can not take these changes. Use ANPR instead of LTNs then residents don't have to join the que of traffic driving past their street to get to a roundabout to drive up a road to enter their street in another direction.	Use ANPR instead of LTNs so residents don't have to drive past their own street to a roundabout then up another road to access their street from another direction.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	Too high	Not sure	Other	To mend potholes and similar repairs	Neutral	It's going to happen regardless of what we say.	No	Make scooter riders, cyclists, and all road users obey the law! At present, it's a free-for-all!
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Very negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Positive	There are too many free passes for Oxford and Oxfordshire residents being offered, I'm not sure this is enough incentive to really change driving behaviour. The price should be more than a return bus journey at minimum.		Please sort out the small bit of road between Kennington and Redbridge which goes from 30mph to 50mph for about 100m before dropping back to 20mph. This causes incredibly dangerous driving as everyone accelerates then decelerates rapidly.
an Oxford resident	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	We do not want this. You've destroyed the city with your LTNs. This is a ludicrous decision. Working class and low income families are again being penalised. Nobody can afford these extra charges.	Just stop.	Do you even care what the local residents want? It's OK saying get on a bike. How can I carry a weeks worth of shopping on a push bike? How can I travel 6 miles across the city to care for my elderly parents. You are thoughtless. You simply don't care.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	This is another scheme thatll kill the city centre for anyone but tourists.	This survey is loaded. You have to answer the questions on permits based on it being a done deal such as to what to do with the money raised.	Get rid of the LTNs, makes buses cheaper and get rid of Andrew Gant
an Oxford resident	daily		I don't	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	I will no longer be able to drive on multiple routes that I currently can.	Charging drivers to use roads that they have already paid high road tax to use is simply wrong.	If you want to encourage people to not use their cars, make the alternatives attractive - don't force people to use them by charging them more if they don't!
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Neutral	Neutral	Too low	Yes	Make buses cheaper for all		Very positive	There are far too many cars in Oxford, especially on Abingdon Road. Reducing that number will make travel quicker and more pleasant for everyone		Close the Westgate car park! Add side bridges to Folly Bridge for pedestrians and cyclists Remove nsht turns between Donnington Brdge and Abingdon Road.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all		Very negative	This beautiful city is being destroyed by you know who, there will be no visitors, shoppers, more shops will close and all because of greed. How do you get to the train station without passing thru a £5 zone? Quicker and free parking to drive to Dickot, Witney and better shopping too. I'm sure John Lewis' rental deal once ended means they will also leave Oxford.	Just greed and you know who taking pleasure in destroying our once beautiful historic city. He harps on about cycling - am I going to do this in pouring rain, drizzle, frost - no, I can't arrive at my job looking a mess.	Remove the LTNs that East Oxford residents voted AGAINST as reported in Oxford Mail but he put them in anyway - no democracy. People have died since he put the LTNs in, widely known because of the additional time for emergency services to attend. Note, there are no LTNs in North Oxford, he wouldn't allow it.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent		Very negative	The whole city will suffer as people will stop coming here. The city centre will become a student / tourist centre with no real life. People should not be hindered getting to hospital. Woodstock and Banbury roads will become impassable as everyone is diverted there from Marston Ferry. I agree that commuters should possibly pay but only at peak times. Residents should not have to pay to move around the area and not be trapped in their homes. The nearest bus to me is half a mile away and I have had two knee replacements. People don't have time to walk to bus stops, wait for buses. Not everyone can cycle!	Your stupid policies of building houses on the periphery and keeping sites in the centre of the City for commercial stuff exacerbates commuting. More cheap accessible houses should be built in the City near the jobs!! Also electric cars should be exempt. Traffic is only bad twice a day so keep the charges for those coming in and out and not those who live here.	Target commuters not residents. Build houses close to jobs not stuck out in the green belt. Plan properly. Listen to the residents!
an Oxford resident	daily	Taxis and private hire vehicles	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	No logical explanation, in a financial crisis these charges will derail economic and social stability	Not thought out, no clear purpose	Public consultation, meetings and hearing public views procaitively
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Negative	About right	Yes	Extend hours of operation for buses, Add public cycle parking		Positive	I drive into Oxford once per week, but can pick a route that doesn't cross a charging location, so this doesn't affect me greatly. On the odd occasion I need to drive through a charging area I can use one of the Oxfordshire resident permits. I often use the park and ride, or bus on the Abingdon Road. and this scheme should reduce delays on this route.	Locations seem sensible - I am looking forward to the introduction of the eventual traffic filters.	Having a 'time-limit' to the bus charge, like in London, where you can get on multiple buses within a time period (e.g. an hour) for the price of one bus. Some routes require a bus change which makes them disproportionately expensive compared to drivino
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Registered car clubs	I don't	Negative	Very negative	Too low	Yes	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Positive	Living in South Oxford, I hope that the new congestion charge will reduce traffic in the city centre in general, and on Abingdon Road in particular. I would say "very positive" except that there are so many exemptions that I expect the traffic reduction to be less than it could be. The charge is far too low. At £5/day it is less than a single return bus ticket around the city for one person, let alone tickets for a day. Please make sure that it is cheaper to travel by bus than by car. I'm concerned about the number of exemptions. * 100 days per car, with up to three cars per household, would allow someone 300 days of driving through all the filter locations without ever being charged. This is enough to commute every work day, or to do the entire year's school runs. We need far fewer exemptions than this to change people's behaviour. * Only charging vehicles of type M1 (cars) also creates some perverse incentives. If one wanted to drive around the city for free every day, this could easily be achieved by using a van instead of a car. Worse still, vehicles of type N2, which includes pick up trucks such as the Ford Ranger, are often used as private cars. These vehicles would be allowed to drive through all of the filter locations for free every day. This congestion charge has built in an incentive to replace a car wih what amounts to a monster truck. These vehicles are worse for congestion than cars, due to their size. They're worse for pollution. And they're far worse for pedestrian and cyclist safety.	Please make sure the money raised from the congestion charge is used to encourage people to travel to Oxford by public transport for their entire journey. Currently using the Park and Ride is significantly cheaper than using a bus for a full journey's length. This is the wrong way around; we should be subsidising people to travel the whole distance in by bus rather than to drive to the edge of the city and catch a bus from there. Currently it is cheaper to catch a bus from the park and ride than to leave ones car at home and catch a bus for the full distance. This is a perverse incentive. Please subsidise the ride, rather than subsidising the parking. The workplace parking levy would also help with this. I really cannot understand why people commuting by car to park at city centre employers should be exempted from this charge. We want them to cycle, use the bus, or use the park and ride.	Reduce the amount of parking in the city centre, and make what remains more expensive. If large parts of the centre had no parking available and that was clear to drivers, then that would reduce journeys driven to the centre, and also cruising to look for spaces. The workplace parking levy would also help with this. I really cannot understand why people commuting by car to park at city centre employers should be exempted from this charge. We want them to cycle, use the bus, or use the park and ride.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive	Anything that reduces the volume of traffic on Abingdon Road would be welcome.	I would extend the central parking area. The traffic to the Westgate centre makes the lives of those living off Abingdon Road a misery.	Make westgate centre parking more expensive and encourage more park and ride use.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Disability benefit claimants, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I have to drive round the whole of oxford just to get to cowley road when I live marston road right near St Clements... this takes the mick and I can't afford petrol ... I need my car to load shoppin with my autistic son which im not entitled to a blue badge	Stop making us pay for things we didnt ask for get rid of LTN and maybe make the streets one way...	One way streets ... please listen to the residents that live here as you are making it lives suicidal
a resident of Oxfordshire living outside Oxford	less than weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Negative		Will make it harder for businesses	
an Oxford resident	weekly	Unpaid carers	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Stop ripping people off, change 20 zones back to 30 and plant more trees not lins	Very negative	Oxford is becoming a no go area for many, the lins and 20 zones have already increased congestion and caused cars to drive more miles than before. Absolutely backwards ideas so far and a war on motorists to Rob more taxes		Remove lins, put 30 zones back in place
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	We will not visit Oxford, we will go to Reading or other towns	Thus should not happen until Botley Road reopened. Very worried about impact on hospital visits/ appointments	More direct bus route into Oxford from Wallingford
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	Too high	Yes	Add new bus routes, Make bus services more frequent		Negative	Elderly with mobility problems; no bus service in Jericho; husband needs trips to JR hosital.	Surely it is the nose-to-tail buses in the High Street that cause the most pollution.	
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	Too high	No	Other	There are already too many buses that go into Oxford. Most of these buses only have a handful of passengers. Why not make the park and rides a central bus station. Shuttle buses or more frequent park and ride buses can then take buses into central Oxford	Very negative	Unless you scrap parking charges in central Oxford to mitigate the extra charge I won't be going to Oxford	This whole idea is ludicrous and ill conceived. It is a knee jerk reaction to comments made by Oxford Bus Company that do nothing but benefit the buses. It is unfair and immoral and highlights the inept councillors in charge of our counties roads.	As already said the park and rides should serve as a hub for the buses. There are countless buses going in and out of Oxford all doing the same journey.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Positive	There should be no charges at all	Not sure	Make buses cheaper for all		Negative	A charge would apply on st Clements which is a regular route I drive. Traffic is dreadful since LTNs, doesn't seem fair to punish residents. It also puts people off visiting us.		Make cycling safer, buses cheaper, but not really. As it is it's very frustrating.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Oxford is already a very unwelcoming city. The road system from Hythe Bridge Steer to the Westgate already doesn't work. Charge for Thames Street and this blocks off access to the Westgate parking. I pay congestion charge, then expensive parking fees! I would definitely stop coming into Oxford and find a more welcomins city to go to.		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I don't think it'll reduce the traffic, just increase Council's income	They're unacceptable while Botley Rd is still closed. I don't see how the traffic on remaining roads will improve with this plan. Bus situation in Oxford is abysmal and caused mostly bv the overrunning rail works.	Reopen Botley Rd or force the National Rail to build temporary overpass for motor traffic to recover West side route to the citv
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	No			Very negative	This would make Oxford a location that I wouldn't choose to visit for retail/leisure purposes. I personally choose to drive as with 2 small children, the buses aren't suitable - either waiting long periods or unable to get on with prams. With other locations in Oxfordshire, I would go elsewhere. The offering in Oxford is pretty poor anyway, so the introduction of this would just make it a waste of money going into Oxford, when I could go elsewhere for a lot cheaper (e.g Banbury/Newbury/Didcot/Reading)		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Negative	The existing LTVs cause great difficulties for workers who need to visit and move around Oxford for work, eg those employed in education and health services. Existing bus services are of limited use - there is no guarantee that the new scheme would be accompanied by improved bus services. The proposed scheme would incur costs and complexity for everyone. No figures for estimates around which the effectiveness of the scheme could be judged have been provided		Traffic congestion in and around Oxford is the direct result of planning decisions which result in the building of many thousands of houses and business premises on what was previously agricultural land. The car and commercial vehicle traffic needed to provide services to new developments is an inevitable consequence of those decisions.
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Scrap cycle lanes	Very negative	I have elderly parents living in a zone I would have to pay to get into to visit them!	They are ridiculous	Scrap all LTN's then the traffic would flow just fine like it did for the many years before! this ridiculous traffic mess has only happened since they were introduced! Also make more roads one way to help solve the problem
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	Poor idea that will kill the centre of Oxford.		Make Park and Ride parking free and cheap bus fares to get there and back,
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Neutral	Neutral	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Positive	Oxford is horrible to access because of the traffic, almost all caused by those on the school run, or parking at the westgate.		I would go a step further and prevent any private traffic beyond the park and rides (except for those with accessibility / residential needs)
a resident of Oxfordshire living outside Oxford	daily	School students with special educational needs	I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Negative	In my experience the main daily congestion is around Oxford and not in central Oxford. This charge will only make that worse as it will push people out.	The focus of easing congestion should be on the roads around Oxford and not those in the centre. I do also worry about the impact this charge would have on those visiting the city centre to shop. Also people may reduce train travel if they cannot be as easily dropped off or picked up from the central train station.	The ring roads and A34 are where the traffic is considerably worse. Need to focus more on schemes which could ease that. That would have a much greater benefit.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I will go else where Oxford is becoming a no go zone for shopping due to high price parking. I don't want to use the bus to carry bags of shopping on.	Just a reminder you are a public servant. Your job is to serve the people and do the will of the people not your own agenda. If the public say no to this, and you push it through everyone of you should resign.	You have made it worst with blocking roads.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Very positive	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all		Positive			
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Very negative	Because it can be said with 100% certainty that the charge will not be temporary.	If this was being done for genuine reasons i.e. to reduce congestion, as opposed to a mere money making scheme, — and on the basis that it was in fact only a temporary measure— then the honest approach would be to simply use the income to make the park and ride service completely free for the duration of the congestion charge period, including park and ride parking costs.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Negative	Too low	Yes	Make buses cheaper for all		Very positive	Our house does not actually run a car, we rely on a car club. Oxford needs to be far less dominated by cars. The Broad is now a wonderful space for people. Very few would argue that it is changed back to a car park. Oxford CC needs to be bold and make changes for everyone's health. Change seems to take far too long. How long have we been waiting for the bus gates?	No	Cheap and frequent buses. So many people say they would take the bus if they were reliable, so they simply add to the traffic that makes them unreliable. Also - why is there no pedestrian crossing on St Giles, anywhere? Whilst it is meant to be a 20 mph road, that is not enforced. A few zebra crossings might help slow the traffic, and help pedestrians. Also (!) the traffic lights at the corner of Parks Road and South Parks Road are a joke for pedestrians. They take forever to change. If the idea is to prioritise vulnerable road users, they should respond almost immediately. Last - in France lights at pedestrian crossings where there are usually a lot of pedestrians change automatically on timers, there is no "beg button". And in some places in Holland they change from pedestrian to car only when they sense a car waiting. How about some of this to prioritise pedestrians?
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Emergency service vehicles, Firefighters	I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	Not sure			Negative	I have no choice but to drive to work as there is only 1 bus route which is very infrequent and completely inadequate for me to use	It feels like a knee-jerk reaction. Get the Botley Road open before any more restrictions are brought in PLEASE	Busses that cover more routes not just the most profitable
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	Yes	Other	I don't think you should do it at all	Very negative	We often have to use the Marston Ferry Road to get to the hospital		Have an inner ring road and pedestrianise the city centre. The Marston ferry road should be part of that inner ring
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Not sure	Make buses cheaper for all, Add public cycle parking		Very positive	Very sensible and pragmatic scheme, 100 permits is a good number, income generation for reinvestment is needed. Speedier buses would be super. I drive, cycle, walk and bus around Oxford, with my 3 children and this is a sensible investment for their future and for our city streets.		Fitter lane coming down Rose Hill still doesn't work well and causes a lot of tailback for cars not turning into Between Towns Road. School streets should be more widely implemented, including around private schools, and driving to schools should be disincentivised. More bike parking please. More monitoring of hire scooter parking, as they're currently a massive hinderence to pavement safety. Please can we have policing of car drivers using their phones to text whilst in queues - not only is it prolific and dangerous but their slower reactions to the queues moving slow down the traffic.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very positive	I mainly cycle to/from Oxford and occasionally use buses in the evenings. Any actions that reduce traffic on my route make me feel safer & reduce exposure to emissions.	Why not offer daily bus passes to city/county residents rather than permits?	Changing behaviour of dyed in the wool drivers is very difficult so focus on the future. Free/very cheap bus travel for u20s Bike loan or hire free/cheap passes for u20s Cycle to school incentives (individual & school)
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent		Very negative	Traffic is already very bad in Oxford and this will push more traffic onto the ring road, this will affect people travelling to hospitals	Hollow way is not particularly congested in the mornings and will push traffic out onto the ringroad	The train that is planned from Cowley to Oxford is a great idea, if it could run from somewhere like horspath this would be great

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't do it. Very bad idea. Totally unnecessary in a city this size	Very negative	Though I will charge the extra driving time off against my taxes. It restricts access to the city. I estimate two hours a week extra driving. 100 hours a year @ £100 an hour. Lost tax revenue	I am 100% opposed. Despite the fact I normally cycle into town, Marston Ferry Road and Hollow way are particularly bad	I don't think we should reduce traffic. We should reduce buses. Many are empty. They are subsidised. Congestion is due to people wanting to use the city! Trying to diminish it will harm the economy.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I frequently have to drive via St Clements and this will make my commute very tricky. I am not able to get a bus from Abingdon as they no longer run the Brookes to Headington campus route.	See above. Please reinstate the old x13 bus from Abingdon to Oxford Brookes Headington campus to make the commute more feasible by bus.	See above.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't			There should be no charges at all	No			Very negative	It would put off people travelling into Oxford to shop, have dinner.	It is a bad idea and will discourage people from Oxfordshire going to shop/visit the restaurants.	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		Just pushing traffic on to all ready busy roads .	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Extend hours of operation for buses, Add public cycle parking, Other	Make P&R faster	Negative	Live in Kennington so right next to charge zone, when travelling in to Westgate/Oxpens would have to pay charge. Would only qualify for 25 passes. Bus is currently £4 each return, Westgate parking after 5pm is £4.80.	Include the bordering villages in Oxford passes zone.	Try and figure out how to include bus lanes all the way in. Train line through Littlemore/BBL is a good idea.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Sometimes there is a need to travel into Oxford by car as it becomes more convenient than using public transport. Having small children who often struggle to walk the distances when shopping in Oxford having the car close by is a god send. This charge and anticiated difficulty in getting passes due to drivino a lease car makes me concerned.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice. Unpaid carers	I don't	Neutral	Positive		Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral	Inconvenient but better air quality and hopefully improved cheaper buses. Pros and cons		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all		Make buses cheaper for all		Very negative	Lost trust in system which put in LTN's against majority of opinions surveyed .. Would like independent survey with open scrutiny of results and recommendations upheld.	It is a strangled hold on city centre !	Park and ride must be free. People will choose it especially with cheaper bus service.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	as resident I should always allowed to go in different part of the city by the more convenient way and with the more convenient mean (car, bike, walk) without limitations imposed on me		- residents should be in the priority groups since forcing them to go the long way would increase traffic -park and ride should be free for visitors that make purchases -Westgate car park should be made more expensive and Westgate should pay for a person who enforces the "car park full" sign and avoid traffic lams that blocks the entire Abingdon road
a business	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Improving the flow of roads for cars/vens etc , rather than creating pinch points with hairbrained schemes	Very negative	For the last 20 odd years I've been involved in projects as a carpenter that improve and enhance Oxford , heritage work to College's , new school classrooms , affordable homes etc , and in that time it has become harder each year to access and then park at these projects, we carry 100s of kgs of tools and equipment at times , and public transport is not suitable for transport in this case. The building trade does not rely exclusively on vans either so permit would need to reflect this and I'm sure as in the parking system they eventually won't. Giving permits initially to appease certain groups can easily backtracked on , once the scheme is in place. Unfortunately history has told us that when you give up your freedoms , they are never handed back willingly.	If you want Oxford to flow, have a fully pedestrianised central area, no buses, no bikes , no scooters. Maintenance would be completed in this area out of hours and financed to reflect this. Remove LTNs , queues of vehicles chugging out co2 or EVs going flat helps nobody. Introduce one way systems where necessary. Inforce removal of E bikes that hammer along cycle lanes over speed limit endangering cyclists and pedestrians. Enforcement of traffic lights for cyclists (I am one btw). Stop Taxis using Bus lanes , why does paying for a hired car and driver entitle you to hold up public transport. Encourage early/late goods delivery where possible. Remove untravelling/unused vehicles.	All in answer to Q 14
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I work at the hospital so would have to reroute to be able to get to work or pay to go through the zone. Its very unfair.	Its ridiculous to charge people. Very unfair and will cause more traffic elsewhere because everyone will be using the same roads.	Stop closing off roads elsewhere
a resident of Oxfordshire living outside Oxford	daily		I don't	No impact	No impact	Too low	Yes	Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very positive	I dont drive but catch the 400 bus in and out of town most days. Sometimes it can be really slow because of the traffic so hopefully this get better		I like riding my bike but don't feel safe in the centre. I don't ride any further than Headington so a separate cycle lane with no cars all the way into Oxford would mean I don't need to wait for a bus
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	My family and friends will be put off visiting, as I live in central Oxford, 100 permits a year is not enough. I also have a disabled family member who lives in another part of Oxford that will have the congestion charge enforced so visiting her will be more difficult.	Oxford is becoming a no go city for car drivers	Remove the LTNs
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Other	Apply the congestion on weekdays only and limited time	Very negative	With the cost of living crisis, the lower income will be affected more. I live just outside Oxford with limited bus service and I need to os to shoosno in Cowley or meet friends.		Apply congestion charges on peak time only
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Negative	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses		Negative			
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make buses cheaper for all		Very negative			Remove LTNs and let the traffic flow freely , insist bicycles use cycle routes that are in place .
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Other	Narrow hours to 6pm to not deter evening visitors	Negative	Not being able to freely move around and impact on finances as there are already to many LTNs that have a negative impact on the people who live in Oxford unless you can ride a bicycle These trips are already barely viable ,a charge to visit Oxford will be the final straw for me. Theatree and cinima start at 1930 usually. To make it worthwhile an eta by 1800 allows us to get something to eat. I visit Oxford less and less now. Bus from park and ride for an evening in oxford just does not work.	Waste of money , not needed .if you removed the LTNs the traffic would flow freely and not impact the main roads , it seems like Oxford in a dictatorship..	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Other	Make buses free to everyone	Very negative	I'm living within the city how would I need to pay for congestion charge ? The idea is to avoid congestion's caused by outside cars not residents cars.	Its just easier to go elsewhere for entertainment these days.	Finish the Elynsham park and ride!!
a resident of Oxfordshire living outside Oxford	weekly		I don't							Very negative		This is a bad ideas and it would cause even more congestion as you just push all traffic into the ring road. Why don't you make buses all free to everyone then the traffic would be solved by itself .	Make public transport free
an Oxford resident	daily	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Negative	There should be no charges at all	No			Very negative	Have to travel daily to central oxford so will cost me to go to work Plus it will put more traffic on Morrell avenue	Waste of time	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	This is a hideous ideological scheme that promotes free passes to those who live in town with access to public transport yet punishes those without public transport who have to travel into town. Where do you think your food comes from?	Very negative	We have no option other than to drive into town, we car share not to pretend that we're green but because it's common sense, not no mention of that, just should we charge for bigger cars, no doubt excluding overweight EV's which damage the roads but as the smog from their electricity is made elsewhere that doesn't have any impact on your precious city. When we asked the liberal hypocrite of an MP why car sharers or villages JUST outside the city walls weren't going to get the 300 permits as those who lived inside his response was "if you don't like it don't vote for me", Callum Miller is a disgrace!	Consider the people your madcap ideological scheme has an massive impact on that will make little or no material difference to improve journey times, in fact there has been little to no factual evidence to support these plans, just chippy comments about large cars and giving central Oxford residents far too many passes. Logic would give those who need them who have no public transport 100 passes and those with good access in the centre very limited passes as those are without doubt the ones who are driving short distances when they don't need to and unnecessarily clogging up the roads.	Traffic doesn't need reducing, congestion would be solved by opening up the Botley Road and scrapping those pointless cycle and bus lanes that randomly stop. Build bus stops off the road so that all other traffic can pass, especially up the Banbury road from Marston Ferry to the Cutteslowe roundabout. The buses are hardly ever full, put on smaller buses more frequently. Build proper cycle lanes that do not interfere with other road users, the Woodstock road is a disaster trying to walk along as a pedestrian, or drive along. Try listening to your residents, from the many people I have discussed this with it would appear none of you are and sensible ideas based on fact and common sense do not come into play.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very negative	We live in North Oxford. My husband has a degenerative condition which means we have to visit JR every couple of months. Not enough for your proposed changes. My social network and mental health and physical health, will be affected due to not being able to travel down the Marston Ferry Road. This is an awful idea.	You are not listening to the people who put you in power. Your LTNs and travel charges are ill thought out. Your suggested parking in Summertown alone will affect businesses; as it has on the Botley Road.. You price everyone in a lower pay grade than £50,000 out of Oxford. You will have a student strong, but local poor colour in Oxford. Who will pay for your city when local people have been forced away?	Scrap LTNs. Make Cowley Road one way, and Iffley Road one way, (other way).The breath of these roads mean that businesses there will be able increase footfall. Mental health services are there. Oxford residents need to access the city . Or build hospitals and GP surgeries and markets with direct access from the ring roads WITH parking. Ensure access to the ring road is safe, with traffic lights rather than slip roads. It is not safe with 'short' slip roads to access the ring road from points such as; Wolvercote, Kennington, Botley, and Rose Hill, Barton has it right. Ensure any road planning is undertaken by a Driver!! Ensure free flow traffic. Enlarge the a34. This is the spine of the UK and is so often blocked though accidents. Allow the A34 to be accessed to but bypass Oxford. Look at pinch points. Find out why they occur. Fed up of roadworks. Fed up of no coordination or cooperation between services. Make busses accessible by stopping when flagged by anyone. Make more roads a '2 hour' stopping point for cars. It's especially noticeable that the more affluent'North Oxford' is not as affected by proposed congestion charges or however you dress this up, as the other, more regarded as 'poorer', less affluent areas of Oxford. Shame on you.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Negative	Negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Finish the access road to Eynsham park and ride and get people off the A40, reinstate the Oxford to Witney train line	Very positive	I spend around 10 hours every week commuting by bus due to congestion between Oxford and Eynsham, much of the traffic is going into town and is made up of large single occupancy cars.	To encourage more people to use public transport we need to make space on the roads for a reliable bus service, and i think this scheme will help if done properly. Make the buses/park and ride cheaper than the congestion charges though or there's no incentive for people to change their behaviour - if people are asked to choose between a £6 return on the bus that runs on a schedule, or a £5 charge for the whole day on their own terms, they're going to choose driving every time.	Finish the Eynsham park and ride!!
a member of the public living outside Oxfordshire	weekly		I don't	Neutral	Very negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very positive	Cars are a blight on Oxford's roads, causing horrible buses to be stuck in traffic and emitting constant noise and air pollution. Oxford is a walkable city with reasonably reliable public transport. There are few valid reasons to need a car in the centre.		Reduce bike theft and build proper (read: segregated from the road) bike lanes.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	Too high	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	My drs is on Holloway and I drive there to Catholic Church and that way for my dentist as don't like driving on a34	Don't agree with occ traffic policies at all LTNs are so wrong and have made the congestion on the roads around Cowley iv lives in Oxford Cowley and ersaler levs for 60 yrs comdete loke now ruined the city I once loved	Open up the LTNs
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Improve quality of white lines on roads. Reduce potholes.	Very negative			Only allow Electric vehicles in oxford
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	I don't drive in every day, but usually save my car for days when I need to go somewhere with my children at the end of the day. It's really frustrating that a huge part of Oxford is already pretty hard to drive through, especially when trying to juggle work and family commitments with tight time deadlines. Business in Oxford has already suffered due to the Botley Road mess and things will onlr get worse with more restrictions.	Save the time and effort on this and focus on improving public transport, please.	Cheaper public transport. It's got to cost less than driving, and it really doesn't.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Business cars used as goods vehicles	I commute to the central permit area by car	Negative	Neutral	There should be no charges at all	No	Other	Improve roads for people who actually pay toad tax to use them by fixing pot holes. And fining cyclists eho use the road when there is a desiorated cycle lane nect vo them	Very negative	I have family who have medical appointments regularly in te city i drive tjem and bavk to collect them. We just couldn't afford extra costs. Its fine for yhevich but the most vulnerable poor people who just about survive wont cope	Scrap them completely	Sack Andrew gant
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Hearses and funeral cars	I don't	Negative	Negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	I think that while the system has a significant role in reducing the levels of CO2 I'd say that levels of traffic in the centre of Oxford are low as it is due to pedestrianised areas and bus gates. This proposed emission zone while having a correct reason at the centre, I just feel that I may not be necessary as traffic is relatively low as it is. And so as a result by expanding the zone, there may be no real effect		By connecting up the eynsham park and ride, even if it is connected via bus lane until a later date. By bringing buses into public ownership, like in London, Manchester and the West Yorkshire regions in order to lower fares and increase connectivity due to bus times being centralised. And also by improving the safety of cycle lanes entering the city, as in areas such as the plain this can be a real issue and discourage people from cycling. In reality though, I believe that the council is doing enough as it is, and not much more needs to be improved
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Hearses and funeral cars	I don't	Positive	Positive	Too low	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive	Car use is still too high and makes bus use unreliable	Saturday needs a longer time period. I travel in by bus from Didcot and Abingdon Road is the weak point in the journey	Wider pavements in High Street, stop focusing on the red tourist busesand focus on making the city walkable
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	Get charged enough in the Westgate car park on weekend visit now it will cost more	Why not do something like with the proposed traffic filters where Oxfordshire residents aren't affected not just people who live in the centre	
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Unpaid carers, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't charge and then you won't need cash to run it	Very positive	You are only moving the same amount of traffic from one place to another, it will only cause a jam elsewhere	Do not do it	Sort out the A40,since allowing new builds by wolvercote roundabout you have made it 100 % worse
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area. on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for young people, Add public cycle parking		Very positive	There are way too many cars in the city. Any measure to discourage their use is welcome.	Add them to Cowley and iffley Road, too.	Ban school drop off and pick up by car.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area. on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Negative	Given the location of the proposed gate at St. Clement's this will force the traffic to use other routes causing further congestion. It will be impossible to get from morrel Avenue to if felt road without adding significant time and congestion on other routes.	Reduced / no congestion charge should be introduced for those with electric vehicles to promote the uptake of green vehicles.	Build more affordable housing within central Oxford, have more affordable and regular trains and buses from local Villages.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Other	I don't trust that there will be a reinvestment	Very negative	It is difficult enough to come into Oxford as it is. I actually don't find Oxford welcoming at all and am selling my home to live elsewhere. I come into Oxford 3-4 times a year and if I had to pay a congestion charge I would not come in at all. You are making the city less accessible and more exclusive va inclusive.	See above. Oxford is not a welcoming location.	It's already a terrible place to drive around.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Yes	Make buses cheaper for all		Very positive			Get rid of Gant. The private schools should have a bus service for their students. No cars should be alowwed for them to be drocoed off. All students should be banned from brinoina their cars whilst studvina in oxford
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative	This is not the answer. We need a policy of carrots not the stick. If buses were cheaper people would use public transport.	Offer free parking outside the city and cheap bus fares then it is a much easier choice than trying to find parking.	Offer much cheaper bike hire throughout the city, better bus lanes and free motorcycle and scooter parking.
a member of the public living outside Oxfordshire	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	A congestion charge will not get rid of congestion in Oxford and will not make buses run to time. I worked in Cowley before and immediately after the introduction of the LTNs along the side streets of the Cowley Road - this was the point at which congestion became noticeably worse. To reduce congestion at these points, remove the extremely unpopular LTNs. Furthermore by introducing these schemes, traffic will increase on the A34 ring road, increasing congestion there and pollution for people who live, for example, in Botley. There seems to be no consideration for the people living in these areas which, due to university monopoly in the city centre and high cost of housing, is the majority of people working in the city. There are also issues of buses being out, with no return of these routes being made before the introduction of these charges, for example the 400 bus service is being removed from travelling as far as Harcourt Hill, leaving just one bus service to serve the entirety of the Botley estate. It is manifestly unfair to implement charges before addressing the lack of alternative options.	There has been little consideration for the people who live and work in Oxfordshire. Communities should not have to pay to access, for example, the hospital or their local doctors surgery. Although I no longer live in Oxford I visit regularly as the majority of my family live there, and for them to reach their GP surgery they would be forced to pay the £5 charge since there is no bus route to the surgery and it is a significant walk, particularly when unwell and with the Botley Road works continuing until next year. I sincerely urge you to reconsider this scheme which, quite frankly, appears to be little more than a money making scheme rather than a genuine attempt to improve traffic conditions for the county and actually providing something of benefit to all residents, not just those lucky and affluent enough to live in the city centre.	Abolish the LTNs; re-introduce axed bus routes; ensure there are viable, positive, alternative travel options before punishing the entire county with unfair charges.
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	There should be no charges at all	Yes	Make buses cheaper for young people		Neutral	We the residents already pay the highest council taxes so why this extra charge!		
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
other	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	An unnecessary charge on people who are already struggling.	Please do not implement this charge	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very positive	We need fewer cars in Oxford as a matter of urgency.	Comms, comms, comms!	Trams, buggies, pedestrianisation from the bottom of the high st through broad st, St Giles, Beaumont st linking to Walton St LTN reinstated.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	Too high	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I have to drive my daughter to nursery on the way to work, which would entail driving through the congestion charge area every work day. However I do not work in central Oxford so do not know if I would be eligible for the permit.	This seems unlikely to actually help traffic, and instead to lock up the ring road making it harder for most Oxford residents to commute.	Start with improving the buses - if it were easy to do the journey by bus, people might be willing to choose that over driving. Starting by making it harder to drive without improving bus services (and just some vague mention that you might use income to improve buses in the future) will just make things harder
a resident of Oxfordshire living outside Oxford	weekly		I don't							Very negative			Get rid of the LTNs and the traffic would return to normal,instead of all the traffic blocking up the main routes in and out of Oxford
an Oxford resident	daily	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Negative	There should be no charges at all	No			Very negative	Have to travel daily to central oxford so will cost me to go to work Plus it will put more traffic on Morrell avenue	Waste of time	

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitlt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitlt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	As a key worker, i.e. a teacher, I have no option to work from home and must travel during the times that it is proposed that they Marston Ferry Road is closed/restricted unless I want a 12 hour working day. This is unreasonable and undermines all that was said about key workers during the pandemic. Looking just at the end of Marston Ferry Road there are 5 schools and the JR. Using the bus is not any option as they simply are too unreliable to arrive at a consistent time plus they are expensive compared to Europe. I have NOT voted for this approach nor did anyone else as it was NOT visible in any manifesto. C	Reopen the LTNs and this will free up the arterial roads which the bus company's report has clearly suggested. More carrot and less stick will bring about lasting chance to habits. Make it easier to do rather than hold residents and schools hostage. Recruitment will become a major issue in Oxford's key services and this should be considered seriously.	Remove LTNs. Bring back old street lights so it is not so dim for travel when the clocks change. It isn't safe for women e.g Marston chucked path and Marston Ferry Road (hidden from view so not good at night).
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Other		Negative			Reduce the LTN's, make roads one way
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Negative	Cant get my son to school or to his childcare with these regulations in place		Remove ltns
other	daily		I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	Not sure	Make bus services more frequent, Extend hours of operation for buses, Other	Introduce discount/free bus travel for those attending events in wry centre	Very negative	My daily commute will be extended by approx 45 minutes per day or c.£200p.month The hours I work mean that i cannot solely rely on public transport and the infrequent park and ride service, coupled with safety concerns on the bus with drunk passengers, getting to bus stops (the Botley station tunnel is horrific at night, the northbound stops on George St by Tesco unsanitary) & how vulnerable i feel at the park and ride car parks late at night, I'd seriously consider changing jobs as the impact on my safety, finances or commute time would be significant and entirely negative	Why 7am to 7pm? The congestion is worst on the edge of Oxford in the morning with traffic on the A34, A44 and A40 as bad as in the city centre. Similarly in the evening. Reducing routes to the station while the Botley Rd is closed has a massive impact too. I will have to make an 8 mile detour to pick my disabled sister up from the station. This also feels like a tax on people who work hours when public transport does not allow them to commute both ways (ie those who start early or late).	Charge coaches to set down/pick up in city centre. Create a one way system across Woodstock and Banbury road. Create one way system around Hythe Bridge, New St and the bottom of George St Change lane ordering on Wolvercote roundabout from Pearmree to put straight ahead traffic in right hand lane. Rebuild train station and create more pleasant pedestrian route into city centre
a resident of Oxfordshire living outside Oxford	daily		I don't	Neutral	Negative	Too high	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	I spend far too much time sitting on the bus stuck in traffic in Oxford. We need a way to reduce the traffic.	I think that Network Rail should be paying towards this. Lower the charge for car drivers and make Network Rail pay the rest.	Fine Network Rail until Botley Road reopens
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Very negative.I drive daily on Marston link road at 7am.there is no traffic.yet it will be bus gated.six days a week.not needed	During school holidays they should be switched off as there is very low traffic.Marston congestion charge is not needed six days.Saturday is low traffic.so why is it six days?pushing traffic to ring road will spell disaster for people trying to commute to and from work,one accident or breakdown and it will be oridock	I think you should open ltns temporarily to see if traffic is reduced at choke points.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Negative	We do not come into Oxfordshire often, the visits are mainly because we do not have any choice due to the state of my wife and I's health but to be treated in the main hospitals of OUHFT.	The three main treatment and A&E departments of OUHFT and Oxford Community Trust are in the six congestion charge locations. As the locations of these healthcare facilities are unlikely to change, why are pensioners and their families not except from these charges when transporting family members to visit or get to the hospital after husband/wife are rushed to hospital. Also if you are not going the charges communters into Oxford - how is this reducing pollution, which is what congestion charges are meant to be doing. The worst pollution is during those commuter times - I know I used to commute into Oxford and the roads are packed with cars but that is not the case between 10am and 3.00pm.	Stop having the vital services such as hospitals in Oxford. Is it really fair anyway to have these facilities landlocked in big cities despite they are local centres of population. Or at least except pensioners and those on benefits from having to pay the congestion charge if visiting hospitals during healthcare emergency and other health care appointments we have no real choice if we need to attend these appointments
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	It limits freedom of movement and makes it difficult to take my daughter for appointments at the dentist and hospital in Oxford /we would not qualify for a frequent attendens permiti.		Get rid of the LTNs... you've made your own problem.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Neutral			Add Morrell Avenue to the LTNs so that congestion does not get worse. Place a LTN between East Ave and Union Street.
an Oxford resident	daily	Blue badge holders, Disability benefit claimants, Unpaid carers, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	There should be no charges at all	No	Other	do you not think people have not got the money for these charges	Very negative	i live in the area im disabled need to go to hospital appointments my family also visit me why should they be charged a congestion charge also depending on who is available to take me also need to be taken shopping it is bad enough for me having to me recovered from cancer oot to have his ooerations other hosoital appointments what dood is 50 oasses	DO YOU EVER LISTEN TO THE PUBLIC WE DONT WANT AND DONT NEED THIS RUBBISH	get rid of ltns
a business	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Bring in 24 hour free motorcycle parking in Broad Street and free on street car parking in all areas after 1800 weekdays and all day at weekends.	Very negative	It will increase journey times, costs and stress levels.	It is a silly idea and Andrew Gant should have mentioned it in his manifesto before the May Council elections. Had he done so, many would have voted against him. This scheme is unnecessary and undemocratic, a bit like Mr Gant himself.	Remove the LTNs and reopen Botley Railway Bridge.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No			Very negative	To get to work in a bus out costs minimum 10£ a day as i have to change multiple buses. I will have to leave early and get home late. It's a 12 hour day with my car.. with buses out will oet lonoer. It will add 100£ a month on my bills.	You all should be sacked. I pay taxes to make life easier for myself not to suffer more	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	This is an unjustified additional tax on car users who already pay road tax. I fear OCC have no interest in listening to the consultation results, much like the LTN installation and money would be better spend improving cycle and bus routes.	No, and the St Clements and Marston Ferry Road ones are the most disruptive of all. There should not be vechicle segration between The Swan School and Cherwell School and this is going to damage access for teachers driving in from outside of Oxford.	An access road from the ring road should be provided to the JR. It is completely unjustified that access to such a major hospital runs through inner city roads which potentially could impact people's lives. Money should also be invested into reopening the Cowley/ Littlemore train routes so that easier access can be provided to the city centre and science parks.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	For someone working in central oxford who can't afford to live in oxford and has been priced out within the last four years, this scheme is just another challenge for those who are simply trying to make ends meet and get to work every day. The city feels like it's just for students and the rich, public transport is inefficient unreliable and far too expensive, with the cost of living crisis. Trains are over crowded and unaffordable and my work requires specialist tools which I can't carry on public transport. The congestion charge and traffic filters are threatening my job, my career and my mental health because it is just so stressful wondering what else the council will do to make getting to work harder and more expensive.	Surely the congestion charge will just push more traffic onto the ring road. The park and rides are already pretty much at capacity - how will this be resolved? The trains are well and truly at capacity (the Bicester to oxford train at rush hour is only two carriages and already full) - what do you expect people to do? Don't punish people just simply trying to make a living and working in oxford. If people drive in it's because they have no reliable alternatives.	Charge all the private school parents who block the roads during term time. In half term the roads are quiet and functional , it's not just people taking time off during the holidays. My commute is 3-4 times longer outside of school holidays. Most of the traffic in the rush hour is school drop offs or people who already live within oxford dropping kids at school/nursery in their giant SUV's . The people that can't afford to live in oxford but work there are being targeted and penalised and these are the people who are already struggling to make ends meet, it's cruel. Make the private schools run mini buses, get the Colleges to run shuttles to and from the park and ride. People don't WANT to drive in oxford, they do it because they have to Cyclists would be safer if they didn't go through red lights and used the cycle paths and lanes instead of weaving in and out of cars and pedestrians. Make the buses and trains cheaper with more carriages , stop punishing car drivers , stop targeting people who already can't afford to live in the city they work in. Commuting is already insanely expensive and draining it's a misery - this will just make it worse. Stop staring with people's lives
a resident of Oxfordshire living outside Oxford	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	We all know you won't Listen to the public.	What's the point !!! You refuse to listen to the public	Bring in by laws to make cyclist wear a helmet and have lights on there bikes
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	If you want to reduce congestion, you need to target times of high congestion to encourage people to adjust their timing. But this is just a scheme to get money from motorists. It will jut mean I don't visit Oxford as often.	The hours of operation need to allow theatre goers to enter the city at a reasonable time , say 6:00pm Access to the Westgat Centre from Abingdon will drive traffic to the Botley Rd which is busier than the Abingdon Rd. This make no sense	A fine of £300 should do Don't bother, you've already made Oxord hard enough to access. I've lived in many cities. You are obsessed with Oxford traffic being bad. It's not, compared to other cities. Heavy traffic is the price you pay for living in a city with a healthy collection of facilities and a sense of life.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	As a resident that cycles everywhere the traffic is horrendous and getting worse. People queue for hours during rush hour through all entries into Oxford rather than getting park and rides. School drop offs are absurd- I can't believe how many people drive their kids to school. The private schools cause huge issues with people driving in to drop kids off, whether they live round the corner or further out. We need to stop cars coming into Oxford in the volumes they currently are so there needs to be a deterrent to driving and the buses have to be more appealing than driving. As a local I have stopped going to food shop as i just can't bear sitting in traffic and now get food delivered. I only use my car to leave oxford.		I think more of Oxford should be pedestrianised. Remove so much parking in the city centre as this just encourages people to drive in. Congestion charges should be throughout all of central Oxford not just certain roads and then increase parking at park and rides to make that the most attractive option for travelling in. People blame the LTNs on traffic but it's the ridiculous volumes of people driving into the city that is causing issues and residents should be able to leave their homes to travel out of Oxford without sitting in traffic for ages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Add new bus routes from Park & Ride to cover the East Oxford area, and other underserved areas from these P&R..	Very positive	Anything to incentivise residents of Oxford(shire) to only use their cars when really needed.		'- Please clamp down on school runs, esp. those with only one kid (on board a huge SUV). - It wasn't financially viable at the time, but the Oxford bus company bookable PickMeUp service would be a great addition. It'd be great to find a way to make it work (fund it with the fees collected from those not respecting the filters/bus and taxi lanes/wasteful school runs/etc.)? - Give council ownership of the bus running in Oxford
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I don't	Negative	Negative	There should be no charges at all	No	Other	You should not charge but if you do it should go to totally Free park and rides and buses	Very negative	We would not easily access hospitals.	This should not go ahead! You have already generated a great number of problems by installing ltns. You have allowed network rail to cause years of chaos by not pinning them down to a proper plan in the first place. You are turning Oxford into a third world city! Years and years of bad planning and knee bending to the universities has caused the existing problems!	Remove all car parking to universities businesses . Shut off all through routes eg, long walk street grange street
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Other		Very negative	Traffic is bad enough due to current LTN policy and closure of Botley Road which has impacted my work considerably. Oxford is now ashno as a result of the council transport strateov.	No	Open the LTN's
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too low	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Positive	Encouraging people to not drive through Oxford is great. If this really reduces traffic and incentives public transport, it will be a great thing		
a resident of Oxfordshire living outside Oxford	weekly		I don't	Neutral	Neutral	There should be no charges at all	No	Other	Cheaper car parking	Very negative	Another restriction of freedoms imposed by an elected body supposed to serve its residents not constantly gouge them for more and more money.	Education aside, Oxford's history and that of the surrounding county is steeped in automotive production and motorsport. Stop trying to punish or tax people going about their daily lives and stop killing the city centre by discouraging shopping visits.	Remove LTNs and all other restrictions. Stop putting traffic lights on ring road junctions and roundabouts. Let the traffic flow.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	There should be no charges at all	Not sure	Other	NO CHARGE AT ALL - THEN THERE WOULD BE NO COSTS!!!	Very negative	Introducing any charge at all on the ownership or use of a private vehicle is a punitive charge which will adversely affect those least able to afford it.	Absolutely shocking example of ideological colonialism	Create enough local school places / invest in the local high street to create local jobs and site local all amenities - libraries, post offices, community centres, health care, leisure facilities, arts facilities, parks, city council customer service, job centres - all within half km square ! tax amazon out of existence / nationalise royal mail - / tax DPD and FED EX and other global delivery services out of existence / Nationalise public transport - create more routes and make them free - / ban commercial public transport services / - create an infrastructure in which people do not NEED to drive - rather than imposing market lead behaviour control punitive cost based systems like an authoritarian fascism - whose only effect is to create adversity towards tackling climate chanae
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	People in Oxford deserve the flexibility to travel whenever and however they want. Busses, cycle roots are but the answer for all. Business are suffering because of the current restrictions please reconsider and make Oxford a great city with freedom not restrictions.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	Too high	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes		Very negative	I travel to and from work daily and I also own my own business where people come to me and I like in one of the permit areas I WILL LOOSE A LOT OF CUSTOMERS DUE TO THIS!! It's outrageous how selfish the council are! They have no Care for the people it will affect		Scrap the scheme and remove the LTN's as well!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Negative	I don't think it will reduce traffic significantly. On hollow way I think it will double traffic for school drop offs at Tyndall on one side of the traffic filter. I don't think the impact on the ring road has been assessed and it segregates areas of the town. No easy routes to nice family areas like Florence park and Hinksey / cutteslowe from many areas of the city. Need parents to do nursery pick up which is 2 miles away and across a traffic filter. No direct bu available and the are in their seventies so not confident to cycle with a 3 year old	I don't think it will reduce traffic as there are so many exceptions.	Improve cycling on roads like Cowley Road and Iffley Road / Marston Road / london Road
a resident of Oxfordshire living outside Oxford	weekly	Firefighters	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	No	Make Park & Ride buses cheaper		Very negative	I am fundamentally opposed to the idea of a congestion charge. It is not needed. What needs to happen is sorting the Botley Rd and OCC stoo interferino		

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Extend hours of operation for buses		Very positive			
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	How about finishing the park and ride in west Oxfordshire before planning to charge us more for your and networks rails inability to finish a project	Very negative	If you are planning on giving out so many free passes, who are you exactly trying to prevent from coming into Oxford. The only people I can see paying will be tourists and infrequent visitors from outside of Oxfordshire. You might as well just put a sign up saying tourists not welcome.	Another waste of money caused by social engineering gone mad.	You're doing a grand job. Nobody will want to do business in Oxford anymore, there will be no visitors.
an Oxford resident	daily		I commute to the central permit area by car	Positive	Positive	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral	I think Oxford's traffic / congestion problem is quite complicated, and can't be solved just by adding further restrictions. I'm not opposed to congestion charging, but it must facilitate tangible, marked improvements to travel and transport infrastructure.	All of Oxford's main central car parks are within the congestion charge zone. Charging £5 congestion in addition to £10 or £12 or £15 parking is going to be a deterrent to day visitors. Maybe the parking fees should be reduced, or special 'congestion charge included' rates introduced for longer stays. The locations also don't seem to account for some of the worst red zones for peak hours - the congestion caused by school drop-off traffic (e.g. St Clements, Abingdon Road) is the worst in Oxford, and completely unnecessary. This is massively self evident during school holidays, when a bus ride into the city centre takes less than half of the time it takes during term time.	Oxford is a self-titled 'cycling city' with cycling infrastructure so bad that every day somebody gets knocked of a bike. Safe, abundant cycling infrastructure would be a great investment and an appropriate way of using some of the income generated by congestion fees. The congestion charge will be seen by many as purely punitive. This will be exacerbated by only allowing 24hours to pay the fee. Allow three days, and set up an auto-pay account system like TFL does, so that people don't get hit with unreasonable fines.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No			Very negative			
a resident of Oxfordshire living outside Oxford	daily		I don't	Very positive	Very positive	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very positive	Anything that reduces cars in the city centre improves air quality and therefore health, as well as general well-being, the walkability of the city and the pleasantness of the city		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	It will mean having to travel a lot further to take my daughter to nursery at the Jr, this will increase time spent travelling and pollution. I don't have time to wait for a bus to take her there, before I have to drive out of oxford for my place of work. Traffic pollution as a whole has surely increased due to bottlenecks and traffic jams, longer journey times created by the ltns. The traffic filters will worsen this and unfairly charge residents of oxford to use their cars (when many don't have the money or time for other options). It will push more traffic onto the already unbearably busy a34 and create more pollution in bottleneck areas. It is an unfair scheme that penalises residents in an area which is already extremely expensive live in	They are a terrible idea and I am very firmly against them.	Remove or at least reduce the number of ltns.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	Old and disabled hugely affected.. perhaps you want them all dead?	The biggest impact will be to engender a very hostile angry attitude towards Oxford. Vouncil	Clamp down on crazy high speed Ebikes used by illegals
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Get rid of the county councillors from the Oxford city	Very negative	First you spent the whopping money to build swanky car park and now charging those same cars who wants to come and park what a scamm	Not single county councillor lives in the Oxford city area who are taking the decision on behalf of people of Oxford city , they are hell bent on killing the soul of this beautiful city	Simply revert back the LTns that will automatically reduced the traffic , create elevated pathways for cyclists and widen the roads
a business	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other		No impact		As the owner of a business in Oxfordshire whose employees travel by private car to the central Oxfordshire area, we will need to ad a surcharge onto our clients fees to visit them. You might as well ust tax central Oxford homeowners more.	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	Too low	Not sure	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	We need to make it easier, quicker and safer to get around the city without using private cars. Financial penalties seem one of the best available methods to reduce the use of vehicles to get around.	Must ensure that there are quick and easy alternatives, including prioritising pedestrians, cyclists and busses and not cars at junctions and crossings.	Make pedestrian and cycle crossings take priority over vehicle lanes. Put zebra crossings across the side road at junctions similar to all Eurovean cities. to prioritise pedestrians and cyclists continuing straight ahead.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	As a resident of Kidlington who commutes to Milton Park on the A34 everyday, there is major congestion caused by traffic entering Oxford via Woodstock and Banbury Road. This traffic often backs up to kidlington and Yarnton blocking both the kidlington and Peartree roundabouts resulting in 30-40 minutes in traffic from kidlington to the A34. As the Woodstock an Banbury roads are the only roads without a congestion charge this proposed plan will have no effect on reducing congestion through North Oxford to the center and likely increase congestion as more people will use this route to avoid the charge on other roads.	- Make public transport options cheaper and more frequent. Direct bus routes or train routes from all commuter areas in Oxfordshire to the Oxford and Milton Park science parks. Currently the only way to get to these large employers is by car causing serious congestion which will only get worse as new science parks open and new houses are built with no new transport infrastructure - Make designated cycle paths into the city center from all commuter areas outside Oxford e.g kidlington, Yarnton. Making cycling safer for both cyclists and drivers. - Once alternative public transport options are in place then implement congestion zones on all roads that enter the city center.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Other	Do not have the charges at all.	Very negative	For a resident in Oxford with 4 young children it is essential I can drive around in order to get them to school and me to work. In order to access facilities ie GP surgeries, dentists, childcare, leisure etc. Not being able to do this, or incurring a charge to do these basic daily activities would be extremely detrimental to mine and my children's wellbeing and ability to earn money.	I feel they are unjustified and not necessary. Since the LTN's being implemented traffic conditions have worsened and I see the traffic congestion charge and filters will only add to that in a negative way. I feel these traffic charges will force locals and shoppers out of Oxford to places like Reading, Swindon and Westfield in London as they are cheaper to park and often quicker and easier to access. This will negatively effect businesses in Oxford.	Open the LTN's, they have achieved none of the proposed objectives. Reduce bus ticket prices, they are extortionate for a family. Travelling from within the ring road to town and back is £24! This would no way discourage me from using my car.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Other	The money should go into ensuring the Botley Road construction is completed.	Very negative	It's adding a burden on the individuals both in task and financial.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add public cycle parking		Very negative	As a local east Oxford resident, there are way too many restrictions as it is. We are struggling to transport our children around the city and I think these changes would only continue to add to the worsening traffic congestion!! Please don't do it. It won't stop people using their cars which I'm assuming is the main point	Consider the impact on the areas surrounding the city centre! The LTNs are already funnelling traffic onto the main roads and the congestion is unbearable. People will pay the charges and continue to drive through them. It's not a long term fix	Please can you give the east Oxford residents a permit to travel through Magdalen Road. This would really help with traffic flow especially on days when there are accidents or road works that are blocking the other roads
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	This congestion charge will add significant cost to moving around the city from where I live. All the LTN's have done is pushed traffic out to other areas and benefitted the privileged few in richer housing areas in Oxford. This is very much a charge that will be borne by our much needed hospital workers who already have to tolerate long commuting times that have been created by the LTN's and the council's refusal to just remove them while the Botley Road has been closed (which is a farce in itself). You're looking after the onlieased few at the essense of the local Oxford people. Disacraceful.	Do not impose them.	Remove LTN's to improve the flow of traffic around Oxford to free up the main roads for buses to use more reliably. Not until there are better bus services, covering longer periods of time, should you be installing any measures.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I travel into Oxford for work and for leisure. The bus routes from west Oxfordshire are unusable from villages and take long routes. They are too hot and too busy and often late. I would no longer visit Oxford for leisure and this would make Oxford only for people who live in the city. Businesses would suffer, offering less variety for shoppers and less reason for me to come into oxford.	This will actively harm Oxford as a destination for local residents already struggling with the cost of living. It will make it only suitable to the wealthy and put undue stress on me as a local when I inevitably have to come into the city. Cycling in takes an hour and a half and cycle routes will not change that. Busses are too unreliable and infrastructure has not been put in place to accomodate. The botley road closure has made the bus service worse and a temporary congestion scheme will not provide enough time/money to improve infrastructure.	Build a bus lane to west Oxfordshire down the A40. Open botley road. Make trains cheaper and build more rail routes into the city.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Living outside the ring road means I'd only get 25 passes consideration should be taken to areas su h as kennington where many people would need to cross the charge locations for work. Also consideration for those whose workplaces don't have parking but need to drive to work.	This and the propised bus gates will push traffic onto already congested main roads eg a34, ring road. It may serve its purpose to ease congestion on some roads but is not solving the problem but pushing it elsewhere. Offering cheaper alternatives such as bus fares and park and ride is more likely to encourage drivers to use alternatives. Risk less people will use town centre due to charges. resulting in loss of jobs and shops.	Seansewer to q12
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't		Very negative	About right	No	Make Park & Ride parking cheaper, Make buses cheaper for vouno people. Add new bus routes		Very positive	It will speed up buses and coaches and reduce pollution		An alternative is to introduce traffic filters in east of city before Botley Road reopens, they don't need to wait until the reopening
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	When you have a child that needs to go to the hospital every few months I do not want to be using a bus. None of these options will help me.	Very negative	Poorly children and worn out mum's can't cope with bits rides. We need the 'luxury' of driving without being stuck on the bypass.	I think it's ridiculous but I suspect my thoughts won't count or matter.	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients				There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	Your reason for doing this scheme is to make traffic congestion less so buses can operate better, but your low traffic areas are the real reason for all the congestion in first place. Beino anti car in Oxford City is aoing to kill all business and make everybody poorer	One day the the people of Oxford will realise that they need all forms of transport to get around in the city, older people cant always walk long distances or ride a bike and if they live outside Oxford in villages buses are not plentiful and regular so they use a car.	Get rid of a lot of low traffic areas and allow the traffic to flow again.
an Oxford resident	daily		I don't	Very negative	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative		With all the extra Road closure with the LTNS where I can I use public transport. Do you not think that if domestic one doesn't need to use their car they don't. With work general life sometimes it's not possible to use public transport	Remove the LTNS and not to charge for these roads
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	Less congestion would make public transport more convenient to use.		Increase the price of parking in the Westgate. Charge companies and the university colleges for any parking they provide for commuters.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative		I am concerned about children especially girls travelling on public transport to and from schools. Parents should be able to drop them off. My daughter had a bad exserience on a bus with a man making her very uncomfortable.	Remove on road parking completely. Move the bus terminal out of the city. Get rid of big buses and replace with a monorail. Make the cithe a sindle one wav circular track.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent	I live in Oxford, so Park and Ride is not an option for me. Marston Road has got terrible bus service, we are not connected to Summertown and by implementing traffic filter or conestion charge on Marston Ferry Road, you limit my kids access to swimming lessons (via bus from Ferry Road or Ferry Pool), art classes (Art 4U), karate classes (Tiger Martial Art), mathnesium or French lessons in Alliance Francaise (Polsted Road). Those who are rich and can afford to live in Summertown, Jericho etc would have no issues, but others, who are not so rich, are not permitted to arrange extra tuition for their kids. Once again Concillors are not thinking about people, just about rich and privileged.	Those who are rich and live in Central Oxford permit area would have free access through all congestion charge and their children will have 50 free permits to visit these hyper-priveledged people. Why should I pay conistion charge to drive on Marston Ferry Road? That is my connection to Summertown, no bus from Marston Road to Summertown. Bus X3 is twice per hour but it doesn't take me to Ferry pool. Bus 14 is even worse, it doesnt stop anyway near me and quite unreliable.	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Positive	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses	Being 1 mile outside Oxford in south Oxfordshire, our bus service is appalling, leaving us with little alternative but to drive into Oxford. More charges would deter me from going into Oxford even less than I do now, which could impact on local businesses.	Very negative	If you were serious about reducing car use, you wouldn't have let the Westgate car park been built. Even using the Redbridge P&R this Saturday, buses didn't turn up, ran very late, meaning it would have worked out quicker to drive and almost the same cost to park. When popping in as a local resident to attend appointments, shop for essentials and meet friends/family, Oxford is fast becomine the last place I want to visit as its lust is too difficult already to aet into the centre.	More buses from surrounding area, running more frequently and over a longer time i.e in the evenings. Make them small, frequent and cheap and people will use them. At the moment they are infrequent, unreliable and expensive if you're a family. It's cheaper to park still.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Very negative	Too high	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I earn a low wage supporting disabled people. This will make me seek work elsewhere.	I live in Oxfordshire with a limited bus service. I earn a relatively low wage supporting other people. These proposals and the subsequent bollards will force me to look elsewhere for work, or to seek early retirement. Their impact might well be my economic inactivity.	1. Provide more park and ride, e.g in East Oxford. 2. Require private schools to provide shared transport for pupils. See Cowley Place between 8:00am and 9:00am for example. 3. Increase the frequency of buses from towns and villages outside Oxford. 3 buses an hour should be the minimum from all towns and villages with 10,000 residents or more. 4. Remember that Oxford is a County Town. It should serve the County and reap the economic benefits by doing so.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Frankly, introducing six temporary congestion charge points in Oxford is like pouring vinegar on an open wound for people like me. Oxford is already a nightmare to drive around — the existing LTN schemes have forced most of the traffic onto the Ring Road, turning what used to be a 20-minute journey into a daily exercise in patience and fuel wastage. Now add a congestion charge on top of that, and you've created a system that penalises the people who have the least choice in how they travel. I'm a full-time unpaid carer for my 92-year-old father-in-law. We're a one-income household, already stretched to the limit. The idea that we might be charged £5 just to go about essential daily tasks — things that public transport simply cannot accommodate — is not just unhelpful, it's punishing. I'm not driving into town for leisure. I'm doing the heavy lifting of care work that the system doesn't pay for, and now may be charged for doing so. And let's be real: there is a cost of living crisis. £5 a day might sound small in a policy meeting, but it adds up fast for families already forced to make impossible choices between fuel, food, and heating. So what's the overall impact? Greater stress, greater financial strain, more barriers to caregiving, and a system that feels increasingly out of touch with the realities of the people it's meant to serve.	Temporary schemes like this are short-sighted. They disrupt lives and drain finances without offering any certainty or real, lasting improvements. And let's be honest: the supposed benefits that get talked up in these proposals — cleaner air, reduced congestion, improved health — rarely trickle down to the people like me who shoulder the biggest burdens. We're not seeing better buses or more accessible alternatives. We're just seeing higher costs and longer travel times.	Yes — before introducing more charges or restrictions, the Council should take a step back and properly model the system as a whole. Right now, decisions feel piecemeal — as if we're applying sticking plasters without diagnosing the underlying issues. A comprehensive, evidence-based approach is badly needed. That means undertaking proper traffic flow modelling across the city — looking at when and where congestion actually occurs, what journeys people are making, and why. It also means being willing to revisit and potentially remove some of the existing LTNs if the data shows they're causing more harm than good. We need a joined-up plan, not more layers of isolated measures. Instead of punishing those who are already struggling — carers, low-income families, key workers — let's look at solutions that are fairer and more sustainable in the long term. That could include: Investing in reliable, affordable, and accessible public transport, especially in the outer areas and for people with mobility needs. Improving park and ride systems and encouraging their use through subsidies or incentives. Targeted traffic management based on real-time data, rather than blanket charges. Supporting active travel with infrastructure that makes walking and cycling genuinely safe and practical — not just symbolic. And critically, engaging local communities before implementing changes, to understand lived experiences, not just theoretical outcomes. Oxford needs a system designed with intention — not a patchwork of reactive policies. If the Council really wants to reduce traffic and improve air quality, it must start with honest analysis, inclusive design, and long-term thinking.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very negative	The fact that the public transport in Oxford is very expensive, unreliable and very poor connecting important areas of the city, makes this proposal very bad for general people. Normal commute and drop off and pick up from schools and nursery will be incredible stressful, very likely the traffic is going to be even worse adding more time and cost to population. I also completely disagree with motorbikes not paying the charge, they also pollute and contribute to traffic.		Public transport should be way more frequent and cheaper. As a family of 4 it is cheaper to pay westgate car park than going to the city centre by bus. Also cycle lanes should be safer around Oxford. Finally the Oxford Science Park should be much better communicated, there is a goods train going near by so I don't see why people couldn't use it as well. I have many colleagues coming from London o a daily basis by train and taking a taxi due to how enriable the buses are and how badly communicated is
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			Build new roads! Stop building more houses in oxfordshire! Remove LTNs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Getting around Oxford has already gone from fair to rubbish, with the introduction of LTNs. This is just rubbing our noses in it. Oxford is becomine a no-go zone now.	I already try and shop elsewhere now due to the current road management, and this is another nail in the coffin for trade.	Remove the LTNs, as they funnel all the traffic into one area with the buses.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't			Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	It will banish poor people from the road and have no impact on rich people.	A fine equal to the raised charge should be imposed on the people responsible for the botley road closure. They caused this after all Tourist coaches also need to be charged Havina a charae on the road many people take to the ir hosoital is not fair	Charge tourist coaches A charge for all non resident vehicles coming into Oxford Charges need to be high enough to be a deterrent Ban bikes from the roads where there is a cycle oath
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative			

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	Too high	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	I support students. I would leave this city.	1. Six is too many. It will stifle productivity of this city. 2. There is too much of an imbalance between residents and commuters It is not a choice to commute - many of us cannot afford to live inside Oxford.	1. You would have a more positive impact on health and the environment is EVs were except - it would definitely persuade more people around the county to convert, with immediate benefit of the health of all in our towns. 2. You should think more creatively about how to reduce the number of vans/trunks/delivery/commerce vehicles - a blanket exemption is frankly ridiculous. 3. Longer term, I think you should plan on building FREE park-and-cycle locations, under 2 miles from carfax, with safe dedicated cycle paths. There is no point if they charge, and there is no point putting them out on the ring road. The route from Redbridge is not adequate and too far from major employment sites eg South Parks Road. 4. The road closures between Iffley Rd and Cowley Rd have not worked - they have increased traffic congestion by lengthening journeys, they have made the Plain a death trap due to massively increased usage, and they are damaging businesses. You could at least open two roads between Iffley Rd and Cowley Rd, one in each direction.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	Park and ride should be free for both parking and riding.	No impact	I will still drive into Oxford and pay relevant congestion charge and parking fee so will make no impact for myself or other family members.	Oxford's congestion is down to poor traffic management and the council not understanding how road systems work. Traffic will be pushed to outer roads causing concestion for even more residents.	Free dedicated bus service from all park and ride locations where the bus has priority over all other traffic. Reduce size of cycle lanes for quicker bus travel.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, School students with special educational needs, Unpaid carers	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Other	Get rid of the LTN's to allow traffic to flow more freely. We don't need more buses- they are frequent and are never full.	Very negative	This impacts my daily life with my children and also helping my elderly neighbours. It makes getting to the train station impossible. It will kill businesses in the area, which includes my business. Why should residents be punished and made miserable with all the council tax they pay.	Why isn't North Oxford affected by this? So the rich get richer? I hope all the traffic clogs your arterial road into Oxford. The fact that you are closing off Headington to Oxford is ridiculous as it's the access road to London.	Open your LTN's , reduce the frequency of some buses, open buses to other areas that need it. Reduce bus fare and park and ride fares. You have bottlenecked St Clements with your LTN's to a ridiculous point. You have made this mess, and making another one won't fix the problem but fill your council with more of our hard earned money in a cost of living crises that you will just waste again on another silly money making scheme. Also- where was this information at election time? Seems pretty well thought out to be done after elections. I am a hardworking Oxford resident with a business in Oxford and I will never vote for this council. the best cotion is to leave Oxford at this point. you have made this city a mess.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	About right	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral	I think I will be entitled to permits as a resident of Oxfordshire, however 25 passes annually for residents of Sandford on Thames and Kennington, seems low. Consider a mid point for residents of areas immediately adjacent to the Oxford City Council boundaries.		
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Get rid of the ltns and any cameras, to put the roads back to how they were pre covid. Life has got worse ever since they were put on. Traffic is so much worse, pollution has massively increased where we live. Council only help themselves and their friend	Very negative	Oxford is a terrible place to live and has got worse and worse. Traffic is terrible because of the LTNs, journeys have got longer but the lying council make out pollution hasnt increased. I live right by the ring road where traffic has increased tenfold, but according to the council there has been no increase of pollution. Maybe check in the areas that arent ltns and actually see how your terrible traffic ideas have actually affected people. With these new traffic regulations coming in, the ring road will be worse and have even more traffic. At what point will this council actually check areas like Iffiemore for pollution? I live by the bridge and i know for a fact the pollution is terrible because of the dirt and filth that appears on the outside of all my windows. We are breathing this in. Thank you for killing my 5yr old with your inept traffic ideas.	Pollution is already terrible because the ri g road is so busy and lots of stationary cars causing more pollution. Maybe actually sort out the ring road before you kill us all from the pollution.	Open the ltns. Stop the charges. Use the money to actually make the ring road a viable choice, where there is no stationary traffic, roundabouts are a big issue in Iffiemore as theres no other way for traffic to go, so it has become a pollution hotspot tuat the council ignores.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Registered car clubs	I don't	Neutral	Very negative	Too low	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	Congestion is terrible and charges are an effective way to reduce it	Make it permanent	Better cycling infrastructure
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	No	Make buses cheaper for all, Add new bus routes		Very negative	I'm concerned how to take my Children to school, as I have three children at different school locations. Also the bus fare is not affordable for families, most recently I paid over £10 return for a day for me and my three children- I cannot afford this daily. I also work full time and after dropping the three children off to school at various locations, I then travel to work by car. Once I finish work I then collect the kids and drive to there out of school activities. The implementation of the changes in Holloway will affect us as a family, and our quality of life. 100 passes for my household is not enough, especially daily school drop offs around Oxford.	I feel that residents living in the area should be given unlimited use of the roads, i.e Holloway.	More safer cycling routes for children… cheaper buses fare as it present it's not affordable.
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	Unsure how the blue badge permits would work		
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	No impact	About right	No	Make bus services more frequent, Add public cycle parking		Neutral	I don't understand from the information presented how this will affect students and parents who need to move their children & possessions in and out of central Oxford colleges. This is already a nightmare and I would like to understand how your plans will affect this termly process.		
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	Yes	Make buses cheaper for all		Very negative	Extremely negative, the rising costs have meant that I cannot afford to live in oxford and now I will struggle to complete my daily commute to a job that is specialist to the oxford town. I simply do not have the extra money to commute into oxford for my role	Overall negative feelings to the proposal.	Most of the traffic is generated from large expensive cars channeling their children to private schools. This charge you have proposed is not enough to affect these people but have a heavy impact on the everyday people trying to provide a service to oxford and who are already struggling too much to live centrally. Put more engagements into the private schools to educate them on the negative impact their parents are having on the area when dropping them off in a 4x4. Traffic is much quieter in half term, maybe think about having school buses just for students to be picked up. Consideration for more pedestrian crossing that go over the road such as bridges and underpasses, then reduce the amount of lunk crossings that increase traffic flow.
a resident of Oxfordshire living outside Oxford	less than weekly		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	People are struggling financially as it is so this is ridiculous! Oxford hate cars and will drive people and business away!	Ridiculous	
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't		Positive		Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Other	Remove the LTNs				Remove the LTNs so cars can move through the small roads, but make it harder for them to use the main routes, keeping those for buses, HGVs and bicycles
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	You should not fix the mess you have allowed in Bottles road by charging us all. You should accept the delay on the traffic filters just like the people in Mobley road have accepted that horrendous project. how am I supposed to get to work on Bicester everyday with 100 day pass? What do I do the rest of the days?	By blocking Marston ferry road (B4495) you will only be making the traffic on the A40 worst.	We need proper cycle lanes and cheaper buses.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	Too low	No	Make buses cheaper for all, Add public cycle parking		Negative	I see no benefit when taxis, vehicle delivery drivers and everything from cars are exempt. Charges should apply to all vehicles except public transport, emergency vehicles, disabled transport & health care workers. Why are business vehicles exempt from the charge? They are entering the area for profit or business benefit, the business should be aware and make necessary plans or adjustments to accommodate the charges.	Cycling is neither safer or more attractive.	If you have to introduce traffic filters apply charges to taxis & personal delivery vehicles I.e amazon vans. To significantly reduce traffic and use cameras to fine vehicles causing traffic hold ups from poorly parked/ stopped taxis and vans which cause delays
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	I use the bus more frequently to visit Oxford than I use my car. Anything that deters people from filling the roads up with their cars gets my vote	I would be in favour of extending the scheme to cover a larger area of Oxford	Increase car parking charges
a resident of Oxfordshire living outside Oxford	daily		I don't	Very negative	Very negative	There should be no charges at all	No	Other	There should be no congestion charge at all to raise money! Learn from other counties on how to budget better	Very negative	It will kill off all businesses in Oxford, people are already going elsewhere to shop	It should not happen end of story	Yes, make bus travel free if you pay for parking! Like so many other cities do
a resident of Oxfordshire living outside Oxford	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Neutral	I manage a team of nurses who work in Cowley place, if we are not all issued free permits I will loose my staff. thanks OCC		M Scrap the idea. this is people's livelihoods you are messing with!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Other	Fix potholes, remove inappropriate 20mph speed limit signs on many roads.	Negative	I live just inside oxfordshire, sometimes get a lift with someone who lives in Northamptonshire who wouldn't have a permit so have to pay. The only place I'm likely to visit is the hospitals and wouldn't have gone anywhere near Botley road even if it was open. It seems to me some of the charging locations are irrelevant to Botley road blockage and just an excuse to charge, particularly the one at Marston which midnt affect me.	If the problem is caused by network rail, it's them that should pay, not car drivers.	Make the use of the park and ride not time limited so I can park there and get the bus to Heathrow when I go away, rather than having to drive to Heathrow and park there. Build a better bypass so when I'm coming from the south up the A34 I can completely bypass Oxford traffic, even more necessary for those on the a40.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	There should be no charge as this results of the inability and incompentence to manage the Botley road project, and little trust in the council of this being a temporary measure. In all probability this will be permanent as the council continues its anti car asenda		Cheaper parking charges and increase park and ride to attract better use of the service.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	People who have no choice but to drive to their daily jobs should not have to pay to go their jobs		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Reopen the train line to Witney.	Very negative	It's a slap in the face to local constituents and the working man.	Listen to your local working class constituents not just your middle class yuppies and champagne socialist students who barely spend 6 months of the year actually living in the city.	Widen the A40, Reinstate the Witney to Oxford train line, Remove all LTNs and prioritise road vehicles through the city, introduce a bicycle licence and educate correct rd usage. Ban cyclists in bus lanes, Redesign the ring road to incorporate flyovers and underpasses as so to not impede traffic flow, add direct access to the John Radcliffe from the ring road.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice. Unwell carers	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	Increased traffic congestion on other routes.	Ridiculous idea from an incompetent council	Maybe build a park and ride near Eynsham. Oh.. wait a minute.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I hope it will reduce the traffic, so on the rare occasions I need to drive it will not take ages to get there.	The 100 and 25 free passes should be apply automatically if car drives thorough the gate. That way it will reduce the web traffic and eliminate fees in case someone forgot to get permit for a day.	Reduce or eliminate car drops for schools. Especially the private ones. Trafficking drops significantly when they holiday starts. Provide a school bus so people don't need use they car. There is lots of people who choose to use car even if they have better way of oetting to school. makina that less convenient would force them to use bikes.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	It's a further anti-motorist measure and is in effect another tax on driving	It is a very bad idea to add to a list of bad ideas. LTNs, 20mph limits are destroying Oxfordshire businesses.	Make Abingdon Road and Iffley Road one way working in opposite directions. The width released can allow proper cycle lanes and bus stops.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Neutral	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very positive	In theory, it should encourage people to use the park & ride sites and this reduce congestion in the city centre. This would increase the speed and efficiency of buses, which is a daily issue for myself.	I'm worried there are too many exemptions and too many ways to work around the charge (e.g. use vans instead of cars).	Please do something about the parking and congestion on Cowley Road from The Plain to Manzil Way. Both legal and illegal parking make getting buses through there a challenge, there needs to be a lot less parking on this busy bus route. The main issue in the city centre is actually the Westgate car park, which consistently brings the city to a half every weekend and bank holiday. There needs to be active management of the queue for the car park, specifically, telling waiting cars to go elsewhere rather than wait for the car park. These waiting cars are what bring Abingdon Road, Thames Street and Hythe Bridge Street to a halt. Perhaps better promotion of the combined bus+parking tickets which are excellent value and already cheaper than using the car park at Westgate. Lastly, please take the 'Monday-Saturday' sign down from outside Oxford Parkway on the main road. The park & ride operates daily and this false signage probably discourages some users.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It's a bad idea. Cambridge tried to introduce a congestion charge and it was quickly scrapped. You are forgetting the people who need to be able to help pick up family members from the train station or drop off at hospital appointments - people who are not classed in your categories of being exempt from the charge but who this policy would have a massive impact on - not just the cost but the added admin burden of remembering to log on and pay the charge or the upset when they forget. I have an autoimmune disease but it's not bad enough to be classed as disabled but I have regular hospital appointments but not regular enough to probably qualify for a free pass so now on top of managing my condition and health appointments prescriptions etc i would have additional burden of having to pay a charge for a city which is the lifeblood of the area....	Don't do it.	The problem is the private schools. I commute into Oxford on the park and ride and traffic is SO much better when the private schools are on holiday. You want to reduce the traffic then stop the private school parents driving in their massive cars with 1 kid in the front seat.
an Oxford resident	daily	Blue badge holders, Disability benefit claimants, Disabled taxi cars	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	We build the west gate to attract visitors to Oxford and now charging them to come into Oxford will force more people out.... Your killing our city slowly	It's disgusting all about money money money, greedy fat cats	Make park and ride free completely and the buses into town, people will use them, and get rid of the lens and bus gates and let our city breath again
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Very positive	Oxford needs far fewer cars, then cycling and walking will be safer and buses faster.	No	Tax workplace parking spaces
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Positive	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	100 passes is not enough, traffic will just be diverted to the already congested ring road and A34		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Neutral	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very positive	Less cars, safer for active travel		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	This is pushing all the traffic into roads that do not have the infrastructure to cope with the level of traffic already. I also have to work on a Friday until 5 and then get my daughter to swimming at ferry pool by 5.30. This will not be possible to do if I have to be on the ring road there for you you are penalising her as we will need to stop the swimming lesson or find alternative at another council own. This is a scam to make money for a council that has water money all over the city	Stop these stupid idea ran by people who actually don't live in the area you are a joke of a council. You will lose people working in this city	One way system
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	There are too many cars currently traversing oxford, it makes cycling dangerous and buses slow. anything to reduce this is a good thing	No	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Very negative	Whilst I understand traffic is high this scheme will impact those living further out of Oxford (usually lower economic areas) disproportionally. Those that live more central have more passes and are likely to have higher incomes to pay the charge. The bus network os not reliable enough and the cycle routes are not safe enough (pornholes etc.)	I am a cyclist and driver, so am not anti car or anti bike. Adding this scheme on top of the low traffic neighbourhoods will just make the few routes into town much worse. I sant see any value of pushing cars onto an already too busy ring road. Many will need to drive further which will increase pollution. This scheme will impact the lower economic area working person tge worst. Those who can afford the fee will just pay it and keep driving through the filters or purchase an exempt vehicle. East Oxford is already pushed down less roads ans that hasn't worked, so why add another scheme. But realistically like the tin consultation you have probably already made your decision and this is all a tick box.	Get rid of the LTNs so that the main routes into town are no longer as congested. Reduce the bus fairs ans park ans ride prices ans people may be more willing to use them. Look at affordable ways to introduce transport from the outer points of the city, as these are the people that will be most impacted. And resurface cycle lanes so that it is safe. Headington Hill cycle path has the tarmac finish in thr middle of the lane meaning it is at different levels and unsafe.
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Other	Make parking or the bus journey from park and ride free	Negative	From my experience the council is not very good at implementing online permit systems. The one for visitors parking that residents can use is poor and didn't work well. It discriminates those who are unable to use technology for whatever reason. It causes unnecessary stress.	I believe it will have a negative impact upon how visitors feel about Oxford. Whenever I travel to cities with restricted areas I usually feel stressed and it takes the enjoyment out of being there. Quick visits that go through any of these routes undermine the wellbeing of oecole.	Make buses cheaper and more frequent.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	No impact	There should be no charges at all	No	Extend hours of operation for buses		Very negative			
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't have this in place. We don't need it.	Very negative	I work all over Oxford. I cannot pay this charge daily.	Stop it!	Take out the LTNs.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Neutral	From my personal experience, school traffic (particularly private schools) is the main cause of congestion. You can see the traffic drastically decreasing during school holidays. I don't understand how the congestion charge could help, seeing as a lot of traffic takes place in summertown and headington. I think schools should be encouraged to provide appropriate transportation for students. Furthermore, buses and the park and rides are expensive and there are barely any bus routes that allow north to south and east to west transport across Oxford	Na	Buses need to be cheaper. Definitely improve the cycle paths, which are often overgrown with weeds and have very uneven paving
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Create a useful connection 24/7 between parking and JR for staff	Very negative	This will worsen traffic for those who commute to work at JR. Who do you think looks after the patients?!	A terrible idea driven by ideology not putting the interests of the people you are meant to serve first!	The biggest issue in Oxford is hospital staff and they are completely ignored. If you actually cared about improving things you would make a useful public transport scheme like a tram or a subway not just harping on about buses.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative	There should be no LTN and no Traffic filters. I'm looking after elderly lady who needs regular travels in Oxford.	There should be no LTN no Traffic filters!!!	Make buss rides cheaper,that everyone could afford it!
a resident of Oxfordshire living outside Oxford	daily		I don't	Negative	Positive	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people		Neutral	Most of the traffic issues are from temporary roadworks. This isn't fixing the issues. To sort air pollution you need to tackle the more pollutino cars	The camera on Thames Street will increase the cost of parking in the Westgate. The bus is impractical for families with small children. People will set sick of the extra cost and shoo elsewhere.	Utilise the rivers more to transport goods

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on davs of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in... SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper		Very negative	This is a ridiculous plan to punish car users yet again for travelling into and around Oxford. You've raised the prices of the park and ride and made using buses more expensive. And yet National Rail has crippled the city by closing one of the main arterial routes into the city. Rather than punish them, you again go after our users. Instead of implementing a congestion charge, why don't you fine National Rail for their incompetence and inability to complete a major infrastructure project. A fine for every day they fail to open would quickly galvanise NR management to actual get the road reopened and the money could be used to fund transport infrastructure as well a provide compensation to the business affected by the road closure. Stop punishing hard working individuals yet again and go after the actual problem that is National Rails incompetence.	Traffic is awful, but that is not because of car users. It's the incompetence of Oxford City Council to actually plan for car users to access the city. I've lived in and around the city for almost 20 years and have lost count at the money wasted changing the junction by Worcester Street car park. And yet the council blames car users, not city planners. If you want people to ditch their cars then make the Park and Rides free again and reduce the prices of P&R buses. Penalise National Rail for their incompetence in the Botley Road fiasco and focus on getting the road opened so traffic doesn't have to just travel down the Abingdon Road and onto St Giles. And while your at it, get rid of the LTNs! They are single handily the worst thing the council has introduced (well, so far, the CC would be a very close second!)	Get the Botley Road reopened and remove the LTNs. Understand that cars aren't going away and focus on improving the infrastructure like fixing pot holes rather than punishing hard working individuals! You're literally killing the city centre with these ludicrous ideas! No wonder locals don't go shopping in Oxford any more and go to Reading, Swindon or Bicester
an Oxford resident	daily	Blue badge holders, Disability benefit claimants, Disabled tax cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for young people, Add new bus routes		Very negative		Whoever came up with this idea needs to give their head a wobble, it has got to be the stupidest thing I've ever heard of, the tlns were bad enough ,and the effects they have had on the local community has been disastrous and the amount of accidents we'll. I have no words....	REMOVE THE LTN'S, THEY ARE THE CAUSE OF ALL THE CONGESTION
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	What is needed is for the County Council to stop engineering traffic jams & lift the LTNs & improve the roads ie pot holes & dangerous iron works !	Stupid idea kicking people while they're already down isn't clever. People will resort to more crime as their incomes are driven down.	Remove LTNs simple !
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders, Community health or care workers who need to visit multiple locations or travel urgently, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Hearses and funeral cars	I don't	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Very positive	Far too many lazy people drive cars (by themselves) into the city centre everyday, often taking advantage of exclusive College/Departmental or private school parking. This might help curb this. But if you worked with the university and schools to create special buses and encourage them to restrict this parking, it would have a greater impact	The wording of many of the above questions is so poor much of it doesn't make sense. Also, I cycle to work. Every day I cycle past hundreds of single occupancy cars sitting in their own traffic. This is nuts. If people either shared or took buses our congestion problem would be solved overnight. This is the real problem. The congestion charge will be deeply unpopular and hard to manage. You have to win the argument that sitting on gridlock every day just because you can't be bothered to act responsibly or think about your commute (hiding behind claims about freedom of movement etc) is not on	See above. Get uni and schools on board to create real change. Outside of university and private school terms there is no congestion so it's clear they are who you need to reach out too
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	Congestion is at extreme levels in Oxford. Oxford needs to deter people from driving on narrow Oxford streets. However, care needs to be taken to make sure people who definitely need to drive i.e. care workers, NHS staff etc.	I am fully supportive of this. However as mentioned above, driving is necessary for some residents who have essential work - NHS etc. who should be given special access pass.	Primary traffic issues in Oxford seem to be caused by parents dropping kids off at schools like Magdalen College School which causes major traffic issues on St. Clements and other arterial roads. OCC needs to work with Magdalen College School and other facilities in Oxford to come up with a solution to this issue.
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	You are simply making things worse for the ordinary residents who are already struggling to make ends meet.		Open up All the lins.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	Oxford is too congested with cars at the moment. I think that this is a positive step. It has been introduced successfully in London. There are however a lot of excecitons where people don't have to pay the charge.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Free buses for all children in education	Very negative	Shouldn't happen at all	Cycle brains trying to push this through	Cheaper buses, would get people out of cars and using the bus
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make bus services more frequent, Add public cycle parking		Neutral	As someone outside Oxford it will be annoying to have to get permits but they would cover our general usage.	I think it is unhelpful having the Thames street gate as a congestion charging point - it means that with Botley road closed visitors the the west gate (which does have suitable parking) would have to pay the charge on top of expensive parking as no alternative would exist. This should be avoided as likely to have negative impacts	More properly designed and segregated bike lanes including Eynsham to Botley road via Farmoor
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No			Very negative	This is simply an unjustified tax to repair your council budget. It will have detrimental effect on the shops and restaurants in the city.		Improve the lane distribution at the junction at the Westgate entrance. A lot of congestion is simply because the left turn into Westgate holds the traffic back. There is space to redesign it. Invest in road infrastructure - that's how it's done in cycling friendly Denmark. Netherlands and Poland. Simply fishtino vehicular transport is not the solution.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Positive	There should be no charges at all	No	Other	Remove the hated LTN'S and stop persecuting the people of East Oxford.	Very negative	We might as well be living in a communist country thanks to Gant and his Lib Dem cronies who between them couldn't run a p..up in a brewery	stop robbing decent people	Get rid of LTN'S Sick of cyclists getting their own way and not paying a penny for using the roads.They don't obey the rules riding on pavements and going through red lights.Totally oblivious of their surroundings so pedestrians are not safe.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very positive	There should be no charges at all	No	Other	I don't see why this needs to be done at all. It's not an issue for other cities.	Very negative	Other than London, no other cities in the UK need a scheme like this. Westgate carpark is already expensive enough, and to bring in these charges would mean that I would seek to socialise elsewhere.		Hurry up the Botley road work. Don't punish residents
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Neutral	Negative as I may occasionally have to pay the charge as a driver, but positive as traffic should be reduced reducing pollution and increasins safety for me as a pedestrian	It is a shame that so many are opposed to attempts to reduce congestion in Oxford. I applaud the councils efforts to make Oxford a pleasant place to live and visit	More pedestrian zones in the city centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	We struggle to get out of our road already! If all traffic is diverted our way that's going to be impossible, if there's an accident our alternative route is through a charge location which is not fair either! I pay road tax to use roads and am being stopped totally awfull	Unfortunately for us we have to drive out of the city to use a park n ride which is pointless! Our one and only local bus barely runs every half hour, hourly in evenings/weekends and is expensive! City routes should not be the capped fair as that's not fair... we pay same price going 10 mins as someone coming from Bicester for example how is that encouraging. I have to go through a gate twice a day to provide grandparents care is that going to be recognised?	and chicanes to slow some traffic especially in rat run areas rather than gate them off and also force residents to divert! (Some of these diversions will change a 10 mins drive to a hour plus one... increasing fuel consumption and emissions and forcing more cars on an already busy road, that don't make sense.. Stop endless traffic lights as honestly when lights are out at some junctions there's no jams/tailbacks! Maybe do a dedicated shuttle for hospital staff from park n rides in line with shift times to cut down drivers! Put 20mph zones in realistic places as some speed limits cause more problems than necessary!
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I live in a road which has an exit into Hollow Way and as I live less than 50 yards from Hollow Way this is the route I take. Hollow way is not an excessively busy road but does get busy at school times. It is The Slade and Oxford Rd which cause the traffic issues and as they can't really be targeted it seems Hollow Way is the easy target. Also why should a resident who lives in a road off of Hollow Way get the same number of permits as someone living the other side of the city?	It feels like a way to generate income from the residents of the city. There are many improvements that can be made but little effort seems to go into trying. Buses need to be cheaper and more reliable, stop allowing family homes to be turned into HMOs which inevitably mean more cars in the residential areas. The vast increase in cars is somewhat down to the allowing of so many family homes being turned into large HMOs. There is no joined up thinking. There is also the issue with any free land in this area being turned into student accommodation. They are not supposed to have cars but many do	See point 12. Also look at schools and where families live. A lot of parents drive their children to school when they could walk.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Congestion charges should not be place until there is much better county wide public transport, like trams or every village trains		Open up the LTNs. Provide actual usable transport like trains
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Positive	Too low	Yes	Add public cycle parking		Very positive	Oxford is, due to its size, an ideal town to enjoy cycling or walking, with public transport available for those who can't cycle/walk. Currently the traffic is such that public transport is not reliable. creating a vicious circle	The sooner this is in place, the better. And please make a priority to fix the Botley road mess	Better bike paths, they are not great everywhere
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all		Very negative	Just another way to discriminate against people who cannot use public transport into the city and have to use their own car		Stop building so many houses/ flats
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper		Negative			
an Oxford resident	weekly		I don't	No impact	No impact	There should be no charges at all	Not sure	Other	Free bus travel and free park and ride	Very negative	Oxon Botley road and allow oxford residents the freedom of their town	It's a ridiculous idea. as are the other traffic restrictions.	Oxen botley road, make more parkino soace. reduce cost of parkins. free bus and train travel
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	Too high	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Neutral	The issue once again, like the LTNs is class. Those who have property in the most expensive area will have unlimited access, those is cheaper areas - less access. That should be considered. I think having a charge to get to Westgate is an issue for Business too. Having the charge be income based rather than car size would be useful. Let's face it, Oxford is blissful to drive in when private schools are on holiday, that's a big issue. This might help but need to fully listen and respond to local communities rather than force things.	See above - class issues and Westgate concern.	I'm an unpaid carer for my partner, will be applying for a blue badge soon. It's a bit sad to not be entitled and be penalized for living with them. As a disabled person also, conserving energy in ways such as driving so then I can better look after her. However I do think the 100 passes is a good number of passes. I'd be concerned if we moved out into the 25 passes, perhaps 50 would work better. Still doesn't feel safe enough to cycle for me, the hire bikes and scooters are impacting accessibility of pavements for wheelchair users which needs to be sorted. Hoping this would increase bus services. Also new bus lines would make a difference- being able to get around easier with less switching - as a disabled person would be very useful.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice. Frequent hospital patients	I commute to the central permit area by car		No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	I will no longer shop in Oxford. Carrying shopping on a crowded bus would be very difficult.	It's bad enough and parking expensive when attending hospitals as it is. This will cause unnecessary stress to patients and visitors.	Out of town retail parks. Out of town outpatient deoartments.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Neutral	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative		The wider area should be given more permits	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't			There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I live in a town where our local bank is shutting and the only option is to go into the city centre which I will need to do at least once a month. P&R buses are quite often rammed which is not only dangerous but if you can't provide a seat for someone then why should they pay the same amount as someone who has a seat, more buses should be run to prevent this happening. You have to be given a seat in a plane but you are forcing people to use buses when there isn't enough seats for them.OR pay at least £10 to visit the city including car park parking but the services aren't sufficient to get people in. Why include the access road to the multi storey car park in the zone? I live in Wootton and getting a bus that runs only once an hour from my village it's just ridiculous and on top of that I physically can't make the walk from where buses drop off on the Botley Road now but I am not considered disabled. When you have more empty shops in the centre because people stop visiting you'll then be regretting this half brained idea		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Having to travel into Oxford for work with tools, Safety equipment and a laptop the bus is impractical especially with having to travel out of Oxford for other work in the same day. Those costs would be passed onto clients including DCC who I do inspections for, if they or you do not cover the costs those inssections would not be carried out.	Is likely to cause people to leave where they work within the City as costs will reduce income.	Average speed cameras to slow the traffic within and prevent the caterpillar effect. Barrier bike lanes to prevent cyclists swerving into traffic. Allow motorcycles to use bus lanes, would likely see an uptake of motorcycles which would allow easier flow of traffic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	All of the traffic that will be avoiding St Clements will congest further the Cowley and Iffley Roads which are already congested due to the LTNs	I feel that my personal freedom to move around the city where I live is being eroded. I do not want the bus filters either. Why are there no LTNs in North Oxford? I suspect because the wealthiest will put up more of a fight for their freedom. I regret voting Lib Dem.	More varied bus routes e.g. resumption of the 3A bus route to the station and eventually over to Botley as the 4A used to do. Also a bus from east Cosford to Jericho.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Residents are already struggling with the cost of living and businesses are already struggling for various reasons, including because of the tlns. If you add this burden as well, businesses will start to close meaning less revenue in tax, etc. These schemes always expand in cost and scope. The plans to reduce traffic are clearly not working, the tlns have just moved traffic from one area to another. Until the proper infrastructure is in place none of these plans will work.		Put cycle lanes separate from bus lanes to enable speedier bus journeys, have enforcement against cyclists and e-bike/scooter users for the safety of pedestrians, reduce bus fares in and around Oxfordshire and increase bus services. Road surfacing should also be a priority.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	As a single mum of 3 I have to attend my sons orthodontist in Oxford every 8 weeks and occasionally drop my older daughter i. Oxford for college if there is a problem with the public bus. (this happens alot) I think it's really unfair to have you pay to come all the way into Oxford for these quick trips. The park in Oxford is already way over priced. The reason I have to drive in and not get the bus is because public transport is so poor. I also have to leave work then pick my kids up to drop them. I don't have the time to get so many different buses.	Yes it's really unfair on us. U have already messed up all the traffic by introducing the stupid 20mph rubbish. The roads are a state. Push bikes can go faster on the roads then we can and we pay to drive on the roads. Oxfordshire council is a joke.	Build more roads. Fix the roads we have. Stop reducing speed to 20 from 30. This is making g the conjunction so bad.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper		Very negative			The congestion in Oxford has only gotten worse since the LTN's have been introduced. Sure they have made a benefit to the people living in those areas, but it has made a negative impact with more cars stuck in traffic on other streets. If a single road has road works, then it is absolute chaos for the whole area. This idea will only help push all cars out of the city and into the ring road which is already a nightmare aswell.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Don't charge people it's another tax	Very negative	The reason we have congestion on these routes is the undemocratic introduction of LTNs	Don't do it it's wrong rethink LTNs	Put traffic lights on the plain the constant flow of cyclists slows down traffic from St Clements, Cowley Rd and Iffley Rd. Just sit there between 15:30 and 19:00
a resident of Oxfordshire living outside Oxford	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	My wife and I visit our daughter's family regularly in Central North Oxford. This would now be costly and inconvenient.	These congestion charges will only displace traffic to other busy roads around Oxford e.g. Ring Road/A34	Before introducing these schemes there must be viable alternatives for people to use. Not enough thought has been put into this.
an Oxford resident	daily		I don't	Neutral	Positive	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Remove LTN's	Negative	I have family members that visit elderly family in city centre to and from work and care for them driving daily is essential to every day life for some people		Remove LTN's
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	I don't see how this will improve congestion and/or add any money beyond operating the scheme itself	For the filters Mon-Sat, there is no commuters congestion on Saturday, just parents trying to make it on time with one child going to ballet and another one to a football match. No reason not to make it Mon-Fri.	Ask residents of Oxford The cycling paths are not built in a smart way, the buses are expensive and not reliable. Of course people are resorting to cars. Introduce smaller buses to go frequently around neighborhoods, make it cheaper. More shelters bike parking, investstate thoroughly bike theft, more lothtino in the winter to make it safer.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	No impact	Too high	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Negative	I visit friends who aren't very mobile to take them out.	Marston Ferry link road is not central Oxford!	Reduce the number of cars dropping off children at schools, particularly those driving in from outside Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Residents shouldn't have to pay. We're serving this city and they're stealing the little we earn.	Very negative	If you charge residents, I'll have to apply for benefits. It's not worth working. Why rob us? This is robbery.	stop robbing the residents	I work in maintenance, so I'm not going to take the bus to work. Sometimes I have to carry tools.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	No charge at all!!	Very negative	I live in Kidlington and my child attends nursery ON Marston Ferry Road. It is not safe for me to catch a bus at 6am to get my child to nursery; I would then also not make it to work in time following drop off. You are punishing me as a hard working person with this charge. A cost of £25 per week would make me rethink my ability to work full time - this has repercussions as I am a tax payer who is also supporting a local business by putting my child into local childcare. I feel so emotional with this potential charge. The petition has gained over 10,000 signatures as at the time of writing. Please hear us.	The charge in itself is wrong - but the locations picked are even worse. Marston Ferry Road is not busy at those times - this would push traffic towards headington and the ring road. This would be unbearable for hard working hospital workers.	Get rid of the LTNS. implementing this caused the traffic problems we have today.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Having to drop child off to family for childcare then use my car to work for local authority I would not qualify for any support through this scheme I would be penalised	Genuinely awful the East of the city is already so inaccessible the services aren't fit to cope and you are further disadvantaging the most disadvantaged people	Get rid of LTNs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	There should be no charges at all	No	Other	There should be no charge	Neutral			Oxford residents should not only get 100 day passes for the bus gates when they come in. 100 days is not enough as this does not even cover commuting to a standard 5 day a week job. Oxford residents should be able to drive down these roads 365 days a year with no charge. It is a disgrace that residents will be charged for using the roads where they live on top of other charges like stupidly expensive parking permits. If you want to introduce a limit for non-residents/ commuters for the bus gates then fair enough that would be a good plan but it's time to stop adding yet more traffic charges for residents of the city who already pay very expensive council tax only to be told by the council that they cannot use the roads where they live without charge
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Not to make the changes in the first place	Very negative	As a tradesman I wouldn't be able to take on any work in the permit only areas. This also includes visiting trade shops for supplies		Opening botley road sooner like it was suppose to be
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	You don't yet have the public transportation infrastructure in place to implement your scheme. It will cause financial distress to businesses and the lower income community.	This is a town, not a city like Amsterdam or Paris. It's important to remember we are not able to mimic what they do, as great as it might be.	Please put pedestrians first. Cyclists are for the most part a single demographic - not always but often they are white and middle/upper class. The council members who want more cycling are of the same demographic and are not representing everyone who lives in Oxford.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trains to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	weekly	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative		There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Can't afford charge		Open LTN, takes longer to get from office to work at the Cowley centre, twice the mileage twice the time
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	Reducing cars in the city centre is necessary but these measures don't go far enough and there are too many exemptions and passes available		Better and safer cycle routes
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all		Neutral		The Ring Road is already congested and your congestion charge plan is going to make it even more congested. Also Marston Ferry Road has the only proper cycle path in the whole of Oxford. It should not be included in the congestion charge plan and the future bus gate system.	Cheaper bus services.
a resident of Oxfordshire living outside Oxford	weekly	Taxis and private hire vehicles	I don't	No impact	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It will make life more intolerable for residents and businesses in Oxford, who already struggle because of LTN's The ring road is unable to cope.		Remove the LTN's
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative	Having to commute to drop children at childcare before working in healthcare daily, with no public transport options available - this will likely increase commuting time as more traffic on ring road or cost us financially.	I think it is extremely unfair especially on those just outside the city.	Remove the LTNs. Create more bus routes with cheaper prices and free transport for children like in London.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Positive	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Very negative	We live in Islip and regularly come into Oxford for shopping and for children's clubs (e.g. swimming). It is not always possible to make these journeys by public transport - the trains are too infrequent from Islip to Oxford - and the extra cost of the congestion charge would discourage us from doing so. We would be quite isolated without easy access into the city.	These will result in those roads which are not part of the congestion charge zone (e.g Banbury and Woodstock Road) becoming increasingly congested.	The starting point needs to be improving public transport. When there is a system that means that we don't need to rely on cars to get around - and that those of us living outside the city have an easy and quick route in - then start to consider things like congestion zones. Otherwise we simply won't come into Oxford - we'll give our custom to other towns instead.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	Hollow way is a quagmire at the best of times, causing the roundabout with Horspath Driffway to clog up often going in front of the fire station. Restricting movements on Hollow way will make that roundabout flow more freely. Marston Ferry road, however, flows freely enough that it doesn't need it	Always huge congestion on St Clements, with limited bus and bike options. Currently the bike infrastructure from Old Road towards the city on St Clements is poor and discourages cycling.	
an Oxford resident	daily	Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I manage a service that requires access to residents living in the chargeable area. If they had to go from one service user to another without using the chargeable area it would reduce the number of service users they could see daily	I am totally against it. It will make travelling in Oxford so difficult that it will impact on everyone. I have a bus pass but would rather travel to Witney to shop than go into Oxford City centre, which is dying. Its a disgrace	How is walking and cycling easier if you live beyond the Plain and St Giles which are flat. I live at the top of headington Hill. How am I at my late sisters supposed to make more use of walking and cycling carrying shopping or grandchildren. Get rid of the LTNs. Improve the parkride services
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Positive		The train station - Churchill hospital route is difficult to get to by bus, and there is not exception for dropping people off at the train station.	Have more buses that run radially without the need to go into central Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Positive	Too low	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add public cycle parking		Negative	I need my car more than 100 times. So I don't think it is justified that I will be punished when living in Oxford. I don't have a choice but to travel through those routes for some of my business. Permits should cover at least each working day of the year as employers expected people to show up to work. Plus, I need permits for visitors.	Repeat: I need my car more than 100 times. So I don't think it is justified that I will be punished when living in Oxford. I don't have a choice but to travel through those routes for some of my business. Permits should cover at least each working day of the year as employers expected people to show up to work. Plus, I need permits for visitors which will hopefully be given (as stated in your message). Also add lavbavs for buses. Thev stop the traffic and make it worse.	Laybays for busses. Open the side streets between Iffley and Cowley but make the main streets one directional. Then introduce a bus lane in the freed up lane. This will make busses faster than cars and offer an alternative to driving. Right now there is no point in taking the bus.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Other	Reinvest into roads	Very negative	My daughter is at school and will need to pick up and drop off when the school bus is not used, for example when music lessons, sports clubs etc are needed after school. The council is not well managing the roads around the city or working to provide useful alternatives in terms of additional capacity. When living in a city all of the network of city streets are needed to share the traffic load, the congestion and pollution are factually going down not up and all of the problems are caused by other vehicles	Not needed and unacceptable	Remove LTNs, use all of the available network.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No			Negative	This will put people off visiting Oxford for purposes that they cannot use buses. It's also forces lone women to use public transport when they might not feel safe. I.e when coming into oxford for the theatre etc. before 7pm.	I believe that most people use the bus if they can and that those driving in usually have good reason.	Cheaper train travel
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative	My time distance and cost will at least double regardless of whether I continue to drive or switch to park and ride	This will just move the congestion to the ring road making it even worse, and the rich living in Oxford getting about easier	Make all private school use park and ride locations and put buses on for the kids
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very positive	I support efforts to control the number of private car journeys in urban area. Oxford is over congested and unpleasant to live in because of the volume of cars.	Please do more to improve cycle routes. I live fairly centrally but am not on a bus route. Cycling feels dangerous as cycle routes are poorly linked and not safe	As above. Better cycle routes - protected from the traffic where possible. More secure cycle parking in central Oxford. There simply isn't enough at the moment. Pedestrianise queen street - the buses are huge and overwhelm the street.
an Oxford resident	daily		I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative			Term time traffic is the most problematic. Could school buses run from the park and ride in addition to the village buses.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles, Fire fighters, Ambulance drivers, Police officers, Prison officers, Military personnel, Vehicles for business purposes, Driving instructors, Hearses and funeral cars	I don't	Positive	Neutral	About right	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Positive	A gate at the bottom of the Abingdon road would be better for me, but this is good		Enforce the school streets
a resident of Oxfordshire living outside Oxford	weekly	Business cars used as goods vehicles	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Other	Maintaining the road to a standard would be beneficial. We seem to get taxed and charged more and more with no real benefit. You'll just relocate the problem to surrounding areas. History will tell you that in most cases. Businesses are being destroyed	Very negative	As noted businesses will suffer and you'll just move the majority of these vehicles to other areas.	I suspect when the majority don't support this, the council will do it anyway.	With limited funds the councils have nationwide, the current road network which cannot cope with the traffic flow. The simplest answer always seems to be, charge people to enter and try to limit the vehicles entering. But as noted the problem will just move elsewhere. People won't want to go into Oxford. Buses are only any good if going to or nearby to the destination. This is often not the case. Buses are not the be all to end all. And charging people to make journeys which in many cases cannot be travelled in any other way, is not ideal. I understand theres heavy traffic but charging people more and more in most cases, will not solve the problem on a wider scale.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Other	Fix the pot holes that are destroying the roads In central oxford. Why are we having to pay for roads that are not fit for purpose and cause damages to cars	Very negative	Don't agree that we should be charged further for driving in oxford when we already pay road tax for the broken roads that are in and around oxford.	No	Get rid of the horrid LTNS and other ridiculous schemes that make it insufferable to get around oxford. Some times it is far easier for people to drive their own cars than use public transport or cycle.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses, Other		Very negative	I don't have an alternative but to drive, Oxford public transport is not good enough, nor public transport to Oxford	The proposal should be abolished	The east west rail
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	If this proposal genuinely allows Oxford residents to travel in their own Vity without charges and there is investment in the public transport infrastructure of Oxford without damaging people's health and wellbeing then I am behind it, but I cannot see that until proposals are properly drawn up.	I am very concerned as I am a single mother of a son with ADHD who requires routine. I have to be at work at a specific time after dropping my son off at school and cannot afford to get the bus or rely on the timings I also work in Reading twice a week and need to drop my son off in Jericho from my home on Banbury Road drive to Reading. I need reassurance that I can get to work. If lose my job I will lose my mortgage and home and my son's security. I cannot agree to something that puts my families security at risk with no profit it will help the environment. Sorry but that is the way it has to be.	Can we get a tram service? Can we make buses actually affordable and routes properly joined up and on time? The bus companies run this city and cars are the only viable way to get from one side to the other. I have daily and fiends in Cowely but live on Banbury Road but cant get there any other au but by car
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	Oxfordshire city council has already lost the trust of the public by the extended closure of the botley bridge due to failing roadworks and the public are now being charged to drive though an already frustrating situation	The commuter passes & residents permits will soothe sore and infuriating congestion charge- one that will no doubt segregate the community. Not to mention the divide of income between family's living in marston & summertown+ two neighbourhoods that are in catchment for the Cherwell school and will now be adding futher deprecation to those accessing school via parents care through the marston ferry road.	School passes for marston ferry road to access Cherwell school
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area. on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	This is a ridiculous idea, putting charges on arterial roads into the city is even more stupid than the backfiring LTNs in Cowley	Very negative	It will cause chaos for students and parents in particular, as well as many members of staff who work for the universities, and in businesses within the city	This should NOT be done. It will not aid congestion, disproportionately impact lower income families far more than more wealthy individuals, and in general cause far more trouble than it is worth. Particularly, it serves as a scheme to obtain more money from students and their families when movino in and out at the start and end of terms.	Take out the LTNs in Cowley. Open Botley Road, subsidise train and oxford tube travel
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very positive	Very positive	About right	Yes	Make buses cheaper for young people, Add new bus routes, Add public cycle parking		Very positive	I would like to ride a bike safer in Oxford		More full partitioned cycle lanes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	Very positive	There should be no charges at all	Yes			Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I work for a funeral company also Oxford coroners service met the police at Boundary Brook the other wk during school finishing time for a coroners to take to the John Radcliffe hospital for a postmortem & the following week your trying to bll us for driving to the address at that time of day does this explain my answer for you		Yes get rid of all the LTN
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	As a parent of a young child the charges would isolate me from my wider family who would be less likely to visit. Local services are already poor for young children and the charge would seriously make me consider relocating. I work as a teacher in a local school and schemes like these are driving colleagues out of the schools in Oxford.	Penalising people for using cars is not an affective deterrent.	Traffic and congestion is caused by a lack of affordable housing. Workers are pushed out of Oxford and forced to commute in from more affordable areas. Heavy handed traffic control measures will force more people to leave jobs in the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	he proposed temporary congestion charge in Oxford would have a significantly negative impact on me and the people I represent. While the stated goals—reducing traffic, improving bus services, and cutting pollution—are commendable, the reality is that this scheme places an unfair financial and logistical burden on everyday residents, workers, and small businesses. Many people rely on their cars not out of choice, but necessity—whether for shift work, caring responsibilities, or accessing services not easily reached by public transport. A £5 daily charge, even if labelled "temporary," adds up quickly and risks deepening inequality by making city access a privilege for those who can afford it. Moreover, the timing feels rushed and poorly co-ordinated. With the Botley Road closure already causing disruption, layering on a congestion charge without fully functioning alternatives—like reliable, affordable public transport—feels punitive rather than progressive.	This proposal risks isolating communities, harming local businesses, and disproportionately affecting those who are already struggling. It's not the right solution, and certainly not at the right time.	Free park and ride, free buses or very cheap and private schools should have their buses or use public buses
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all				Very negative	It will make it very difficult to travel about. I have an elderly father whose mobility relies on being able to drive to access places. This presents more barriers to him, just in the presence of an idea. It is his last years of life and the proposal of this will limit him. We operate a business and traveling through parts of Oxford can be done by bike some of the time but not all the time as it means transporting services and goods. I also requires tradespeople to want to support us. This presents a challenge to them which we see us either paying increased prices or being turned down by tradespeople not wanting to work for us.	If the aim of the charges is to suppress congestion at peak times I don't understand why any charges should be levied to people who are travel at other times of the day. It seems ridiculous to prevent parts of society who rely on transport to be able to live their lives (young and old) and businesses trying to make a living. I understand that we must be environmentally conscious. I have worked in the environmental sector for over 30 years but the approach adopted here does not support social or economic benefits. I therefore cannot support.	Make and maintain safe cycle paths and for pavements for pedestrians. You have just made the top of the Woodstock road more dangerous by swapping lanes. There are many points such as opposite st Edwards where cyclists are now directed off the cycle path into oncoming traffic. Focus and encourage less commenting during busy times. This will reduce congestion and travel times for those that must. Summer holidays alleviate traffic significantly, working with schools particularly the private schools in North Oxford to encourage pupil bus travel would make a significant difference. Finish a couple of projects properly rather than starting new ones. Open up the botley road, and invest in doing that rather than frivolous exercises such as the £3.2m spent on the Woodstock road replacing the junctions with paving and adding green spaces. Finish the Eynsham park and ride rather than doing the same. Do better traffic modelling, as we understand none was done in the design of the bus lane swap for the Woodstock road. Also it's apparent whoever your current contractors are, are not improving the layouts of roads to ease the flow of traffic, only making them harder to naqivage and slowing free movement. Examples include the Wolvercote roundabout from both pear tree and Witney where the replacement layouts are poorly designed and a step backwards from the previous work.
a resident of Oxfordshire living outside Oxford	daily	Business cars used as goods vehicles	I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Very negative	I need to visit clients by car, and collect items from them in Oxford, on a daily basis.	This will be the death of many businesses in the city	Not introducing LTN's/bus gates which force everyone onto a few main routes, which will cause utter chaos
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area. on days of your choice	I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	I don't see the need of paying this charge. It's unfair on Oxford residents.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	Will reduce traffic so more pleasant, easier to cycle and hopefully cheaper and quicker buses	The priority must be to reduce cost of bus transport. It is mad that to get a bus from Headington into Oxford is almost £3. . decide will it take the bus unless it becomes sianificantly cheaper.	I think a congestion charge is much better than the bus gates since it will generate income which will allow for cheaper buses
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative			Get rid of the LTNs, it was never an issue before.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car		Very positive	There should be no charges at all	No			Very negative	I work in the nursery on Marston ferry road and have to commute to work each day, also the families that use our setting will need access to get their child/children to nursery there are all under 5 years old	Although workers and regular uses of the business free access	Open the LTN's these are what has caused the traffic!
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride buses cheaper, Add new bus routes, Add public cycle parking		Neutral	I don't need to drive through town. So a charge won't impact me. But I do want congestion to decrease so that it becomes safer to cycle and walk and buses don't get stuck in queues. I'm not sure this will reduce congestion. There are so many exemptions. It will be an interesting experiment. Hopefully a year is long enough.	Please could you monitor Iffley Road and Cowley Road? To see how much the traffic increases because all parents driving their kids to Magdalen College School will have to use one of those roads. That is what causes most conaestion on iffley road at the moment.	Charge tourist coaches for travelling into Oxford. Or only allow them to drop passengers off at the Park and Ride. They are a danger to cyclists and pedestrians when they park on Magdalen Bridge and elsewhere. They also add to the congestion.
a member of the public living outside Oxfordshire	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	About right	No	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Positive	People do need to stop driving, and need to accept that they "are" traffic. My parents live in one of the LTNs and I am having to visit from Yorkshire at short notice - I would get the train but it is £176 and takes longer. Their street is a much more pleasant place to live but I do need to be able to drive to them as a carer.		I might consider using the park and ride but am not sure if cars can be left overnight

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on davs of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Introduce more dedicated cycling lanes (especially on Abingdon Road)	Very negative	This proposal will make it very hard for family and friends to visit, and I am concerned that it will leave me and my husband isolated. We chose to live in Headington so that we could walk and cycle to work, but we are now being penalised as it will be very difficult for family and friends to visit us, who cannot reach us without driving. We would like to see free guest passes for all Oxford residents, not just those in a small section of Oxford.	I am concerned that these proposals will further clog up the ring road, which is already struggling to sustain current levels of traffic and frequently jams. Increasing traffic on the ring road in its current state is not a viable solution. I am concerned that these proposals will prevent people from accessing places of worship on Sunday morning - many people travel from further afield to churches in the city centre. I am concerned that areas like Kennington and Radley - which are in practice part of the suburb of Oxford are being cut off by the boundary between "Oxford" and "Oxfordshire". As a former resident of Kennington my whole life was in Oxford - my work, my church and my friends - and this is true for many other people. I am concerned about colleagues who do shift work in the centre of Oxford, who have to drive into the city during restricted hours so that they have a car with them to drive home at midnight, when they finish work. There are many people who do not feel safe travelling home alone at this time who need to drive, but crucially they need to drive into the city earlier in the day before their shift starts.	Yes! restricting the roads that cars can drive on we no reouce congesion. Congesson we ony reauce when car drivers have a viable alternative that allows them to make the same journey as quicky and cheaply as driving. There are several ways to do this: 1. Work with the schools to introduce dedicated school buses. There should be enough school buses to provide transport for all pupil journeys and schools should be incentivised to get their students to use them. Otherwise pupils will continue to be brought to school by car. Eg, if schools can prove that 90% pupil journeys are made sustainably (by walking, cycling or by bus/public transport) the council could cover the cost of the required buses. If schools don't meet their quota, then they could be required to pay for the cost of the buses. (Traffic is noticeably lighter out of term time, so providing alternative school transport is key to tackling Oxford's congestion issue.) 2. Make buses free at the point of use for all Oxfordshire residents. As already provided for the elderly, introduce free bus passes for all Oxfordshire residents. These should be funded via council tax. That way, all Oxfordshire residents would pay for the bus services, incentivising them to use the bus. The bus will never be faster or more convenient than driving, so the only way people will feel it is worth taking the bus is if it is free. Moreover, those who are taking longer journeys, requiring more than one bus, will no longer be penalised by having to buy multiple tickets. Park and ride parking should also be free. 3. Invest in dedicated bike lanes. They are worth the money, and residents of Oxford want them. They save lives, prevent accidents, and ensure that cyclists feel safe on the road. The scariest part about cycling in Oxford is not the cars on the road, but the lack of protected space for bikes, especially on roads like Abingdon Road. It is possible to have a cycling city in a historic area - the Dutch have proved this in Amsterdam - but we need to up our game. 4. Open Littlemore station (if you can). 5. Regulate the taxis. Ensure that they are not cruising around Oxford's streets empty, but are only making journeys when necessary. 6. Ask people travelling in Oxford to (voluntarily) record all their journeys for a fortnight, and use this data to inform planning for public transport - rather than designing a bus system on guesswork.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	Too low	Yes	Make buses cheaper for all, Add public cycle parking		Very positive	The options for increase traffic demand to the city are: (1) increase the number of roads or (2) decrease the number of drivers. No one wants (1) in Oxford and it's not even possible in most areas. We need to reduce the number of cars and invest more in transportation that scales better.		
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	I am a mobile podiatrist who visits diamond court summertown going through marston ferry road all my patients are over 90 years old I go every 7 weeks These old people do not have computers to give me there passes you suggested.I cannot change my hours you are penalising old people and stopping me from attending. I have heavy bags for my equipment.I cannot go on a bus	I would like a pass for 25 times a year then I would be able to continue offering a service to these clients otherwise I shall stop going into summertown	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	No			Very negative			
a resident of Oxfordshire living outside Oxford	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	People will visit less , businesses and companies will leave , jobs will go, just for yet another vanity project	Just another money grabbing scheme dreamt up by an uncaring irresponsible council , who have respect for residents of Oxford and the county	Remove the lins , make buses a lot cheaper and better more efficient by keeping the traffic flowing rather than keep it in queues
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders	I don't	Very negative	Neutral	There should be no charges at all		Make Park & Ride buses cheaper		Very negative	Experience with LTNs has shown that traffic is squeezed elsewhere, causing severe queueing and pollution. People will not stop using their cars. If things are made difficult for drivers by blocking areas of the city they will always find alternative routes. It has been the excess of (often empty) buses causing pollution. Now many routes are electric this in turn has increased bus fares for residents. Come on - you can get across London for £1.75 and someone unable to walk from Blackbird Leys to Cowley centre pays £3! How is this a sustainable option when trying to encourage the use of public transport?	How is Hollow Way part of the city centre?	Reliable and affordable public transport. The cost at present is ridiculous. This is the obvious cause of people being discouraged from using this as alternative to driving.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Positive	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	More money people will have to spend out when money is already tight	It is no more than a restriction of movement and money grab from a dictatorship	Open up the LTN's that have caused the problem in the first place
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Positive	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent		Very negative	Going to push more traffic into the Banbury / Woodstock road area, which is already heavily congested from Kidlington all the way into the city. It takes up to an hour to travel 3 miles to my sons nursery already and limiting access through the only remaining routes into the city is going to only increase traffic in this area further.	No	Put more bus route options in place, put in fast routes for frequent commuter hot spots. Open a station at the Cowley Line. Improve the Banbury Road / A40 roundabout for traffic crossing from Kidlington to the city and back. If you are going to put in a conestion charge including Banbury Road.
other	daily		I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Other	Shouldn't be charging ridiculous amount during a cost of living crisis	Very negative	People are struggling to make ends meet		Have another access point to hospital to divide traffic flow
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Very positive	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	This will add costs to owning a car and make it more difficult for people to commute to work in Oxford every day.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all		Very negative	Just another money making scam	Scrap the lot it's all false information	Get rid of the LTN's
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses		Very negative	I live in Horseman Close. Marsh Lane is already very congested and it can only get worse with Marston Ferry Road subject to congestion charge. Generally ring road will be even more congested. Businesses will suffer as people will shop elsewhere. All		Make Lln roads one way allowing through traffic. Pollution is just being moved to different places
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	Too high	Not sure	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Other	Help those with low incomes pay the congestion charge	Very negative		It does not make Oxford very welcoming, it seems that the city don't want people to enter	A lot of the time Oxford doesn't have a traffic problem, encourage business to use flexible working.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Positive	Living in central Oxford (Iffley Rd close to the Plain), the current situation is having a very negative impact. The air quality monitor inside my house shows illegal levels of pollutants, and the dirt on the windows and front of house accurate weekly (whereas it used to take several months). Solving this issue is important, and shouldn't wait for the Botley Road to reopen. My only concern is allowing commuters access to the same scheme, the point of which ought to be moving those coming into Oxford for any reason on to public transport. Commuters out to pay the congestion charge as they would in any other major city.	Adding the Iffley or Cowley Rd near the Plain ought to be considered. The current proposal creates a rat run up one street and down the other for one parent one child school commuters.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	About right	Not sure	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very positive	If it helps make bus journeys quicker, serves to reduce pollution and makes junctions and streets safer for pedestrians and cyclists by reducing conestion then I am all in favour.	No	Not off the top of my head. I feel so positive about what the Council is trying to achieve here: this is such important work
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Add public cycle parking		Very negative	It leads to congestion in other places		Open Botly Road and
a member of the public living outside Oxfordshire	weekly		I don't	No impact	No impact	There should be no charges at all	No	Other	Money should go into paying for the relocation of the ice rink to a location unaffected by this charges and future travel restrictions.	Very negative	The increases the cost to access the ice rink. Teams travel from long distances to use the rink park and ride buses are unsuitable to be carrying ice hockey equipment.		
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Getting rid of the LTN would improve traffic not this.	LTN are the route of the traffic chaos in oxford. Admit that and take them away instead.	Put the LTN's in areas such a ox2 where the rich live, they would be reversed and removed within weeks. Problems with traffic solved
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Negative	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	There need to be more locations		
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses		Very negative	This is a discriminating proposal led by people who are privileged and fortunate to be able to afford living within Oxford. They don't understand that driving to and within Oxford is not a choice for working people.	Oxford does not have proper public transport, e.g., like London and should tax people before having proper public transport	Open Botley road, support East-West Rail, congestion is not really that bad.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	You haven't taken into account faith groups and what they need to do and how they operate 24/7, and Oxford Mutual Aid deliveries. You haven't got cross-Oxford buses and you're 'ableist', no thought at all about people who can't walk far, and why should people have to pay more to get to different places in Oxford?	Not thought through proposals as usual, lots of NIMBY councillors or councillors who don't live in Oxford behind these proposals. You're not going to help congestion, just push it into particular roads, and you haven't thought through people needing to come in for work and to the hospitals. Buses don't work for everyone, nor cycling. And when will you understand that Oxford is built on steep hills. We're not all rich, we can't afford this, and stop putting the woes of the Botley Road onto the ordinary people of Oxford, you messed us the neoshitlions.	Improve the bus services, including cheaper fares. Put in cross-Oxford buses, I can't get to North Oxford by bus from here without walking and paying for additional buses. But understand the needs of those using the hospitals, buses don't always work.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	The charge will impact cost of living without improving quality of life. I don't think is fair to charge people for going to the hosoital. but if I need to. I will have to pay and this is not accetable	You should first increase the frequency of buses and reduce the price of the tickets	Reduce the price of the bus fares
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Disability benefit claimants	I don't	No impact	No impact	There should be no charges at all	Not sure	Add new bus routes		Very negative	We are oxford residents. We shouldn't need to pay to move about our city. You could ask visitors to pay but not residents.	I think it is a disrespectful idea. Residents should not need to pay. Movement and parking around the city should be primarily for residents, then for visitors who work here and lastly for visitors. Already residents need to pay for a permit to park outside their house. Now they need to pay to drive around their city. I think the congestion charge (if you are adamant about implementing it) could be only for peak hours and not during midday and weekends	1) elevate the Marston cycle path so it doesn't flood and force cyclists into the city. 2) open many access ways into the city instead if pushing everyone through a few entries/exits. 3) make it mandatory that road works occur at night and not during the day. 4) expand the frequency and reliability of buses. 5) have buses that connect neighbourhoods like summertown to headington (not JR) through Marston. 6) expand roads and make internal bus stops (not on the road) at expense of verges.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Neutral	Neutral	About right	Yes	Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Neutral	It will move more traffic into my village	It will and is moving more traffic into my village increasing the traffic and pollution substantially	Give the surrounding villages the same bus gates as residents are being afforded with in Oxford
a member of the public living outside Oxfordshire	less than weekly		I don't	Negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of operation for buses		Negative	Congestion charging will create a zone that people will not want to visit if commuting from areas where public transit is either difficult or significantly more expensive. Oxford is a staple city of the UK and should be accessible to all. It is stated that it will be a temporary charge but this will most likely not be the case.	Reducing the cost of the park and bus into the city and advertise this service to local car rental companies and maybe a PSA for UK residents who have not heard of this method of visiting UK cities.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative		Yes whyyy you taking more money of us poor people let us go whatever freely we pay sooo much for road tax,mot ,car insurance etc... you already cause so much traffic with LTNs and now you want this	Yessss Take LTNs off that's the only way to reduce traffic !!!!!!!!! You know you need to take those LTNs off to reduce the traffic!!!!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I live on Hollow Way within 50 metres of the charging gates, this is going to be a huge inconvenience to us as we have to take the children to nursery. It has not been possible to get nursery places nearby as they are full. The one we did find shutdown. It will also be an inconvenience to my family and the childrens grandparents who visit regularly, but live outside Oxfordshire. They will be forced to come from Cowley and go all the way up Hollow Way to get to us.	Living very close to a charging gate is going to mean we end up driving further to avoid it. The uncertainty is effecting house prices. The Hollow Way gate should be scrapped.	Make buses affordable.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	no charges, ved should be used for road upgrades	Very negative	no streets shoulb be blocked by ltns or road charging	no charging	open all blocked roads and let traffic move freely
an Oxford resident	daily		I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I am extremely worried about how my elderly parents will manage this. You've only just switched to the online permits system and they are struggling to access that - you did it without any support available to them. They will end up isolated and disadvantaged- it's like elderly discrimination at this point.	Don't do it	Stop digging up the roads - particularly all at once. Make the bus lane between the Kidlington roundabout and the oxford parkway park and ride so that those driving to the park and ride can drive in it too.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Direct and dedicated bus route from a new park and ride at Barton Park to the JR hospital for staff and patients which would run every 15 mins	Very negative	Charging commuters and visitors will not help	Better and more frequent buses	Take all diagnostic test appointments and services away from the JR to a new dedicated site north of the JR
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Negative	Too high	Yes	Make buses cheaper for all, Make bus services more frequent		Very negative	It will make travelling to other parts of Oxford more problematic for me.	Introducing sticks with no carrots is another indication that the council does not seek the best interest of it's residents, and is hell bent on fighting cars w/o improving overall experience of travel. The permanent LTNs in Cowley serve as another prime example of that.	Remove Cowley LTNs and allow only residents of Oxford to go through them. Introduce bus lanes wherever possible, including bus lanes on major roads during rush hour with exemption only to carers or vital workers requiring the service. Reduce bus rates and ensure tickets are respected by all companies to improve service and affordability. Reduce bus prices on major roads during rush hours. Think out of the box!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	My alternative route is where your diverting the traffic too!	Don't do them	Stop private school traffic maybe give them school buses or shuttle buses that parents can put their kids on/off at park and rides !! Traffic is so much quieter when school is out!!!!
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses		Negative	I don't feel anyone should have to pay to reach their destination if it never would have been paid for previously.		
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't			About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	If it reduces traffic it benefits usxall in so many ways		Increase the size of the central ZEZ significantly
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Negative	This is a poor attempt to make more money; this will not help me to get to Oxford quickly when I need to go and visit the places in which I will be working	Abandon them	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Neutral	About right	Yes	Make buses cheaper for all, Make buses cheaper for young people, Extend hours of operation for buses		Very positive	I live on the Iffley Road and I am very supportive of initiative to discourage car use in the City and to encourage use of public transport, walking and cycling.		Create a separated cycle lane on the Iffley Road. Free parking at Park & Ride
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	Too high	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Bus service is still really infrequent and unreliable. Fix the buses first then do this.	The wealthy residents of North Oxford and Oxfordshire villages will, as ever, be fine. This will hit the poor and marginalised yet again	More buses. Buses that work. Less roadworks. More awareness of when roadworks are happening in one part of town to avoid compounding the misery. More awareness of not everywhere being cyclable or walkable, and not everyone being able to walk, cycle or drive and therefore needing to use a bus. No "bus gates on all roads into the city except for the North Oxford route in", no private schools allowed to plop on the centre of town with buses/drop off. Trams.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	I won't pay everyday two buses with my kids to bring them to the nursery and school	Very negative	It would be very expensive to bring children to nursery and school	No	No

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent		Very negative			
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I work in Oxford and commute here daily. This would become extremely costly for me to get to work	I don't see why those earning an honest living should be charged to use roads when we already pay car tax and council tax. We are being penalised for the Botley Road closure which has gone way over schedule that is not our fault. It was supposed to take a year and we're nearly up to 3 years. The reason for the congestion in Oxford is due to the council and national rail and the works being done not down to those who drive. Some of us live hand to mouth and having to pay fees to get to work could push people over the edge. It is already hard enough living in Oxfordshire in a cost of living crisis and this is being added.	
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Living in Cumnor we are severely affected by the closure of the Botley Road at the station. We volunteer in the city on a weekly basis and we are unable to easily get to the city centre if we have anything to carry home. We volunteer weekly at the Oxford gatehouse and this is also very complicated without using a car. I agree with the desire to reduce traffic in Oxford. I have lived here since 1989. However there HAS to be a consideration for all of us that live on the other side of the railway bridge and cannot set into the city centre easily.	Please see above comment you must consider all those who cannot get a bus into the city centre without using a car.	Bus priority where there is only one lane
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	The present intransigence of the county council is making Oxford a no go area for many people. Certainly shopping in the city centre will be damaged and for people needing to visit the hospitals it just adds to the stress. I don't expect my comments will be read as the county council do not listen to the residents!		Remove the LTNs - not everybody can cycle or walk. A lot of OAPs cannot get to a bus stop, get on a bus or have a service they can use. I lived on the Cowley Road for the first 25 years of my life - the county council has ruined it.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	Too low	No	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	Reduced traffic for those who really can't travel by other means.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I regularly drive into Summertown from Charlton on Otmoor for work and children activities. If it is going to cost an extra £5 per day I will look at work and leisure options outside of Summertown and Oxford.	Why do they need to be on Marston Ferry Road and Hollow Way if the aim is reduce congestion in the central area? Marston Ferry Road is a vital link between Marston and Summertown. Also, why is there no exception or at least reduction for electric vehicles?	More frequent bus services. Easier access to park and ride sites.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	Too low	No	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very positive	It will hopefully make people think twice before using the car	They should add one on the Abingdon Road and The Plain	Add extra benefits to the better points app for those using options other than car. Add a monthly option to the mybus Oxfordshire pass and add extra charging locations to reduce traffic on Abingdon Road. They should also encourage use of the Park & Ride by offering free parking and charging bus fare only and work with vix and lime to offer lower prices on the use of e-bikes & e-scooters.
an Oxford resident	daily	Disability benefit claimants, School students with special educational needs	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all		Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		Make your money another way. We are run by halt wits. Put lin filters and restrictions in North Oxford...oh wait, that where the rich live who run the city and would sue the council into bankruptcy if you tried it!!!!	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	It would mean I would potentially not be able to continue working at the local SEMH school, as I wouldn't be able to do school drop offs (Headington) and get back down to summertown for work on time.	The cause of the traffic are the private schools. Once they break up, the traffic runs far more freely. It's about penalising those who work and need to drive around.	Get a filter on the traffic lights on the Marston Ferry Road into summertown during the morning rush hour, that will help clear the road. The traffic on the Marston Ferry Road, isn't actually bad. It takes about 20 minutes to get from the JR to summertown at 8:00 in the morning. That for rush hour. isn't a stupid amount of travel time.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Reduce car parking costs	Very negative		This is legalised theft	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	This is extremely restrictive. The vast majority of workers in Oxford do not live in the centre of the city. They commute in from outside and have to fit family commitments around this. Charging them to even get to their place of work, because of a catastrophically run rail enslect zone wrong, is punitive and unfair.	Yes, I do. Why not fine Network Rail for its mismanagement of the railway bridge? Use that money to introduce proper cycle lanes and safety features, rather than punishing drivers.	Make the Banbury Road one direction and the Woodstock Road the other.
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	No impact	Very positive	Too high	Yes	Make Park & Ride parking cheaper		Negative	I will be charged to commute to work every day. I would park in a park and ride car park but the parking cost would still have a negative effect land wouldn't offset the inconvenience of cycling - car/cluarly in bad weather		
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Neutral	Neutral	About right	No	Make buses cheaper for all		Neutral			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Add public cycle parking		Very negative	The congestion charge will channel even more traffic down Woodstock and Banbury Rd - this is highly undesirable. In addition, as a long term resident, and council tax payer I'm fed up with being penalised, when travelling in my own city, whilst non-residents 'in any vehicle which is not a car' can travel freely - buses, vans, lorries etc. If you intend to cut congestion these vehicles should be included and reduced. In addition no effort is being made to put proper, safe, dedicated cycle lanes in place on Banbury and Woodstock roads. Cycling in Oxford is highly dangerous. I've cycled for 40 years but don't feel safe doing so in Oxford. In addition, traffic speeds on Banbury are not properly enforced, after the speed camera coming towards Summertown. Traffic is much too fast here. The junction at Marston Ferry Rd and Banbury is highly dangerous for pedestrians walking into Oxford - why is this not being addressed? Lastly, for cyclists, the surface of Banbury Rd is very very dangerous - ridded with holes and bumps. Why can't you address some of these fundamentals before this scheme?	The electrification of city buses is very welcome, but far too many buses remain which are not electrified - including tourist coaches. Why on earth are you not focusing on managing these very large dangerous vehicles better? Electrification should become mandatory, and charging to manage the number of large vehicles should be applied to coaches!	Surely it's time for a bipass to eliminate the congestion from the A40, A34 junction filtering everything around 2 roundabouts at the top of Woodstock and Banbury Roads? The volume of traffic through North Oxford, which is passing through, at these roundabouts is unsustainable. And isn't it time for a tramway into Oxford, from the northern quarter? Eliminate all the buses entirely?
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Add new bus routes		Very negative	You are killing shops and businesses in Oxford. The bus system is unreliable and park and ride costly.		Improve bus services and make park and ride shuttles free and more frequent
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all		Very negative	Awful. Can't believe you are thinking of getting public to pay for poor project management of the Botley roadworks The council should be holding these people accountable and not punishing travelers around Oxford You are making Oxford terrible Poor choice Lift up the Ib's in the city to keep traffic moving You are causing so many hottle necks and making being miserable	Shocking and disgusting Think again Think smarter around how to tackle the traffic Maybe incentivise people for using the bus or cycle instead of cars	Make it more attractive to use public transport Making it easy to travel Cycle lines and bus lanes are awful - look at the Woodstock road dor example like a rollercoaster going down there
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	About right	Yes	Make buses cheaper for all		No impact	I rarely, if ever, use my car to drive around central Oxford. Mainly because I try to minimise my carbon footprint as much as possible. I walk or go by bus. So I am very unlikely to drive through any of the areas where a congestion charge is proposed.	Anything that encourages people to stop driving their cars has my vote. Too many unnecessary journeys are made, causing our traffic problems.	I use the buses frequently as I have a senior bus pass. Lower bus fares may encourage people to use them more.
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Negative	Very positive	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses		Very negative	The cost of travelling into Oxford via train is too high (£22 per day) and the service is not reliable, myself my partner and my mother lift share into Oxford as we all live outside the area and we use an EV so I feel this should be exempt	Businesses will be impacted by the lack of people wanting to travel to Oxford and people will travel elsewhere. The city centre is full off derelict shops and this will only increase	Charge parents dropping off school children that live within walking distance of schools
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	There shouldn't be any congestion charge	There shouldn't be any congestion charge	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other		Very negative	Absolute joke.. we are taxed beyond belief for owning and driving and furling a car as it is and now you want our remaining coppers to impose more roads that we can't drive down even thought we are already paying for them in vehicle tax and fuel tax..you install bike lane but don't fix roads , take half existing roads and make them cycle or bus lanes.. I'm speechless at you insanity	Don't do it.. open up the capillary roads you have commandeered to allow the veins to run freely once more.. you had shut, narrowed and made driving so dangerous but let cyclists take over with no responsibilty and comeback with this insane road reve roads that we can't drive down and admit you've got it wrong.. But all these comments will be deleted and you'll just carry on regardless.. Goodbye to my once loved oxford.. I and here my whole 58 years, never has it been so badly run. Shame on you	put it back as it was.. it worked better
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Other	Don't run the scheme as other methods of transport simply doesn't get to my work at the time I need. I notice nothing at all on Lorrie's, tractors etc which cause congestion. Remove the LTN's to stop conestion.	Very negative	I have to use my car to drive into work. I feel that putting in the LTN's and enforcing this will simply push more cars into the main roads where Lorrie's, tractors need and will cause even more congestion. Doing this is even worse for the environment.	It's the worst idea I've heard! Why not put emission charges on these roads if you are genuinely concerned fir welfare and environment.	Remove the LTN's, only local drivers know these routes. Use emission charges rather than congestion charges, force Lorrie's - tractors and other large slow vehicles that always cause accidents to pay a premium charge to use the main roads in peak hours. 100% against the 'congestion charge'
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Neutral	I live in central Oxford near one of the proposed sites of bus gates and work at Oxford hospitals but do not own a car and already travel by bus, however occasionally need a car to help specific activities that are difficult by buses such as oncall duties out of hours for which I rely on friends/family. We should be allowed a visitor passes for these per year. In particular those that live near a proposed site and would have no option but to go a longer way round should have more passes and/or some other incentive such as discounted bus passes to get around	As above	School buses to reduce number of parents taking children to schools. When schools are on holiday traffic on hollow way is much better showing how much must be related to school journeys
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Unable to drop children at nursery and drive to work when unable to take bus due toong working hours that the bus do not cover.	Affects those with less money the most. Will kill Oxford shops	Buses too expensive Not frequent enough soecially those ooins to hosoital
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Add public cycle parking		Very negative			
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I have to commute to work by car because the bus service from my village into central Oxford is incompatible with my working hours. The route from my home to work does not pass through any park and ride. The introduction of the traffic filters and/or congestion charge will increase the cost for me to get to wok, and potentially increase the time taken to get to work as well.	As you pointed out, the Botley road is still closed. Therefore, there is an area in central Oxford that is not accessible without passing through the charging zone. This is totally against what you said about all areas in Oxford can be reached without pasting through the charging zone.	Reduce all the road works with temporary traffic lights that do not sync with actual traffic lights. The amount of ongoing work at different routes are causing so much congestions in and around Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	Too high	No	Other		Negative	It would prevent friends and family from visiting to check on me as I'm not getting any younger	I believe it is unnecessary and will cause massive congestion on the ring road	Prevent cars being used for school runs
an Oxford resident	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Unpaid carers, Frequent hosoital oatients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	Travel around Oxford is difficult with only a few roads in And out. This will increase traffic in certain routes where it is already bad		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Positive	Would speed up travel through the city		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Very negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	We live on Wytham street just off Abingdon Road, there is too much traffic already. We have a car, but I commute to Banbury by bike and train, it's more pleasant. However the quickest route is on Abingdon Road which can be solid with traffic, this makes cycling unpleasant as you have to filter through traffic, watch out for cars turning and constantly get squeezed by larger cars where the road narrows. I would say however less exemptions should be given. Charge the most polluting and damaging large cars and vehicles the most	Make it simple. Be brave, improve buses and active modes of transport. Encourage businesses by pedestrianising more of Oxford. Close queen street to busses, madness. Encourage cafe culture. Half half measures like broad street are ok but don't make the most of the potential.	More quick cycle routes for commuters. The quiet alternative routes are ok when you don't have to be somewhere, but there is a time penalty for this. Make Oxford a cycling city! Also screw Mogford, never driven to one of his restaurants and I won't be cycling to one now either!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	The fee is not high enough to stop people who can afford it paying daily and thus not reducing congestion. This will negatively impact people commuting to work every day who cannot afford to pay the charge but do not have a choice in how they get to work every day. The fact that traffic reduces drastically during school holidays shows that the majority of the problem is related to people driving their children to school, and these people will be able to easily afford the £5 fee and the problems will continue.		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No			Very negative	Traffic on the A40 and ring road is already poor. I expect the charges to encourage more people to use the ring road to avoid additional costs		Link the A40 into Oxford directly to the A34 to reduce traffic on the wolvercote roundabout
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all		Positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car			There should be no charges at all	No	Other		Very negative			
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Add new bus routes		Very negative	Controls . It's my home You shouldn't control how I move around my city	Don't do it If you do Watch the rest of the city die I'm so sad you think this is progress Think of the Oxford people and not the Visitors	Make buses free
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	REDACTED	REDACTED	REDACTED

Survey Response														
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all				Very negative	Absolutly ridiculous	Your causing traffic with the LTNS get rid of them too	Get rid of the LTNS
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	I feel that you are not being honest with the public. The current LTN's have move traffic from cowley rd to the boundary.. I think this will happen again. How are villagers going to cope? How will this improve shift workers. Do something radical. Be brave. Have you investisated trams? Make public transport free?	Fine network rail and Thames water for the delay. Charge them £5 for every car that passed one of the locations. I bet this would focus there mind and get the work completed faster.. are they working 24/7 on the botley rd bridge.. Make the commercial companies pay. not the public...	Tax breaks for cycling. Free public transport, pursued companies to promote WFH.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very negative	I live off Headley Way. Putting 2 congestion charge locations 1 Marston Ferry Rd and will force cars to use Marsh Lane and the London Rd causing more traffic jams and delays.2. Hollow Way this will cause more cars to use Horspath Driffway causing more congestion	Don't do it! Remove the LTNs! Get Oxford moving again!	Free P&R parking. More buses. One way Cowley Rd and One Way Iffley Rd. More Dedicated bus Lanes.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Need access to school	Add permits for parents	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent		Very negative	Oxford is an overrated city to live already. Don't make it any more miserable for residents who pay extortionate amount of taxes.	Whoever came up with this congestion charge idea, it is no good.	Bus charge - 10£ a journey for a family of 4 or nearly 5£ for single person. Public transport is not cheap or comfortable. We all know where the money is going. Don't try to fool public.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	Too high	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Very negative	I have to commute into central Oxford for work daily and due to health reasons and distance could not cycle. If I am not eligible for a permit - I would have to give up work. Buses do not travel often enough from my location and would add on an extra 1 hour plus either end to an already long 11 hour shift. This would cause health issues, stress issues and mental health issues.	Blocking all of the access routes into the centre of Oxford only caused build up on the main routes. Travelling takes longer, say in traffic for longer - cannot see how this helps the traffic issue.	Working people should also be included in permit allocation. We have to travel for work. Before individuals can cycle, they need safe places to leave bikes- safe secure places. Further charges in motorists will continue to smother the trades in Oxford. Eventually you will create a ghost town.
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders	I don't	Neutral	Neutral	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	As a blue badge car user I depend on parking g at the westgate . I need re assurance that all blue badge owners will not need to sav the charge . I can't use a bus walk from the bus etc would exhaust me.		Around Oxford , buses and better parking g further out of the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Disability benefit claimants,, School students with social educational needs	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Open the LTNs	Very negative	People are already struggling financially with rising costs everywhere, it's takes 2/3 times as long to get anywhere on bus, parents with multiple children with SEN cannot use public transportation, we have children to drop off to school, childminders, assortments. etc. Hospital asots. On too of extortionate rent within Oxford.	I think it's an absolute joke to be honest. You shut all the through roads which has caused horrendous traffic build up on Cowley Road, iffley road, and anywhere else when there's an incident or car crash, and now people must pay to get anywhere quicker.	What about people who don't have blue badges, or are trading. What about ordinary people who are struggling to get through each day and don't have a badge to show they're not ok!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Add public cycle parking, Other	Improve cycle lanes - focus on segregated lanes away from traffic and short routes that don't meander. Prioritise active travel, particularly at roundabouts and junctions. Worst roads for cycling are Banbury Road and the cutteslowe Wolvercote roundabouts	Negative	Though I personally rarely drive down these roads, so the charge won't affect me, the congestion moving elsewhere will. Marston Ferry Road helps to ease the congestion we see in Cuttlesbwe and through Summertown. This proposal will make everyone go along the A40, along Banbury Road, Woodstock Road or Sunderland Avenue, which are already full to bursting at rush hours and awfully polluted. Secondly Hythe Bridge Street needs to be thought through and not added until a future phase. The current transport links (buses and timings of Oxford parkway trains with onward trains at Oxford station) to the train station from the north of Oxford are poor. The cycle parking is also difficult there. So much cycle parking, but very few racks ever available. This needs to be fixed and Botley Road to be opened before Hythe Bridge street should close to cars.	More segregated bike lanes in North Oxford please! Paint is not protection.	Prioritise active travel. Make it easier to walk/cycle. Start by rethinking cutteslowe roundabout. The areas to wait to cross are inadequate. 3 lanes from Sunderland Avenue onto Cutteslowe roundabout are unnecessary and has pushed the space to stand and wait to be too small - only comfortable for one or two bikes, but there are often many people trying to cross and in each others' way. The lights prioritise traffic, not people, and the people have to inhale the fumes. Best thing would be to send traffic underground and make Sunderland Avenue a boulevard again, but understand this would be cost prohibiting.
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking, Other	Allow cars	Very negative	People might stop visiting city center which damage the business in the Oxford	Should not be any charge	Build more parking space
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Take park and ride free	Very negative	Oxford councils are killing Oxford, it's an absolutely embarrassment what they are doing, killing the businesses, making it difficult for people to get a round and ultimately your restricting free movement. If park and ride was free it would be different but you're too tight to do that. This is a money making scheme, instead of spending money on this truly atrocious scheme maybe spend the money on trying to fix botley road bridge sooner. How come china can build a bridge in 7 days yet we're struggling to do it in 3 years it's and embarrassment and you're an Embarrassment and you're making Oxford a laughing stock. No wonder everyone is moving away.	Don't do it. Awful idea and clearly whose ever idea this is lack common sense. I really do feel for all the businesses in Oxford because you really don't understand how you build and develop a successful city! Businesses are opening in other towns, they're just closing in Oxford.	Make park and ride free, actually be innovative and famous for something and maybe be the first town to make bus travel cheap, £1 a single. This scheme will not force people to use public transport it will just stop them visiting. Take this opportunity to be world leading with free park and ride or £1 bus fares! You say this won't work but surely it's cheaper to run a full bus with 20 People on it paying £1 then have 5 people Paying £3, do the maths. Come on Oxford, be famous, be innovative, you can do it if you put your mind to it! Don't fall into this dreadful trap and upset even more locals.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	For small business owners like myself, who rely on vehicular transport for operational efficiency—especially in the shipping and printing sector—these congestion charges would add an unnecessary financial burden. They may also deter customers from accessing services, reducing footfall and harming local commerce.	Yes, I would like to add that the proposal lacks transparency and meaningful community consultation. Temporary or not, introducing six congestion charge locations has significant implications for residents, businesses, and the overall accessibility of the city. There appears to be insufficient detail about how the revenue from these charges will be used, and no clear evidence that the proposed scheme will deliver proportionate environmental or traffic benefits compared to the economic and social disruption it will cause. Additionally, no adequate alternatives—such as improved public transport or subsidised delivery options for small businesses—have been proposed as part of this plan. I urge the Council to engage more directly with local business owners, families, and educators to design a truly balanced solution that addresses both sustainability goals and economic resilience. Oxford is a diverse and historic city, and any traffic or environmental policies must be designed to serve the entire community fairly and pragmatically.	major contributor to traffic congestion is the presence of large car parks in Westgate ! Why dont tpu close this down instead?! These encourage high volumes of incoming traffic and make the city a destination for can-based travel. Close this down. Rather than applying charges broadly to all vehicles, a smarter and fairer system would exempt Oxfordshire residents and instead apply charges only to visitors from outside the county. This would protect local communities who rely on vehicles for daily life and business operations, while still encouraging sustainable travel choices among tourists and commuters from other regions Any congestion-reducing measures must go hand-in-hand with support for small businesses that rely on deliveries and customer access by car. Oxford should be working toward a balanced solution that considers both environmental goals and the economic wellbeing of its community.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The scheme will massively increase traffic on the main routes in and out of Oxford, increasing commuting time. The bus route between Summertown and Marston is so infrequent that it cannot replace car travel. The overall effect of this proposal is to push people away from the city, with bad consequences for schools, shops, and businesses within Oxford. Discrimination against those who live outside the city but work within it is indefensible.		There used to be a direct bus from Islip to Oxford via Summertown, running twice each morning. Bring this back.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Just let people drive their cars. Remove LTN's to ease congestion	Very negative	It's absolutely ridiculous. It's controlling. Totally unnecessary & and charge that some people may not be able to afford. It makes no sense whatsoever. We pay enough in road tax so should be able to drive our cars where we like.	A huge majority of residents living locally said no to the LTN's but you ignored us. The roads are just more congested which in turn, means there's more pollution. You will just be adding to this even more.	Remove the LTN's Allow electric scooter
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No			Very negative	This will cut the city off from the areas surrounding it. It will also discourage visitors to the centre, with the attendant impact on local businesses. The Council appears indifferent to this and regrettably I have no confidence that the congestion charge will be stopped regardless of the level of opposition that will become apparent from the response to this consultation. That is a sad state of affairs.	Areas around the city (eg Kennington and Kidlington) need to be treated differently to the rest of Oxfordshire - and should be treated as part of the city.	Remove the LTNs and stop funnelling everything via the ring road.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers	I commute to the central permit area by car	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Positive	There should be no charges at all	Not sure			Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days ng your choice	I don't	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I have to travel across Oxford for work and to take my son to Sea Cadets and I don't feel safe driving on the ring road especially when it gets dark as it impacts my confidence and clear vision when having to use dark roads and at high speeds whereas driving through city streets I feel safe and confident due to street lighting, slower speeds and I can see well.	With all these extra restrictions already introduced and now proposing further restrictions is diabolical for the continued success of maintaining a vibrant and accessible city. In the 8 years I've lived here the city has gone down hill and ideas like this will make it even worse. The city doesn't have the transport infrastructure in place to make it viable and I hope this time you listen to residents and stop this idea of penalizing Oxford residents especially those who could afford this the least.	Stop trying to push everything to the ring roads and let people drive. Add more buses and bus lanes. Put in rail links to Cowley again. Get rid of the LTNs that are causing traffic jams on arterial roads.
an Oxford resident	daily	School students with special educational needs	I don't	No impact	Very positive	There should be no charges at all	Not sure	Add new bus routes		Very negative	We live in Marston and my SEN daughter goes to Cherwell. I currently drive her as she isn't able to get to school independently. Marston Ferry road is our route for many essentials Also, I am a member of the Ferry leisure centre and won't be able to go. Cycling is not an option unfortunately.	Pleased provide a frequent bus service from Marston Rd to Summer town/Cherwell. Also to Headington shops. And a more frequent service to city center. After public transcortation runs smoothly vou can charge people for driving.	Better public transportation. More frequent and more routes.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't do the congestion charge!!	Very negative	With all the LTN's, bus gates etc you are making so hard to visit family, friends, going to appointments, going to hospital, it's an absolute Joke of a city	Absolute worst idea EVER!	Take out the LTN's!! You are pushing everything onto the ring road causing even more congestion!!
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Other	None of the above. Don't impose even more restrictions on traffic!	Very negative	This scheme will make congestion even worse than it is currently. Stop meddling and prioritise services that help not hinder		Stop all of the restrictions and remove the LTNs that no one asked for.
a resident of Oxfordshire living outside Oxford	weekly	Frequent hospital patients, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Clearly none of you live in areas that make it difficult to manage without a car	Very negative	There are far more important issues than making it harder for businesses to be a success by encouraging customers to shop elsewhere.	This entire idea is totally anti-democratic, nobody within the entire county has ever been given the opportunity for a full referendum if any plans should be tested or implemented.	Stop making traffic problems by some of the junctions incredibly slow and removing road space for cars. Clearly none of you have ever been in any sort of business, that without their taxes and employment the council would have no money. Talk about blino the hand that feeds.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		If you want less traffic in the city get rid of the LTN'S!!!	GET GET IF THE LTNS!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Not sure	Make buses cheaper for all, Add public cycle parking, Other	More protected cycle lanes	Very positive	As an Oxford resident, I'm believe that the city center should be carless. Any changes in that direction are positive ones.		Reliable buses and cycle lanes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	The introduction of LTN's in Oxford, has caused unprecedented traffic delays. Stationery vehicles are visible everywhere, on all routes with engines running, buses and emergency service vehicles are unable to achieve there destination in a reasonable time. For any vehicle of any description to try and get to there intended destination, now takes you on an absurd long route. Therefore, all vehicles will now travel several times the distance and consume more fuel, release more fumes. I have spoken to many hundred people on this matter, I have found one person who thought it was a good idea, everyone else is against this ludicrous idea! The concept to make everyone drive for longer, drive further and create huge congestion everywhere is not good for the planet!!	I think it is ludicrous to add to the misery that this council has inflicted on the residents of Oxford.	Remove the LTN's
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other		Very negative			
a resident of Oxfordshire living outside Oxford	weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	Getting into Oxford is difficult enough as it is without being charged for the "privilege", the whole thing being driven by the total incompetence of the Botley Road/ Oxford Statiuon nonsense	NO. But it's a abad idea. Delenda est carthago	No
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Reopen the REDACTED Botley road closure ASAP. Do not do anything stupid anymore. You are all REDACTED useless, REDACTEDand irresponsible.	Very negative	No more stupid action.You are all REDACTEDuseless, REDACTED and irresponsible. Just focus on reopening the Botley Road closure!!!!!!	No more stupid action.You are all REDACTEDuseless, REDACTEDand irresponsible. Just focus on reopening the Botley Road closure!!!!!!	No more stupid action.You are all REDACTEDuseless, REDACTEDand irresponsible. Just focus on reopening the Botley Road closure!!!!!!
a resident of Oxfordshire living outside Oxford	less than weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper		Very negative	Oxford is becoming an impossible place to visit, we used to live in central Oxford and love the city but the current council seem to be doing everything they can to stop you going into Oxford. My mums house has been cut off by bus gate restrictions which means I can't get anywhere near her to visit or take her out. Oxford is now a place that car drivers do not visit, tourism will really suffer and many like us, despite comms from Oxford do not now visit the city. Very sad!		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Stop clogging up the ring road with displaced traffic and making a 15 minute journey in to 30 or 40 minute journey.	Very negative	I don't go into the City Centre if I can help it, but I do have to use the ring road on a daily basis. This is just going to make getting around or out of Oxford even slower and the ring road will be more congested and polluted. I feel sorry for family and friends living close to the ring road.	It's a very bad idea.	Keep cyclists out of bus lanes. Where so much money has been spent on cycle lanes, make them compulsory for cyclists to use. I frequently see buses held up by one cyclist in the bus lane because they want to go faster than the other three that are safely usina the cycle lane. but they can't do as fast as the bus needs to travel to stay on schedule.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Extend hours of operation for buses, Add public cycle parking, Other	Reopen the LTNs thereby allowing vehicles to cross the city and unclogging the blocked up arterial roads (caused by the LTNs)	Very negative	These proposals do not represent the people of Oxford and hit the lowest paid the hardest. The supposedly utopian changes that these measures are trying to effect are not for the current people of Oxford but for some other future city population make up.		Cambridge herb would improve matters for cyclists. I cannot see how buses running faster is good for cycling and pedestrian safetv.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	There is already ample bus network integration in Oxford. This scheme as a 'temporary fix' only masks the inefficient operating of these buses. Traffic through Oxford is hampered enough by constant roadworks and delays to already started work. It also (like other cities) has the potential to remain in use after the works are completed, which will also make it less and less feasible to travel into Oxford (which will choke the local economy). £5 per day is ludicrous for anyone who works in or around Oxford. The value of sustaining local businesses by not impose this charge and just forcing the transport department to spend better is the most cost effective long term solution		Make use of the already constructed park and rides that aren't in use. Build better connecting roads to the A34 and M40 to stop traffic being throttled into 2/3 places around the exterior of Oxford. Make train journeys more accessible with faster direct connections to places like London and Birmingham from Oxford Parkway station, to make wider commutes more viable from the areas around Oxford itself
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Positive	I would expect this to reduce congestion on the woodstock road and wolvercote roundabout I rarely drive into central oxford, but do drive from wolvercote to the ring roadleyresham, so wolvercote roundabout can be a choke point. I think the current costs for buses are too high - with 2-4 people travelling, the bus is expensive enough that I am incentivised to use the car to ao to cnetral oxford. becomina part of the problem.	the pitching of your survey is odd. tell people much earlier that they will have 100 free passes, and i expect support will be stronger!	improved cycle lanes into oxford along woodstock road, and outward along a40 more frequent and cheaper buses
an Oxford resident	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I believe it's unnecessary and wrong to charge residents to move around their own city. There must be another way		

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	less than weekly	Unpaid carers	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral	I am a carer	I don't agree with the charges. Parking charges in Oxford are already too high and this would add to the problem	Remove the LTNs to improve traffic flow.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make bus services more frequent		Very negative	On accident on the ring road and Oxford gridlock and money rolling in	Why build a mult story car park in the middle of town if you don't want cars in it. Then build a park and ride that you can't park in	Your not going to isten.
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very positive	I am enjoying using the new buses and routes but feel that they would be quicker and more reliable without so many cars in Central Oxford. Air quality is also important to me	I am pleased to see attempts to try to improve the city. There is no magic solution to manage traffic but I feel that at least attempts are being made to prevent Oxford becoming one huge traffic jam/ car park.	Continuing to provide bus routes that are more direct and go around as well as into the city. Some routes go a roundabout way to get where you want to be. Simplify tickets to make boarding quicker.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative		There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The bus route from Headington to the Oxford Business Park in Cowley takes 50 mins because it goes all around the houses. As bus routes from Headington Quarry were discontinued over 30 years ago, this means the nearest bus stop is a good 10 to 15 minutes walk away and from The Swan, it is the same to the Business Park. Also, because of the trend since Covid to downsize office space and hotdesking, I would need to carry all of my work paraphernalia including my laptop on the bus. The journey currently takes 10 to 15 minutes in my car but if all traffic is pushed onto the ring road because of the congestion charge on Hollow Way, the journey will double.	I pay to park outside my house, I pay road tax and now I have to pay to go to work. This is nothing to do with the environment or traffic easing - it's just pure greed which will see the end of a lot of businesses in those areas of Oxford. Also, firms like the one I work for will not be able to recruit new talent, as I would think twice about working somewhere where I either have to pay to drive to or be stuck on the ring road. Science labs are being built all around this area but they will probably end up empty, like so much of the Business Park.	Better and increased routes, reduced prices and remove the LTNs
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	I think it will reduce congestion and therefore improve bus services.	I support the scheme because something must be done. There is a view that congestion would be reduced if the LTNs were removed. You presumably have data about the effect of LTNs on conestion - such data should be publicised better.	I support the scheme because something must be done, however I would have preferred a congestion charge for the whole of Oxford.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It will result in me not coming into Oxford unless I have to for work. I will shop elsewhere, Witney and Bicester are far more accessible than Oxford for car drivers.	I think overall the County Council have made an absolute mess of Oxford. I was born, bred and once proud to say I lived in Oxford but no more, I have moved out of the City having lived there for more than 50 years and avoid travelling back in as far as I possibly can. utilising Kidlington, Bicester, Witney and Banbury for shoosing and leisure.	Provide better school transport as much of the traffic issues are around school times and are much alleviated in school holidays.
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for young people		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	this is being introduced into residential areas, what if one day I need to be dropped home by a friend and then they are charged for it?	it's a free country no one should have to pray for driving in free space especially popular ones.	Instead lower bus prices instead of constantly increasing them and improve the routes
a member of the public living outside Oxfordshire	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Given the already heavy financial burden on car drivers, this is absurd. For sake: excise duty, road tax, MOT expense , insurance and now the government is piling on with congestion charges and ULEZ. It's hard to imagine how many more on the list. STOP.	Very negative	Given the already heavy financial burden on car drivers, this is absurd. Just think about it: excise duty, road tax, annual MOT requirements, insurance---and now the government is piling on with congestion charges and ULEZ. It's hard to imagine how many more taxes might be on the horizon. It is stressful to earn extra to pay new charges here and there. People start stopping kids activities then other less important but stress relief activities. Car is basic need for working class people. So please don't introduce new burden.		Yes. Inspire local offices and business to set outside of Oxford. Give them grant or other benefits. So commuting people will not travel inside.
a resident of Oxfordshire living outside Oxford	weekly	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	Id likely forget- and end up being fined. We pay road tax as it is. Enough	Open up the LTN roads	Stop killing businesses. Open up LTN roads Get on with Botley Road works.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	You haven't provided a map which clearly shows the congestion charge area. I come into Oxford for shopping and sightseeing and usually park in The Westgate Centre. I don't know the names of all the streets I drive along to get there, so your naming streets is useless to me. You don't mention whether those wishing to drive to the Westgate Centre would have to pay the charge but I strongly suspect they would. This is disingenuous of you. The Westgate was designed to be driven to by those living outside Oxford so I do not believe you should be charging people to drive there. You should be fining Network Rail for their wholesale failure to deliver their upgrade on time.	You will put people off coming into Oxford for shopping or sightseeing with this charge. What will happen if I drive in and don't realise I have passed into the zone or forget to pay. Will I face a fine? I have in the past tried to use the park and ride system but it is totally overpriced and the buses are too in frequent. The bus stops are also not in convenient locations and are confusing. I therefore gave up using them. If you want to get people out of their cars you need to make it easier for them and free.	See above. Drastically improve your park and ride system and make it free to use.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	My son's nursery is on Marston Ferry Road and we often need to use the car to take him to and from nursery as he is young and finds the walk tough. We also have a newborn baby who is too young put on the back of the bike. This will increase already expensive childcare costs. There should be an exclusion for parents of very young children who cannot always walk or cycle even with the best intention. There are no buses that would assist with the journey and in any case, the buses are very expensive to do two return journeys for drop off and pick up.		More bus routes serving pinch points at busy times. There are lots of journeys that could easily be done by bus but there are no routes serving them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative	The conversation charge and the traffic filters make it incredibly difficult for workers to commute into Oxford. This will also have a negative impact for hospitality and retail businesses in there area as it will drive people out of the city		
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I don't drive into Oxford often, so would benefit from having lower traffic and easier bus routes into the city when I do go in.	Ensuring that the cost is for a day pass because it is very easy to pass multiple filters in a single day. Also perhaps only have the traffic filters active during peak hours (i.e. 7am to 10am and 4pm to 7pm)	Reduce bus prices to make it comparable to driving.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	As a popular tourist town Oxford should be more welcoming to car users. However much you wish it was true most people will visit by car and if you make it difficult tourist won't come and Oxford will become insignificant.	What do you mean by temporary, 3 months, 6 months, a year ? We need to have some idea of time scales	
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It's a joke	We pay enough taxes etc	Make publick transport ALOT cheaper
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Add new bus routes		Very negative	We live in a village with no bus service. Adding a congestion charge will make travelling to Oxford prohibitively expensive. For us to drive to the park and ride takes substantially longer and is more expensive than simply driving where we need to go.	They will further damage local businesses.	Allow traffic to move through the path of least resistance. In other words, remove the LTNs that are forcing vehicles to move through a limited number of routes.
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative	It's a further barrier to be able To access the city where I live to visit friend and to help people my friends already can't cope with the residential parking permit systems let alone more and to be honest it really feels so unfair and another reason why the council seems to be ounishina ordinary people.	Please please please don't do this to us. Life is hard enough already	Tax tourists instead and make tourists pay more To Visit Oxford by car
an Oxford resident	daily	Registered car clubs	I don't	Neutral	Neutral	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	Any reduction in traffic congestion is welcomed by cylists like me and this will only be accomplished by detering motorists which this small charge may achieve.	I think it is a great idea considering the agreed traffic filters are on hold, it will hopefully encourage motorists to find more appropriate ways to get about in preperation for the bus gates etc.	Many motorists seem totally oblivious to the fact that they are a major problem, congestion is not new to Oxford yet it seems more and more drivers participate in the daily congestion and in bigger and bigger vehicles which puts many people off cycling or walking and makes the busses unreliable. It is time to stop trying to 'nudge' them and start taking some real action such as pedestrianising the town centre and creating LTNs in all rat runs - Quarry Hollow is long overdue for relief from the selfish commuters.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent		Very negative	It will cause so much trouble a the Westgate centre and Oxford city centre shops will be closed due to reduced footfall.	Just impose in rush hours times so everyone can otherwise not be impacted . Ridiculous to impose in quiet times in the days	Yes smaller more frequent electric buses - no scooters which are dangerous and get in the way.
an Oxford resident	daily	Registered car clubs	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	About right	Yes	Make buses cheaper for all, Other	Better facilities to improve safe cycling and walking in the city	Positive	I think this may improve outdid with traffic in the city at least a little. In still concerned that drivers will be tempted to use our street as rat run (Dene Rd, OX3 7EQ) and Mary continue speeding - I am worried about accidents as the road goes round the corner outside no. 101/103/105 Dene Rd.	Please do everything you can to lessen motor traffic in the city and encourage safe cycling and walking. Thank you very much.	More traffic calming measures and speed cameras, reducing/ banking pavement parking, financial incentives to persuade people to make healthier and safer choices.
a resident of Oxfordshire living outside Oxford	daily	Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Extend hours of operation for buses		Very negative	OCC = anti car leftiesl You have just sealed the fate of many businesses! Well Done! AND made recruitment and retention at the JR even harder! Good Luck in the next pandemic with no staff. Pricks!		A decent free bus service that runs when people need it. In fact don't bother, most of us from outside the actual city of Oxford don't bother going in to the city unless it's for work, these proposals make it VERY unattractive to go in to Oxford for theatre, eating out, cinema or shopping.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		No impact	People will just route around the charged roads, causing rat runs. You shouldn't fund a project on the commission you think it's going to raise especially if the point is to reduce vehicles. It's a lose lose then; no vehicles, no revenue.	There shouldn't be any additional charges while the town is vit on two with the Botley rail works. Business are already suffering as well as people who can't make it from one side of town to the other. It's an abysmal delay and you're making the public pay for it in more ways than one.	More park and ride locations with proper bus routes. The new parks and ride at Eynsham is empty and unconnected. That could seriously improve the a40. Increase routes; there's not a bus from Witney to the hospitals, you need to change and it takes hours when the drive is 30mins.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Negative			
a member of the public living outside Oxfordshire	less than weekly		I don't	Very negative	Very negative	Too low	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Positive	A good start but not applying to vans and other vehicles, and the ridiculous number of free permits will hobble the scheme and it's potentially benefits. The scheme should cost the minimum of a return bus fare with no exceptions. Where are the 100 free tickets for bus users??	Get it done but don't be wimps. Scrap the free permits and charge all motor vehicles for passing.	Workplace parking levy. Reduce parking availability and improve cycle lane and facilities.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	It's very obvious during any school holiday that the issue is primarily related to school drop offs and so more should be done about this. As well as removing the ridiculous LTNs in the Cowley and Littlemore areas as these have caused significant traffic issues	It's very obvious during any school holiday that the issue is primarily related to school drop offs and so more should be done about this. As well as removing the ridiculous LTNs in the Cowley and Littlemore areas as these have caused significant traffic issues It is useless. Traffic jam is not because many cars. It is because your road and traffic lights design problem. The bus lane design is stupid and waste the road use. The bus services is expensive, not reliable and not frequent.	It's very obvious during any school holiday that the issue is primarily related to school drop offs and so more should be done about this. As well as removing the ridiculous LTNs in the Cowley and Littlemore areas as these have caused significant traffic issues You should build Underground Railroad and develop new road to connect the A34
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I need to use car to take my daughter to school in Oxford centre. I need go through centre every day.		
an Oxford resident	daily		I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Other	Get rid of ltn	Very negative	Extremely hard to get to work and rowing, i work as a doctor in the jr and churchill hospital	Do not implement them, get rid of ltn	Get rid of ltns and do not implement this traffic filter.
a resident of Oxfordshire living outside Oxford	less than weekly	Personal cars used as goods vehicles for business purposes	I don't	No impact	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Negative	Although i understand the requirement for this the occasional visit to oxford would be made a bit more awkward as i am unlikely to use my motorbike		
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Other	Improve road condition and connection	Very negative	This doesn't solve the fundamental issue of road connecting in and around Oxford isn't keeping up with Morden standards. Congestion charges won't stop traffic and worst of all would cause the traffic to build up on the outskirts/ring road.		There are too many bus operators and bad connections and frequencies in some areas outside of ring road. Having empty buses is even worse. Oxford is such a vibrant city, hence the increase number of visitors. Reducing traffic is not the right train of thought, Oxford council should be thinking how to optimise the flow of traffic to reduce standing traffic.
a business	daily	Business cars used as goods vehicles	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	Too high	No	Make buses cheaper for all		Very negative	That happens is it just diverts traffic to different route. So no overall benefit.	Why have you not included the Woodstock and Banbury road in this scheme. Don't want to upset the wrong people. Something does not smell right to me.	Unfortunately I don't have a magic wand. But the traffic is noticeably reduced when the private schools are on holiday. I feel the drivers going to all these private schools has a massive effect on traffic in Oxford. Have areas on the outskirts of Oxford where parents can drop their children off that attend these schools. They can then get on dedicated buses to their appropriate school. Ban these drivers from comina in to Oxford.
a member of the public living outside Oxfordshire	weekly		I don't	Negative	Negative	There should be no charges at all	No	Other		Very negative	I live in Long Compton Warwickshire just 1 mile from the Oxfordshire border. We have been under the Chipping Norton Health Centre for 27 years. My husband has a life limiting illness and is being treated at the Nuffield Orthopedic Hospital. These charges will make a huge impact on our finances when he goes to the NOH for his essential and life saving treatment		
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper		Very negative	I use the locations as my job as a childminder to take the children around Oxford to shops on Botley Road for example I cannot take 6 children on the bus or on a bike So for me it's ridiculous Also how do you expect pensioners to cope with this !!!!!	Stupid money grabbing scheme for selfish people who have not thought about the general public The Woodstock road is already ruined and an accident waiting to happen More money for the Council!!! Everything is done for bikes I have been walking with children and nearly mowed down by bikes who don't seem to have bells any more Too much given to bikes	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	We live in a village outside of Oxford but travel regularly into oxford for shopping, eating and meeting friends. We try and use the P&R but find the service expensive, unreliable and when travelling alone not safe. We want to shop locally but having to pay a congestion charge on top of parking we would prefer to travel to Milton Keynes. The council are penalising residents and visitors to the city because of the incompetence of the council and network rail for the extended closure of the Botley Road. You should be doing everything possible to encourage visitors/residents to the city not discourage.		Free park & ride parking, regular buses that run frequently and longer hours. Stop tourist buses parking in St Giles. Make St Giles parking cheaper to stop cars trying to get to the Westgate.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	I live close to central Oxford, but I do not own a car. My main concern is for my elderly parents (80+ years old), who drive a car to Oxford when they want to visit me.		Make Park & Ride as frictionless as possible.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I work in Oxford. I cannot afford to live in Oxford. Those who get permits are the wealthy who can afford to live in Oxford. How is this fair? You are making workers in Oxford even more difficult for the ones who have to do it	Buses need to run west to north and with the Botley road closed, need to run from west to north to centre. Stopping so far away from the city centre on the Botley road is not acceptable	Please just leave cars alone. It's hard enough already to make a living without it being made even harder to get into Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The charges apply equally regardless of income, disproportionately affecting lower-income drivers who may not have flexible work hours or alternative transportation. Shoppers may avoid areas with congestion charges, impacting local retail and services. Drivers may reroute to avoid charged areas, leading to increased traffic, pollution, and road wear in surrounding neighbourhoods. Some people may simply pay the fee without changing driving habits, reducing the policy's effectiveness over time.	Negative impacts are clearly outweighing the benefits. The person who suggests should step down.	Remove LTNs
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	We are congested because of the LTNs and allowing parking on the main roads, especially cowley area. Remove that first, and then let's talk about charges. Also there should be no charges for electric cars.		remove parking on cowley roads and don't allow road services during the day or during school holidays.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent, Add public cycle parking, Other	Improve cycle paths	Very negative	The proposed charging scheme limits our access to our city. It's already expensive enough to live here without your thoughtless plans. The cycle paths are mostly terrible and dangerous. There is inadequate enforcement of existing road regulations. For example, the extensive use of cycle paths by electric bikes at high speed. The 20mph speed limit is a good rule, but useless as it's not enforced.	I strongly opposed these new measures. I will exercise my democratic right to elect officials who did not support these terrible LTNs and congestion charges.	Improve cycle routes in Oxford and to all the local villages. Allow free use of vehicles after 6pm with free parking. Give us back our city!!!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	There are no direct buses to Westgate start from one which that's 90 minutes from Wantage. You have to get out and walk from osney. So we drive and park in Westgate. The traffic is usually fine. If we are going as a family, it is cheaper and more convenient than park and ride and paying for 4 people to use the bus. If you want to reduce traffic, you have to make bus travel super convenient and very frequent. For example there should be an express service to the JR from every Oxfordshire town.	Just seems like a way for the council to make more money, not to help residents.	Increase buses first rather than penalizing people first.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Other	Lower council tax	Very negative	Any congestion charge will further destroy shopping in Oxford. Local traders and restaurants will see less footfall. This will lead to yet more empty shops and a sense that the high street is a place for vape, nail and barber shops - resulting in less jobs, worse pay and an increase in the general degradation of Oxford and inevitably you will charge residents - like you do for parking outside their homes.	Just don't do it. The restrictions on driving are so bad because of the terrible changes to traffic flow already out in place between Iffley, Cowley and Headington roads. This feels like yet another money grabbing scheme like parking. Disgraceful and must surely be revenue losing as no one parks in Oxford now as the prices are so extreme.	Remove the traffic filters in Cowley.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Other	improve cycling facilities (protected lanes, shortcuts, parking, communal ooms/tools ...)	Very positive		Improve the communication around the scheme. Focus on the positives.	Help businesses and shops make use of the empty units within the city. This way, there is less need for people to travel long distances.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	Negative	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I lives one of the charged areas, it's very difficult and expensive if u charge for travel	No	promote public transport system ,and put more buses on time
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative			

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the roads you have already . Not put money into private owned companies	Very negative	Cost of living. Total restriction of mourret. Motorists already pay to use the roads . The restrictions are all placed on one side of the city . Traffic will vastly increase on the last remaining routes into the city	The council will not take any notice of the opinions of residence as the vast majority of councilors don't live or work in Oxford	Open up all the road network to motorists there by speading congestion out. Target schools as when the schools have broken up for holidays, then congestion in Oxford becomes virtually none existent
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Neutral	There should be no charges at all	No	Other	Make park and ride parking FREE	Very negative	I feel that those who can afford the charge will just pay it and have no impact at all, continue to drive their children to the private schools etc and those of us without access to wealth and privilege for example NHS and other public sector staff who have been subjected to real terms pay cuts for 14 years and cost of living crisis will be forced into sitting in worsening traffic on the ring road and avoiding the congestion charge . The administrative burden of healthcare workers having a permit has also not been fully considered	I think this is a wholly bad idea	Make safe cycling routes which are segregated and lit up so safe for women Don't close the towpath for months at a time so people can cycle and walk Make the buses free Open the Botley Road so Botley residents can actually use the bus
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all		Negative	I live on horspath road and I work 25 miles out of the city.I turn right onto Holloway to get on eastern bypass,once my passes are used up I would then have to turn left onto Holloway and make my journey much longer and stressful,my work time changes so I will have no choice,personally I believe Oxford residents should be exempted from charge,especially residents that live one of the 6 roads .we cav enough council tax to justify this...	Please exempt anyone living on 1 of the proposed routes	How about opening all LTNs on a trail basis to ease congestion
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very negative	I will no longer shop in central Oxford. I work at a school in West Oxford and this will cause recruitment and retention issues at our school for teaching and support staff.	The traffic problems in Oxford have been caused by the establishment of the LTNs. The proposals will simply divert more cars along fewer roads and make people's commute even longer. The Oxford ring road will become clogged. Footfall to shops and amenities in the city centre will diminish and more shops will close. My husband needs to attend the John Radcliffe Hospital as a patient and his journey from East Oxford will become even more fraught (he would need to cqtch two buses and walk half a mile to get there by public transport). Since the inception of the LTNs my daily cycle commute from East Oxford to West Oxford has become more dangerous (e-scooters, bikes and vehicles all vying for the same space on the Iffley Road; buses, ambulances and heavy goods vehicles in particular encroach the cycle lane on the Iffley Road because the road simply isn't wide enough for two traffic lanes and two cycle lanes; the air is foul to breathe when vehicles are stationary).	Remove the LTNs. Our current bus service number 3 ends at Westgate. We don't have a service that connects us directly to other parts of Oxford eg Headington, for the hospitals, the train station, bus station, West Oxford, Summertown. The lower deck of buses could be redesigned with less seating and more standing room / open space to increase provision for travellers using wheelchairs or pushchairs.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Neutral	Very positive	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Add public cycle parking		Neutral	I work in properties of people marketing their homes and have no fixed route but often travel and need to park in the proposed areas. Provided I am able to travel into these areas free of charge the reduction in traffic would be positive.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Negative	I will be cut off from other parts of the city	Residents should get more than 100 free days. Or just not do it but have an emmison zone instead	I would prefer a city wide emmosions zone (similar to London). Only electric cars being completely free. This would reduce traffic but still make it possible to get around. You are disproportionately effecting residents who will have to go out and round the ring road to come back in. It will also create bottle necks like heedley way where there is just 1 stream of traffic
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or cares workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			Discourage car use by extending bus services and making bus journeys cheaper
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Other	Make the roads better. The A40 desperately needs to be a dual carriageway the whole way from Witney to green round roundabout. There needs to be a direct A40/A34 link. You need to scrap the awful bus lanes around wolvercote roundabout.	Very negative	It's just another tax so you can use the money to make Oxfordshire even worse to live in. Just realise we're in the middle of the country with key road routes that people need to use cars on.	Don't do it.	Improve the rest of the roads. Look at how much money is being spent on the A417 missing link, a major project to improve A40 and A34 would improve Oxford no end. Who actually wants to get a bus with all their shopping? Especially when it's shared with uni students?
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Sort out Park & Ride to be safe for lone travellers particularly older women. Currently I do not feel it is a safe, comfortable form of travel even in daylight.	Very negative	No clear understanding how commuters from north Oxfordshire can travel to Oxford. This will affect businesses and shopping in the city centre. I do not feel safe or comfortable on public transport in the winter, with dark, wet and cold days. I would limit comimo to Oxford for entertainment. oleasure or work.	The council are using this as a money making scheme. It does not aid charities, museums or business within the city centre. No safety concerns have been taken into consideration for women, lone workers or children.	Sort out the dual routes and carriers. Make the buses better to use. Make them safer.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	Due to the botley road closure, we can't use the park and ride so we have to drive to get to west gate shopping centre. Now we have to pay £5 before we even get to the car park and then we have to pay for parking which is expensive as it is. Plus we like to watch the Oxford stars so now we have to pay £5 before we even get to the ice rink so now this will put us off going g ice hockey every week as we can't afford to go which means Oxford will loose there ice hockey team	I understand the need to some form of charge. The charge should start after the entrance to the west gate shopping centre car park and ice rink to keep people coming to the shopping centre and to come and support their local teams. With the charge this will drive people away as you have now other valid means to get people to those locations with ease	Review your internal processes when it comes to proposed works as the general public knew the botley road closure would be extended even before the work began so those processes needs to be addressed for any future projects as your decisions have ended many business and your future congestion charges are going to end even more businesses
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't	Neutral	Negative	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I live in St Clements and the traffic has got appalling. I hope it will make it a bit more reasonable. 100 passes is plenty for us to do our occasional trips to The Plain to go up Iffley road and out to the ring road. My husband's business may qualify as a personal car used for goods transport but actually we may only need 100 passes total to account for that.	Just that the bus gate idea seems neater but I think this is a good alternative for now.	I gave lots of responses to the Oxford Brookes study funded by the Rees Jeffreys Road Fund - it's a good report, out now.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	Too low	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Positive	I hope it will encourage people to use their car less.	There are too many exceptions and too many passes, more restrictions and fewer passes would be better.	Remove car parking from city centre (e.g. St Giles, Worcester St car). Work with private schools to ensure less car use at these schools. Westgate shopping centre generates a bit of traffic, reduce the parking there. Ensure busses are cheaper than driving. Ideally invest in other transport such as light trams (see e.g. Coventry or Liverpool). More investment in active travel / less or no investment in road buildins.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Neutral	There should be no charges at all	No	Make buses cheaper for all		Negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent, Add public cycle parking		Negative	I am less like to go to Oxford as a result of the proposed scheme.	Oxford is not big enough to have a congestion charge zone. The area covered is very small. It will be easy to avoid the charge by taking alternative route into the city centre and there will be pressure to park on streets just outside of the charge zone.	Improve traffic flows around the Ring Road. Make buses and Park & Ride parking cheaper and make buses more frequent.
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	Having this scheme will only make me no longer visit my relatives, regardless of me having a disabled badge.		Could start by all members of the council to use the bus.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't			There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses		Very negative	We live just 4 miles from Oxford city centre and we usually go to the mosque weekly in east Oxford as well as do our weekly food shopping from Cowley rd because we don't have these facilities where we live. This change will impact us really neoatively as we will need to take two buses to get to east Oxford in order to avoid the charge.	If you live in the north of the city (Kidlington, Yarnton) and you need to travel to the east of the city, buses are neither convenient nor well connected, no matter how much you reduce traffic. For those who need to buy halal food, there is no alternative as there is verv little orovision of halal food shops in the north side of Oxford.	Provide cheap bus tickets. It costs 4.80 for a return ticket. That's a lot of money and it's cheaper to take the car and pay parking fees. Especially when the whole family goes out together.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make buses cheaper for all		Very negative	It's a stupid idea		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Other	Use it to lower the car park charges	Negative	As a person of pension age I already find it difficult carrying heavy shopping but this is made easier if I can drive and carry it to the car. to have to carry it around the city and then to a bus is unacceptable	We have tried since Covid to try to use local businesses rather than online shopping but this charge will effectively stop us from usina the city centre. is this what Oxford City council want?	Leave the roads alone, so far the council's recent decisions have made congestion worse
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	Not sure	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative			
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	just another con to extract more moneyfrom motorists	will just cause more disruptionto the ordinary motorist, but the same as ltns this will go ahead regardless off this survey frace	dont have these gates and remove the ltns
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	Too high	No	Make buses cheaper for all		Positive	I'll be alright Jack!	But it will be another nail in the coffin for Oxford as a Town with regard to shops & businesses. Cars are necessary for ease of life, carrying more shopping, giving lifts. The elderly & those not fit & don't qualify for blue badge will again be disadvantaged. Too much admin involved & will most likely be problematic. Council tax & road tax is already paid for the upkeep & use of these roads. So less Town & more Gown takina over.	Cancel big social events. Cancel all events that close the centre of Oxford (except Remembrance Day) All fun runs (& like) should be done off road & in the large Oxford parks or on running tracks. Any other place but central Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Other	Improve road surface quality and potholes	Very negative	We will be charged every time we take children to school or nursery, there is no alternative.	Ring road is at the limit now. It will be heavily congested when this is implemented. It will be a much better improvement to remove roundabouts and traffic lights from the rina road so the capacity is increased.	Close inner city centre to all cars.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	I live on the Abingdon Road and we are gridlocked most of the time, terrible for fumes and pollution	please bring this in	LTNs are slowing buses round st Clements, buses should be allowed to use the short cuts
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	No	Other	As a female travelling alone in the evening I do not feel safe using the Park and Ride bus.	Very negative	As a Kennington resident only a few miles outside Oxford I am only entitled to 25 passes. I have an elderly parent who is unable to use buses due to mobility. This scheme is biased to areas where councillors live. The bus service is too unreliable. Since the introduction of LTNs, movement around Oxford is congested and not working. There are times when people are forced to drive for a variety of reasons, e.g., parents dropping children off at school and then needing to get to work. You have no consideration to what the majority of residents need in Oxford and it feels that any 'consultation' is already a 'done deal'.		Take out the LTNs.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	We visit my family minimum once a week and 25 passes isn't going to cover it. How dare you charge families to see each other. We are in a cost of living crisis without this extra REDACTED.	Temporary?!? Yeah we all know what Temporary means in Oxford. Botley closure was Temporary. I don't trust you to make it Temporary.	Cheap, frequent buses the serve throughout Oxfordshire. One £3 charge to use on all buses. If we wanted to visit the family I'd have to get 2 buses so that's £12 there and back for one of us let alone the rest.
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent		Very negative	As a regular hospital patient sometimes my appointments are 8.30 am or could be after 3pm depending on times for treatment or dr appointments this would then hit me for congestion charge times Also I work for a company having to visit colleges in Oxford this again will hit me travelling into the enter of Oxford this can be two or 3 times a week depending on appointments and commitments to businesses	You have driven traffic away from Botley Road for years now you want to penalise CARS! Once that is over for visiting Oxford. Why is North Oxford not on any of these proposed routes? Why are vans, motorbikes, mini buses, work vehicles or lorries not going to be charged? The LTNs caused congestion in other roads that took traffic away to quieten the lm streets down making more pollution and congestion for the other areas. You really need to buck up your ideas and try and generate income into Oxford for the flagging businesses as their rates are huge and the congestion charge will put people of coming to the town. The bicycles causes lots of congestion as cars can't overtake them due to the 20mph speed limit, are they going to be penalised?	Ban cyclists as cars can't over take due to 20mph speed limit. They have no road awareness and although paying no road tax think the own the roads.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Negative	There should not be a charge it will stop people coming into Oxford shopping	No	
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make buses cheaper for young people, Make bus services more frequent, Add public cycle parking		Very positive	great to reduce traffic and pollution, the Westgate car park has been a disaster for traffic flow	bring it on please	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Another ridiculous idea by OCC, as if the current schemes havent messed up traffic and reduced business enough.		Cheaper bus journeys, schemes for employees travelling to Oxford
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative		Until fully segregated cycle lanes are widespread in the city centre this proposal is very premature	Fully segregated cycle lanes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	No	Make buses cheaper for all, Make buses cheaper for young people, Extend hours of operation for buses		Very negative	We are already hemmed in by 3 ltns in a Mike radius, now to access our house we will be forced to go down Holloway and along Oxford Road. To get anywhere. Making hospital visits impossible.	Yes crap it	Open LTNs as traffic was never thus busy before imposed ltns
a business	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add public cycle parking		Very negative	I am being charged to have and to run a business in Oxford. A ridiculous policy!	Don't have them at all!	Make buses more attractive, and cycle routes
an Oxford resident	daily	Registered car clubs	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	There is way too much traffic in Oxford. Air pollution is very high, emergency vehicles can be stuck in queues, busses delayed due to too many private vehicles typically carrying only 1 or 2 people on board. The sooner schemes are implemented to reduce the traffic, the better for all.	Imposing a charge is a good idea to limit cars. But at the same time busses are very expensive, with return tickets costing 6£. For those who live outside Oxford far from bus routes, park and ride is also costly. These costs should've lowered drastically to make them not only more practical, but also more economically viable. This would also support the less well off, who often live outside of Oxford and have to commute to work.	I would recommend scrapping a few bus stops where there isn't enough space for busses to overtake those at the stop. Alternatively, since many busses travel along similar routes, not all busses should stop at all stops. This would increase flow, speed of travel, and reduce congestion at stops.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Registered car clubs	I don't	No impact	No impact	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive			
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Potholes, get rid of parking permits, build a entrance to the eynsham park and ride (wasted money)	Very negative	I really don't understand what the council are doing to my roads. Side streets shut of by LTN's, just prolong my journey, on streets that are now deserted, no more people walking, no more cyclists and no children playing on the streets, I see it every single day, and if the council want to sit in my van at night, you are more than welcome to do so, to see what I have to sit in, when I could actually get home a lot quicker and reduce pollution in doing so. You tend to make the traffic look bad, along the likes of iffley rd/ cowley rd, which gives a false impression, as you are the ones making it. Just open up all roads and streets and let traffic flow again. Not everyone wants to get on a bus.	Yes , waste of time and money	Open up roads, LTN's, get rid of bus gates, keep traffic flowing
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I don't	No impact	No impact	There should be no charges at all	No	Other		Very negative	If I have to go to the JR or Churchill every day for 14-17 days as I have in the past, that means £70-85 in congestion charges. This is unacceptable for having to take care of urgent medical needs.	Don't do it. Oxford has become entirely undriveable. I only go now for urgent medical requirements and am not able to afford or be limited to all these extra charges and car restrictions. Build more community hospitals if you can't be bothered to help medicalk necessary visitations to Oxford easv.	You're doing an excellent job of killing off businesses in Oxford already so that no one wants to go there. Build/allow more services outside of Oxford and stop centralising everything if you don't want all of Oxfordshire needing to get into the city centre.
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I commute to the central permit area by car	Negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all		Negative	What a waste of money consulting and implementing a scheme that will only last a year. If it's because of the Botley Road delays. aet Network Rail to pav for it.		Stop private school parents driving Monty and Clementine to school in Oxford in their unnecessarily large 4x4s. It's bliss durina school holidays when the roads are quieter.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on davs of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses, Other	Extend exemption permits to Holywell Street area residents unable to cycle due to health / age (non-blue-badge) who will be forced to daily congest Summertown to transport heavy shopping, children, elderly, equipment to/fro South Parks / South Oxford	Very negative	I am a resident of Holywell Street, who is unable to cycle due to health (unstable pelvis meaning cycling is extremely painful and Raynauds syndrome causing ulceration of my hands in cold weather, meaning cycling is not an option in winter) with children whose hands also ulcerate in cold weather so cannot cycle in cold weather, as well as elderly parents who are unable to cycle due to age). None of us is eligible for blue-badges. I daily drive to the South Parks / South / East Oxford area to transport heavy shopping, children, elderly relatives and schools/sports/orchestra equipment. The current proposal has me 'trapped' in the 'tip' of the Summertown 'pizza slice', which will force me to daily congest Summertown, the ring road and London Road or Cowley Road simply to access the South Parks / South / East Oxford area for my children's education, our family's food shopping and to visit elderly relatives. This is completely illogical. The congestion charge will not encourage me to go by bus, since I can't take heavy shopping/equipment/elderly relatives on the bus; neither will it encourage me to cycle (due to the non-blue-badge health reasons outlined above); it will simply force me to congest the whole length of the Banbury Road twice a day, plus the ring road, and either London or Cowley Roads, increasing my journey-time ten-fold.	By dividing Oxford into slices like a 'pizza', those of us who live (not just work) in the centre of Oxford are essentially trapped in the 'tip' of a slice – a move more akin to British colonialism and than to even a basic understanding of how communities function. Unlike commuters who work in the centre, our families live here 24/7, meaning we need to transport heavy shopping, elderly parents, children, etc around the centre of the city, across the bus gates/congestion charging points and back multiple times a week in the way that commuters don't. Commuters won't be paying a congestion charge to do their A&S shop, visit their elderly parent at the weekend, take their children swimming, etc, but we will. The council doesn't seem to have taken our very particular situation into account, and perhaps doesn't recognise that the proposals will force us to congest and pollute the city, but forcing us to drive all the way out the ringroad, round and back again, simply to access another location in central Oxford.	Decrease bus fares significantly. Make family tickets affordable. Currently taking a family on the bus is simply unaffordable. Standardise bus fairs. Stage Coach and City charge different prices even though they both share the same services - eg some Number 8 buses are Stage Coach and some Number 8s are City buses. Ensure the 'Get Around for a Pound' scheme for young children is available on ALL buses - currently it's available on City buses, but not on Stage Coach buses, which means young people using, for example, the Number 8, can only travel affordably on a Number 8 that's run by City, and if a Stage Coach Number 8 comes along, they can't afford to get on it, which is completely illogical. Increase frequency of buses, for example the ST2, which my daughter used to catch from St Cross Road to Valentia Road, was reduced last year to just once an hour, which means we have completely stopped using it
a resident of Oxfordshire living outside Oxford	daily		I don't	Neutral	Neutral	There should be no charges at all	Not sure			Very negative			Open up all possible routes. This will allow people the maximum opportunity to adapt to the traffic conditions at the time that they need to travel.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Drivers will find other routes to avoid charge leading to longer journeys, more emissions and more tailbacks compared to status quo where traffic routes are more dispersed	Don't do it - reason see points made in response to question 11	More and better roads will allow traffic to disperse better leading to fewer tailbacks and less congestion. Provision of more car parkins space will reduce time drivers are searching for parking spaces
a member of the public living outside Oxfordshire	less than weekly		I don't	No impact	No impact		Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative			Both my son and my daughter-in-law are university alumni (Queen's and Oriel colleges respectively). At the start and end of each term they were required to move ALL their possessions between home and College. The would have going into the congestion charge area. This is a very specific issue that only occurs on six occasions a year but I do think you should allow parents of students a pass to do this without charge on those occasions. It will not now affect me but if it had happened ten years ago it I would have felt aggrieved.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	It will make travel to Oxford even more expensive in the middle of a cost of living crisis and further increase inequalities.		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	Oxford will become inaccessible to those of lower income. Buses (and the park and ride) need to reduce their costs in advance of any introduction of charges.		Make buses free or ridiculously cheap.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Neutral	About right	No	Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive	In favour of reducing traffic and improving air quality, and the proposals look to achieve this.	The Oxford Nursery is on the Marston Ferry road - it is a good quality, popular nursery and a successful small business. Many parents drop their children off by car, especially in poor weather. Suggest that to avoid adversely affecting the nursery, which could run counter to wider efforts to increase nursery places, you take steps to mitigate the impact. For example, you could widen the exception for school children with special educational needs, so that the exemption includes under-5s. Full disclosure, I have a child at the nursery but typically walk there, so I would not be directly affected by the proposals.	More fully-segregated cycle lanes.
an Oxford resident	daily		I don't	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make buses cheaper for all, Add public cycle parking		Very positive	In theory, fewer cars on the road and so better bus service but also better environment for cycling		One way systems on central roads
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative		We need buses that don't all go into the city centre. Iffley Road to Headington for instance. £5 congestion charge is cheaper than current price of 2 buses needed for that journey so car will always win	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	weekly		I don't	No impact	No impact	There should be no charges at all	No	Make bus services more frequent		Very negative	Bus services are too infrequent to where we live. Park and ride takes too long and costs too much.		Improve key junctions on ring road.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Business cars used as goods vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Just don't do it. This scheme indecent and will ruin the livelihood of many people in and outside of Oxford. Shame on you!	Very negative	People will have to solve a jigsaw puzzle just to go from A to B. You have no right to dictate how people should move around. This proposal is sick to its core.	Yes, it's obscene. Andrew Gant and this bunch of dictators at Oxfordshire County Council should resign just to have thought about it.	Make most of streets on a one way system. Scrap tfns and any obscene traffic restrictions proposal. Give the people ticket machines at bus stops so the bus driver doesn't waste time to issue tickets to the passengers.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	No impact	About right	Yes	Make buses cheaper for all		Neutral	Try to avoid coming into Oxford. Occasionally drive in or use the bus. Less likely to come into shops/theatre etc.		
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative	I will continue to drive through the area up to 3 times a week to reach my place of work just north of the centre and I will pay the charge. The cost will be inconvenient but not as awful as trying to navigate my way around the Peartree junction and then sitting in a queue down the Woodstock or Banbury Road. The already long queues there will be much worse if this and the bus gate proposals go ahead as these will be used by cars trying to avoid these schemes.	They' will severely affect businesses that rely on customers.as they will go elsewhere. They will also badly affect theatres as they will increase the already high costs of attending.	Make the park and ride service and parking cheaper and have more frequent buses. Stop tinkering with schemes for traffic control and have a. Holistic overhaul of all forms of travel into the city.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	Too high	No	Make buses cheaper for all	Mend the dangerous potholes on roads, fund scheme to license electric motorised bikes which frequently speed causing danger to pedestrians etc. Remove LTNs. Fund scheme to be able to identify cyclists that ride on roads desoite bike lanes	Negative	As lifelong residents of Oxford we are extremely restricted already with where we can drive without introducing yet more restrictions. Not everyone is able to use buses or bikes due to age or mobility etc. We even have to pay to park outside our houses. Oxford is not geared up to be a car free city due to people travelling to hospitals and schools and workplaces across the county. It's about time the council removed it's head from it's arse and stop wasting money on schemes that just cause more problems.	Horrible idea	Stop it!!!!!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Neutral	There should be no charges at all	No	Other		Negative	Oxford is a central hub for many people who live in the surrounding areas. The high parking fees and limited parking already stop most people who aren't local from coming into the city. The council have let residents down but not finishing multiple projects (A34 on-ramp, North Oxford Park and Ride, Botley junction) and now there is expectation for residents to pay more for this, which is not acceptable. Bus companies are supporting this however this is affecting residents more and it should be about the residents of Oxford and Oxfordshire, rather than companies making profits out of this. This will also damage the local economy - many in the local area will find it more arduous to travel in and therefore will do so less. This will hit smaller businesses harder than bigger ones and as Oxford is proud of its community, this will detract from that. This may also increase pollution as people do their best to avoid the area - driving more miles to do shorter trips in order to avoid the zone.	Listen to the residents of Oxford- the ones who actually live and work here rather than those in power that are not affected by these schemes. If it wasn't for the fact that I was born in Oxford I would never choose to move to the city which is very sad.	Remove the LTNs which has not reduced the number of cars on the roads but just makes more traffic on the ring road etc which is just moving pollution rather than reducing it.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No			Very negative		The biggest concern is residents being asked to foot the bill for congestion which could have been solved easily by finishing projects and would not result in a charge. The other issue is that it states this is 'expected' to be short term. This is not very hopeful for what is meant to be a temporary measure. If anything a low emissions charge should be put in place as this is not about sustainability but about transport companies (especially private ones) profiting off the back of local residents.	Invest in High speed rail at Oxford Parkway. Be more realistic with projects (not doing all at the same time to significantly increase congestion). Finish the jobs that have been started - add extra resource if necessary to finishing projects. Think about North Oxford Bypass and linking up to A34/moving ring road further out.
an Oxford resident	daily	Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	About right	No	Make bus services more frequent		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I live in Walton Manor near Jerico and I travel on Abingdon road every day. I would be forced onto Woodstock Road and A34 which are already hugely crowded. A trip to Waitrose which is just over a mile would be more 5 miles on A34 , which is frankly not very sensible.	I don't want it or the barriers.	Make buses cheaper, make Park and ride free and parking free. Put a tram on either Woodstock or Banbury Road, it really is the only option that would eliminate traffic in Oxford without damaging the economy
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	No	Extend hours of operation for buses		Negative	Additional complexity to an already complicated traffic system	Concerned that the County doesn't have the technical and managerial resources to ensure the system is reliable and fairly operated	Very odd that there are no incentives for zero emission vehicles. Also proper county wide planning of bus services so that I have a genuine choice. This scheme doesn't dave me any new options
an Oxford resident	never		I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative			
a resident of Oxfordshire living outside Oxford	weekly	Disability benefit claimants	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Every time I visit family or friends in oxford I will have this to worry about. I have lived in oxford and Oxfordshire my entire life and think this is absolutely ridiculous, it's greedy money making schemes out of people who are just trying to go about their lives.	Yes, it's ridiculous	It was never like this prior to botley road, the new Westgate & all the 20mph and road works everywhere. Oxford is not what it was even 5 years ago.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Not sure	Other	You have already made your mind. I am sure you will not be able to either improve or reduce prices of any of the services listed above. Plus you will increase the council tax next year. So, STOP this DRAMA and do whatever you want as you wont listen.	Very negative	You have already made your mind. I am sure you will not be able to either improve or reduce prices of any of the services listed above. Plus you will increase the council tax next year. So, STOP this DRAMA and do whatever you want as you wont listen to the public.	STOP this DRAMA the people are already fed up with LTNs, do away with LTNs and things will get normal. Why do you not fine network rail for delay in Botley bridge and reduce the council tax of people.	STOP this DRAMA.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	Too high	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Other	A single bus ticket is £3 . So a return bus journey will be £6. So there is no point taking the bus when it will be cheaper to drive. I work shift work when public transport isn't running, but one of my journeys will be within the restriction so lose lose	Very negative	I work at the railway station as station staff. With Botley road closure (it's frustrating for us as well) there is no route to either car park without going through a congestion charge. So to avoid the congestion charge passengers will drive further to go to other stations, staff have already said they will have to leave and work at other stations. It will also mean we will struggle to hire as colleagues will be financially worst off to work in Oxford. Train drivers won't be able to get into work to drive the trains. So will mean the trying to promote passengers to use the trains instead of the car to do journeys will be negatively effected. My shifts cover 24 hours when buses don't run. I could start at 02.00 but finish at 10:00 or start at 14:00 but finish at 22:00 etc.	The congestion problem in Oxford is only during school hours. But the biggest problem especially on weekends is Westgate shopping center what grid locks up the central Oxford area. 100 passes a year isn't enough for local residents who are seemingly being punished and will push people to drive further around to avoid the congestion charge People aren't going to want to visit Oxford or shop in Oxford as they won't want to pay the congestion charge. Meaning shops will close. Shops also won't be able to recruit staff. If you want people to use buses there needs to be a 24 hour service to allow people to get in and out of work and using a bus shouldn't be more expensive than the congestion charge At the moment the congestion charge will destroy businesses and the city will become full of streets of abandoned shops and reducing the economy in the city.	Traffic marshals for west gate shopping center. That when the car park is full people don't just block the road with the indicator on that they have to move on. Schools need to be engaged with and promote children not being picked up by car. Kids should majority be local to the school. In Marston. St Nicholas, Swan School the parents picking up block up Oxford road with considerate parking preventing the flow. In the Banbury road area traffic is blocked up through summer town around 1530 - 17:30. This is due to people cutting through the bellbroughton road to meaning flow of traffic is prioritised to people cutting through that area from northern blocking up Banbury road. Perhaps for cars Banbury road should be one way and the A4144 can be one way in the other direction. While Buses can still be dual direction on each road
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	As a resident in Kennington I would only be entitled to 25 passes per year, far too low for the number of trips we would take to central Oxford as a vouna family for events and activities.	I think it's ludicrous that residents should have to shoulder the burden for failures of all those involved in the rail works closing Botley road.	Hold to account those responsible for the baffling overruns of the works which caused the Botley road closure.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	About right	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Positive	We live near the Magdalen roundabout, and would obviously welcome less fumes and noise every morning and evening.	We are supportive of any initiative that reduce the number of cars on the roads, and in our street. We have two children and worry about their future health.	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	You are stopping people going into/visiting Oxford and using Oxfords retailers and business. Why the hell would've want to go into Oxford when Swindon, Cheltenham, Bicester are cheaper	Why don't you just close Oxford	All the bad publicity LTNs and now this are killing Oxford and reducing thr traffic anyway. Try an inner Tram network you could have orobably done for the amount of money you wasted on the £57m car park in Evnsham
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	God help the ring road	Its a city matter and not county	The only congestion is rush hour
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	Too low	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	Traffic is horrendous and must be reduced and public transport improved to make Oxford a better place to live. I have marked the scheme down for having too many exceptions and free passes. Schemes like this work by causing people to change their behaviour - if you mitigate the costs with free passes and exceptions (particularly exceptions which don't reduce traffic, such as taxis / car club cars etc) then you reduce the change in behaviour and reduce the effectiveness of the scheme.	Busses are much too expensive, and I worry that £5/day is insufficient given this. It should never be cheaper to take the car, but as bus travel costs increase linearly with the number of people in a group, whereas the cost in a car is only marginally higher, it is hard to justify travelling by bus if you are in a group. Ticketing is also made more complex with two operators, with tickets which are not valid between them, journeys with transfers which cost 2x as much (e.g. oxford -> summertown, summertown -> headington). All busses should be tap on (tap off?) with automatic daily / weekly maximums and discounts. Transfers between busses should not cost more than the same journey on a sinale bus.	Organise the busses into hubs with fast frequent transfers, and local busses for the 'last mile'. E.g. a hub at the JR with fast frequent transfers to other hubs in the city center, summertown etc, and also coordinated busses which go round the busses locally (perhaps a variant of the 'on demand' minibusses?). Have simple fares, tap on with automatic maximums and discounts.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I am someone who commutes to central Oxford daily for work, with my office being at the centre of the zone with the filters. In a cost of living crisis, you want to be charging people £5 daily to go and earn a living or alternatively have them use public transport multiple times a day which will be £5+ a day - it's outrageous! It's like you don't want people to actually go out and work to earn money and you want people to worry about more expense. It's not fair.	It's a silly proposal that gives no hope to people trying to live and work in Oxford, made by people who won't be impacted by the filters. It's disgusting and you're trying to drive people away from Oxford, trying to drive local people away from Oxford.	Get the Botley Road open to let there be more routes around the city then the roads won't be as busy all at the same time.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for vouno people		Very negative	We would go elsewhere and so businesses in Oxford will suffer. I don't have confidence in the council to deliver this solution competently or in a cost effective manner based on previous experience of Oxford traffic schemes.	This seems all stick and no carrot. If the park and ride was more attractive the problem wouldn't exist. Paying. For parking and buying tickets is confusing and a pain (and expensive compared to parking in town)	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	This will further undermine the quality of life for residents trying to live and work in Oxford.		
a resident of Oxfordshire living outside Oxford	weekly		I don't	Neutral	Positive	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses, Other	Trains for gods sake , why buses only	Very negative	I will not travel to Oxford , I will not use local businesses , shops and restaurants- I will and spend where I am welcome. This would be circa £400 per month removed spend	Why are we paying for the council, rail and developer incompetence- this is a terrible idea will cost you the next local elections.	Reduce train parking fees and ticket prices
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Community health or care workers who need to visit multiple locations or travel urgently, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make buses cheaper for all, Extend hours of operation for buses		Very positive	I work in the city center and go to work every day, I also think that these projects of restriction streets and LTNs are just ways to raise money and have no benefit in the city, since these projects have increased traffic a lot.		remove the LTNs because this only worsened traffic in the city and also duplicated to two lanes the city's main roads
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	You hit in the pocket vulnerable people with this measure, basically allowing people who has the means to have little to no issue at all. Also you are allowing a gate from Summertown to city center with no penalties. That is actualy elitist.	You hit in the pocket vulnerable people with this measure, basically allowing people who has the means to have little to no issue at all. Also you are allowing a gate from Summertown to city center with no penalties. That is actualy elitist.	No all buses needs to come to city centre. Allowing buses from Oxfordshire to use P&R as final destination and use Park and ride buses, every 10 min max, with less stops, to city center free of charge, you would see a decrease in cars in the city and buses runninq seamlessly on time!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Add public cycle parking		Very positive	I don't drive at all and only cycle. The roads are terribly congested by drivers commuting to work or dropping off their children at school. Often these journeys are done by a single party and not shared between several. Additionally, children are perfectly capable of walking or cycling to school. The drop off areas around Magdalen School and Dragon School have become extremely dangerous zones for everyone		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Other	This charge will add over an hour a day to our daily commute and prevent us from taking our child to school if it rains	Very negative	This charge will add an hour to our daily commute and make us pay ghen we nees to drive our child tp school if it rains.	Don't do it	Stop forcing all of Oxford traffic through a single interchange at st clemens or through am impossible ring road

Survey Response												
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on davs of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Negative	Too low	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Positive		I think the biggest problem as someone who drives into Oxford about twice a month is the school traffic for those attending public schools. When the private schools are on holiday it is so easy to drive into Oxford. Can you work with the schools to enforce parents to get their children on public or pooled transport. Can you have school policies that exist elsewhere that say you can't do it less you can get to the school without using a car.....	Talk to the private schools. Put a larger charge on traffic at certain hours eg 7-45-9.45 and 2.45-4.30.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	causing a social divide, those that can afford to pay are able to pass through. Those that cannot pay must pay extra fuel and take more time to go around.	I totally disagree with them	open the lns allow traffic to free flow, make useable bike paths
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking, Other	Better rural buses	Very negative	We won't be able to pick up our elderly parents when they get the train to Oxford and the buses aren't nearly good enough to rural areas like ours.		Rural buses and cycle lanes outside of the town centre need to be prioritised as members of the surrounding villages of Oxford will be trapped by this. They have no other realistic option than to drive into Oxford currently.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Improve cycle lanes to and from Oxford to nearby town	Very positive	We mostly use park and ride. This is a good move	Charge based on the vehicle current price rather than size and age. So those who have broad shoulders pay extra	Incentivize cycle users and walkers, give vouchers to those use eco friendly ways
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Neutral	I don't go into Oxford very often.	Why on earth do you want to penalise the car users even more. The Botley debacle is already causing enough grief. Now you want to add to it. And you think the Council has enough resources to support this when they are already over stretched. Absolutely ridiculous.	Make it cheaper to use and park at the railway stations.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral	I drive into Oxford briefly two or three days a week to take my daughter to nursery and my wife to work (I work from home) and would not normally pass through the proposed charge locations.	I'm broadly supportive of any measures that might improve traffic and bus travel in the city. I live in Yarnton, which is not well served by current bus services. I'm not clear why commuters are being exempted from the congestion charge as they are surely the biggest contributors to peak period traffic, as well as being the group who could most reasonably take other forms of transport.	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for young people		Very negative	A further example of OCC being out of touch with the people of Oxford.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Other	Fix Oxford road too many potholes and really poor tarmac with so many road in need of resurfacing	Very negative	With these changes will force all driver to use few especifica road and will cause even more traffic in so many roads and even more delays in public transport, all this have been caused by the low traffic neighbourhoods, you diverted all the traffic to few main roads without ootion to exit these mains road causina huge delavs on Oxford arterial roads	Please don't do it will only cause even more traffic and congestion	Yes, open all low traffic neighbourhoods, they will release the pressure in so many mains roads like Cowley Road, Iffley Road and St Clements Street
an Oxford resident	weekly	Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	Oxford residents should be able to travel freely across the city no.matter of background, transport preferences or other bias based charges. Car drivers have already paid road tax. This is yet another decisive tax on the city's residents.	None of these charges should be implemented whether temporary or otherwise. Residents should have the freedom of gge city ye travel when ever, however they do wish add not subjected to further taxes on their incomes.	Remove the LTNs and allow ghe traffic to find its ien way around the city. All the council has done so far with existing LTNs and bus gates is bring traffic to a standstill and Oxford is as bad as the M25 on a good day.
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I commute to the central permit area by car	Neutral	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	Business will lose money because of this for example families who need to get children to nursery parents.might not beable to afford this. Staff who work in education can't afford to pay £5 a day to go to oxford not paid enough as it is and not enough buses or routes to make sure on time		Improve the roads Get the train Station finished so botley road can re open so people don't have to go long way round and neither do buses which would reduce traffic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I will make it difficult to drive around Oxford and make people who have to drive travel further causing more traffic and pollution. The online system will be hard for elderly people to use. Unless you improve public transport first people have no choice but to drive.	Will cause more problems than it solves. Thanks exemptions for vans mean that some people will use them instead of cars causing more pollution	Remove LTN and a lot of restrictions on car drivers th spread the traffic out. Remove bus lanes for at least 200m before roundabouts, e'g. In Woodstock Road at its junction with the A40, to improve traffic flow onto the roundabout. Simplifying The Plain Roundabout. Put your charging camera system on the roads leading to schools and only have them activated at school commute times + more school buses
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No			Negative	I live in a rural area where no public transport is available. I have to have a car. Cars are expensive to run so I need to make the most of my vehicle. I can't afford to spend money on other forms of transport. I simply won't bother going to Oxford any more	Stop hating motorists so much. Some of us have no alternative	Get rid of bus lanes. They're useless because they don't go all the way into the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other		Very negative	Would make me have to travel the other way down hollow way getting stuck in the Cowley road traffic.		Get rid of the LTNs, or only have the LTNs enforced on the weekend
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the roads and teach cyclist how to ride and give them classes on traffic rules and Safe driving.	Very negative	Congestion, time on the roads for a normal journey will oncreasd by Atleast 200% .. busy ring road, waste of working hours, petrol and money.	It's a waste as we already have so much congestion in oxford and on ring roads.	Take of the LTNs, bring speed breaker and it will help reduce the speed and will be more safe and secure.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Very positive	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	Something needs to be done about traffic levels in central Oxford. It won't be popular, but this scheme seems fair.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make the roads a safer drivable condition, pot holes, broken tarmac repaired	Very negative	I work in Oxford and I drive around all of Oxford due to my work and I shouldn't. Be paying nor should anyone be paying to drive around their own city they live in	It shouldn't be allowed to happen, there is congestion down st clements due to the low traffic neighbourhoods that don't work	Remove the LTN's in Oxford and bus gates
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	I cycle everyday, but see the queues of people trying to commute, but there doesnt seem to be a shift in behaviour of commuters, only a lot of moaning about other drivers getting in their way.	Making people shift to other forms of transport i.e. away from cars, must become a financial argument, and the buses are not a viable alternative - it is always cheaper for me to drive to the city centre even with parking, than get a bus for my family. Buses need to be so cheap that it is insane not to use them.	See above - buses have to be cheaper, a lot cheaper
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very positive			
an Oxford resident	daily	REDACTED	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	REDACTED. I cannot afford to pay £5 a day. Those with money will not be affected but those in a budget are being penalised. It's very unfair.	No	Yes, open up the side roads. Remove the LTN's to allow traffic to move more freely. Promote cycling by making dedicated cycle lanes that are safe to use.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	We shouldn't have to pay to move around the city when there isn't a viable alternative. I know the money will be used towards changing this but it will take time and in meantime we will all be screwed. Buses around my area NEVER run on time and so cannot be relied on to get to work. I also drop off a child at school and a baby at a childminder on the way, and would have to get multiple busses. It's not reasonable to get the bus for me and lots of other people. With the cost of living crisis and Oxford rent prices through the roof every single penny is being squeezed out of us. Paying to go to work on top of this is a disgrace.		Get rid of the LTNs. Everyone hates them and they are the reason for the clogged traffic at St Clements.
a member of the public living outside Oxfordshire	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It's just another money making scheme that you won't take away and it will definitely stop people who want to shop in Oxford, coming.	DONT DO IT.	Make car parks easier to get in and out off. Get rid of certain traffic lights like the ones on roundabouts which should only possibly be used at peak hours. Allow traffic to move quickly in and out of town. Put back the dedicated bus lav-bvs.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	It will kill off what is left of retail in the city centre	Terrible idea	Bring in a tram.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I am totally against charging to use roads u see any circumstance.		Build more roads, remove LTN's and allow FREE movement by vehicle anywhere at anytime.
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Times are harder than ever, with the squeeze on motorists also harder than ever. So many drivers simply need to get about for a living. It feels quite insulting at yet another charge being introduced.	The other roads will not be able to cope with the change in traffic levels, the problem is just being pushed elsewhere.	Open the roads near the station.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	If this has to be introduced, please use the money to make safer cycling routes throughout the city so cyclists are not sharing space with buses for example	Very negative	The main huge problem I see with this scheme or the proposed bus gates is the creating of more congestion on the ring road and main arterial routes into and out of the city, with all traffic driving between areas of Oxford forced to use these routes to get around. I fear it will leave the centre less congested but create hugely worse congestion on these routes, making living in and travelling around Oxford very negative and difficult (for cyclists and walkers too, outside of the very central areas). It will disproportionally impact more vulnerable residents eg the very elderly and those with young children It will also prevent us being able to drive to many places we often visit, meaning we will not visit locations in Oxford. We will instead drive further to go to Witney for example. This will result in a terrible impact on Oxford businesses, meaning it will be an even harder place to do business in than it is already - many shops and hospitality businesses will likely eventually have to close due to reduced footfall	There is no significant congestion on the Marston Ferry Road for most of the day - why is it felt necessary to include this in the scheme? Other access roads to Headington are already very congested - this will make that worse without helping a non-problem on the Marston Ferry road	Make it safer to cycle - so we are not taking our lives into our hands cycling in the same lane as buses for example. Make shorter bus journeys in the city cheaper
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Usual route to hospital and visiting friends compromised.	I do not support this proposal.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, School students with special educational needs, Unpaid carers, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	Yes	Make buses cheaper for all		Very negative	During the times in operation, the buses may have a clear run until they reach the point where everything is at a standstill, because all you have done is moved more traffic onto congested roads ,already congested because of LTN's. Contrary to your own belief, LTN's do not reduce traffic, they move it somewhere else.	The only reason you are introducing these is because you can't implement the bus gate's. It's not going to make bus journeys easier and quicker, in fact I'll be surprised if you don't bring Oxford to a standstill. Try employing someone who actually knows about traffic management instead of a music teacher who just hates cars,businesses and people coming into Oxford for work.	Remove the LTN's, because as with Lambeth council, the high court told them to remove the LTN's because the council failed to listen to the majority and in the case of Oxford, the council did exactly the same thing. So there will be a court case for the council to answer.
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	Negative	Negative	Too high	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Negative	I think putting in a train station by southern park and ride and a train every 10 or 15 mins to station. Could work really well. I think fare enough on the charge but parking needs to be reduced.	Need to make things more easier on expense for people. Otherwise reform will get votes and win. So there must be positive win for people.	Put in a train with the park and ride. Then no issues with the park and ride buses taking to long.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	DO NOT ADD CONGESTION ZONES	Very negative	Ocford centre is losing trade daily and this WILL make it worse	This is nothing but a money making scheme, and will only impact residents, businesses and visitors negatively.	Anything but charges. We all know saying that they are temporary is a lie. If you want to help people in Oxford give them a break from the endless bills and chances.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	The infrastructure around oxfordshire and oxford centre is simply not good enough to support this without just making it impossible to get anywhere		
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Driving instructors, Hearses and funeral cars	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Other	No charges at all	Very negative	It's money a lot of people don't have.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Hold network rail accountable for the issues at Botley and make them pay for improved transport links rather than the people who are made to have longer journeys because of it. Open LTN's and improve bus frequency and affordability instead		Open up LTN's which cause delays and traffic from East oxford to city centre. Make buses more affordable.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No			Negative	The two outer roads, Marston Ferry and Holloway, don't really see significant congestion, so why is the fee needed? The residents who live on the outer perimeter of Oxford shouldn't be penalised like this, many poorer communities already have a different lived experience to those who live near better facilities in the centre. unfortunately, all that will potentially will happen is that traffic will be pushed onto the boundary roads, exacerbating inequality. The LTNS as they currently exist need to be reduced in size and to be used sparingly as a last measure so instead of hitting everything and everyone (including small businesses) with a sledgehammer, perhaps you could be more nuanced and thoughtful in your approach? Use one-way systems, better buses, build a new park and ride just off Garsington Road, revert some of the LTNS back to one way to improve network resilience, increase road safety (yes, really) improved school bus provision, tackle private school and term time traffic if those are issues. If small business start to close down due to reduced footfall from increasing restrictions, then local jobs will be lost, and people will start to go elsewhere, even if this doesn't happen overnight. And finally if you cant manage without a congestion charge, use it on the approach into the centre, not right on the outskirts of Oxford and only during rush hour. It's not needed other times	See above	Above really. I do think you need to be careful about what you consider a priority. There are many priority reasons why people need to use a car that don't fit neatly into the categories above e.g., picking up elderly members of the community to take them to Church, visiting relatives who are at end of life outside of Oxford. It's called life. Stop trying to make it difficult in pursuit of the ideal and start building better bridges with the communities you are meant to serve.
other	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I don't	Very negative	Positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	Why? It's obvious as this people are already paying too much to drive a car anyway consider this a older person driving a car three times a week to any of the Oxford hospitals yes another £ 15 a week + hospital parking charges if you want to cut down car travel in Oxford make it compulsory for every car to be full up ie four people in one car saving 3 other cars not coming in & it cuts down conoestion 🙈	Scrap it fix the roads instead look at making small electric cars to hire from park & ride into Oxford this could work as well as provide jobs for people the local talent is already there use it instead of hair brained short term expensive plans that nobody wants	Yes as I have already stated small electric cars to drive into Oxford centre from park and ride and all other cars made to be full up

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Don't do it at all	Very negative	It's a silly idea we don't need it	Very silly idea	Get ride of the poles in the roads so cars can go down every street again
an Oxford resident	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No			Very negative	Network rail should be fined for the time and impact on residents and businesses due to the overrunning of the Botley Road bridge. It should not be another tax on the public. Oxford traffic management is appalling which is solely due to the LTN introduction it must NOT	It should NOT go ahead and the result of this survey must be listened to	Remove LTN
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Don't do it	Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	It is already difficult to access central oxford so people choose not to visit the museums, shops and theatre area so they may close. Further barriers to public accessino central London would be a disaster. Oxford will be emoty	Do not do this. No one wants it. It is a mistadv	Cheaper buses
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Add public cycle parking		Negative	We live in Kennington, OX1 5NA. We are outside the Oxford residents area. However, we are not further away than the north or the west limits of the Oxford residents area. Why is Kennington out of that area please?	The whole scheme will add minimum value outside of peak hours, when congestion in Oxford is typically minimal. Why not have this charge apply only during the morning and late afternoon/ early evening peak traffic times?	Deliver bike routes which are fast and safe (and not necessarily on main roads). Fight bike theft crime (CCTV etc). Provide more bike locking areas in central Oxford. Deploy shareable fleet of small e-cars (buses are not everything!). Encourage people to car share. Survey and publish reasons why people use their cars to travel or transverse city centre by car and then invite creative discussion on reducing low-value movements.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	School buses to prevent congestion as during school half terms and holidays it's a pleasure to drive around Oxford with no traffic lams	As it will just cause congestion in other areas and the town centre will become a ghost town		Wrong description ,the county council should give school places nearest to where people live to cut down on the need to take the car to take them to school and put on school buses for the further afield pupils as when there are school holidays or inset days there is hardly anv traffic on the roads . do a survey on this if you don't believe me	School buses and a better selection process for school places ,and we probably wouldn't need the bus gates or LTNs ,and forcibly restricting the residents of Oxford from travelling around
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Positive	I drive through the locations fewer than 100 times per year so it won't cost me anything and it might slightly reduce traffic which would make cycling safer.	No	Stop tour buses driving into Oxford. Day trips don't do much for the city's economy but harm its environment. Sort out Broad street so cyclists are separate from pedestrians - it's not just frustrating but potentially dangerous at present.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	I think it will just push traffic out on to other roads causing more congestion, I don't believe it will incentivise people to take public transport. Furthermore, it's nonsensical, those who can afford it will still drive into Oxford.		If you want to incentivise people away from cars, public transport needs to be improved.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative			
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I am one of 6 siblings to my parents living in the affected area, we all take turns to look after our parents take them to appointments etc the limited passes will not be sufficient and we will be hugely impacted by this proposal. Looking after our parents as unpaid carer our costs is increasing, also using this area to take my children to clubs	With the alarms and congestions charge really dividing communities, Oxford is becoming grid locked, time to travel has increased significantly	Bus fares are extremely expensive particularly is the whole family is travelling, bus frequency for my route is hourly. Adds to inaccessibility.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Negative	About right	No	Make buses cheaper for all		Very positive	I cycle or use the bus with my very young children. The congestion charge would reduce traffic and make cycling safer and the buses more reliable. It is also an important signal to drivers that they aren't always the most important road users.	Some of my car journeys will be disrupted, take longer or be more expensive. However it is more important to have better and more environmentally friendly transport in our city. It is a sacrifice/reprioritisation we all need to make.	The bike lanes have been really helpful. Often the joins between cycle paths on different roads are unclear and unsafe.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all, Other	Remove LTNs	Very negative	Little impact on congestion. Improves profits for bus companies over needs of permanent residents within the ring road.		Remove LTNs to stop forcing traffic onto known hazard points (like the Plain). Improve car access and flow to allow cars to visit centre (good for families and shopping). Consider emissions based zones if air quality truly a concern - and exempt electric vehicles
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Maintenance of existing infrastructure, that has been so poorly managed over the past few years. This includes existing roads, pot holes, pathways in residential streets as well as main roads.	Very negative	I regularly take my parents (who are in their late 80's) and live within a proposed charging areas /litter to medical appointments. One for medical dressings, 3 times a weeks at a GP in Oxford. And the other to regular appointments at both the JR and Churchill hospitals for treatment. Tell me how and why I should now be expected to pay £15 to £25 on an almost weekly basis. I would only qualify for 25 passes a year, given I come in from outside of the central area, even though I have a OX1 ooxtcode?This would be an absolutely crioolno situation financially.	I am opposed to any charges relating to car travel in and around Oxford. This concept means that only those with money will be able to access Oxford by car.	Re-open most areas where LTN's have been enforced in Oxford, as this looks to have been a catalyst to additional congestion. Look to create one way systems in some of these locations, if needed. Wait until the Botley road has re-opened before doing anything further.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Very negative	Too low	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	The scheme is too lenient providing too many concessions to people commuting into Oxford by car. Motorcycles should not be exempt. 100 days of free passes is far too generous for Oxford residents. The biggest losers in Oxford congestion are bus passengers. Please don't pander to drivers by making park and ride free. Put the money into general bus improvements.		Oxford needs car free bus routes (or more ambitiously a metro, tram, monorail or suspended railway) on the Abingdon Road and routes to and from the JR. Accompanied children aged 5-16 should have free bus travel. Park and Ride buses should not be cheaper than public buses. Bus companies should be required to use the air conditioning that is fitted in their vehicles to increase the comfort and therefore desirability of bus travel, and to prevent drivers from being exposed to dangerous working conditions.
a business	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	As a self employed peripatetic teacher visiting more than one school each day in the city centre, unless I can move around the city centre carnvios excensive and heavy eauioment in my car. my iob will become unviable.	Why are teachers not included in the exemption permits? Also, the congestion on the other roads will be huge. Not being able to drive to the main city car parks is a joke.	Remove the LTns to ease congestion on the main routes that cars are having to use unnecessarily.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I have two reasons: I live in Wolvercote, my non-driving elderly mother lives off the Cowley Rd. She is not entitled to a blue badge, but she lives alone and does need my help - especially as the LTN's have meant lots of tradespeople will NOT visit her anymore because it takes too long to get to her. I need to be able to get to her quickly - via Marston Ferry Rd, when needed. She has no other family alive but me and my children and no other access to a car. 2. I work for a Nursery that is based in Eynsham and in Summertown. I am often needed in both locations to work/deliver essentials etc. I need to travel to these locations with no penalties or further worries. I am a single parent, I am also an only child, so all family responsibilities fall to me. One of my children is classed as disabled. I do not need all of this extra worry and expense just trying to get to work or get to support my elderly mother. The stress that these proposals are causing to normal people is just awful, I thought nothing could be worse than the LTNs. How wrong am I	See above Perhaps look at numbers of cars per household ? Charges in that area ?	Get rid of the LTN's. The traffic problems they have caused is ridiculous.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Add public cycle parking		Very negative	I need to get to and from family with our health without worry of extra taxes that'll be wasted on bus gates and traffic barriers, at the same time as the roads not being fit to cycling on!	It's just a money making purse to be wasted in the future.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I live just outside the pink central zone in the city so don't qualify for the unlimited passes, but also have to pass through a toll road to commute to work each day. I work shifts, as and the current public transport options are not viable. The 100 passes I do qualify for will not be enough for a year for me to go to work 5 days a week, and will essentially be a fine for living in central oxford, but outside the pink zone.	They essentially prohibit residents in oxford from leaving towards the east as all options (Marston ferry and St clements) are in the zone.	Residents should not be charged to leave the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Other	Don't introduce this stupidity nonsense	Very negative	I took after two people in their 80s who live in Rewley road. I live in navigation way, so I have to pad through the central zone to get to them. By bring this this in you are making my horribly complicated life unimaginably more difficult with endless permit [REDACTED]	Please please please please don't do this	Get the Botley road bridge open asap and get network rail or whoever was in charge of this REDACTED to pay my council tax for a year in compensation.
a resident of Oxfordshire living outside Oxford	weekly			Very negative	Very negative	There should be no charges at all	No	Extend hours of operation for buses, Other		Very negative	More burocracy	Everone should be egible to drive to oxford	
an Oxford resident	daily	Blue badge holders, Disability benefit claimants	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Other	Buses are not an option for a lot of people and many people will not have the proof to provide to show that they need their car which means a lot of vulnerable people will be able closed and them getting around would be more restricted causing upset	Very negative	I work around Oxford and have to visits many locations throughout the day, I am also registered disabled and need suoport from others often and being that they live all around Oxford it will restrict the support i receive and restrict how I work making my job more stressful which could potentially result in me ending my job for my mental and physical health. This also applies to many others in Oxford. Also families with children in different schools that cannot travel alone, this would make school runs near on impossible. Stop wasting money on unnecessary things and use that money to make bus travel cheaper rather than making us pay even more to be the roads than we already pay while restricting how much we can drive .	Constant rise in the cost of driving and then have the cheek to restrict our driving. This is very corrupt and close on theft, taking more money from the public in an already hard time with the cost of living.	Open the roads back up and put speed bumps to slow cars down in neighbourhoods.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very negative	There is already enough financial strain on families, due to the cost of living crisis. Such charge will put even more pressure on individual and families		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Negative	I work in keble triangle at the top of St Giles and frequently travel to the law building next to the st cross gate. The congestion I experience is not in the charging zone but in summer town and cuttesslow/wolvercote roundabouts and iffley road. I commute from Faringdon, west of Botley. A Botley road reopened the the bridge filter will incentivise me to continue travelling round the ring road and in through summer town rather than the more direct West Oxford route. This defies logic by massively increasing my emissions and commute time and adding congestion to one of the worst routes. It will also stop me exiting Oxford southwards.	The only people I hear pushing for the filters are the bus operators who have a vested interest in disincentivising private transport. I do not believe the plans target congestion hot spots. They could add to Congestion elsewhere by limiting choice of alternative routes, and will add to emissions by forcing long journeys (an extra 6k in each direction in the case of my commute via north Oxford rather than botley road). Congestion in North Oxford would be better tackled by targeting transport to private schools, since there is a notable difference when they are not open. I do not believe other options have been well considered. One way systems on Banbury/Woodstock and iffley/Cowley roads might have a bigger impact on congestion, and release space for more bus lanes.	Make North Oxford one way, with Woodstock and Banbury road acting as unidirectional spines. Consider the same for Cowley/iffley roads. Work with private schools to reduce traffic at peak times, citing changes in traffic flow in public school vs state holidays vs term time. Actively manage impacts of pedestrian crossings on traffic flow- a 5x delay waiting for the green man wouldn't greatly impact pedestrians but would allow traffic to flow- on Woodstock road the constant stream of pedestrians and cycles halting the traffic at school drop off time has a greater impact than traffic volume
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride buses cheaper, Make bus services more frequent, Add public cycle parking		Positive	It will deliver some of the traffic reduction benefits of the filters, but the exemptions are too numerous and the charge probably too low to deliver substantial reductions.		Introduce Eastern Arc filters (St. Cross Road, St. Clements, Hollow Way, Marston Road) immediately, with congestion charging for the Thames Street and Hythe Bridge Street filters
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Negative	Adding fees will not stop people traveling by car and it will not reduce traffic. We have seen this be true with the LTNs- they keep some roads traffic free but it's just moving the problem to other roads by bottlenecking neighborhoods and adding longer journey times to car drivers	We made informed decisions about living in Oxford based on the accessibility and commutability for work. We have already been negatively impacted by LTNs, permit holder parking only, permit badges required for parking and now this proposal.	If you want to encourage people to drive less, there needs to be more of a focus on cycling becoming more affordable, safer and more designated paths.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Very negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Positive	This scheme is very important and I support it, I think it should go further and not allow any permits for people not resident in Oxford. I think the charge should be higher and should penalise larger and heavier vehicles. For this reason, I am positive but I cannot be 'very positive' unless inprovements are implemented.	The locations should not be temporary. They should be permanent even if/when the bus gate system is implemented. Using public transport in Oxford is extremely negatively impacted by inefficient use of personal vehicles and more steps should be taken to discourage the use of cars.	Make the congestion charge permanent, pedestrianise more of the city centre, make bus routes cheaper and more regular. If we're really doing blue sky thinking, I'd like to suggest that we (re)introduce trams because they are the most efficient way to move larae numbers of people around a city.
a resident of Oxfordshire living outside Oxford	weekly	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative		Stupid idea	No
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	I would be less likely to visit places that I can't get to easily by bus, and so classes that I would like to attend or places that I would visit and spend money at I will no longer be likely to do so.	Oxfordshire is already an extremely expensive area to live in and this will serve to make Oxford more difficult to access for anyone living outside of the city. I would like to use the buses more but they are expensive and unreliable and certain areas are not well served by bus.	Subsidise buses and make the park and ride free to park at like it used to be. Currently it is not a particularly cheap option. Maybe it would be worth creating more park and ride areas outside of the ring road with good bus links into different areas of the city
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Busses from Chalgrove are in frequent and very expensive, not suitable for travel late afternoon or evening. focus on support for Oxfordshire residents as it always looks like Oxford is anti anyone living outside the city, surely killing city businesses.	Very negative	This is another tax that I am sure will not stop after 2 years, and continues to deter anyone to visit Oxford to use restaurants and entertainment. Why doesn't the council take responsibility for allowing the Botley road rail mess to happen and all resign. Being in force on bank holidays shows this is a money making scheme to benefit Oxford city council and not a congestion charge	You are making Oxford city too complicated to visit with and car policies and now I very rarely ever visit to use shops, restaurants etc. Even to visit a renowned pub for a meal off iffley road is impossible due to resident parking, this lead to not showing for a booking as it's impossible to park anywhere.	Charge Oxford city residents £10 to drive their cars inside the city as they have realistic cycling/bus options and allow outsiders to drive for free to attempt to salvage patronage and save trade.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Very positive	About right	Yes	Add new bus routes, Other	Please resurface Oxford city's roads. They are shocking	Negative	Why no incentives for EV car owners? Why reward multi car households? Why not fix the coaches problem on St Giles & school run traffic in North of Oxford?	Think you should stick to a congestion charge rather than bring in the filters. The filters are so punitive with £70 fines if you eg need to take your cat to the vet once your 100 permits are exoired.	Sort school run & coach parking - use Park & Ride. This plan does nothing for that. Resurface the roads please. Support EV cars more - charging in Oxford has stalled
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Business cars used as goods vehicles	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	Totally unnecessary to ask residents to pay for the absolute mess that is the Botley road delay. This is a stealth tax, and any mention of 'temporary' will soon go away	See my answer to the last question. Temporary will become permanent, mark my words	How about getting the park and ride at Eynsham up and running for starters. How dare you spend that much money, then leave it dormant for years!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Use council tax money to fund your virtue signaling projects. g	Very negative	You do realise that most of the jobs in Oxfordshire are in Oxford. Do people have a choice? You are taxing those who chose to work to feed their family. What a fanatic bunch of coincidors we have got.	Abolish	Build less homes. But if you are really looking to reduce congestion then think of what are the bottleneck points in the traffic system and how you can improve those. Could you invest to have tram system? You would say that it is not financially viable. So ultimately it is money that you want to make from these schemes. If you bunch are not sadists then you wouldn't have thought of a scheme which seanalises its own citizens.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I don't	No impact	Negative	There should be no charges at all	No	Extend hours of operation for buses		Very negative	This scheme will simply make driving into the city less attractive whilst alienating outlying Oxfordshire residents from Oxford. Furthermore this will further increase discontent with council leadership inside and outside of Oxford given congestion is being made significantly worse by the botched roadworks taking place on the railway bridge at Botley road. This scheme is being introduced to remedy an onaoing council failure.	Yes - scrap the proposal for a congestion charge and sort out the ongoing roadworks. Or alternatively at least clarify what is meant by temporary - as knowing how local governments operate temporary can become permanent with no warning whatsoever	Rectify the ongoing delay with the botley roadworks - recognise your failure as a council rather than punishing road users. Alternatively ban learner motorcyclists from operating as delivery drivers - these individuals cause more havoc, confusion and potential delays on the road than any other group
an Oxford resident	weekly		I don't	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	I usually walk around Oxford for work and to go into town, but sometimes take the bus or cycle, and find the traffic really terrible. The buses are greatly affected and I don't feel safe as a cyclist. People should be incentivised to use public transport or cycle instead of driving by car where possible so I support the idea of the congestion charge being used to support local bus routes		Oxford really needs to ban pavement parking, this badly impacts traffic and is dangerous for pedestrians and cyclists
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative	Oxford is already unfriendly enough for people living outside to visit this would make it a no go zone. Park and ride to hospitals is abysmal and options for public transport to Oxford from some rural areas is practically non-existent or difficult to get to services because thev are too distant to walk to and there is no nearby parkina.		Maybe encourage residents not to use cars rather than excluding visitors from nearby towns, villages and rural areas
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders, Disabled tax cans, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Personal cars used as goods vehicles for business purposes	I don't	Very positive	Very positive	There should be no charges at all	No	Other	Improve the roads (potholes line painting etc.)	Very negative	You would have to pay more to go to the hospitals (even more on top of the extortionate parking) It would deter me from going to Oxford at all. All of the efforts so far (LTNs for example) just make Oxford less appealing to visit.		Prioritise making more ways to drive into central oxford (fixing Botley road)
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	You are penalising people getting to work, going shopping. Already extortionate. No point coming to Oxford. Sort out Botley Road there will be oenalty clauses fines to be levied. Disasterous scheme proposed for Oxford footfall.	Dont do it	Cut bus prices apleal to the pocket.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	Neutral	Negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I think it is a good idea, overdue. I hope it will improve traffic in Oxford. I don't think it will be popular though.	No	Prevent people from driving schoolchildren to school. School buses?
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Roads conditions	Very negative	With the cost of life going up and as a father for 3 kids who need the money to feed my family this will add more and not necessary cost on me		Open all that roads you closed around cowley are
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all		Very negative	The cause of congestion also because of traffic filters, close of Botley Road, construction works. However, cars users are penalized by the council.	This is not solving the issue. Council members are lazy and not willing to tackle the issue. Only want to find an easy way out by imposing unnecessary charges on car users.	Reopen Botley Road and lift traffic filters. Don't force the traffic to the main road.
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	No congestion charging	Very negative	We cannot afford to pay anymore money	This will affect majority of people who are already struggling financially.	Make buses free
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Do not charge for cars	Very negative	I'm driving every day in Oxford for work. I can NOT afford to pay any charge for my car and I don't have possibility to commute with a bus.	Please don't change anything!!!! At least until the Botley Road will open.	

Survey Response												
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Very negative	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	Cycling often feels unsafe and bus journeys are slow due to car traffic. Any reduction in private vehicle use is very positive.	N/A	No
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I expect that in order to avoid the charge there is going to be a much higher use and suffocating congestion of the ring road and the roads that lead to the ring road.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	I live in Cranmer Road, I cant see how I can get out without using Hollow Way. If I need to alter the route to other small streets, there will be another congestion point. Please be considerate.	I live in Cranmer Road, I cant see how I can get out without using Hollow Way. If I need to alter the route to other small streets, there will be another congestion point. Please be considerate.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the existing roads which are some of the worst in the country.	Very negative	It will stop me visiting Oxford entirely. I won't spend money whilst shopping or for leisure in Oxford once its implemented. I will stop volunteering in Oxford. I will discourage my kids to choose schools in Oxford. I will laugh hard when the town centre becomes a ghost town full of coffee shops and charity shops. The stupid, dumb elected officials and council officers will ONLY have themselves to BLAME. They ruined the town with their stupid ideas.	Oxford is currently experiencing some of the best air quality its ever had. This is NOT the result of council policy, its the result of improving emissions from vehicle tailpipes as technology improves. Don't be idiots and pretend this is to improve the environment. It's about money and politics.	Get rid of the under used buses and replace with minibuses. Value the car driver. Finally come to the realisation that public transport doesn't work for commuting or school travel - it takes hours to get anywhere, its not direct enough and its too expensive. Enforce road safety standards on cyclists at the start of the academic year to stop poor cyclists behavior. Get the police out there issuing tickets.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	Not sure	Other	Better cycling paths which are safe	Very negative	I need to drop my baby of at nursery on Marston road every day. This means I will have to pay a 5 pound fee every working day. Considering the already high cost of childcare, this just adds an additional burden. Also congestion on the ring road is already terrible in the mornings. the crocossed chances will make it even worse.	Please do not put the Marston road congestion charge in place. There is a nursery there and this is an unfair financial burden just for dropping children off in the morning.	Create better cycling infrastructure, such as consistent cycle roots on Banbury road (at the Summertown shops there is no cycle lane so it's dangerous to cycle with children).
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	About right	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very positive	Less traffic means less congestion, noise and pollution. Road pricing is a proven method for reducing traffic.		Substantially restrict on-road parking, especially on bus routes, to improve traffic flow. Ban all pavement parking (including where already permitted), with strict enforcement and bollards/barriers where needed. Improve pavements to make walking less unpleasant - sort out the mess of bumpy driveway access, make footways continuous across side roads (or at least have reliable drop kerbs for wheelchairs and buggies).
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	Too low	Yes	Other	Parking at the JR and in the centre of town. Upgrade the a34 so i can bypass Oxford instead of getting stuck in the local traffic.	Negative	Makes visiting Oxford more difficult. Would likely travel to Milton Keynes instead.	Congestion charge is a far superior idea to bus gates. Fundamentally nobody wants to use the bus. For the 2 days a year i actually visit (i actively avoid Oxford if possible because travel by car is difficult) I'd rather pay even £50 congestion charge than ride a bus.	The buses are choking the city. I can't stop by bus or by bike. Just sort the roads out and provide adequate parking. Oxford is the only city I've visited that has these problems. There is congestion because the roads don't cater for free flowing traffic and the a34 needs to be a three lane motorway that doesn't serve local traffic.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	Too high	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	No impact	There should be no charges at all	Not sure	Other	I very much doubt they'll be any money left after covering the set up and running costs. It seems a complete waste of time, money and resources to set this up for as a temporary measure. I can't believe this is leaal.	Very negative	I have family and friend living in central Oxford that I visit regularly and it's not always possible to use the bus. Parking is already so expensive and with this scheme, we would have to pay even extra to accesa the simply access the car parks at the westgate & oxpens. It find it outrageous to allow the westgate carpark to be expanded to then charge people to access it.	I am completely against it, especially as a short term measure. A waste of time, money and resources that is gonna piss people off and move traffic issues to other areas. Still against it but it only makes sense to set this up if intended for long term use.	Improve public transport (times, routes & costs) continue educating people on benefits of cycling & the use of public transport.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Other	Improve cycle routes	Very positive	It should reduce car usage so improve bus services and make cyclists life less challenging.	Given the objectives of the scheme it is absurd not to treat private hire vehicles and taxis exactly like private cars, as the impact is identical.	Proceed as fast as possible with rail line to Blackbird Leys etc. Consider reintroducing minibuses which can be "booked" via use of an app. In other words the bus can carry say 10 or so passengers, and people give an advance notice of where they'd like to be picked up. An algorithm then sorts the best route and advises pick up times and locations.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add public cycle parking		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I commute to the central permit area by car	Positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	UK economy is going down if need charge for outside visitor or traveller how big impact for the SMALL SHOP and Restaurant? Affected employee cost go up!	First go change from 20mph back to 20mph Speed limited. Build more council car park at nearly city centre by from Four direction drive in. That road should be dual carriages direct point to the car park.	NA.
a representative of a group or organisation	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Negative	Make it expensive for me to collect or drop off family and other visitors who arrive at the station by train with luggage	Congestion charge will always affect the less well off far more than the well off who can easily pay £5 without any pain. If there is a charge it needs to be linked somehow to the driver's ability to pay. Not size of car alone, but also age and book value could perhaps be taken into account. Better would be to allow access to certain lanes/routes to buses only and also set up proper segregated cycles routes, thereby limiting car access. Or one-way systems with more capacity out of the city than in. Better than a charge would be a permit system based on need (resident access, workplace, essential services, etc.), or	Main key for cycling is properly segregated routes. A large proportion of people will not cycle while it involves being unprotected next to motor traffic. The recent changes to cycle lane painting has made cycling more dangerous, not less, as the markings are now widely ignored (e.g. Marsh Lane, Iffley Rd) and in some cases the addition of lane markings has encouraged vehicles to close pass (Marston Rd, St Clement's end) whereas previously a reasonable number of drivers would give more space. The 20 speed limits are also largely ignored. LTNs have clearly increased congestion on roads leading to the Plain as there are now no alternatives – some of the LTNs need rethinking, and the use of one-way roads, alterations to on-road parking layouts, and the addition of segregated cycle routes would help a lot (e.g. cycling down the middle of St Mary's
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Other	Build a tram system — Newbury to Bicester, Witney to Thame.	Very negative	businesses and other employers based in Oxford could be required to provide transport from park and ride sites for their employees. I think this is a terrible idea. I live in Abingdon and come to Oxford to spend thousands of pounds a year. If I can't get there I'll take my business elsewhere.	Please don't follow this ghastly agenda. Roads are for cars. We should be free to go where we want. This type of micro-management is not welcomed in the city. People will vote you all out next time if you go ahead with this.	Road between two ranks of parked cars isn't great, and when a motor vehicle comes at you at speed leaving you nowhere to go, it can be terrifying. This happens roughly 10% of the times cycling in that area. Obviously better and cheaper bus services would help – or better, light rail / tram systems which could be combined with cycleways and replace cars all together on some roads in and out of the centre except for resident access. Build an OUT OF TOWN SHOPPING CENTRE with its own easy parking and access from the A34 or M40. Botley would be ideal. Build a tram system like Manchester or Sheffield.
a resident of Oxfordshire living outside Oxford	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Scrap the scheme and reconsider.	Very negative	As budgets are tight, chances are this will be made permanent, hurting the wallets of Oxfordshire residents for years to come.		
an Oxford resident	weekly	Blue badge holders	I don't	Neutral	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all		Neutral			
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Negative	Negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	All it will do is push more traffic onto the ring road and increase congestion there. What happens when traffic has to be diverted due to incident? You will kill Oxford businesses as people will go elsewhere to shop.	Marston ferry is a key rd across Oxford...you will segregate the city. Meeting friends who live across Oxford will be difficult so will force us to meet out of Oxford and take our business elsewhere. Our teams go into schools on marston ferry to support students so that would stop as would not be prepared to pay charge.	Have more than one entrance/ exit to JR. Provide free parking/discounted train travel at all park and rides to staff at jr. Have a train stn on east side of Oxford. More direct bus routes from towns as we commute as we can't afford to live in Oxford. Adding an extra hour to my journey by bus each way is not aoceaible as it does round the houses
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	We need measures to reduce the number of cars on Oxford roads, and encourage people to use public transport or cycle.		Busses need to be more reliable, serve more routes, and be cheaper. Going East to North, South to North, or West to East are currently a real pain. Also why don't more busses stop at the station?
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Other	This is totally wrong there should be no fee to ho to Oxford	Very negative	We educate in Oxford, we use the hospital in Oxford and work in Oxford. My family provide trades in Oxford. You need to use incentives not punishment. LTNs and cameras are terrible ideas that punish businesses, residents, schools and hospital workers.	You won't listen as Oxford council just go through the motions of putting out surveys and ignoring the responses but this is a terrible idea as was the LTN and speed limit reductions that caused the congestion.	Move the Hospitals!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	Charging people money will not reduce the number of cars, just cause hassle and increased expense.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make buses cheaper for all, Add new bus routes		Positive	Traffic control measures so far have wonderful in terms of general well-being for me and those I know. In particular, the LTN barriers by Florence Park and Temple Cowley have made it much easier to sleep at night and socialise with others in the neighborhood. Two of the proposed locations for the charges St Clements and Marston Ferry Road) would hopefully bring this benefit to where I live now, which would be a very welcome addition to a scheme that's already helped a lot.		LTNs and the addition of good bike lanes has already helped immeasurably, so I suppose more of the same, while continuing to ensure bus routes reach as much of the city as possible.
an Oxford resident	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Positive	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Other	Extend Oxford area to Kennington - it's always excluded and is a suburb of Oxford	Very negative	How does this differ from the the trial gates proposed, such that this scheme can be introduced whilst Botley Road remains closed	St Clements literally cuts off the Church from churchgoers who drive!	Cheaper buses
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	The congestion charge won't cut traffic or pollution—cars will still come, just costlier. Oxford's transport hasn't improved despite promises. With more homes and people, traffic will worsen. This is just a money grab, not a real solution.	Very negative	I want to express my strong opposition to the proposed congestion charge scheme. While I understand the aim is to reduce traffic and pollution, this approach is fundamentally flawed and unlikely to deliver meaningful improvements. Charging drivers to enter congested areas does not eliminate congestion—it simply adds a financial burden. The same number of vehicles will still pass through, particularly those who have no alternative due to work, school, or essential travel. Pollution levels will remain largely unchanged, yet residents and workers will face higher costs in their daily lives. You claim that funds raised will be reinvested in public transport, as required by law. However, the reality is that Oxford's public transport has seen little to no noticeable improvement for years. Many communities remain poorly connected, and buses remain unreliable or infrequent—hardly a viable alternative to driving. The root issue is not just traffic volume, but rapid population growth and relentless housing development. Roads are increasingly overwhelmed, and without serious investment in infrastructure, no amount of charging will fix that. In fact, it's likely to worsen inequality, as only those who can afford the charge will be unaffected. This scheme feels more like a revenue-raising measure than a genuine solution. If the Council is truly committed to tackling congestion and pollution, it must focus on long-term infrastructure planning, improved public transport, and sustainable growth policies—not quick fixes at the public's expense.	The Westgate Centre should have been located outside the city centre. Its placement has increased car traffic in an area that is meant to be more pedestrian- and cycle-friendly. Additionally, concentrating retail activity there has negatively impacted traditional shopping areas like the High Street and the Covered Market. A more effective approach to reducing car use would be improving public transport connectivity—for example, activating a train station in Blackbird Leys near the Mini Plant. Better rail links into the city would give residents real alternatives to driving.	The Westgate Centre should have been located outside the city centre. Its placement has increased car traffic in an area that is meant to be more pedestrian- and cycle-friendly. A more effective approach to reducing car use would be improving public transport connectivity—for example, activating a train station in Blackbird Leys near the Mini Plant. Better rail links into the city would give residents real alternatives to driving.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Add public cycle parking, Other	rail	Positive	I live in Didcot and visit central Oxford from time to time. I will not bother to make use of the free 25 days per year to which I would be entitled as an Oxfordshire resident: when visiting Oxford, I will continue to park just outside of the city and finish my journey to the centre by bicycle, as I do at present. With reduced traffic, I would benefit from safer cycle ride into town, and also a more pleasant environment in the centre once I arrive. I feel that on balance I would benefit, even though I might face more competition for parking in the areas where I might park my car, from other motorists who might get the same idea as me to replace the use of the central car parks. It is unlikely that I would be persuaded to avoid the use of my car completely, although that might change if the money raised was used to bring down the price of local rail services, in particular a day return from Didcot to Oxford. The bus is not an attractive option because it is very slow, and takes nearly as long as cycling all the way from Didcot.		
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders, Disability benefit claimants, Disabled tax cars	I don't	No impact	No impact	There should be no charges at all	No	Other	Make the buses fully accessible for wheelchairs (they are not) - see the Denver 16th St. Mall buses on how this SHOULD be done.	Negative	The charge will significantly reduce the incentive to go to Oxford by many who will go elsewhere. The decreased footfall will affect Oxford generally but the Westgate especially, decreasing income and likley leading to closures - further reducing the incentive to visit and making Oxford even more of a Student dormitory than it already is. Oxford is only marginally more attractive that many other towns and West London as it is.	Why are the bus gates still closed to disabled/blue badge drivers????? I gave to exit the town centre, run miles around the ring road using a map ONLY available on paper or on the internet (where it can be discovered) and re-enter the city again by an obscure unsigned route just to move a few streets, This us descruminatory, especially for disabled drivers NOT from the Oxford reaion.	light rail
a member of the public living outside Oxfordshire	daily		I don't			There should be no charges at all	Not sure	Add new bus routes		Very negative	REDACTED	This scheme will particularly impact teachers and nurses as well as parents plus local businesses as clientele will not want to come into Oxford as traffic will be even worse on the already congested ring road	Have regular bus routes with multiple shuttle buses between 730am - 815am from Thornhill Park and Ride (and other park and rides) that go direct to schools such as OHS plus something similar at the end of the school day from schools to Thornhill. Other routes should be out in to suoport students / teachers commuting to the universitv
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of coeration for buses		Very negative	There should be a complete freedom of movement without any charges, anywhere.		Remove LTNs, build new roads, tunnels.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Negative as the people of Oxford shouldn't have to pay to drive in their own city as we pay to drive on the roads already. A dav out visitino friends and costino £5 after 100 davs in each zone is ridiculous let alone a dav pass.		No as you will be reducing tourism in Oxford which already brings in a lot for the city already.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very positive	A change is very much needed given the horrendous traffic issues in central Oxford.	Make it more expensive and reduce parking in city. It has to hurt otherwise people will not stop driving into the city!	Close Westgate parking
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all		Very negative	Living in the permit zone I have to work across Oxfordshire and there is already so much traffic on the ring road this will make leaving Oxford even more difficult	No	Make the ring road more effective, perhaps something like a bypass. There is so much congestion I can barely leave Oxford
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other		Very negative	I work in central oxford. Operationally I have to be in work for 8 am, and the earliest I can drop my baby to the child minder is 8am I therefore cannot rely on a bus and must drive. I already pay for a permit. I won't be able to afford to work with this charge	Read the room, you've destroyed Oxford enough with the LTNs.	Get rid of ltns
an Oxford resident				Very negative	Very negative	There should be no charges at all				Very negative			
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Very positive	About right	No	Make buses cheaper for all, Extend hours of operation for buses		Negative		Bollocks	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Very positive	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative	It will be impossible to get to the Westgate car park without passing through one of the congestion gates. This will lead to reduction in business. I will not be driving in to Oxford and instead will go to reading or Bicester to do my retail shopping. It will succeed in reducing congestion but at the side effect of killing business in the centre, be prepared for shops to move out of the Westgate!	A similar proposal was made in Cambridge and several big businesses including shops like Waitrose and John Lewis said if it went ahead it would kill business and they would move out. I would note John Lewis holds the biggest unit space in the Westgate and that the Westgate has been silent on the matter so far which I would think is not good news.	Get rid of the LTN's! There wasn't anywhere near as much congestion before these went in! You artificially created congestion by forcing cars from quieter routes on to already busy roads!!!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	The issue is over crowding and too many people, which will continue for as long as they keep building more and more houses. The traffic will stay exactly the same.	It won't work	Stop building houses use LTN's and give oxfordshire residents a set number of permits as you previously proposed invest in better shopping facilities outside of oxford...the reason most people come into oxford is the shops/restaurants etc in other parts of oxfordshire are crao
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Positive	About right	No	Make buses cheaper for all, Add new bus routes, Other	Improve cycle paths and create more cycle provision	Negative			Improve cycle provision. Create public transport routes around ring road
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	About right	Yes	Make buses cheaper for all, Extend hours of operation for buses, Add public cycle parking		Positive	Reduced congestion		Improve bike lanes at junctions. Too often bike lanes are good until a junction which is the most dangerous part
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Negative	Very negative	There should be no charges at all	No	Other	There won't be a surplus in the short term - operating costs will miraculously be excessive, and the vindictive inclusion of the access path to west gate car park will serve only to destroy value in Oxford as a retail and leisure destination	Very negative	I view the inclusion of the stretch of Thames street required to access westgate car park as extremely vindictive	This will drive businesses, retailers and leisure out of town. Will kill the (fabulous) Christmas market	Park and rail from didcot, parkway and the science park.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in... SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	With the cost of living going up and Oxford being a VERY expensive city charging people is just a money grabbing exercise to line the pockets of the council	People who impose these charges should live in the areas it will affect so they can see first hand what it will do the people's travel and daily living	Remove some LNTs
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	This proposal is likely to severely reduce visitor numbers to Oxford - not the organised tourist visits but the Oxfordshire resident and casual visitors who spend time and money in Oxford. The effect of this on businesses in central Oxford will be catastrophic. Already parking charges are excessive and adding a congestion charge will make matters so much worse. It is likely I would visit Oxford less frequently (if at all) and towns like Newbury and Reading will benefit from me spending time and money there.	This is a very bad proposal, I'll thought out and likely to be catastrophic for Oxford.	Reopening Botley Road to through traffic asap will reduce pressure on other routes into the city. The City needs visitors to spend money to provide a thriving and attractive place to visit/work/live. So, do not drive visitors away. Park & Ride is not appropriate for all shopping visits and there needs to be a way of encouraging genuine shoppers - perhaps a discount scheme for P&R users and free short time parking for shoppers to collect their purchases - OR a speedy free transfer of purchases to P&R sites?
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I don't	Neutral	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
a business	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	As a business I have staff who are required to be onsite at different hours of the day, in addition I think contractors and clients will be put off visiting Oxford due to the extra tax. This scheme will negatively impact Oxford Castle and prison tourist attraction. This area is already see a drop in visitation, this will negatively impact the business in this area and the staff who work here.		Add an official coach drop off point outside the castle quarter.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	My house overlooks London Place and the daily traffic jams and associated noise and air pollution since the introduction of the LTNs are a very serious nuisance.	This will be the most positive thing to have happened to Oxford in my lifetime. If you want to live and work in such a special place, you need to be willing to make some effort to preserve and improve it. The scheme isn't ambitious enough, but it's a good start.	In residential areas like Morrell Avenue, it would be very helpful (and very cheap) to put up 'residential area' signs like they do all over Europe, e.g. with a picture of a house and a child kicking a ball. Many people who commute into Oxford, and speed and hoot and have illegal modified exhausts, behave as if no one lived alono their route.
an Oxford resident	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Other	Fix the terrible roads which are an embarrassment. Oxford is a famous tourist location but some of the worst road surfaces. Seen better roads on a safari	Very negative	I was born and raised in Oxford and now work for the local NHS organisations for last 20 years and can 1000% say for sure all the measures the OCC have tried in past years have done nothing but make traffic worse!!! From Cowley Road, St Clements, High Street, St Aldates, even in Littlemore - all have had a negative impact. What amazes me is why no one is asking for the OCC to provide any credible evidence of any 'improvements' any of the previous restrictions have had? The perspective from people living and working in Oxford - it has got consistently and increasingly worse for the last 20 years. Perhaps a reform of the Council is what is needed as clearly you are all out of touch.	Remove the ring road & implement a bus gate Remove the previous traffic restrictions imposed as they have only made things worse. Consider new routes in and out of major hotspots (including JR, Churchill, Botley,) consider new moder innovative methods to reduce/mitigate congestion on the ring road and a34 due to breakdowns or crashes (I drove past one yesterday 22/06/2025 20:30) and it was due to a lane closure where a single police officer was having a pleasant conversation with the recovery truck driver(!!). Invest and make Oxford a smart digital city, with intelligent cloud connected traffic lights that sense/detect if no need to go red Ona schedule if not needed to keep traffic flowing + better for the environment, less emissions and less congestion. Remove 20mph zones they are waste of time and only causes more congestion and frustration. Create a multi storey car park at the JR and Churchill Hospitals for staff and patients. Free parkina for patients at all NHS sites.
a resident of Oxfordshire living outside Oxford	daily		I don't	Very negative	Very negative	There should be no charges at all	No			Very negative	this charge will prevent me to come into Oxford to experience social events, and will strongly limit my quality of life	No to this charge,people suffer enough from waiting in traffic and high parking fees, don't make it easier for rich vs poor to enjov Oxford	expand the roads, build more parkings in the city, build a tram
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders, Disabled tax cars, School students with special educational needs, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hosoital patients. Drivina instructors	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	Remove the low traffic neighbours and you will be resolve the traffic issues you have created. I've lived in many different places, I'm usually in favour of green policies but when they are reasonable. You can't have all traffic going through only one place (the plain roundabout). LTNs have made traffic worse and create traffic jams that are one of the most contaminating thino.	Stop doing stupid things, remove LTNs and accept that schemes applicable in other towns don't work in Oxford.	Unless you can take down some houses and buildings you cannot cut streets for the LTN. Since you implemented the LTN travels by bus are taking longer than before due to the additional traffic you have generated in the Plain. Moreover, that extra traffic is also annoying and more dangerous for cyclists. Remove LTN and stop implementing stupid schemes that are not applicable for a city like Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Extend hours of operation for buses, Other		Very negative			
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders, Disabled tax cars	I don't	Neutral	Neutral	There should be no charges at all	No			Neutral	I would get a free pass anyway	My partner would not automatically receive a free pass, but does need to enter these areas for business on occasion so shouldn't need to sav as her business mav suffer.	Remove LTNs
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Add new bus routes, Extend hours of operation for buses		Very negative	Oxford is an expensive city to live in so people have to commute in. It is all ready hard to recruit teachers and this will make it harder		Remove LTN
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Negative	I don't want to pay to visit my home town and it will push more traffic onto the already congested ring road that I sit in traffic every week when visitino my mum.	I will not visit Oxford for shopping, food or theatre any more.	Stop blocking all the roads with LTN and let cars use every road to spread the load.
an Oxford resident	daily	School students with special educational needs	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Not sure	Other	Free park and ride	Very positive	Too busy more public transport services	There should be no charge	Park and ride is the answer
an Oxford resident	daily		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Re open gated roads they cause the congestion & more pollution people have to do more miles each day & it causes delays all it's done is treble the amount of pollution in oxford overhaul what a way to waste money	Very negative	Already have it's the gated roads causing the problem & wasting money on stupid so called safety features like painting white picture of a bike on the road every road user already knows bikes use roads next yue be painting picture of people in case they cross the road no common sense anymore just stupidity fix the roads use the money wisely instead of wasting it every time the road needs repair the picture have to be repainted causeing longer road delays & increased cost also get someone to check out the traffic lights at the bottom of rose hill they need a filter for turning right it turns red before cars can turn	Yes scrap them stupid idea trying to fix problems caused by you	Use common sense
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Very negative	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	I cycle and use the bus. Fewer cars will make my travel quicker and safer.		Restrict drop offs at Magdalen College School as it blocks traffic on the plain Improve cycling infrastructure - better bike lanes with more separation More regular buses with no increase in fares, to provide the transport capacity to replace car journeys Pursue Cowley train station proposal
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	I can see no other improvement	Very negative	This is nothing more than another anti-car revenue generation scheme dreamed up by Andrew Gant and OCC to replace the debaved income from the traffic filter revenue generation scheme. sorry "trial".	I believe this consultation is purely to satisfy the legal requirements of introducing this extra local tax on cars and car usage. I further believe that OCC will ignore anv obiections raised and proceed with its introduction.	
a business	daily	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Other	How about fixing the Eynsham park & ride scandal!	Very negative	As a business owner with myself & staff teaching the most vulnerable children in the city this is going to have an enormous impact due to the increased traffic	Absolutely awful idea, look at the chaos the LTN's have caused.	Re open the LTN's.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride buses cheaper		No impact		Utter nonsense	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too low	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Positive	If it reduces traffic going into the city it will be positive.	Why does it cost less than a return bus fare? It should cost more ...	Limit parking at Westgate. Sanction private schools for not encouraging more use of public transport. Stop coaches parking on iffley road at peak times.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Neutral	I do not think these areas will be temporary since the closure of the Botley Road. It is difficult for people from my end of Oxford to get into town for those who are mobility impaired need to be able to get into Oxford maybe even just to go through Oxford to get to there GP surgery, going around the Ring Road is not always viable because of accidents delays it just quicker to get through town to get from my end to Walton Street to the Jericho health Centre and for other patients that go to the Beaumont surgeries you have other people that go down through to Cowley Road surgeries and to get 23 buses is not really very good for people. Also cars are now much cleaner a lot less emissions than they was 20 to 30 years ago. They are more efficient there are other reasons for the pollutions not lust the vehicles.	I think I said everything I need to in the above statement.	Public transport better and a lot less price more local services on public transport perhaps then you will reduce the congestion in Ox
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people		Neutral	It's clearly negative not just because of the cost but also the admin of paying the fee. I appreciate the need to reduce congestion. I do no think this will relieve congestion on the A40 which is an extreme bottleneck. Without this relief the improvements to bus times from Witney will be marginal.		I often come in from Witney to take family members to the coach station in Gloucester Green,. Can you work with coach providers like National Express to ensure all coaches also stop at one of the Park and Rides, like Ashhi and the Oxford Tube? Likewise you could ask Great Western to ensure that all trains that terminate in Oxford carry on to Oxford Parkway so that it is easier from people out of town to commute without adding unnecessary congestion at peak times?
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	All traffic currently diverted due to Botley works will end up causing congestion via the main routes. Peak hours continue to be heavily congested for drivers. I used to commute to the JR by bus from Abingdon but buses getting home often take 1 hour 30 and more sometimes to get me home whereas my car can take up to an hour. If I were able to cycle I could make it in an hour but cycle paths are not safe		Better management and most importantly communication by the council when coordinating continuous road works.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for young people, Add public cycle parking		Very positive	Current system is unsustainable and pricing scheme is the only alternative.		
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Add new bus routes		Negative	It will put me off visiting places in Oxford		Circular route buses
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	You will price poor car owners out of Oxford, the rich will be fine..	Don't do it.	Make park and ride free
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	I don t go to Oxford if I can avoid it. It's difficult to get into if you need to drive in. park a ride only works for some visits. This is another reason not to go to Oxford		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for young people, Make bus services more frequent		Very positive	We need to get a collective grip on this		
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative			
a member of the public living outside Oxfordshire	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars		Negative	Very negative	There should be no charges at all	No	Other	NO CONGESTION TAX ITS PURELY AN UNWARRANTED PENALTY	Negative	Taxation by deception	There is no justification for any introduction of a further tax on motorists. This is just a political move to justify more control over people's movements.	Traffic = commerce = more businesses = more financial expenditure = taxation = revenue for services. Congestion charge = less commerce = less business = less financial input = NO TAXATION = reduction in local government services. Improve the road surfaces,
an Oxford resident	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	No impact	No impact	Too high	No	Make buses cheaper for all		Very negative			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Negative	Oxford businesses both hospitality and retail are already struggling with reduce footfall and I think this will negatively impact them further.	I think hollow way and marston ferry road should be mon to Friday and to reduce the afternoon time to 3-5pm.	Reopen the LTN
an Oxford resident	daily	Blue badge holders	I don't	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all		Very negative	No congestion charge or bus gates It's a ridiculous idea	Do not introduce the congestion charge Take away the LTNs Let Oxford flow like it used too Do not kill Oxford	There is connection because of the current ltns Remove them then hey presto no congestion. People need to get to work etc. do not kill Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I will be even less able to recruit staff to work in East Oxford where traffic is abysmal as a result of current infrastructure, and commuting costs are so high for public transport	Clumsy and punitive, all sticks and no carrots approach engenders disgruntled driving	Bus hubs around ring Road to reduce number of mostly empty buses on roads such as Cowley, where at 0745 on a Saturday morning there were 10 buses lined up for 1 bus stop, and no more than 7 people on each bus heading to the Plain roundabout
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Negative	Negative	Too high	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative			
a resident of Oxfordshire living outside Oxford	less than weekly		I commute to the central permit area by car	Very negative	Very negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very negative	Too expensive and you statement on where the money is going to to very woolly,COULD make the buses cheaper and it will pay for the permits ?	I will stop going to Oxford, you already messed us Botley Rd works and didn't put any pressure on the works to get sorted quicker	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Open the Park and Ride at Eynsham which is currently a £60 million black hole	Very negative			According to INRIX, and my experience of living in many other cities worldwide, I don't agree that Oxford is unusually congested except where the council has interfered (LTNs) or abjectly failed to manage the roads (Botley Road closure). According to INRIX there are around 110 British towns in the top 1,000 most congested worldwide - Oxford not amongst them. The council publishes no data to support its assertions - a cursory look at the data suggest traffic volumes are at the same level as 2014. Suggestion : improve public transport, make it cheaper, and a natural equilibrium will follow. The other thing which could be done is to stop the daily parking of buses in St Giles and side roads instead making them park in Park and Rides
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure			Very negative	Just keep squeezing residents for money that's all this is, as if the University doesn't generate enough funds for Oxford already	Not in, this is Oxford not London where millionaires can pay to go shop in central London	What traffic congestion, it is another council ploy to get the residents and visitors to pay for the botched up botley road works that have disrupted lives
an Oxford resident	weekly	Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes		Very negative	I have 3 kids. We have a long car. 2 are home educated, we don't receive any help. We travel with the car to do activities. Congestion charge is horrendous	Don't do it. Remove all the LTNs created the last 3 years, they have generated traffic, pollution and more time in cars. Cowley has turned in a prison. Iffley to Headington has multiplied the commuting by 4	Remove LTNs set in the last 3 years

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	Too much control over my life by council /frauds Punishments, We are already paying a lot in council taxes , other taxes and this is another charge introduced by council	Make our lives more comfortable do not punished us for everything!	Free bus service for all residents (money paying in council tax should cover this)
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	There should be no charges at all	No			Very negative	Traffic levels in Oxford are down compared to 2019 levels. Acute congestion is due to a reduction in road capacity, owing to the East Oxford LTN scheme and the systematic reduction in road space, including at junctions, as a direct result of council policies. Council modelling has shown this. The congestion charge did not appear in the Lib Dem manifesto and is deeply divisive, ill-thought out, and will harm professionals. This includes doctors who work non standard/antisocial shifts where at least one limb of their journey is in charging hours. The Liberal Democrats risk a permanent fracturing of trust in democracy if they continue to aggressively proceed in imposing their radical ideology on the people of Oxford. There is no public support for this removal.	There is no need for a charging point on the Marston Ferry Road. This road is not a residential road, provides critical access to the JR for summertown residents, and is a strategic communication between Marston and Summertown. Please remove the Marston ferry road from the scheme if the council feels compelled to impose it nonetheless.	Removal of the East Oxford LTN scheme will immediately and permanently resolve the acute issues at The Plain roundabout and the surrounding area. Reversal of the 20mph policy will increase road capacity. Reversal of the quick ways scheme by re-instating the central lines on roads, and removing underused cycle lanes. Appointing a 'Democracy Tsar' who advocates for the protection the public's wishes.
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Disability benefit claimants, Disabled tax cars, Unpaid carers, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Other	Allow cars to drive to ice rink	Very negative	My 2 children play ice hockey , this is already a very expensive sport and to now add more money onto my trip is criminal . I would worry the ice rink would close!!! E		
a member of the public living outside Oxfordshire	less than weekly	Blue badge holders	I don't	No impact	Very negative	There should be no charges at all	No	Other	It's a stupid idea	Very negative	People will avoid coming.	It needs scrapping before it's started. Just a money grabbing scheme. What a disaster for local businesses.	It's not necessary
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Charging drivers simply for using the roads is unreasonable—especially if cyclists, who are also road users, are not subject to the same fees. I don't understand why motorists should bear the cost of funding this project. It feels unfair and counterproductive. Rather than investing time and resources into a project that adds financial burdens without clear benefits, it would be wiser to reconsider the approach. This could help reduce unnecessary spending. Moreover, implementing such charges is likely to discourage people from visiting the city center, which could significantly harm local businesses. Less foot traffic means fewer customers—and ultimately, less revenue for those who rely on daily visitors.	This survey contains leading questions that seem designed to steer people toward agreeing with the temporary congestion charge proposal. It's not a fair or neutral way to capture public opinion. As a result, it doesn't truly reflect what people actually think or want to say. If the goal is to gather honest feedback, the questions need to be balanced and unbiased—otherwise, the outcome is misleading and undermines public trust.	Traffic Signal Optimisation: Use smart traffic management systems to improve traffic flow at key junctions, reducing unnecessary idling and congestion. Enforce Existing Regulations: Tackle illegal parking, double parking, and blocking of bus lanes, which often cause avoidable delays and congestion. Pilot Non-Monetary Schemes First: Before introducing charges, trial non-monetary interventions and collect data to see if congestion goals can be met without imposing extra financial burdens on residents and visitors.
a resident of Oxfordshire living outside Oxford	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper		Very negative	I work for NHS and will not be able to afford to regaurly visit vulnerable family if this charge comes into place. I take them to hospital and out of oxford. They cannot drive. It has taken me 9 hours at most to leave oxford via the ring road. It on average at busy times takes me 2-3 hours to leave oxford via the rino road at busy times.	Not st clements. St clements is only busy at peak times when people are going to and from work and leaving school. ie 8-9 ,15-17. Other than that it is clear.	Have taxis and busses use alternative routes , reccomend businesses have different staff rota times, open up side roads to ease traffic on main roads.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	I will avoid Oxford. There are other shopping centres offering the same shops like Cheltenham. I can drive to Cheltenham in the same time it takes to get the North Leigh bus to Oxford. The traffic through Wolvercote roundabout won't change so our bus won't be quicker! My husband has to visit the Churchill Hospital 3-4 times a year for check ups and it's not right he should have to pay a concestion charge.	I can't see this being "temporary". Once the council have their income stream they will not want to lose it!	Sort out Wolvercote roundabout. Put the bus lanes in from the park and ride at Eynsham,oops there's no entrance there yet! Another council cock up!
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add public cycle parking		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I will not go to Oxford again if charges are put in place.	The cost to run this will be under estimated, larger profits for those that run the scheme! Do not trust this yo improve buses or make them cheaper.	You are doing it! Introduce the charges and people will go elsewhere!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	We do not need to commute into town. Whenever we need to drive into town we can use a free permit so it wouldn't affect us except an admin overhead to activate some day pass or so	I'd expect that people would try driving around the sites. Wouldn't it be useful to put one system on each road into Oxford right by the ring roads rather than at the central location	For my family it is already very convenient to come into town by bus and bike. Sometimes my wife dreads going into town by bike because of fear of bike theft. That would be my only improvement. Add more cctv bike parking spots to deter bike theft and more oeople would be a le to leave their bikes with more peace of mind.
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I travel to Oxford for my daughters to do ballet. Due to timings and location of the ballet we do not have the time to catch two different buses to reach the location. I would therefore have to pay the charge 4 times a week and this adds extra costs and if this is the case I'll have to stop their ballet.	It just not required and Oxford is already difficult to reach or enter by vat	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	The scheme does not appear to cover Banbury Road and Woodstock Road, both of which I use daily and are very congested during the week, especially during school term time. It seems crazy to introduce a scheme that does not cover one of the main problem areas.	I don't see that the proposals will actually reduce congestion but will simply serve as a way to impose 'fines' on drivers for very little benefit in return.	Stop building / allowing the building of more houses in the edges of Oxford - this is simply adding more traffic to a road system that already cannot cope with the volume.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very negative	All car parks are in the congestion zone.	The cost of parking in Oxford AND congestion charge.	Increase bus routes, reduce bus costs. I know the infrastructure is no longer there, but trains!!! We love to use the train routes, but for us to get to our nearest train station we have drive 10 minutes, but then the local trains have been unreliable for us in the past too. We only have 1 bus an hour to Oxford, and that is unreliable, being late
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	Too low	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Positive	I feel there are too many exemptions and there will still be a lot of traffic.	I absolutely support the proposal as I frequently take buses. I would like fewer drivers to be exempt from the filters as there will still be a lot of traffic as it stands. I would also like the daily cost to be higher, at least as high as the cost of two single bus tickets , as it would still be more cost effective to drive into Oxford than it would be to catch a bus.	All the improvements to active travel have really helped, but these need to go further. For example, cycling along Cowley rd is still dangerous due to the amount of traffic, and the number of parked cars create a risk of being 'doored'. I would like bus travel to be free (or much cheaper) for children and young people to encourage families to travel via public transport rather than by drivina.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Businesses will be impacted as you can no longer just pop into somewhere like the Westgate now. Every journey would need to be planned in advance. Going to the theatre will be something I'll look at booking at a different venue.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes		Very negative	It will push even more traffic onto the ring road, which is already extremely congested because of the LTns. I have no alternative but to drive as my home and place of work are not on an accessible bus route. Adding to the pollution by getting even more vehicles to sit in queues cannot be a good thing. It already takes twice as long as it should for my journey. I would have to consider leavina my iob.	No	Yes open the ltns again and let traffic flow freely, then people would not be frustrated and would not be sat in queues and adding to pollution. Understand that not everyone can access a bus route to their place of work and that people have too much luggage too so that public transport is not always a viable option.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	It's a city not a meadow or a nature reserve! You are supposed to move freely in your car not calculate every journey fearing fines and taxes. You can't take away our freedom of movement however way we want. You can't introduce bus filters, congestion charges or LTNs. These block people 's freedom essentially. Remove and drop all this nonsense at once. We pay high taxes in an expensive city/ region to be able to move freely not to be stuck, isolated, forced to pay. There too few buses, they should be every 5 minutes everyday of the week, and over night, in Oxford and the wider shire! It's lack of civilization to not have public frequent transport. £5 per journey is unacceptably expensive for such a small town. A few minutes on the bus for £3 is enormous!! No LTNs, no bus gates, no congestion charges, buses every 5min every day of the week and at night, cheaper bus tickets.	Stop coming up with ridiculous ideas	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	There should be no charge people commute to work to spend less time travelling and more time with the family	Very negative	You should not charge people to come to Oxford, Oxford is already known as expensive to visit and you want make it even worse	Just don't be greedy	Open botley road
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	Likely to hit businesses, people with physical disabilities, and poorer people harder than anyone else - surely a failing in Oxford's statutory responsibilities	Many aren't busy outside of term time	'- Remove the traffic filters
a resident of Oxfordshire living outside Oxford	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Other	This shouldn't be happening. The scheme will inevitably be miss managed and will cost more than expected due to council inefficiencies	Very negative	It will impact businesses and make Oxford even less accessible to visit. A once great city to visit. Now off my list as I would rather visit reading or Swindon		
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Improve the roads	Negative	The road system in and around Oxford is disgraceful. Why it should take 40 mins to drive down Abingdon Road is beyond me.	Why is there a charge to drive to Westgate	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	No	Make bus services more frequent, Add public cycle parking		Very positive			Better cycling infrastructure!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Very negative	There should be no charges at all	No	Other	My view , we only have issues around Marston when the private schools are in term time . Most Swan school and Chenwell kids use bikes and I avoid the area . Personally I need to get to visite my elderly mother everyday and visited the JR .	Very negative	Stop making it harder to live in Oxford just close roads at school time not charging residents to get around	Stop what you are doing and remove the LTNs and congestion charge , leave Oxford alone . Unless you build a new hospital Marston will always be blocked	Just have restricted access for areas at busy times but better bus routes
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Business cars used as goods vehicles	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	The reason for congestion at the moment is the closure of the botley road. You should not do this until all roads are fully open and then see how traffic flows. I cannot get to work in a timely and low cost manner in time by public transport from outside Oxford and I cannot afford to live in the city. This is the case for many		More services from Bicester and joint train and bus tickets
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Don't bloody make this stupid idiotic change this absolute moronic of councillors doing. Please leave the residents of Oxford alone. You've effed our life enough with your LTN, now you want to make us suffer more like we are animals?	Very negative	This proposal will have a very negative impact. You've already destroyed communities and livelihoods with LTNs — now you're making it worse. More congestion zones mean more suffering, more division, and more cost for ordinary people. Enough is enough. Scrap this madness before you do irreversible damage.	Yes — stop punishing residents for simply trying to live their lives. This isn't about climate or traffic; it's about control and draining even more money from us. You're already making enough from council tax, parking fines, and LTNs. Now you want to add more. These "temporary" charges always become permanent. We're not your guinea pigs. We're fed up, and we're not backing down. Listen to the people — not your aaenda.	Yes — remove the damn LTNs. They're the root cause of all the traffic and chaos. You created the problem and now you're trying to charge us for it. Reopen the roads and stop making life harder for everyone.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	This would solve my issues in terms of running two schools but would significantly impact my parents who are old and struggle without their car. I am not sure how this will impact on the traffic and I wonder if there are more pressing issues to solve.	Why is Kennington not a 100 ticket are? If everyone in central Oxford has a permit will it actually reduce traffic because all of those people can drive wherever they like? Will the commenting passes allow you to drive anywhere?	Free park and ride parking Permit parking in areas such as Kennington to prevent the commuter slide where people park on the streets to avoid paying for parking. Safe bike routes from all park and rides so that commuters who want to cycle into town can. Much cheaper buses. Free school transport (bus passes) for all children which can be used Mon- Friday between 7-9am and them from 2-7pm
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	Too high	No	Make buses cheaper for all, Add new bus routes		Negative	Getting to places where travel kn rongroad is involved is already awful, but it will get worse. Travel time will not reduce but increase if ring road is used. My colleagues at work already complain about travel time and are thinking of quitting. Most of them live outside of Oxford.	We do not need them, just as we need to remove the LTNs	Buses need to be cheaper or even free. We need trams, rather than more buses.
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral		No	Add public cycle parking		Positive		If you use a permit/pay the £5 charge will it cover you to drive through all of the 6 check points for the day or are they each run seperately?	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	Remove LTNs to improve traffic flow back to pre-pandemic levels	Very negative	We travel to oxford primarily for cultural events, theatre (long time members of Playhouse etc). This proposal will reduce greatly the number of times we do this. My wife has MS, so bus and cycle are not an option, she doesn't however qualify for a blue badge. This change is nothing short of discrimination against people who are disabled but not quite disabled enough to get a blue badge. I feel this will end up in court action against the local council as it is a form of discrimination pure and simple, if you aren't well enough to ride a bike or walk to a bus you can't come in. Local businesses, restaurants and theatres will suffer from these proposed changes. Driving in from Abingdon takes just 11 minutes at 4:45pm for theatre trips. There is NO traffic at this time. The draconian times chosen for the charges are a sledge hammer to crack a very small nut.	Having lived in other cities Oxford, apart from a very short period during morning "into the city only" and evening "out of the city only" does not have a traffic problem. A much shorter time window on the charges would make more sense, so 6-8am and 4-6pm. Leaving charging in place until 7pm means no theatre trips for an awful lot of people with reduced mobility. Thames Street is a particular culprit here.	Open up the failed LTN experiment. Make all bus stops lay by type stops so a bus stopping doesn't hold up the flow of traffic each time they stop. Make the system fairer in their location, remove Thames Street, being next to the shopping centre that one makes no sense at all - and put some in the more affluent northern parts of the city too, although I understand that effects your core voters so is something you'd be reluctant to do.
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders	I don't	Neutral	Neutral	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It wastes money to set up a temporary scheme. It further enhances the existing mood that you must be rich to exist in Oxford and is divisive and excludes people. The bus service is unsuitable from villages and this move will destroy the struggling retail sector		Make the park n ride free or very very cheap. Hurry up and open the Eynsham park n ride
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I don't travel into Oxford more frequently than a couple of times a month maximum, but I do choose to drive when I do. Living in Thame, the bus service takes too long and it is much easier and more convenient to drive in. Yes there are routes that can be used that would not involve the permit areas, but I believe the introduction of this would just push the existing congestion to these other roads. I don't think that this will have the desired outcome of encouraging people to use the bus service more frequently because it doesn't address the issue of the length of time of the journey and the lack of convenience. It seems unfair to pay £5 each time and actually, it would be most likely that we wouldn't go into Oxford as often and if other families feel the same, this may reduce shopping and visitors to the town centre.		Improve the safety of cycle lanes, but look further afield. E.g cycle lanes in Oxfordshire (not just Oxford city). I imagine most people driving in live in Oxfordshire and not Oxford city, so you're not really addressing the target issue.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disabled tax cars, Unpaid carers, Frequent hospital patients, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	It's an absolute Joke.	Our city is already ruined. This will just about kill it off.	LTNs get rid. More parking locations that don't extorte people.
an Oxford resident	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Get rid of the LTN. Open up all roads and stop congestion! Not rocket science	Very negative	I pay road tax and council tax so why would I pay this. I travel around Oxford every day, it's hard enough as it is		Get rid of the LTN. More buses
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Emergency service vehicles	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses, Add public cycle parking		Very negative	It's just going to make the alternative routes to the city centre ie. A34 and Abingdon road even more congested. I shouldn't have to pay £5 to get to work in the city centre because you've kept Botley Road shut an inordinate amount of time.	Don't do it.	
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car		Very positive	There should be no charges at all	No	Other		Very negative	This scheme just moves traffic to other areas of the city when access is already limited due to the Botley Road closure	It will not be temporary, it is too expensive to live in central Oxford and this will make it impossible for workers to travel to work around other carino resonsibilities	Stop closing roads for so long and spread traffic routes to avoid congestion
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	No charge	Very negative	Get botley open first		

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on davs of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	weekly	Blue badge holders, School students with special educational needs, Unpaid carers, Frequent hospital patients, Taxis and private hire vehicles	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	congestion on other rds making them very difficult to get anywhere? Just like the other rds that you have blocked off in Oxford		Cycles should pay some kind of rd tax as they take up half of the rd
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Stop messing with the roads	Very negative	Limits times we can visit family. Oxford will no longer be a place to go to shop because of poor access	This needs to stop it another form of tax. People that don't live in oxford make rule that don't affect them	Traffic was not that bad till this now all traffic is forced onto road that cannot cope
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Other	No charges	Very negative	Have lived and work in Oxford all my life and will no longer be able to drive to the Westgate car park without paying charges. We will no longer visit Oxford if they come in and will look for alternative shopping centre.	Temporary congestion charge before filters are imposed on residents living in Oxfordshire is unfair as only wealthy people or students can afford accommodation which would be eligible for permits. Most people born in Oxford have had to move away from centre ring and need to travel by car to access centre Oxford and Westgate to maintain links with our roots.	Bicycles are making Oxford city dangerous for pedestrians. They should be stopped driving through the town centre. Bicycles are going through red traffic lights and cyclists have no lights on when it is dark. We need cyclists to be policed in same way the council is targeting cars.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Yes	Make buses cheaper for all, Extend hours of operation for buses, Add public cycle parking		Very positive	The traffic on the Cowley road is unbearable, anything which reduces that is a huge positive.	No.	A park and ride near the top of Cowley road.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Positive	About right	Yes	Extend hours of operation for buses		Neutral	Because you are introducing a system that allows those who are better off to pay to go where they want.	Put the cameras on thr ring road entry points and don't properly.	You should have built the hard hat by passnround the north of Oxford years ago to divert the A40 from the ring road. There should an alternative road to the A34. It is ridiculous that the Oxford Ring Road has 2 major trunk roads that slow down traffic in and out of Oxford. If you are going to have a congestion charge then do it properly and target those people whondrive into Oxford every day and park in their free work parkinc spaces.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	Hopefully it'll ease congestion and drive more people coming into Oxford to use the park & rides.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent		Very negative	The only alternative route to get from one end of town to the other (our daily commute to school), i.e. the ring road, is already congested during peak times, this will only make the situation worse. The alternative route needs to be improved first, if throuch city traffic is to be rerouted.	Think about the change's impact on other routes not just the city center.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Neutral	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very positive		£5 charge is less than the cost of travel using buses currently	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Positive	About right	Not sure	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very positive	I commute from Kidlington to central Oxford by bike and the traffic jams make this much more dangerous for me. So anything to reduce the traffic will help me		The bike lanes on Banbury road are not fit for purpose. Also not enough cycle racks in central Oxford. Do this and more people would cycle. Also something needs to be done about the junction at Marston ferry and Banbury rd. Lots of drivers are confused about the lights and cause worse conxestion bv stopping mid junction
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Better car parking in city, make park and ride completely free	Very negative	We are health care workers working at the OUH sites. We work shifts and on call sessions. It is not feasible to use park and ride due to emergency on calls and the need to be at the hospital fast. We will not be able to get to the JR or transfer to NOC or Churchill quickly due to this system. Avoiding charges will mean diverting via ring road and sitting in traffic whilst patients are sick and or monbund. This will add to the burden on hospital workers as getting to their shifts will become more arduous and or costly. The health care system in Oxfordshire is struggling due to low wages and high living costs all this does is make that worse. You need to think very carefully about unintended consequences for staff especially low paid. This system is poorly considered and plain stupid	Free parking and ride schemes for tourists/visitors.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I try to avoid Oxford when ever possible these days as parking is so expensive. If I have to go somewhere, as does happen, I don't want the added stress of further payments. I used to visit Oxford frequently, two or three times a week for shopping and socialising, spending money on each occasion. I now visit other local towns and cities where parking charges are more realistic, Newbury, Witney, Banbury and Winchester as examples.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Very negative	This will only achieve - outlying areas being used as unofficial park and rides even more than already are (for example Wolvercote, Kidlington), causing further financial hardship to business and residents who don't qualify for a permit at a time when the city is already on its knees and will just push the traffic elsewhere not remove it	Having been told the bus gates cannot be implemented until Botley Road reopens this scheme is a thinly veiled attempt to bring in the same under a different name. Stop treating the residents and workers of the city as your personal piggy bank. The very fact that tour coaches would pay zero charges only supports this feeling	Make the park and rides and bus services cheaper so people can actually justify using them. I only live just outside the city but for me and my partner to come in with the bus still costs. C £10 - driving considerably less.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Neutral	There should be no charges at all	No			Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearsers and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	Terrible idea		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Negative	There should be no charges at all	Not sure	Make buses cheaper for all		Negative		I work in Central Oxford for more than 100 days a year, so this cap would make my commute more difficult for most of the year	
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Not sure	Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Everyone will use the Woodstock road.		
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	None	Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Positive	As long as Oxfordshire residents get the permits I'm good with this.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	All policies and measures which deter people from visiting the centre of Oxford contribute to the continued and accelerating hollowing out of a once vibrant city. No one chooses to use a car if there is any other viable option. Retail is being driven out of the city as more people have no option but to shop elsewhere or online	The bus operators have already declared that the major cause of their current difficulties is the introduction of LTNs, but this seems to have been ignored. Your protestations that the congestion charge is to improve bus journey times is utterly spurious	Fine cyclists who fail to use cycle lanes which have been created - at huge expense - for them. A 21st century public transport service with smaller buses but more frequent services which are accessible to those who live some distance from a main road
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	No	Other	Alot of the congestion is buses , especially st clements , barton , cowley road , oxford road littlemore with the high majority of the day these buses are completely empty , i was hit of my bike my a bus and left disabled but you only focus on cars	Very negative	Too many empty buses on roads , you talk about safety and congestion but a high majority of congestion is the buses , barton alone have buses take breaks on a blind cross road sections on bth sides completely blocking the roads and making it dangerous , cowley road and st clements and iffley road are just massive ques of buses that are empty or have 1-3 people on , something needs to be looked at about that , large families that are poor can't afford to take there family on buses every day or even a train due to expenses but just about scraping through to run a car for them to use and escape oxford to go shopping. This isnt looking out for local residents at all and you can't force people to use alternative transport , i used to cycle to and from work in oxford city centre apart from my bikes constantly being stolen , i was knocked off by a bus that tried to overtake to close and left disabled now i get to live everyday in excruciating pain and have panic attacks when a bus passes me , i would also like to add since the buses being double deckers you get zero privacy in your homes , the new albuild homes actually shake and crack from them whooshing past and blind you with the sun	Find this congestion zone a joke pushing all the traffic to the bypass which is already constantly blocked so what next a pay per mile tax .... greedy council scheme hitting people who can't afford it	Less buses in non peak times (excluding morning rush hour-evening rush hour) if you was to look at cars maybe look at the single car uses constantly driving around , you also need to look into propet tests and identification for cyclists as alot of them doing dangerous things like zooming red lights cause congestion as it cause accidents, also like a clamp down in the ammount of L plate mopeds around oxford as it's off the charts riding on pavements/ carrying passengers/ parking on double yellows in the city centre and the ticket man just tells them to move on no tickets given then they are back within 10 minutes . My other idea is also stop building so many houses here and push them further afield, building houses and in the brochure talking about how easy the drive is to London to attract London people to move here brings more cars , my neighbour moved from London and his family have 6 cars that are all used daily by single drivers so that equals more congestion
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	No impact	There should be no charges at all	No			Very negative	We go to the central area for my son and daughters studies and lessons. This will significantly increase our cost to do so. We live in Didcot and it's not practical to get to the central are without a car. It would take over 1 hours to travel one way to the central area that would have taken 20 mins by car. With 2 vouns children this is not feasible.		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	There should be no charges at all	No	Add new bus routes		Very negative		Why are you putting a charge on Holloway when the problem is the shade leading to Headington. Why are you not doing anything about Cowley Road.	Improve the roads
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Taxis and private hire vehicles	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral	Traffic filters are supposed to reduce traffic for the residents of the areas in question but also to facilitate travel for the list of cars in the exemption list. If people that work in central Oxford, but do not fall in any of the other exemption list, and normally drive in to get to work are also added in the list then you are left with no car eligible to pay the congestion charge. I doubt the charge will even pay for the cost of this consultation and putting the cameras and signs up. The main traffic in oxford roads in the morning and afternoons is due to private school drop offs and people who park in central Oxford. Private school parents will utilise their free permit days through using all their three cars and people that normally park in central Oxford will use this specific exemption through their employer. This means the council will only benefit from a rogue out of town visitor that gets lost in our roads. Ah, and there will not be traffic reduction.		The main traffic is when during private school term time. Enforce these to provide park and ride facilities for parents at the many park and ride schemes in the Oxford ring road perimeter. Also offer incentives to businesses to encourage their staff to use park and rides rather than exempt them
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	My parents are elderly and find the whole scheme hard to understand and administer. They struggle with technology	Traffic is bad enough since LTN especially getting through St clements	Re open some connections between cowley road and St clements rather than every one around the Plane. Dangerous for cars trying to see cyclists especially coming down iffley and cowley road
other	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Other	Make busses 24 hours from as far away as banbury with chaperones for children you are now forcing on them	Very negative	To make it impossible for a chalice to get to school or he sports club is not beneficial for anyone. It is 28 miles for us to cycle on dangerous roads that are as fast as 60mph and have no dedicated cycle lane every day at 4am so that she can swim in a high risk to life location Leys. Where her bike is likely to be stolen. Or pay even more money to you for what a service that is not fit for the purpose!	yes! It's ill thought of and only thought of for older people who commute. You havent thought about young children who live outside of oxford. And stop wasting money moving bus lanes from one side of the road to another like you did on Woodstock road!	yes get industry to build in the villages outside oxford rather than in the centre
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent		Very negative	My child is in school that requires us or babysitter to drive through Marston ferry Road. This makes it very difficult forworking parents (with early shifts) requiring childcare - to now consider an added charge to use the road or to factor in added time for drop off at a public school	Will there be charge through out the day/ peak times? What about for child minders whose job requires them to go into central Oxford for the school run	Better more frequent bus services that take less time
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make bus services more frequent		Very negative	I work at the hospice, in a non clinical role but in one that raises money to fund an under funded service. That sound familiar? It's bad enough having to leave at 7am to get to work for 8am when you live 5 miles away. You want to know the significant and negative impact you'll have on Oxford residents? You're welcome to join me on my journey and work a day that starts and finishes stressed and tired because of the traffic. Hooe Andrew Gant is haopy.		You need more frequent and affordable direct hospital buses from places like Abingdon and Kennington. And this should be implemented before you start putting stupid ideas like this in place for some twisted, demented agenda that affects working class people who are just trying to go to work, get home quickly in an emergency, drop their kids off to school and still live in some part of Oxfordshire without having to donate their left kidney to afford to
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Positive	I support efforts to reduce car use Not sure this will have a huge effect Would support more-reaching measures if coupled with free park and ride I live in Headington on Quarry Road - difficult even to drive away from house due to cars cutting through Quarry		Cycles and car traffic struggle to 'mix' safely I support efforts to make cycling safer Old Road has some dangerous places where cyclists are expected to turn off into cycle lane very sharply - it means slowing right down and coming in from wider - difficult and dangerous Many choose not to, which then winds drivers up - pls extend and reduce the drop kerb to make the transition easier
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	The economy is struggling and this congestion charge only adds to restrictions to people to come shopping and support local businesses. As a resident of south Oxfordshire, my bills have increased significantly year on year and now this is being crocosed which is utterly ridiculous.	It should be dropped and the council should stop squeezing money out of residents. Perhaps selling land or asking Oxford University to better support the council instead of sitting on property/land would be a better solution.	
an Oxford resident	daily			Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Other	The worst congestion encountered in Oxford is around the Cowley Road, Iffley Road St Clements and Headington areas, this is where the busses are being delayed where people are trying to navigate around the LTNs. Remove them	Very negative	This will cause longer journeys, more pollution and more congestion due to even less Road space.	The congestion charge points are just another name for the already planned bus gates. What is the difference?	Remove the LTNS
a resident of Oxfordshire living outside Oxford	daily		I don't	Very negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	This will kill shopping in oxford. No customers means no shops means no jobs. Don't do it!	Another stupid anti car policy for oxford	Road improvements that actually help the flow of traffic
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	will kill oxford city centre shops people will go elsewhere	Ridiculous	more car parks ,better traffic flows and cheaper public transport
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	Not sure	Other		Very negative	- further inequalities in Oxford (only privileged can use this) - displace traffic to the ring road - I won't even be able to go to visit my vulnerable friend who lives on block down without passing through the filter - using Westgate's cheap parking in the early evening after work will be impossible with the additional charge - 100 passes a year is a joke - we work longer than 100 days per year.	We already pay road tax to use the roads. Now we'll have to pay additional tax to use the same roads. This system is discriminating and only pushes residents who can barely live in Oxford to other areas. We pay triple amounts for water bills compared to 2 years ago, we have the highest council tax in the country, and now this.	Remove LTNs and fix Botley bridge and it will all go back to normal.
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	As a business in Oxford the proposed congestion charge will discourage business , shops and restaurants will close and the city will struadle to attract talent.	Oxford has discouraged cars for the last 30 years - the roads are not fit for purpose and as a result unless you live in Oxford it is a very unattractive place to work .	The park and ride is not fit for purpose - it takes too long , waiting for buses , parking later in the day can be tricky and on a cold dark day if you have a reasonable drive to Oxford it is not an attractive option .
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	For anyone living in West Oxfordshire who needs to travel to Oxford for work or leisure the congestion charge is just another kick in the teeth and a further disincentive to work or support local businesses in Oxford. This is exasperated by the Botley road debacle which is continues to make Oxford travel a laughing stock and a model of incompetence. I am a low income worker and have no real alternative to get to work except by car. The simple maths from the scheme will cost me £30 per week or £1560 per year to continue to work in Oxford. I love my job but with this charge the council puts me under unreasonable financial pressure to have to make a choice of paying my energy bills, or continue to work in Oxford. The decision is an obvious one and after 20 years working in Oxford providing services to Oxford students I am being driven out of the city and am left with little alternative but to find work elsewhere if I am to survive.	The scheme is an example of poor judgement on behalf of the council and will just provide people with more reasons to work, shop and spend leisure time away from Oxford and further damage the local economy.	Fixing the Botley Road as a priority and not just continuing to deny responsibility. Then improve the public transport links.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	Too high	Yes	Other	Upgrade roads to halve congestion, such as one way routes etc.	Very negative	The plan will increase congestion dramatically in other areas. People will try to avoid paying the charge driving around the charging points. This will increase overall pollution and congestion. Plus will affect low income workers that usually carned work from home	It is unfair and shameful against the people visiting JR. Who goes to JR in the vast majority of cases has no other choice that use a car.	I would use a data driven approach rather than an ideological approach, I would propose a collaboration with the University to implement a real data based model of the traffic patterns and congestions causes ; then use AI to simulate a large number of mitigation actions. Then work out to implement what is performing better
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Positive	As a resident of the Botley Road, journeys through the city have increased dramatically in recent years, increasing time travelling and costs of travel. Anything which helps alleviate congestion should be seen as positive, provided that the money generated is actively used to continue to alleviate congestion. There seems little sense in the charge being less than it would cost to use the park and ride.	Although this scheme has been proposed as a specific result of the ongoing botley road closure, it doesn't seem to acknowledge the additional transport issues inflicted on residents here. Might it not be a fair acknowledgement of the inconvenience caused for residents of this area to receive additional day passes. Many would like to travel by public transport but journeys such as to the hospitals are so much increased at the moment and require a change of bus across the closure that many are forced to drive	Get the Botley Road reopened as soon as possible
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Add public cycle parking, Other	Change the timings of the congestion charge, or give certain professions (key workers - teachers & nurses) free passes.	Positive		Marston Ferry Road - this will mostly affect teachers and nurses using this road. Either give them a permanent free pass on this road, or change the timings (7.30-9am and 4-6.30pm)	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	DO NOT DO THIS	Very negative	This is a terrible idea.	Awful.	Don't do it

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of vour choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for young people, Make bus services more frequent		Very positive	I live on Abingdon Road which is clogged with commuters and visitors, driving in to the city. I hope this might make more people think twice or travel by train or bus. But I think £5 is too cheap. To put people off it should be more like Birmingham or London.	Tourist buses are an ussue	Apart from not allowing Keir and Network Rail to completely mess up the city by blocking Botley Rd for years. They created a huge amount of extra miles and traffic. They should be made to pay for all of this.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Don't have the scheme, by answering this question it would appear that correspondents agree with the scheme	Very negative	OCC is anti vehicle what will be next?	Was this mentioned on any election manifesto?	Stop all county councillors using their own vehicles, make surveys easier to complete and worded for people to make true feelings instead of loading the survey so you get the answers you want
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	This scheme should not exist so the answers are irrelevant	Very negative	Yet another tax this time targetting only car drivers. Why not van & lorry drivers and motorcyclists? If you really wish to reduce congestion simply pedestrianise the area. This charge just means that those people for whom £5 is inconsequential have free run of the city and for those for whom it isn't, do not.	Do not implement it.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	No	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	I live in old marston. The bumper to bumper traffic during school drop off / pick off has a very negative impact on the area.		Create an LTN in Old Marston with one directional traffic, from marston ferry road to the a40
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	No impact	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Very negative	This will further isolate some of Oxfordshire most isolated communities. I'm a single parent with a disability but I don't receive disability benefits. I need to use my car for shopping necaise of my mobility issues. I drive to work along hallway to the hospital as I can't cycle far with bags. This proposal will deeply impacte and make things much harder for my family and I. This is the point where I say, enligh, I am leaving the city, its no longer the city it was. I am moving back to Bristol due to this. Its ovulating communities like mine and makes it harder for us to live.	Please see above. The city is fragmented. People on the outskirts have become isolated. The community has died because of the traffic restrictions already. It will be the end of Oxford if you bring this in. It will just be a city for those that can afford it. Shame in you council ignoring the people who already struggle.	If any chatges are introduced it should be for those commuting from outside the city into its not for those of us already living here. Put the charges on the ring road entry points not inside the city charge those coming in from outside amd not using park amd ride
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It will have a negative impact on people travelling into Oxford and potentially reduce numbers of visitors, shoppers and business wanting to be is located in Oxford	Learn from another places who offer cheapee park and ride with free travel on these services at certain times or for certain people. Encourage people to visit by ovino better alternatives instead of drivino people out of the city	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Other	Improving the ring road capacity. It will become gridlocked if cars cannot go through st Clements.	Very negative	I live very close to the st clements filter and I have to make a journey to Elsfield 4 times a week which is not covered by bus. By not going through the filter my journey time and distance increases 3-fold which is frustrating, a waste of petrol and generates more emissions. I should not be charged for living close to a filter, it feels like I'm being unfairly taxed. Please create another free permit (ie can travel everyday) for residents living near the other filters, not just the central ones.	The traffic through st clements isn't that bad currently, only at peak times which I would avoid anyway. If you feel that a charge is absolutely necessary then I would suggest only applying it a peak rush hour times. There is minimal traffic past 6.30pm in st clements, so trying to divert traffic at this time with a congestion charge is unnecessary. Diverting traffic away from these filters will create more congestion on the ring road. Please clarify how you will deal with this. If you have the 100-day permit, how will you know how many days you have left? 100 days is less than 2 per week - I think this should be increased to at least 3 days per week.	Invest in the ring road and improving the junctions around Oxford. This will make them more attractive to use and stop people trying to cut through the centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Neutral	About right	Not sure	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Positive	Worth a try. I walk or cycle most of the time so won't use many permits. Hopefully it will help reduce congestion and make people consider other ways of getting around (although i doubt it)		Cost and convenience are key so I guess bus infrastructure has to be fast and cheap. More cycle tracks away from the road like the one from Marston to South Parks Road or the one running parallel to the railway in Kennington
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Very positive	I support measures to reduce car traffic in to and through Oxford.		
a resident of Oxfordshire living outside Oxford	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			Keep it as it was it's a nightmare to get around and elderly people are put off going out it's dangerous and mayhem
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Scrap all anti motorist measures - LTN's, 20 mph zones, LEZ, no bus gates etc. stop destroying Oxfordshire!	Very negative	People will not come into Oxford! Unnecessary, tinpot tyranny! Stop making life miserable for people and businesses alike! You are attemptina to carry out a alobalist aoenda. aaainst the will of the people! Despicable!		Remove LTN's, scrap 20 mph zones, no bus gates, ope up all roads! Net zero is a globalist hoax!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		No impact			
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add public cycle parking		Negative		People shouldn't have to pay to drive into Oxford locally. Major problem on Northern side is A40 through traffic.	Should have made slip road on A40 in the new northern development straight on to A40 so through traffic not all going through pear tree roundabout.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very negative	I drive to work. Now I will have to pay to get to work I might as well be unemployed	What about the people who live in the area who need that route to get to work	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	About right	Yes	Add public cycle parking		Positive	Get on with it and don't make so many exceptions or it'll be useless	No	More cycle parking in city centre/near station, free p+R buses, better cycle lanes (protected) which a rent driven/parked in.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I'm a cyclist so welcome any initiative to make roads safer, reduce congestion and limit motor traffic. But I worry about the impact on the Woodstock and Banbury roads which are already hazardous for cycling and may attract displaced traffic.		LTNs exxanded and enforced removina peoole oarkina in and blockina them Ban private school traffic which seems to be the main cause of rush hour congestion (from years of cycling in Oxford in term time and out of term and observing traffic). Make these schools transfer pupils who need to be driven from hubs at the Park and Rides.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Positive	Negative	About right	Yes	Make buses cheaper for all, Add public cycle parking, Other	Improve active travel infrastructure.	Very positive	Fewer cars in central Oxford might enable me to cycle there more safely, and might improve air quality.		Improve active travel infrastructure. Ban pavement parking. Make Abingdon Rd and Iffley Rd one way only (would be a circular route) and thereby make soace for decent cycle lanes.
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make park and ride free and have busses running far more regularly - if you want commuters to use park and ride then you need to minimise the additional increase in travel times - especially if not eligible for permits as live 3miles out of oxfordshire!	Very negative	Actively discriminated against Oxford based commuters who live outside of Oxfordshire. Time zone is effectively all day. Will push traffic to other routes causing more issues there - unless you continue to block off roads as you have been doing which will then lust lead to even areater conaestion.	This is i'll thought through and will cause more issues and confession - not less - for traffic management in and around oxford. There are already bus lanes on the major roads into Oxford - this proposal does not change how easy it already is for busses to move around Oxford.	Moving westgate out of the city centre .... though too late now it's built .....
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hosoital patients	I don't	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes		Very negative	We already get charged and taxed for everything. It's not the general public's fault for the network rail issues so why should they bear the brunt.	Same as above	It's not that bad.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Add public cycle parking, Other	To really encourage people to use the P&R, parking should be free, as it is in many other cities. The current price difference between P&R + bus ticket vs parking in the Westgate is not enough to discourage shoppers from parking in the centre.	Positive	a congestion charge can have a positive impact and I support it, as someone who would need to pay for some trips into work, as long as it is introduced alongside genuine alternatives for commuters and visitors.		I agree that something needs to be done, and unnecessary trips into the centre need to be discouraged. As I have said previously, the parking at P&R sites should be free and well advertised to really encourage this, as well as better transport to the schools to discourage parents from driving their children to school. Perhaps free school buses running from the P&R sites? Properly enforced, or even better segregated cycle lanes may also help. I have noticed that many of the cycle lanes, such as along Woodstock road and Abingdon road often have cars parked in them, and drivers doing this should be fined for doing so. Could traffic wardens issue tickets as they are doino their rounds?
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Negative	There should be no charges at all	No	Other	Make it easier for vehicles to pass through and travel around the city	No impact	People will still travel into oxford	I don't believe they will be temporary i believe it will become a permanent charge and increase in cost	
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes		Very negative	The concept will force traffic into condensed areas, just like the LTN's in Cowley. The whole of Oxford has turned into a disaster since the LTN's were introduced, no one I know was in favour	Work with the residents, not with the councils own personal agenda.	Remove the LTN's in Cowley and it will increase traffic flow around the whole of Oxfordshire
a member of the public living outside Oxfordshire	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	My mum provides my childcare year round. As she lives in one of the zones proposed, the 50 free permits wouldn't work for me. For one, it wouldn't cover my childcare and even if it did, it would mean I couldn't visit her outside of her looking after my children.	Yes, I think this is just a way to punish the residents of Oxford and their visitors because the construction work at Botley is taking much longer than expected. This is not the fault of Oxford residents or their visitors so they shouldn't be being punished - that should fall solely on the company doina the work at Botley.	For a start, you need to reduce bus fares for Oxfordshire residents and introduce better bus routes. For example, there should be a bus from Holloway or Horspath Road over to the retail park (where Tesco, Food Warehouse etc are).
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders	I don't	No impact	Positive	There should be no charges at all	No	Other	Fill the pot holes	Negative	I won't ever shop in Oxford	No	Let the public vote
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Pay your overdue service contracts	Very negative	Restrictions are not the answer. Freedom of movement is. As a lifelong resident in Oxford's near proximity, I now make a point to shop/commute to towns further away because of poor access. I am not alone. This is net negative on resources. A larger and more extensive plan is needed. Busses are uncomfortable and unreliable. Birmingham's trams are great. It is expensive but the reintroduction of trams to Oxford is worth a look.		See answer to question 12
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Make buses cheaper for young people		Very positive			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for young people, Add new bus routes		Very positive	This is long overdue. Too many drivers are inconveniencing pedestrian, cyclists and public transport users. Westgate parking is too cheap so drivers will happily be traffic and ignore park and rides. This scheme will help redress the balance. Thank you.	Tourist coaches need to oay	Oxford parkway park and ride should be a hub for tourist coach drivers to prevent coaches driving to centre and then parking in places like osney mead. Give drivers a canteen and rest and washing facilities. Put a nice tourist shop there too. Tourists can travel into centre by train. More, properly segregated, cycle lanes than are direct all the way along major routes and keep going to local villages and towns.
an Oxford resident	weekly	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	Oxford traffic is ridiculus ltns are awful and this is just too much money being made by the local authorities	Bad idea	Move ltns
an Oxford resident	daily	Disability benefit claimants		Very negative	Very negative	There should be no charges at all	No	Other	allow people to move freely whether driving cycling bussing or walking without charge	Very negative	people need to go about the business without hindrance this is a charge nobody wants or can afford there is no need for any restrictions and all should be removed it is those that don't think of the impact that implement these taxes on all residents unless it impacts councillors area or residents	they should not be introduced don't you think the driving public pay enough? why don't you charge cyclist to use the lanes and roads too . they cause as much congestion if not more and bus companies just want more revenue	open up the LTN's and stop putting silly wands up at junctions and sack those responsible for the carnage they have caused . the charge is just another tax as it wont save the planet
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Park and Ride should be free	Very negative		To be honest I'm fed up of OCC 'consulting' aka adhering to their legal obligations, just to 'interpit' the responses to suit their own agenda. I have no doubt whatsoever that this congestion charge will go ahead regardless of the consultation outcome. Very sad 😔	Open the LTNs let the traffic flow. No through traffic in the City centre (early and late loading/delivery times.) Free park and ride, with limited stops to ensure a quick journey to make the P&R attractive to use. Re-assess the Pick-me-up bus shuttle, reduce the size of the off peak buses, there is no need to be running empty electric buses around/through the city boundaries breaking up the road surfaces
a resident of Oxfordshire living outside Oxford	daily		I don't	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I work in Oxford and live outside Oxford. I have no choice than to use my car to go to work. The bus system coming from smaller town to Oxford is not efficient enough for me to go to work using public transport (it would take me over 1 hour and half to go to work by bus). The proposed scheme massively impact workers who cannot afford to live in Oxford and therefore have to commute. If such charges where imposed I would have to find another job(not in Oxford) as it would be one unaffordable for me to come to work. I am certain many people are like me and soon enough nobody will want or will be able to work in Oxford.	Why does Oxford not implement a tram system? It would make commute quicker. Or have actual express buses which go from the smaller town around Oxford to Oxford quickly. The express buses are a jock and stop at every possible stop making the journey ridiculously long.	A tram Actual express buses from smaller town to Oxford. Ones who only have 1 stop. Investing in an underground system
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	This charge would more than double the (already extortionate) cost of travelling into the city for people without access to regular buses or alternative transportation	The Thames street filter in particular seems extremely badly thought out as while botley road remains shut this will completely cut off access to the Westgate and oxpens car parks. If you take anything from this survey, maybe consider pausing or scrapping that particular filter entirely.	
a member of the public living outside Oxfordshire	daily			No impact	No impact	There should be no charges at all	Not sure			Very negative	I have 3 children at school in summer town and commute in from Buckinghamshire. The cost and service provided by the school buses is not practical and far to expensive to work. Costing over £850 per term per child with total journey times over 1hour 30 mins each way. I use an electric car drop off and do not park. By introducing this you have not considered the impact on school children out of area who there are many Discretion to their education is not acceptable		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	This scheme is clearly just another money making exercise at the expense of the residents of Oxford. It will hasten the current decline of the City, also caused by the mismanagement of the council. Why anyone would now choose to live, visit or shop in Oxford I really don't know. There are much better options elsewhere. The City is being turned into an elitist environment for the select few. Disgraceful.	I am totally opposed to this...like I was the LTNs. The sooner the councils LTN and congestion charge policy's are challenged in court, the better. The theory's and data behind these decisions are all flawed and yet the council still ploughs on regardless. No-one has been able to explain how doubling peoples journeys due to the introduction of ltns and future bus gates will reduce pollution (because obviously it doesn't!). We are beina taken for fools.	Remove the LTNs.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Oxford is already congested since the introduction on the ltns, more traffic will be pushed onto other roads.	This is totally unfair to charge people to use their cars when we already pay for road tax which electric cars are now being charged the same as a 3 litre diesel car	Remove the ltns

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Other	This should not be done at all. All the questions are as if you are doing it. So it's not a consultation if you've made your mind up. Like the LTNs this is disgusting!!! Shame on you.	Very negative	This is disgusting behaviour once again by you. The LTNs are a sham. Only in certain parts of Oxford. It's made everything much much worse. We want a whole new political party to come in who listens to the people	Do not introduce this and remove the LTNs!!!	Fix the cycle lanes so cyclists can actually use them!!! So many pot holes and they are in such poor state it's dangerous. Why on earth this hasn't been done before LTNs and this new crazy idea god will only know.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	The operation times for the filter areas are excessive - there is no way that the traffic is congested for all that time! The impact on businesses in the centre of Oxford businesses, theatres and restaurants will be huge at a time when they are already struaalina	The operation times for the filter areas are excessive - there is no way that the traffic is congested for all that time! The impact on businesses in the centre of Oxford businesses, theatres and restaurants will be huge at a time when they are already struaalina	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral	Decreased level of freedom for car-using residents living within the ring road and immediate surrounds	Allow all cars registered within the affected areas (blue zone on map) free and unlimited transit through all zones without any requirements for residents to register. Having to apply for permits creates uncertainty and there are surely workarounds available. LTNs have been a net positive for air quality and ease of traffic flow in residential streets that were previously used as rat runs, but have created significant challenges for tradespeople and other services that rely on cars / vans.	If passes are going to be required for residents living within Oxford to drive through congestion zones, the Council should offer a corresponding number of free bus passes (X journeys per month / year) for residents. Many people cannot, or will not, switch to cycling regardless of how good the infrastructure is. Providing free bus travel retains their ability to get around the city on occasions when personal transport is not essential.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	Rosking Hythbridge st access will make it difficult for residents living in the west of the county to travel and use the Westgate. As a result evening theatre trips become more expensive and become a deterrent. Especially as nighttime weekday services from Oxford back to the west Oxfordshire are less frequent and slow. For example a show ending at 10pm could mean waiting up to 30 mins for a bus then an 1 hour and 20 minute bus ride back to Carterton. It's worth noting that this will become a tax on residences living in villages like Bampton and other surrounding Carterton as these villages do not have evening services into the city (noted the Charging stops at 7pm but they would need to pay the free because to access the city during evenings as they will arrive into the city before 7pm)	More considerations needs to be given for residents living in West Oxfordshire like Carterton and the surrounding village who are poorly connected in terms of time and frequency on buses. If the scheme is to be implemented more express buses need to be implemented to make it quicker for the residents in these areas to get into the city.	Speed up the bus services. More express services. Reduce the number of stops especially ones that was too close to each other. Connect Carterton better to the city and hospitals. Look at using one way systems on existing roads to convert roads into bus lanes and speed the network up. Invest in the A40 to make the bus time quicker. Improve cycle lanes with more segregated lanes from traffic that have decent tarmac
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		No impact	Don't drive through town often enough to exceed the 100 day quota, so won't be charged.	Concerned that what is currently presented as free passes will become a paid service over time like residents' parking schemes.	
a resident of Oxfordshire living outside Oxford	daily	School students with special educational needs, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	This is the mess created by the works on Botley Road work. First, there should be a in depth analysis of what went wrong and why the work is not completed on time. Accordingly, actions should be taken towards the construction company to foot the bill for this congestion. Common people should be left alone as they already are sharing lot of burden created by lots of people in the government. Elected representatives should be working for people, not against people. They should think of making life easy for the electorate, not finding ways to penalise them.	Making difficult for people to drive around is not a sustainable solution. You can't stop people driving their cars, rather you should be thinking about alternatives, what can be done to make it better for all. Studies should be conducted to showcase the proposals will work otherwise this will be another gimmick from OCC.	Remove LTN on temp basis and then evaluate the impact and non impacts of it as you may have collected enough data by now. Also, reduce the bus travel cost, last time there was a straight increase of 50% in bus fares. From £2 to £3 now. Work in the bus time tables as the current scenarios is, either there are no bus or there are 4 buses at the same time, chocking the entire route and resulting in jams. Penalise the bus operators to make sure we have constant buses and if not, penalty. Do all the roadworks in spirit or weekends or during school term breaks, and make sure traffic can flow easily.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, School students with special educational needs, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	As a disabled person and parent with a child having SEND this has a massive affect in regards getting to appointments. I have friends in the city , not seeing these people would have a detrimental impact on mental health.		
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make bus and parking free as it would cost the same as driving in	Very negative	Daily cost just to work.		Nobody wants to travel by bus, they are slow, full of people.
an Oxford resident	weekly	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Positive	There should be no charges at all	No	Make buses cheaper for all		Very negative			No LTN's or congestion charges
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Other	Let people who live in the area have free passes for life why hurt the people who provide for this city	Very negative	I drop my kids to school everyday that's 190-195 days per year do you mean to say I have to pay £975 per year just to drop off my kids?	Don't say to us to use bike or walk because my two son would not fit in a bike and one has autism he will not ride on a bike and he will not walk does that mean I have to suffer to pay that everyday. Be better nobody wants this especially the people who live in Oxford.	Remove the LTN is that simple. LTN has very negative effects in oxford it doesn't work.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Oxford is dying as a city, fewer visitors, more shops and facilities that don't meet the needs of the people who live and work there.	Ill thought out plan with no regard for businesses and families who are struggling.	Open the Botley Road.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral	The scheme as designed wouldn't have a particular impact on my household.	Money should be used to lower parking charges as these are crippling for those of us who use the facilities to attend evening concerts, go to church or purchase item that are not found in Harry Potter emporia.	I live on Woodstock Road. Make all buses that travel on this road stop at all stops. Take a tougher line on cyclists who frequently fail to use the cycle lanes preferring instead to weave in and out of traffic holding up bus lanes. Tax Baboo users they are a middle class nightmare. Why are parents delivering children to the Dragon, Lynams and Summerfields who frequently cause consestion with their large cars not being penalised if they live outside the zones?
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative		I dont know Oxford very well so the possibility of accidently driving through a congestion zone will stop me visiting Oxford	Better and cheaper public transport. Currently, with more than 2 people in a car, it is cheaper to drive and park in Westgate than it is to use park and ride
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car			About right	Not sure	Other	Better trains	Neutral			
an Oxford resident	daily			Very negative	Very negative	There should be no charges at all	No			Very negative			Stop delaying Botley Road and penalising oxford residents for traffic issues you've caused. LTN's have bottle necked everyone and caused huge delays getting in and out of Oxford
a member of the public living outside Oxfordshire	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Other	Resign and call an election	Very negative	I despise you evil control freaks.	STOP IT NOW !	STOP MEDDLING !
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Add public cycle parking		No impact	The income generated will be minimal and the overall effect on traffic minor. I feel the same about the traffic gates	I prefer this to the traffic gates	Stop the idiotic ltn blockages.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Negative	1.I believe the charge will move traffic onto other roads and therefore increase congestion in other areas. 2. Network rail has caused the problem, Network Rail should pay 3. The hospital workers at JR and Churchill etc do not seem to be included in anv of the permit schemes.	Seems to be a lot of set up costs- ANPR recognition and admin for a temporary scheme	Trams
other	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I am already leaving for work over an hour earlier than I should need to simply to avoid traffic. I am priced out of being able to live in Oxford - why should I pay more to work there?		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Not charged at all	Very negative	Stop trying to micromanage everyone and just leave us in peace.	Stop it. Just stop. All this lunacy.	Close the Westgate car park which is the single biggest cause of congestion in the city.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't			About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive	Faster journey times into Oxford. Less congestion.	This should be temporary and removed once filters are in place	To appease the anti LTN community remove a couple of blocks in cowley and then measure the traffic . This will stop the minority who are wasting the council's time and money.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	No			Very negative	All healthcare workers and teachers who commute to their jobs will no longer be able to get to their jobs. In the secondary school I work at the entire science department commutes. If this is introduced the entire science department would be unable to get to work. The offer for workers to 'apply for a pass' means nothing, with how long that takes it will make no difference legally alone if it is rejected. These congestion charges would cost me £100 per month and that is not something I should have to pay to educate the children of Oxford.	Bad idea	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	Not sure	Other	Enforce cyclist to adhere to rules,	Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It will increase anxiety about getting around. I often used to cycle but babies under 1 are not able to go in a trailer, the roads without tins have got busier so are less safe, I didn't want to cycle when pregnant. It is cheaper to drive and park in the Westgate than get the bus to town for a couple of hours and it is often much more convenient and quicker than waiting for a bus (not the journey itself). It feels like making the city somewhere uninviting and unwelcoming especially for residents. We pay a premium to live in Oxford and are being prevented from travelling around our city. It will make other streets busier, and could actually increase pollution by increasing traffic in those areas. Why bother with multi storey carparks and massive shopping centre if you don't want people to go into the city. It makes me want to move away from Oxford but we can't because of work. It'll add mileage to people's journeys to avoid the paid routes which will increase congestion and traffic and pollution. Focus on making cycling safer. Painting a picture of a bike on a road (eg windmill st) doesn't make it safer. It is quicker for me to walk to Cowley than get the bus from Risinghurst because of the circulous route of the 600 (not because of cars)	Don't do it. And get rid of lins while you're at it	Better buses with better more direct routes serving the periphery of Oxford. Make proper cycle ways Make buses cheaper
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	I almost never go shopping in Oxford or restaurants or theatre etc. because I know parking will be awful. Westgate has ripped the heart out of oxford. Park and ride is expensive and slow. Sadeest you decide if Oxford should be a tourist trap or a working city. can't be both.	Reduce charge for EVs. Introduce free bikes to go to / from park and ride.	Introduce free bikes to go to / from park and ride Fillers at the roundabouts on north Oxford ring road could be small tunnels like in many french cities to allow cars to go straight through
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking, Other	If you allow this I will harm myself because I won't be able to afford it.	Very negative	You people are the most stupid I've ever come across. In a time where cost of living is getting worse, war is now influencing prices. You decide to go and add a £5 charge just to drive in my own home. This is Oxford. Not London. You all should either be sacked for your intelligence or be reeducated.	May you all open eyes. Cars are made for a reason. History made 2 wheels into 4 for a reason.	Stop LTNS and introduce hybrid vehicles in oxford only. You don't have to be a genius. Only the oxford council would CREATE their OWN problems. What a joke for a bunch of brainless people.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very negative	Too low	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Other	Improve cycling infrastructure	Very positive	Oxford city centre is congested and polluted. Too many people are driving past a park and ride to get into the centre of Oxford. Congestion charges are essential as part of a whole system approach to improving health and wellbeing of residents. including safe cycling and walking in the city.	Welcome this as a temporary scheme as a way of testing the approach, gathering evidence and then improving the final scheme implemented.	Improving walking and cycling infrastructure but treat and assess differently. The cost of this investment is relatively low compared to the benefits, especially for women, children and less mobile groups.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Other	I think you should be putting your effort into sorting out the Botley road fiasco, not thinking of ways to get more money from Oxford residents.	Negative	It will be yet another cost to factor in, on top of sky high council tax, a new parking permit scheme in my neighbourhood and the increase in bus fares. Everything about getting money from us but never any discernible improvement. Forcing everyone onto the A34 will just create more traffic there. What is the point?	If I want to go to North Oxford, I can take one of three routes at the moment: via Marston, via Long Wall Street, or via the A34- traffic is spread over these three routes, allowing alternatives if one area is snarled up. Just like with bollards, you force everyone onto one route and traffic jams increase and emissions go up, as does time waiting on buses etc.	Turn Meadow Lane into a cycle lane from Rose Hill, through Iffley, along the back of the houses in Iffley Borders and through the sports complex into Christ Church Meadow. At the moment, I am too scared to ride a bike, but if there was a cycle/pedestrian route, I would consider it.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Neutral	Too high	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Negative	I work in Oxford and use the park and ride but occasionally attend meetings in the area when I need my car to go elsewhere. This would be an additional expense for me.	The whole thing has been rushed through without seemingly proper thought and consideration for the impacts on the vulnerable living around the city.	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I represent the staff at Cherwell School which will be adversely affected but by the charges on Marston ferry road. This is a STATE school and we are in the middle of a recruitment crisis for teachers. Making it expensive and difficult for colleagues to get to work will impact our staff and mean many leave. The idea of permits would mean we could get to work. Teachers cannot afford to live in Oxford. Many commute in from villages and towns outside where housing is affordable. This scheme is penalising those who cannot afford to live near work whereas you propose 100 passes to people who live in Oxford and can walk or cycle.	Yes- they penalise women. It is women who drive to work with children to do nursery drop offs and school runs. They trip chain not go a to b. You will be forcing many women out of jobs or your work force out of Oxford.	Make the private schools bus in. The traffic is so much better in The weeks they are off school.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper		Neutral		Not for it, never decreases road traffic-look at London	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Other	improve the state of the roads, repair pot holes and repaint road markings	Very negative	It will put people off entering Oxford for shopping by placing a camera in Thames Street and cause even worse congestion on the roads that are not covered by the cameras, makins the commute in even worse.	Since the instigation of the LTNs traffic on the peripheral roads has because dreadful, this proposal will cause greater consestion and out oecide off workins and shoosins in the Oxford area	
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	With the congestion charge at Hythe Bridge Street, how will it be possible to reach Oxford station from north or west of the city in order to deliver or pick up passengers without incurring the charge - especially since Park End Street is not accessible coming from the north? Often these passengers are old or incapacitated or have heavy luggage, and cannot easily use buses. 25 permits per year is unlikely to be enough. Putting a congestion charge on the main access route to the station before Botley Road re-opens is simply ridiculous.	It will make getting to different places in Oxford which are not easily accessible by bus very complicated and difficult.	Much of the increased traffic and congestion is caused by online delivery vans. Solving this problem is not in the hands of Oxfordshire County Council
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The unacceptable, devise, ill thought out and rubbish closure of Botley Road into town and total lack of interest or care for people walking through the 'tunnel of doom', especially with idiots who do not dismount. Unchallenged by any stewards. Why are they not even there?	Reduce the chaos of the 'school run' traffic madness by variable charging by time of day, as done in other cities around the world! Encourage car sharing. Stop anti-social parking	As above
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add public cycle parking		Very negative	It will be confusing and expensive and won't work.	I can't imagine that you won't get people forgetting to pay the five pounds, or registering the free permit, in which case you as a council will get the penalty charge. Which is just too much for people who live outside Oxford in villages who need to go in to Oxford frequently.	
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	Cost of living continues to rise and you add to due the incompetency of Network Rail and you the Council. Already local businesses are struggling and having to shut due to the incompetent and never ending Botley Road works, you now want to punish the everyday public because of this, nevermind charging to have to visit a hospital which is absolutely absurd	This should not be happening	There would need to be a super efficient and reliable alternative, that is not expensive to use. Also make roadworks more efficient. The amount of times recently I have experienced temporary traffic lights, roadworks and delays due to digging up roads then a few months after they have finished and the same section of road is being dug up again is unbelievable and a joke.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It will force traffic into different areas, as the LTN's have done. The LTN's in the Cowley area have been a complete disaster and have resulted in congestion and stationary traffic everywhere. I personally have had to leave buses in several occasions as the bus was stationary for so lono.	Please work with the Oxfordshire people, nobody wants this, it will deliver more misery to Oxfordshire.	Remove the LTN system
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Positive	About right	No	Make Park & Ride parking cheaper, Add new bus routes, Add public cycle parking		Positive	Really need to reduce congestion on st Clements so buses can be relied on. I don't think this scheme goes far enough (shouldn't be allowing all vans to pass for example) but it's a start	Needs to be more restrictions	Need to make cycle parking better! prioritise cycle lanes more/ reduce vehicle speeding on the quickways like Morrell Avenue so that cycling is safer

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on there cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very negative	There should be no charges at all	Yes	Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Very negative	I think it fails to deal with the bigger issue, the ring road is not suitable capacity for additional traffic created by LTNs I think this change will congest it even further causing those trying to avoid the city centre already to have worse journeys. There are very poor connections to the rural parts of the county so driving is the only choice for many.	I find it ridiculous that Summertown and Jericho areas are unaffected by this. it feels completely inexcuseable that the richest areas of Oxford continue to have free car access into the centre. The Summertown roundabout is also already extremely congested most of the time this will make it so much worse be diverting more traffic to it.	Look into school realted traffic there is a huge amount of it on the plain roundabout and old road caused by children being dropped off by parents at school, restricting this traffic would do a huge amount to relieving these two areas
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	You should stop people by parking on narrow streets, like Hollow Way, which produces a bottle neck, as well as improving awful traffic lights systems. They are part of the congestion charge. Open the roads that have been closed to reduce pollution. They are causing to worsen and concentrate pollution on main roads.	All of you are a bunch of cranlopaths having no idea what you are doing.	Give me your salary and I will provide you with some ideas.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too low	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	It will cut congestion and pollution by encouraging people onto buses		Tax workplace parking for commuters to encourage them to use park and ride
a resident of Oxfordshire living outside Oxford	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	No impact	There should be no charges at all	No	Other	Better car parks	Very negative	It will do nothing to help Oxford develop as a visitor centre, will significantly impact cultural events, will be bad for businesses, as the cercecetion of those from outside Oxford/Oxfordshire will be that Oxford is 'closed for business'	The 'six months' survey is a sham, as it is well known that once introduced it will be permanent.	Cut unnecessary cycle lanes, provide better car parking in central Oxford
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It would stop us coming and spending money in oxford	None	Stop building in the center of Oxford, making it the only place to come. Build shopping centres, restaurants etc out of town.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	Too high	Not sure	Add public cycle parking, Other	improved cycling routes/pathways e.g. to Oxford Parkway Railway Station	Very positive	If this reduces traffic congestion in central Oxford then it will be worth doing		Improve cycle pathways to make cycling more attractive (than cars)
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very negative	as a resident that already pays extremely high council tax. I work in the NHS as a nurse with a salary that just about covers my bills , an additional outgoing of up to 35 pounds per week to go to work and live is unrealistic. Ultimately I think this will be th final tipping point for me to move away from Oxford to work and live somewhere cheaper.		nhs / key worker discount electric car discount better access for permeant residents
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	Too high	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I am elderly and have mobility problems and depend on my car .		Work on children walking or biking to school Ban students having cars . Open up side streets . There would be no traffic problems if you did this . You only have to see the situation in school holidays
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Very positive	Something needs to be done to reduce traffic, I hope this works, well-done for trying		All tradesman should have free oaases all the time Stop Magdalen college school parents from picking up their children from the school, they should have buses to the park and ride if outside oxford or walk / bus if in the city
a member of the public living outside Oxfordshire	weekly		I don't	Negative	Negative	About right	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very positive	Oxford has far more traffic than it can deal with. This scheme helps to encourage people to use buses - because the buses should be quicker and cars more expensive - which allows more people to travel in and from the city	There seem to be a lot of exemptions! I wonder if it will make any difference at all? All the exemptions of the bus gates, but no hard stop	
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Negative	There should be no charges at all	No			Negative	Reading or Newbury would be a cheaper option	Make/Reading and Newbury abetted option	Why?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	Oxford's roads are frequency clogged with cars, often with just one person in each. Given there are perfectly good park & rides all around Oxford, this is completely unnecessary. People need to be encouraged to use P+Rs - both by carrot and stick. The carrot would be making it cheaper to use them and the stick is making it more expensive not to. If more people do, roads will be less congested and everybody's journey time will, over average, reduce. And there will be less pollution and fewer accidents too. There really are very few reasons not to do this, and plenty of reasons to do it.		Make the congestion charge permanent, but the money raised must go to things like subsidising the bus service, making P+Rs cheaper to use, etc. We could probably do with more cycle parking in Oxford.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	Bad idea		Stop building houses
a resident of Oxfordshire living outside Oxford	daily	Driving instructors	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	This proposal is an absolute disaster for Oxford. It's a regressive tax on ordinary citizens, especially those in outlying areas with poor public transport, who rely on cars for work, childcare, or vital appointments. Businesses will suffer immensely from reduced footfall and increased delivery costs, potentially leading to closures and job losses. It creates a two-tier city where only the wealthy can afford convenient access, further exacerbating inequality during a cost-of-living crisis. This "temporary" measure risks becoming permanent, turning Oxford into an elitist, inaccessible shell of its former self.	I have no faith in OCC that they will ever do any good	Tax cyclists, introduce more speed cameras and heavily fine motorists who break speed limits.
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I would usually drive to my workplace via Marston Ferry Road and will now need to come down the Banbury Road. The congestion is likely to be worse than it is currently. The £5 charge is less than paying park and ride and buses so is not going to stop people from driving into Oxford.	The explanation about whether you can commute into work is misleading - in some places it says commuting is allowed, but in others it specifies that this is only if there is no other route in The Council has explicitly named private schools as part of the issue contributing to congestion. However, the Marston Ferry Road is totally congested by traffic dropping children at Swan and Cherwell at around 8.15 each day. School drop offs - for whatever hoe of school - is always going to bring traffic	Free park and ride and free (and more regular) buses into town - this will make it so much easier for people to use public transport rather than cars
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Negative	In our 80 s and everything online and difficult: Rush hours exist everywhere, no big deal. Air pollution is actually low now since electric buses. Make private schools use minibus contract: no parents collecting children.	No	As above, private schools are the problem.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I would be interested to know the modelling of the cost of introducing and the administrating of this scheme... e.g. the detail and the exemptions versus the income. I don't believe this has been shared.	Boulter Street is a dead end street which currently (perhaps pre-emptively) has a red line drawn by yourselves on the left hand exit into St. Clement's. Currently taxis and cars as well as vans use the the street as a place to do a three point turn. Also top left and top right of the street exit are bus stops (blind spots) catering delivery vehicles to the college at top left enter and turn in Boulter Street. I would prefer the line to be at the very entrance to the Plain Roundabout. I know there are varied views in the street about this. No one in the street likes it being used as a turnaround street for vehicles though, we are all agreed on that I think.	I don't think a congestion charge is the way to go please see my comments above re set up and administrative costs versus profit and the availability of a study. I don't believe this has been shared. Note the inconvenience. I note the accidents that I know of with bikes and pedestrians have been van related, not car related.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	We live on Iffley Road, so I doubt it will have any effect on the congestion there		Implement the bus gates now. I really don't understand why you're not doing it, the Botley Road being closed seems irrelevant to the bus rate locations in East/North Oxford
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	I think this proposal is ill conceived and will not benefit the residents of Oxford who should be able to drive around their city without having to pay any charge whatsoever. How can the council believe it is appropriate to charge anybody to go to the shopping centre , which the council approved or to go to the train station to drop off or pick up passengers ..... this needs a proper rethink.	Yes..... Oxford needs a comprehensive and managed traffic plan to incorporate the best of LTN , 20 mpg roads , bus lanes , cycle lanes , congestion zones , or whatever is appropriate, not a series of cobbled together traffic restrictions that do not work and appear to make no sense of a workable solution.	Go back to square one and rethink Oxford traffic requirements given the council have built an enormous shopping centre in the middle of the city that attracts visitors in cars heading to the underground car park.....bonkers situation. Close the car park , but the shops will close as visitors will stay away so Oxford has a real problem which park and ride will not solve , people go shopping in their car !! Resolve the car parking and traffic will ease .
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	Too high	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	It will in many cases increase the need for longer journeys in and out of the city, making use of the bypass / ring road and therefore potentially leading to more emissions, albeit outside the city centre	No	Reopening the Cowley branch line
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Very positive	We need to take action, and no one will know the true outcome unless we try it!!		Parking rules appear ONLY to be enforced in central Oxford. Where I live in Marston I have not seen a traffic warden for 10 years.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, School students with soecial educational needs.	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Other	Remove all LTNs around oxford so that traffic can move freely and this alone will ease traffic and pollution in oxford	Very positive	I live in Headington and travel to Botley, Marston every day for work and school and having to pay £35 a week to drive in oxford in ridiculous just a way to make more money when the cost of living is already so high		Remove LTNs and let traffic flow naturally insteady of causing traffic on the ring road. This causes more pollution as sat at idle your catalitic converter does not work as they are designed to work above 2000rpm
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	It will negatively impact local businesses by further driving shoppers away from the city. The onslaught of anti-vehicle measures in Oxford needs to be stooped.		
a member of the public living outside Oxfordshire	weekly		I don't	Very positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	It has to be done, traffic is terrible in Oxford.	I think you should be braver. The reason we don't use the park and ride instead if driving into Westgate is because the bus sits in traffic for at least half an hour on the way in. It's also as pricey as parking fees. You should expand the congestion charge route to wider areas of Oxford for further adress traffic and make buses the better choice. I used to live in Oxford but now live in a town which charges and the signage means drivers can't turn around safely when they see the sign, so are faced with the decision of a charge or being safe. Please make sure any signage takes into account drivers familiarity (or lack thereof) of Oxford and doesn't force them to do unsafe u turns in the middle of the roads!!	As I said above, I think your proposal is too generous. I would expand it.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It's a money making scheme for the council plus more well-off residents won't care.	I don't have a car but I have family and friends who visit, this is just another bureaucratic nightmare to join the new visitors parking app.	I don't think this will be the answer. People from the villages who work in Oxford still need to journey in. This is a living city not a tourist attraction
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	I would be less likely to visit Oxford for shopping/leisure and would likely take my business to another town like Newbury or Basingstoke where there are no charges.		I will be more likely to use the park and ride when the botley road roadworks are finished.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Add new bus routes, Make bus services more frequent		Negative	Length of time it will take to avoid driving through charging zone. Concern about additional pollution caused by having to drive greater distances to get to destinations. Poorer quality of life at having to deal with this proposed scheme adds insult to injury for those already massively inconvenienced by Botley Road closure.	Do you really think this will generate any surplus income at all - it seems like a massive waste of resources to implement such a scheme before you know what the impact of re-opening the Botley Road - whenever that will happen !!!	Increase the charge for the Westgate Car Park to encourage people to use cheaper or even FREE park and ride schemes. This might reduce the traffic on Abingdon Road, and on the Botley Road if and when it eventually re-opens. Increase the number of buses. Reintroduce bus service for Jericho.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	No Charge!	Very negative	Another tax and will make Oxford even more of a turist place. As usual, the consultation is late, it should have been done before the development of any plans. Another action that defines how local authorities think that they know best and do not take the interest of the communits as the main priority	Stop it	Ask the people what they would like and take their input to define plans of action,
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Very negative	Plain and simple certain areas will become worse with these charges. For example- Hollow Way it may reduce traffic coming onto Hollow way from The Slade, but that lack of traffic will cause negative effects as there is a round about for Hollow Way and The Slade. The issue there is if no one is turning right onto Hollow Way from The Slade then those needing to leave from Hollow Way can't. The traffic is so bad in the morning hours due to in-coming traffic for the hospital shifts- that people on Hollow Way are stuck for a very long time until someone turns onto Hollow Way to allow them to turn onto Horspath Drifway. Currently without the charge or forth coming bungate it can be 15-30 min wait just to get through this round about. With the new congestion charge it will be worse as no one will want to use Hollow Way meaning no one from Hollow Way will be able to get out. Issues like this will occur at other areas like these.	Only major concern is if you go through with this charge- and not give a 365 day permit to those living in the areas - they will be forced to go LONG ways around adding more CO2 to the air, etc. Which makes no sense. Hollow Way is going to be worse due to the bus gate since they are still allowing parking on the road which is why the buses are having issues- not the amount of traffic- but that fact they and everyone else plays leap frog when going down a VERY busy road blocked by parked cars.	Yes, remove street parking for many of the areas. Or make it strictly one side. Oxford's problem is multi-fold but the real problem is this city living spaces were built before cars were common place and basically every family had one, much less the multiple many families need now. What was thought to be two way streets are now clogged with parked vehicles who make the gaps in the roads so narrow not all roads can even fit a single vehicle down it, much less two, one going each way. Sadly what Oxford is going to need is parking garages if they allow this many cars to it's residents.
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative	People who want to attend functions at the theatre, ice rink, playhouse etc or even just a night out would have pay extra just for the privilege of going to Oxford!! Are you trying to make Oxford a ghost town!	Just a money making decision at the expense and inconvenience of the public. The council should be looking at other money saving ways.	Open the Botley Road railway bridge up again!?!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent		Very negative	Please stop! The basics of flow management are that to reduce pressure, you open up more routes, not fewer!	I will have to drive an extra 2 miles every day in slow traffic to get home. This is not great. I will also stop lift sharing with a colleague and we will drive separately to work. However,	Open up all the roads that were closed by the LTNs.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	We live next to one of the main arteries in and out of central Oxford. Congestion and traffic - especially on weekends - significantly lowers our quality of life due to air quality and constant noise. Traffic filters will hopefully help reduce the amount of traffic. We also cycle to and from work and the high level of traffic and congestion is making it more dangerous. This congestion charge will hopefully help reduce the amount of traffic - or at least benefit public transportation.	I am worried that the council is going to scale down this project in the face of resistance by a local minority. Please, do not back down! This is important!	Please, use the funds to invest in cycling and pedestrian infrastructure which is currently lacking across the city.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	The new charges will make people less likely to want to travel and work within oxford. My personal journey from my home, to my child's nursery, and then to work, will travel through two filters and I will very quickly use all the free passes, resulting in additional costs I cannot afford. The journey is not possible to us by means other than car.	This proposal will be the death of Oxford city, as people will choose to shop and work elsewhere. I personally won't be able to afford to commute into the office after my permits have been used.	No, the journeys that we make by car that cannot be done by bus as there either isn't a service or the services don't match up well, which would mean waiting around for hours for the next bus, and this is not feasible with a small child, or whilst being a working parent
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other	This again madness waste of money get Botley road sorted as always this consultation is to cover up another waste of money and get projects. Us the money Inv Taxes better.	Very negative	Another vanity project and get Botley road sorted.	Another vanity project and get Botley road sorted.	Another vanity project and get Botley road sorted.
an Oxford resident	daily		I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	It would commuting, seeing family, and travel around oxford.		
other	less than weekly		I don't	No impact	No impact	There should be no charges at all	Not sure	Other	Fix pot holes!!	Very negative	Charge will stop people from going to Oxford	This is more anti-Car regulation. It makes me sick that comes from somebody who probably does less than 3000 or 4000 miles a vear.	Please don't do it as it will kill Oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very positive			
a member of the public living outside Oxfordshire	daily		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Stop making it difficult for people to drive	Very negative	Stop trying to police people just trying to get around, with all of the other things traffic is already awful in Oxford and you're making it worse. You're also forcing people out of jobs that can't work around these prococals.		The traffic in Oxford is awful because you've forced all of the traffic down one area with your LTN's and bus gates etc., the traffic will not get better with policing drivins even more. you're just going to push people and business out of Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I'm a single parent living in Headington. I take my children to swimming lessons at Oxford High School. My son has ADHD and struggles with adjusting to new things and teachers and the Swim School of Oxfordshire has been incredible for him, so I can't just move him. We drive there, so this charge on a weekly basis would really have a negative impact on our finances..	You are penalising Oxford residents and not people coming in for other purposes. That's really harsh!	Better bus provision. It would take us over an hour to do the journey from Headington to Oxford High, and the service is unreliable and infrequent. It's not a viable alternative.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Neutral	Neutral	There should be no charges at all	Yes	Other	Make buses from park and ride to hospitals more frequent	Negative	It is unnecessary. You should be waiting to see what traffic flows are like once Botley Road is reopened.		I use park and ride to come into Oxford but I'm frustrated that the frequency of services and speed of services from John Radcliffe to the centre is poor. it makes me want to drive instead. You don't need to send all buses to so many stops in the way to the centre. Some also don't turn up!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Very negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking, Other	Improved cycle routes and safer crossings	Very positive	I am always shocked by the amount of traffic in Oxford. I support this proposal - despite being a car owner myself.		
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper		Very negative	Because we think that it will increase traffic on the ring road and going on to it , people like us have grandchild duties which means that they have to be dropped off . Also as we live near the Churchill hospital, park and ride should be available. People in work iron shifts cannot use a bus in starting work at 7 am		

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant		School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I live near Wantage and currently work as a teacher at Cheney School in Headington. Using the park and ride would (on an average day) actually increase my journey time in and is currently not possible due to childcare drop off. I am worried that the congestion charge locations will make the ring road traffic much worse than it currently is (already, it is not fit for purpose) and I might have no choice but to seek employment elsewhere. When we moved into the are we bought an electric car to reduce our emissions so I am disappointed that electric car owners are being treated the same as petrol/diesel owners.	Could commuters be given additional permits, or perhaps the charge locations only be active on Tuesday through Thursday when traffic is at its worst?	Reopen the LTN routes - traffic used to be much better before these were introduced.
a resident of Oxfordshire living outside Oxford	less than weekly	Unpaid carers, Frequent hospital patients	I don't	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	By introducing this charge you just ensure that only those that can afford it will have the freedom to travel in and around the city.	No	Reduce Park and Ride parking charges and bus fares to encourage people to use public transport. An enormous amount of money has been spent on cyclists, which only benefits those young and fit enough to travel this way, for young or larger families and those older residents this is not an option and they are constantly discriminated against, making travel in and around the city stressful and expensive.
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I live in Buckinghamshire travelling to Oxford for work. I drive 45 miles round trip and then to pay an additional £5 charge each day would significantly impact my budget for travel. I can't use local transport to Oxford no trains I could use and busing from bucks to Oxford would take me over 2 hours.	It will make it a huge challenge for those living outside of Oxfordshire to travel to work in Oxford. Can't afford to live in Oxford and now making it a higher financial burden adding an extra charge to drive in daily	Make the traffic light system work better Marston Ferry Road as an example I use to work already has a huge cycle lane makes the road pointless to have if people can't drive through at peak times. Hardly seen buses go through that route so unclear why this road is one considered for being charged. The alternative route I have is the ring road. It is beyond horrendous! Hardly 3/4 cars get through before the lights change. It builds up with cars intensively. Not sure how cars sitting in traffic building up fumes is helpful to the environment nor traffic for buses all that it does is push the traffic build up somewhere else achieving nothing
a member of the public living outside Oxfordshire	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Other	I can see no benefit to the scheme so the money should not be taken from drivers in the first place	Very negative	I currently visit Oxford on occasion to bring visitors into the city for Oxford's benefit. This proposal is likely to mean I take them elsewhere		The congestion is self limiting so it is better to leave it to itself.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very negative	Fewer people will visit Oxford for pleasure or shopping. Fewer customers mean some shops will have to cdose down, and people will lose their jobs. Oxford is already an expensive city to live in, but wages are not keeping up. It's already hard to live in this city	I can't afford to pay an additional £72 — that's way too expensive. On top of that, the buses are not reliable at all, and they don't even take me to most of the places I need to go. I live on Eynsham Road, and the bus service here is honestly a joke!	Before you start forcing people to pay this unfair charge — which will mostly affect low-income residents — start by improving the bus services and making them more affordable for locals. More people will use buses if they are more frequent, reliable, and cheaper. If you sort that out first, there may be no need for this charge at all. Also, start building proper cycling infrastructure on key roads like Commarket Street, Queen Street, and Broad Street. How can vou expect people to cycle when they're forced to walk their bikes through half the city? It's honestly a joke.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	LTN's in the Cowley area have been the worst decision the council have ever made, they have created unprecedented congestion and stationary traffic everywhere. They have forced traffic into a limited condensed area, and created longer journeys! Do the maths, previously a journey took for example five minutes and one mile, now it takes twenty minutes and four miles. This will result in more pollution and a complete waste of fuel and time, you have removed pollution from one area, multiplied by four to five times and moved it to other areas. how is this common sense?	Listen to the residents of Oxford, work with the people of Oxfordshire not against them! Oxfordshire councils are currently viewed as an organisation that despises the residents of Oxfordshire.	Remove the current LTN's in the Cowley area, carry out an unbiased survey of genuine people to find their views? Nobody ever wanted LTN's, it has removed all means of flow of traffic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I try to cycle or bus most days to work, but at least twice a week I drive for various reasons - medical issues or appointments. On these days the journey to work can take up to half an hour driving two miles, the journey home can take up to an hour. If all the traffic is directed onto the ring road, getting to work will take much longer, especially going into the winter months.	I understand I can get passes to drive through these particular roads. I would hope that if the pubic consultation shows that the majority of residents are against these charges that the council will listen and not implement them. I do believe that the congestion charges will end up being permanent.	Property in Oxford needs to be more affordable so workers can live closer to their place of work.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Very positive	As a family we made the decision to go car-free and rent a car only when there is no alternative for the journey. The traffic situation in Oxford needs to be addressed urgently to discourage single use of car and unnecessary car journeys. Traffic, the sense of entitlement the car drivers have on the road and the rising size of the cars make cycling far less safety than it should be. Any measure that tackles this inequality is a good start.	It should be based on the size of the car.	Communication should be bolder, consistent, more frequent and ubiquitous. Work on the alternatives before the measures has put in place as much as possible.
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders	I don't	No impact	No impact	About right	Yes	Add new bus routes		No impact	I am a blue badge holder so I can apply for a permit BUT as a resident of Cuddesdon & Denton please be aware that we don't have a regular bus service so my elderly neighbours would have to pay to go into central Oxford to shop - not everyone can access a park and ride bus (for example not everyone can step up to get on board or queue for the bus back to their car. I think vou need to be mindful of the rural villages that don't have a reaular bus service.		There are too many buses on some routes! Through Wheatley is a good example where there are often 2 or 3 buses arriving one after the other. I think this needs to be addressed so that the services are allocated where needed.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I work in a school in central Oxford. These charges would heavily impact commuting staff and families coming to the school.		Create bus bays so buses don't need to pull up on the road. Make park and ride parking free / cheaper Larger park and ride car parks. Use somethino similar to ULEZ for the barriers?
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Fix potholes	Very negative	These congestion charges , low transport zones are affecting commerce and free movement in Oxford. You are killing the town under the guises of weak climate change arguments.	Try planning to improve people's lives and not restrict and tax them.	The percentage of residents don't want to use buses or cycles. It's a tiny percentage which has no impact to pollution. Your ltz zones have made traffic in parts of the town WORSE . Parts of Oxford are closing down commercially because residents are avoidina the city due to YOUR bad decisions.
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No			Very negative	The congestion charge would restrict residents' freedom of movement by placing a financial barrier in daily travel within their own communities. making routine activities like accessing services. or commuting more burdensome.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Other	Deal with cycle theft, increase ebike assistance to 20mph/32kmh for commuting to make it faster	Very negative	We already pay a lot of tax for having our cars on the road, no need to introduce any new ones… if you observe what's happening around you, you will find that the poorest people are already struggling and those charges will impact them the most. There's plenty of reasons why this is not a good idea and there's few why this is a good idea, but Oxford city centre is already not the most attractive place to visit and you will make it less accessible. Local businesses will suffer as people will choose to go elsewhere. also no traffic problems will aet solved. it will aet worse in other areas....	I think our concerns are that you guys are not listening to any of our comments…	Make busses free, allow personal scooters, increase ebike assistance speed to 32km h would literally cut 10minutes from my commute which would make me use my bike more frequently to commute. Reduce bike theft so residents feel safer to use bikes. There's plenty of ways if you think about it, think of more of a carrot rather than the stick approach.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Negative	About right	Yes	Make Park & Ride parking cheaper		Very negative	You are only targeting private cars where as other cities who run this share over other users like vans and bikes	Why not make the park and rides parking free again so there is suitable parking for people to commute from	Make all park and rides free to park so that it's a viable alternative to travel in this would encourage people to use alternative Luke bus and bike
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	This will have a very negative effect on Oxford and anyone who wants or needs to get into Oxford for whatever reason. If implemented it be be in place forever. Another reason to stay away and kill oxford.	It is difficult enough already to come into Oxford without more charges. I will be staying away even more so if it's implemented	Make the park and ride completely free to use. Get bottey road open, it's terrible that the council have allowed this to be closed for so long now.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	Too high	No	Make buses cheaper for all, Make bus services more frequent, Other	Improve the roads ie potholes	Negative	This means less people will visit us as it is more difficult to get to us. As a mother with a young baby this is very isolating. Taking the bus with a young baby is difficult as there needs to be a space available and no disabled passenger. Making people pay to visit us will only increase our isolation	Make streets one way for cars and two ways for buses. Ie car only go down the cowley road but buses can do both. Open back up side roads but again with one way systems to reduce traffic flow on them. This way buses can flow down the main roads more efficiently. Actually listen to people who live in and work in oxford as pointless survey when you have made a decision and do not listen to the oecple	Make streets one way for cars and two ways for buses. Ie car only go down the cowley road but buses can do both. Open back up side roads but again with one way systems to reduce traffic flow on them. This way buses can flow down the main roads more efficiently.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	if imposed then park and ride should be made Free	Very negative	it will make Oxford almost impossible to visit with two young children and all their required items le pram etc	as these are public highways and public rights of way then you should not be charging for their use just because there is an issue with one route that causes congestion elsewhere and causes inconvenience to public transport - instead Network rail should be made to foot the extra costs to public transport and if restrictions are to be put into place then be made to subsidise free park and ride for the duration of the works after all if they are causing the issue then they should be paying for the cost of solving it.	the removal of vehicle restrictions and road width restrictions will allow traffic to move more freely and hence in turn re4duce congestion by improving traffic flow this can be further improved by the removal of 50% of bus stops and the remaining stops to be sited in locations that vehicles can pass stationary busses properly again allowing the movement of traffic to be easier. Any experienced city drive will tell you that at the front of virtually every traffic jam is a bus it is also interesting to note that in times of a bus strike when fewer busses and more cars are on the road traffic tends to flow better
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Other	Better car parking	Very negative	There should be no charges to use roads and no restrictions on travel by the most suitable means	Yes. Please abandon the idea entirely	Remove one systems and traffic lights, open up more roads and improve parking
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Other	There should be no income as you should not be doing this. You should wait until the Botley road is open. If the buses are congested then this is your fault because you decided to have the LTN. My strong recommendation is take away the failed LTN's.	No impact	You need to wait until the Botley road is open and then turn on your terrible traffic filters. If the buses are finding it difficult due to congestion, then open up the LTN's and allow traffic to run more freely. Before LTN's I could chose difficult routes to get to Cheney School. You forced me into driving my car where the buses go. How many more people did you force to go where the buses go. It is your fault the buses are congested. My strong recommend is lift the LTN's until the Botley road is open. Do not charge hard working people £5 a day charge.	You need to wait until the Botley road is open and then turn on your terrible traffic filters. If the buses are finding it difficult due to congestion, then open up the LTN's and allow traffic to run more freely. Before LTN's I could chose difficult routes to get to Cheney School. You forced me into driving my car where the buses go. How many more people did you force to go where the buses go. It is your fault the buses are congested. My strong recommend is lift the LTN's until the Botley road is open. Do not charge hard working people £5 a day charge.	Yes open the LTN's as this did not work. You just pushed traffic that used to cut through this roads safelly, and moved then to where the buses go. Open LTN's until Botley Road is open. MY last suggestion would be get one of those big digging holes machine. And build Oxford an understand station (like London) 50 years from now there will still be more cars. So do something radical, and build an underground network (like London)
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	making central Oxford safer for pedestrians	Very negative	It will make me less likely to enter Oxford for shopping	It is bound to damage the local economy. In 1966 Oxford city Council stated its aim was to discourage rural residents from entering Oxford and that Oxford should be kept clear for residents of the city only. This scheme continues that long standing ambition.	Reduce the number of buses "not in service" (up to 50% at peak times) and "staff buses" from transiting the city centre
an Oxford resident	weekly	Blue badge holders, Unpaid carers, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Worried about my large family being able to visit me	i don't think it is necessary. You are increasing people's journeys and forcing them on to a bypass that is not fit for purpose. The Slade and Cowley Road will be even more congested	open up the LTN . Traffic always ran freely before they were shut off.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car		Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Very negative	I wish to express my profound opposition to the proposed temporary congestion charge for Central City and the associated Traffic filter scheme. I have lived in Chalgrove since birth, and have worked for the University of Oxford for the past 30 years in the University Science area on South Parks Road. During that time, it has become increasingly difficult and expensive to get to work from Chalgrove. I do believe the proposed measures will make my (and others) journeys into Oxford from outside of the city infinitely worse. Chalgrove has relatively poor public transport and that whole area (Garsington, Stadhampton and Wallington included) is only served by one bus (Thames travel 11). For example, in the morning there is only a bus at 7.13 or 8.30am which get into central Oxford at 8.13 or 9.26 respectively. Hardly useful if you start work at say 9am. I have two elderly and quite infirm relatives in Chalgrove whom I sometimes need to attend to, and this is the reason I am able to receive a Central Area Car Parking Permit from Oxford University (which we pay for from our salaries), so I can get to them quickly should I need to. Public transport to Chalgrove would not give me the opportunity to get back to them quickly. This is not care in an official capacity but I have needed to go and help them as an emergency when they have had a fall or hospital appointments etc. This congestion charge and traffic filter proposal seems to disproportionately discriminate against people who live in the south-eastern part of the county, as there would be numerous charging point (potential traffic filters) on the main routes into the centre of Oxford from this direction. Other roads into Oxford (such as from North Oxford or the West) have fewer or none at all. I Apart from my opposition to the whole scheme in principle, my main disagreement with the proposed scheme is in the allocation numbers of permits for drivers: WHY will someone who lives in rural Oxfordshire (and who has poor public transport links) only have 25 permits per year, whereas someone within Oxford city (and infinitely better options for public transportation, walking or cycling within Oxford) have 100 permits? This is outrageously unfair to those of us that HAVE to use our car for our everyday journey to work. As you know we have no Park and Ride on the approach to Oxford from the whole South-Easterly (Chalgrove) direction. This issue does not just affect myself but many others who are of low-medium incomes and will find it difficult to afford to work in Oxford (the city of my birth) should this proposal be adopted. Finally, this congestion charge idea wasn't mentioned before the county council elections only a couple of months ago. To claim that Oxford County Council have a mandate for this is entirely false as the voters had no idea it was on the cards. REDACTED	Please see above comments. Also the siting of the St Cross filter is right next to where I park for work with my University Area central Parking permit. If it goes ahead I will have to do a detour or several miles and greatly increased time just to park on the other side of this filter.	Traffic is always much worse during term times so discouraging school run journeys would be an option
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Very negative	About right	No	Make buses cheaper for all, Make buses cheaper for young people		Negative	I understand what the aim is, but I feel setting up and administering the system will take up a lot of the revenue generated. What happens with businesses having deliveries, who pays the charge for their delivery drivers? It is likely this cost will be passed on to the consumer.	If you consider tourists to Oxford who hire a car, they have to content with Bus Gates, ZEZ's and now Congestion Charges which will in future move to Traffic Filters. Driving around a new city is hard enough without a variety of different restrictions. I've seen many people driving through the bus gates as by the time you realise where they are there is no room to turn around	Potentially look into parents who do the school runs across Oxford and see if there are any alternatives for these groups; walking, cycling or shuttle buses. I normally cycle into Oxford for work or go on the bus, they are my preferred options. If I come in with my family then it's cheaper to drive and park than get the bus or the inconvenience of the park and ride (drive and bus). If buses were cheaper then that would be my preferred option, but getting 25 free permits a year would likely cover all my drives into Oxford. For a period my daughter had ice skating lessons, and in situations like this, the idea of ice skating lessons in Oxford would be less appealing if I had to pay for the congestion charge.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Neutral	I'm not opposed to the concept of reducing car traffic in Oxford (I'm in favour of the LTNs). However, a scheme that allows individuals to pay for access is merely a tax on lower income people. The wealthy won't think twice about driving through the congestion charge locations. If anything, this benefits them even more. They have a quieter, more pleasant commute into the centre and have more parking options. Meanwhile, lower income people are forced onto substandard public transport.	The suggestion you will use the money raised to fund the scheme and improving transport is concerning. Because either you're anticipating this will reduce traffic (and therefore little money will be generated), or you're not anticipating this will reduce traffic for there to be money generated (in which case, what's the point, and again, this is a tax on lower income people).	Oxford Underground would be the pipe dream. A subway system spanning Oxford.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	The cost is excessive, especially when there are limited options for those of us commuting to Oxford from further afield in Oxfordshire. Currently to get to work in Oxford it would take me over 2 hours and 2 buses to get to my workplace in North Oxford, which is not sustainable financially, nor a good work-life balance. Seacourt park and ride buses cannot go past the station and Redbridge park and ride is extremely busy and can be slow in the mornings.		Increased bus services (routes and frequency) for towns further outside of Oxford, e.g. Wantage.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes, Other	Hospital shuttles that go directly there from the park and ride, not expect staff to sit for an hour on a bus before or after their working day…	Very negative	Why just cars? Surely this is discriminatory? Your rationale is to reduce traffic and pollution, so it should be for ALL vehicles surely? Obviously you don't want to impact business but therefore you need to think of another way. You need to improve public transport BEFORE you do this… especially for those living outside the ring road where there are no public transport options to aet me to work on time and home again with the hours that I work….	You said the reason for not bringing in the traffic filter is because of the Botley Road work… well these 'temporary' congestion charge locations are essentially the same thing, but under a different name.	Better public transport options! Having lived in London for 20years wouldn't dream of driving to commute but there is no need as the public transport options are numerous and 24hour…
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	Encourage people to use the park and ride, it will reduce traffic and pollution		Dedicated cycle lanes everywhere, where cars physically cannot access
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	No	Extend hours of operation for buses		Negative	Stops regular travellers entering oxford	No	No
a resident of Oxfordshire living outside Oxford	weekly	Disability benefit claimants, Unpaid carers	I don't	Very negative	Negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I'm an unpaid carer, and if my disabled husband isn't with me i need to get back to him as quickly as possibly, this means that if i'm visiting my dentist or other business in oxford i really try to minimise the time i spend away from him, i don't have time to wait for buses and walk to or from stops etc. Also the bus or park and ride currently costs me more than just driving in and parkina	Charging isn't the answer it will undaly affect poorer people and reduce visits to independant businesses not well served by eg the park and ride - there are a number of restaurants and shops i go to on st clements and cowley road and the idea of coming into oxford to go back out of it again is ridiculous when i could just drive straight to st clements and park instead. This area is not well served be public transport if you are comina from south oxfordshire and parkina at redbridge	We should keep tourist buses out of the city, they sit with their engines idling and block traffic on the abingdon road
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative			
an Oxford resident	daily	Blue badge holders, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Open Botley Road!!!!!!!	Very negative	You have ruined Oxford	No words	Lift LTN'S and stop

Survey Response

Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Very negative	I don't want to be dictated as to where and when I travel. I don't want to be surveiled either. We live in a supposed democracy, this is an autocratic measure from a disingenuous council who should have put this in their election manifesto.	Holloway's charge will kill off the businesses in the area.	Make bus journeys fully subsidised, it would get people on board with the idea by being an incentive
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	Won't want to park at the Westgate for shopping as will incur an extra £5 charge. More worrying if I've driven in the wrong area and will get fined - need to be totally clear.		I would happily get the bus in from Witney but as it takes longer than driving my car then there is no point. You need to make bus travel quicker for people to stop using their cars. My sister lives in Carterton and it sometimes takes her 2 hours to get to Oxford.
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	No impact	Too low	Not sure	Make buses cheaper for all, Add public cycle parking, Other	traffic slowing down measures on residential streets like the concrete bays that force cars to stop but let bikes through on one way streets marking and do something about the Plain dancers for cyclists	Positive	There are far too many cars in and around Oxford making the city and areas unpleasant for residents, constant noise and pollution and parking everywhere, especially on footpaths. Drivers are also often very aggressive towards pedestrians and cycles.	A lot of vans are driving in and around oxford, I think these numbers should be reduced as well as private cars or limited to certain hours - like outside school runs - no heavy or business traffic at school runs maybe? It makes little difference to cyclists to have markings of a cycle lane on the street if there are delivery or builders vans parked on it and force the cyclists into the middle of the street.	I think the Plain should be made into a one way streets system or a cycle/pedestrian bridge should be developed. The Lime Oxfords system means that you pay more to use it than city centre car parks if there are more than two people in the car Try creating a system to help reduce congestion rather than this revenue grabbing approach
an Oxford resident	weekly		I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Add new bus routes, Make bus services more frequent		Very negative	Its just the beginning and not necessary. Businesses in Oxford already suffer.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive	There is way too much traffic. Park and rides should be free parking and a £1 bus. Everyone would use it (as long as the buses were frequent). It would make a massive difference. I live on Banbury Rd and rarely drive towards down. The air quality in my home really worries me.	No.	Make parking in the park and rides free. Just charge £1 for buses and force nearly everyone to use them except blue badge/trades. The private schools in North Oxford generate so much traffic. Often parents living in North Oxford driving their kids 0.5miles to school. Make that stop! Also ban people from leaving their cars running outside people's houses. Also make cycling safer so cyclists stop cycling on the pavement. It's all getting increasingly dangerous for cyclists - with e-bikes and scooters, everyone looking at their phones. So I don't blame the cyclists for usina the pavements but it's not fair on pedestrians.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative	I am active in various clubs that require me to go to central Oxford by car. It's just not practical to use public transport (from Woodstock) as it would take far too much time	Make electric cars exempt	
a resident of Oxfordshire living outside Oxford	less than weekly		I don't			There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I like to be able to go to the theatre and shop, eat out in Oxford, if I am already paying to park in the Westgate, the Ice Rink car Park or the open air car park near park end street, I do not see why I should have to pay an additional £5 to drive to pay to park. I choose to drive because the trains are not sufficiently reliable, and it is safer as a single woman. It is also quicker to leave to city than wait for Bus which takes longer and is less direct to get home after an evening out. Equally it is easier if shopping to be able to put your purchases in a car and not carry them around.	I think this will have a detrimental effect on people's ability to use the city for leisure activities, tourism will be impacted and I cannot image how it will impact those that regularly have to travel to oxford. Public transport from the villages and towns around the county is insufficient to enable easy access into the city - equally by limiting travel at these times, it pushes everyone onto the ring road and the A34 causing further congestion down the line. Have you also considered the impact for those that need to cross the city to get the main Oxford University hospitals for appointments that start at 8am - again, public transport is not a viable option for these early hospital appointments. I recently had to bring my dad in for a brain MRI at 8am, from Wallingford - I live in Didcot - I had to leave my house at 6.30am to get to wallingford to then drive him to the Nuffield Orthopaedic Centre - we arrived with 2 minutes spare due to the heavy traffic on the ring road and windmill road. Despite leaving Wallingford at 7am - had traffic been limited through Holloway at that time due to these proposals the traffic would have been even worse. I think you really need to consider the impact of these proposals and the knock on affect on the city - Oxford is increasingly less and less appealing a place to visit, which is a shame, given its beauty and history - but its simply not cost effective to visit anymore	Speak to the train operators and make sure that trains are actually running - have direct buses to the market towns that down go round the houses and cost a fortune.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Neutral	There should be no charges at all	No	Make bus services more frequent		Very negative	I work at the JR and travel through St Clements daily so this will hugely impact me as my commute will be even longer. I already work very long hours in a stressful job and this will add to my stress levels imacting my work life balance.	Staff at OUH & OHFT should be exempt from the charges as they are essential key workers	Open the LTNS which pushed traffic onto the arterial roads leading to the huge increase in congestion in central oxford
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Bus pirotisation measures are a good idea. The challenge is not all locations are easily accessible by bus, I know people who had to change jobs as there was no good bus routes. For some a car is an important leveling up tool, they can't get to work without it. In terms of car ownership, there is a correlation between income and number of car ownership in England. Except in 2 cities: Oxford and Cambridge, Oxford is not like rest of England. There is no correlation between income and car ownership, there are for example high income households with no car and £2k ebikes, and there are low income households with a £2k car. In other cities measures that impact car users mostly impact high income households but that is not necessarily the case in Oxford. In Central Oxford area 54.6% households don't have a car or van, while Greater Leys only 11% have no car van. You can also roughly correlate this with walkability Index. The last walkable areas have higher car ownership in Oxford, which are also the same areas with higher Index of Multiple Deprivation. This also very roughly correlates politically, these are mostly Labour and Independents/IOA wards. While roughly the low Index of Multiple Deprivation, high walkability, low car ownership areas, are mostly Green and Lib Dems.	Just a sociology observation not a transport one. A supersing dynamics played out during the County Council congestion charge meeting. Based on Index of Multiple Deprivation, mostly high IMD area speakers objected to the £5 congestion charge, while mostly low IMD area speakers supported it. The high areas were saying £5 is too expensive during the cost of living crisis, while low area speakers were saying £5 is too cheap and should be much higher, and bigger cars should pay higher prices, and there should be less free permits/exemptions. See Oxford Mail https://www.thisisoxfordshire.co.uk/news/25248415.oxford-congestion-charge-punish-city-says-councillor/ It reminded me of an interesting talk I attended about Oxford by Prof Danny Dorling called ACTING UP IN THE MOST UNEQUAL CITY IN THE MOST UNEQUAL NATION IN EUROPE. We live in the most unequal city in UK in the most unequal country in Europe. Bus pirotisation measures are a good thing to do, and bus gate traffic filters might help the buses 🚌, but asking for higher levels of congestion charge, higher prices for bigger cars, and less free permits EVEN BEFORE the traffic filters congestion charge trial starts goes to show how big the community divide in Oxford is. https://www.oxford.gov.uk/downloads/download/370/download-the-indices-of-deprivation-2019-oxford-report One way is to look at income deprivation levels of areas/wards of speakers and Councillors who supported the congestion charge vs areas/wards Councillors and speakers who objected to the congestion charge. According to the 2019 Index of Multiple Deprivation, "10 of Oxford's 83 neighbourhood areas ('Super Output Areas') are among the 20% most deprived areas in England. These areas, which are in the Leys, Rose Hill, Littlemore, Barton and areas of the city, experience multiple levels of deprivation – low skills, low incomes and relatively high levels of crime. After adjusting for housing costs, 26% of children in Oxford live below the poverty line." Labour and Independent Councillors from these areas objected to the congestion charge and said £5 is too expensive in the cost of living crisis, while Green and Lib Dems Councillors from low IMD areas supported it and wanted higher charges for bigger cars, less permits/exemptions etc... Maybe new tax instead of being based on size, be based on current £ value of the car, this would be a more equitable approach than size. Changing an old valued £2k car the same level as a £20k seems unfair.	Open Circus Street one way from Cowley Road to Iffley Road temporarily as a trial to reduce volume of Cowley road to Iffley Road cars going round the Plain roundabout, it would make it safer for cyclists.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Positive	About right	No	Make buses cheaper for young people, Make bus services more frequent, Other	Introduce new bus routes, eg covering the ring road. To get anywhere from Horspath we have to get the once an hour bus into town and then get a connection out again. Would be much easier to use if could get to Barton/Summertown via the ring road	Neutral	Hopefully fewer cars on the roads when I cycle to work but will stop my children attending some of the afternoon activities they currently do in Oxford		Improvements to cyclist safety on Cowley Road. Review traffic light timings at Horspath Rd/Ring road junction so that cyclists don't have to wait 3 times to cross one road. Increase cycle parking around Commarket.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I use grandparents as childcare in Oxford and live out of the city. I need to drop off and pick up my child and won't have sufficient passes. As such it will cost significantly more for this provision.	Oxford has been completely broken. The combination of the LTNs combined with the closure of Botley road have brought Oxford to a halt. Removal of parking on street in places like east Oxford hasn't appeared to improve parking for residents, and has reduced the available spaces for visitors/results in having to park in overpriced car parks closer to town which results in less walking/plus use into the centre of town. It feels like a very simple problem to fix if you actually speak to and listen to users of the city! More than happy to be contacted for my opinions	I don't think the congestion charge will reduce traffic. It will just bias it towards people that are willing to pay for it, and as such won't free up any additional capacity on the roads.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Other		Very negative	This will cause more mayhem on the roads and will be another pointless charge we have to pay out of our own pockets on top of road tax we PAY to use the roads!! and council tax.	Get rid of this stupid idea and remove the LTNS which will free up the roads compared to now. The main roads people shop, eat at and visit are being congested heavily with standstill traffic which is causing people to breathe in all the fumes from stationary cars.	Open LTNS and turn the side roads in to one way streets, why is these provisions only around the East Oxford area and not North Oxford?!?!
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants. Disabled tax cars	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	SEND children are being sidelined over vanity traffic schemes	Very negative	It's just another layer of control by a certain group of councillors who have ignored ALL other public consultations and will do so with this one.	DO NOT IMPOSE IT the residents of Oxford in the majority do not want it. If they are so sure it's wanted or needed have a referendum but they won't. Democracy in Oxford is non existent now.	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking, Other	Remove the Divinity road and Southfield road L TN's Make the two roads one way (e.g. Divinity Rd up to Headington, Southfield down to Cowley Road. Remove the Howard Street and Magdalen Rd LTN's and reinstate one way flows. Retain all other LTN's	Very negative	Oxfordshire and Oxford itself does not have an integrated public transport network. This means that people have to use cars for all or part of their journey. If people were simply commuting to work it could be called inconvenience, however many are dropping their children to breakfast clubs, child minders or relatives before travelling to work and then the reserve journey. This simply cannot be achieved with today's public transport, or cycling set-up.	The charge locations are a tax on people who have to use their car for one reason or another and are grossly unfair. Not everyone who is unable or struggles with public transport is a blue badge holder. The council should not give free permits to anyone who has a business parking space in Oxford. This smacks of cronyism to Oxford University (Mr Gants employer) as they have by far the most parking available in the city.	Oxford University should be charged a levy for every tourist bus that arrives in the city, as they are the "attraction" they have come to visit. Oxford University to pay a parking space levy. Remove some of the LTN's in East Oxford and make traffic flow one way. Remove the on street parking from any LTN road as these roads have become impossible to walk on the pavements, as car are parked half on half off.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper		Very negative	I would have to pay a charge to access the railway station car park, this is very unfair, the station serves a large part of Oxfordshire, not just Oxford, and for late night or early morning trains driving is essential particularly for those who don't live on a bus route. And before you mention Oxford Parkway, that station only serves for trains to London. If you want to go north then it has to be Oxford central station.		Introduce a charge for those who drive through central Oxford - i.e., if somebody drives in, parks, then drives out again by the same route they don't have to pay. Introduce significantly higher car parking charges in central oxford at peak times (e.g. weekends) encouraging drivers to use the park and ride. Also introduce "car park full" variable message signs on the routes into Oxford, so that you don't get drivers queing down the abingdon road trying to get into an already full westgate car park. Reducino or removino park and ride charaes would be a bio helo.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, School students with special educational needs	I don't	Very negative	No impact	There should be no charges at all	No	Make buses cheaper for all		Very negative	Adding more hassle to travel to Oxford and will push shoppers to go elsewhere	Invest in free park and rides and cheaper buses without bringing in congestion charges. The congestion charges are just going to increase complexities for locals, cost too much to run and will push people away from oxford. By the time it generates enough extra to improve services it will be too late for the shops	Spend the money on free park and rides and cheaper buses without bringing in congestion charges
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	Too low	No	Other	Make city buses electric.	No impact	I occasionally need to be in Oxford and I will still be able to go into Oxford. I wish public transport were better, but I don't envisage that will happen. If it were, I would answer a positive impact. Buses are so uncomfortable, unreliable and badly sign posted that I will not use them. Why do we have buses that are so bad in the UK. I'd be happy to use them if you are welcomed with smile, they don't stink of diesel. shake, rattle and make vou deaf.	Commuters should not get a permit.	Introduce a team system that does not mix into the traffic congestion. Make entry roads into Oxford one way, introduce bike hire schemes that are easily accessible
an Oxford resident	daily	Taxis and private hire vehicles	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make bus services more frequent		Very negative	Will be very bad impact on businesses around oxford. People will be put off coming to Oxford. Already there are many restrictions we as Oxford residents do not need any more.	Scrap the congestion charge as already cost of rent and living is really high in Oxford.	Remove LTN and improve public transport
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	The planet is dying, people use cars far too much having adverse effects on the pollution levels and public health in general including their own!		
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Negative	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	By removing side routes all traffic will now be funnelled into already dangerously congested routes. This will make journey times to the hospitals longer and may harm patients		Make an actual park and ride service like those in other cities. There you pay one charge to park and it includes the bus ticket. Oxfords system means that you pay more to use it than city centre car parks if there are more than two people in the car
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	No impact	About right	Yes	Add public cycle parking		Positive	This will help reduce traffic in my view so I am in favour of it.	None	With the number of cycles travelling through the Plain each day there must be a way of creating more safe cycle routes, even if it means encroaching on Oxford University land. We need an inner cycle ring route to lonaness toaether better
a resident of Oxfordshire living outside Oxford	less than weekly					Too high	No	Other		Very negative	Wouldn't come to Oxford again	Why do you feel it nessencerry to now charge people to attend hospital appointments, I cannot use public transportation as it dirtv unreliable and also I have an Autistic child who only likes to travel by car	Do roadworks at night, sort the botley road out
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Extend hours of operation for buses		Very negative	the congestion charge is another attack on cars by the council. When we have unused bike lanes and cyclist riding in the road next to cycle lanes. Fix oot holes. oroanise road repairs prooerly and traffic will move	They should not go ahead, but knowing the council, they won't listen to drivers	stagger road repairs, fix pot holes. For example on the Banbury Road near the cuttleslowe roundabout - why have roadworks 200 yards from a busy roundabout, with more traffic lights at rush hour and not think to move the bus stop up a few yards which backs up traffic
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't			About right	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive	Reduced congestion	Congestion charge is a BETTER idea than before. Those who need additional access by car can now get it by paying for it.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Very positive	I live and work in Oxford and the congestion is horrendous. The air pollution and the busy roads are dangerous for children. This scheme will hopefully reduce the number of car journeys taken in to Oxford and improve life for those of us living their, including our children. It should also improve travel times for people living outside of Oxford who commute by bus (many of my friends and colleagues).	The 100 residents permit per resident in Oxford is too many. I believe this should be 100 per household because people in Oxford who have a frequent need to drive through the charge locations will likely already be covered by other permit categories. Similarly those residents in the central Oxford zone, while rightly qualifying for unlimited permits themselves, should be limited to 25 permits per annum for visitors. There is no reason why infrequent visitors to that zone should not be required to pay the charge.	I know this is difficult but find ways for genuinely segregated cycle paths for key commuter routes. Force developers to include fully functioning cyclepaths for commuter routes out of town (the Barton Park use of traffic lights instead of an underpass is a disgrace). West Oxfordshire desperately needs a safe cycle path from Witney and Eynsham; this should be a condition of the Botley West Solar Park.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	i simply will not be able to get back and forth from my both my workplaces. i already work two jobs and struggle to pay the bus fee, let alone the congestion charge if i need to use the car instead. both my grandparents are residents of holloway too meaning i wont be able to help take them to places to allow them to live what they have left of their life!	its ridiculous. get rid of the LTNS and this will lower the congestion. no need to pay congestion charge, its just a money making scheme for oxford city council who do not care about residents.	uplift the LTNS as this will lower congestion
	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	You should not be treating the people of your city like this. I have grown up in Oxford and mine and my partners parents live in Oxford. Why should we have to pay if we want to come and visit them?? We live in Thame so have to get 2 buses with children.	Very negative	My dad is disabled and needs care from my brother an me - if my brother or I need to get to him we use our cars- as we live 15/20 mins away via car for 1:30 hr on bus. it's not ok to charge us we grew up here. Have friends here. It's Ridiculous	Occ need a complete reshuffle of staffing if they are treating the people of the city who have lived here their whole lives like this. We can't all afford to spend over £500,000 on a house at the age of 25 - hence moving to Oxfordshire. It's awful they are treating former residents and current residents of Oxford in this way. People are not happy. You did the same with LTNs. "temporary" - it's a lie. We are not as big a city like London.	Open LTNS. Ambulances, fire engines, police offers will be able to respond to people in good timing. When you have multiple road works going on at the same time- open the LTNS. What do you really expect??
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very positive	I don't work in central Oxford and if I do visit for leisure I tend to drive as buses are so expensive. It is SIGNIFICANTLY cheaper for my family and I to drive and pay for parking. If buses were cheaper and quicker I think more people would use them (as well as the park and ride). Hopefully by removing some of the car congestion the bus services will be better for all parties.	Do it. Something has to be done to reduce car congestion in Oxford. Any changes you make will never be popular with everyone so please have the courage of your convictions and implement it.	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car		Neutral	There should be no charges at all	No	Make bus services more frequent		Neutral			
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	A very positive proposal. As you say, you can't reduce traffic without reducing traffic. Thanks too for getting on with it; it would have been easy to wait for Botley Road to reopen, but braver to go ahead anyway. Thank you.	Just a thought about the scheme (which I support) running alongside the Low Emission Zone. The latter seems a bit redundant if all traffic can be reduced and, in the future, the proposed scheme (or the filter scheme to follow) can be expanded. Would it be simpler and less confusing to phase out the LEZ?	The proposal (or the filter scheme to follow) could and should be expanded with further filter points. People need to leave their cars outside of the city centre. Whilst it is reasonable to grant permits to residents, I disagree with the idea of granting permits to workers so they can continue their daily commute by car. They should be encouraged to use the Park and Ride services or other buses.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Oxford does not require Congestion zones. It is far too small of a city to implement charges for certain zones where you can walk from one side to the other in 5 minutes. This is not fair for the residents. We do not wish to pay for free movement in our own city.	Very negative	Oxford does not require Congestion zones. It is far too small of a city to implement charges for certain zones where you can walk from one side to the other in 5 minutes. This is not fair for the residents. We do not wish to pay for free movement in our own city.		Get rid of the LTNs. Ever since they have been introduced, traffic has gone out of control. Congestion levels are getting worse and the botley close is not helping anything either. Stop making free movement so difficult for the people that live and have lived here for decades.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	About right	Not sure	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	the largest impact is to the temporary location of Oxford Co-Op Station Nursery. As this has moved from Rodger Dudman way to enable to works on Botley bridge, this is now on the east side of the bridge. If this was on the west side, this would not be a negative impact, however it puts the nursery right in the middle of 2 congestion charge areas, Thames Street and Hythe bridge street. To be able to commute in to drop kids, and then go back out on the ring road to get around to Headington for work is very difficult compared to going through town, although possible. However, if this was introduced, we would have to pay the charge daily just to drop child off at Nursery. Considering the impact the nursery move has already made for the past 2 years, we feel parents should be able to have access via Thames Street for the purpose of nursery drop off.	This would be best to leave till botley road reopens.	More parking at Park and Rides, cheaper busses, cheaper park and ride, more bike routes. Considering working people and parents in Oxford within the permit scheme as many people commute into Oxford for work.
an Oxford resident	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	No impact	No impact	There should be no charges at all		Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very negative	It will further disincentivise people to travel to the city centre and ruin what businesses that remain		Make buses free. Build tramway. Yes it can be done. Other cities have them.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	I will stop visiting Oxford and so will my family. There are many other places we can spend our money.	It won't be temporary. These things never are.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make bus services more frequent		Very negative	we dont need this		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Business cars used as goods vehicles, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fill pot holes!!	Very negative			Remove all the LTN's!
a resident of Oxfordshire living outside Oxford	weekly	Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	No	Other	Why the heck are you introducing this ? Are you hell bent on becoming areedy like pigs for public money	Very negative	I don't need to explain	Yes. You council people are crazy. We as public have enough problems and you want to make our lives more miserable	I don't find any congestion in Oxford. The speed limit of 20 miles is ridiculous. Remove that and everything will be fine. Stop thinking like woke people.
a member of the public living outside Oxfordshire	daily		I don't	No impact	Negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	I hope it will make bus journeys more reliable and quicker.		Please could the scheme be extended to Banbury and Woodstock roads?
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Neutral	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative	Myself and my team have to travel across Oxford almost daily due to our work in childcare. This could make it more difficult for us to visit the settings regularly and ensure that children are receiving the best care possible.	Whilst I agree that something needs to be done about the traffic in the area, I think that improved and cheaper public transport is a more practical solution. Or if the congestion charge is to be introduced that it is couple with better public transport across Oxfordshire so that people have a realistic alternative way of getting into Oxford.	Better public transport in surrounding towns and villages. I live in a village about 10 miles from Oxford, I would love to use public transport on some days, however my bus journey would take up to two hours and there is not a bus early enough to get me to work on time and therefore I have no choice but to use a car.
an Oxford resident	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	OCC seem to forget that Oxford city is the County hub for all of Oxfordshire residents. These proposals will have a significant effect on the residents of the County. It will be even more of a reason to shop, visit elsewhere. It will push more traffic on to the ring road making it even more congested than it is now. For those of us who live in rural Oxfordshire visits to the City or hospital appointments will become even more difficult. Perhaps OCC should introduce a scheme whereby people in receipt of the state pension should be able to use their bus pass at any time of day. This would reduce car traffic much easier and be cheaper than this proposal.		Introduce free travel on buses for all people in receipt of the state pension.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative		It is a crazy idea an it will be the end of the business life in Oxford. The tesident in oxfordshire will chose other citys to shopping	
a member of the public living outside Oxfordshire	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	This system does not accommodate users of the ice rink who have very heavy baas to carry	Very negative	I play ice hockey in Oxford and not practical to carry bags and sticks on bus etc - I'm over 50.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	Not sure	Make bus services more frequent		Negative	How will this benefit community sports if made difficult and cost prohibitive? I live in Folly Bridge Court (i.e. outside of the central permit areas) and regularly visit other areas of the city including Botley, North Oxford. Already due to Botley Road fiasco I have to take the Ring Road to visit parts of the city that are less than 1 mile away direct. This adds significant cost and pollution. In adding further restrictions in where I can drive, essentially giving me 1 option when I leave my property, this will add further cost, pollution in the city, concentrate even more traffic on Abingdon Road and time to my journeys. Please consider the impact this is going to have on the Oxford residents, who pay council tax, as well as tourists.		
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	We are not London, this will be negative for people and impact tourism and those unaware.	It is a bad idea that will give the idiots in reform yet another drum to bang to bash the centre and left of the country.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Business cars used as goods vehicles	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	Yes	Other	do something to make sure buses arrive to every stop ON TIME as scheduled by the app.	Very negative	Even though the traffic is better, but it makes my living even more worse.	Starting time should be at 8:15 am instead of 7:00	Free permit should be applied to those residents who living inside the ring road of oxford, not just the tiny central area.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	About right	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	I live on the Botley Road and despite the closure, there is still a lot of cars and traffic that queue down the Botley Road causing air pollution and an unpleasant environment for me as I am currently pregnant. I strongly support congestion charging and would like to see higher charges for larger vehicles such as SUVs. I am hopeful that the congestion charge will lower traffic levels and improve air quality in the centre of Oxford	Strongly supportive and would encourage more local consultation to make sure that key scheme messages are clearly communicated with the public. Unfortunately, there is a lot of misinformation in the public and clear, concise information should be communicated via a variety of means	The congestion charge could be rolled out with a same time messaging around a temporary reduction in bus fares in the centre of Oxford. Private Bus companies will have to make a minimum contribution through temporary fare reductions rather than just partial messages. Larger and more heavier vehicles should have a higher charge as they cause most damage to the roads and incur maintenance. Cycle paths and pedestrian paths will need ro be the same quality as the carriageway with widening at key pinch points in the centre of Oxford
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Make trains more frequent and reliable- I would happily commute by train but it is not viable for these reasons; expensive, unreliable and always having to stand	Very negative	I am unsure what permit I would be granted as an Oxfordshire resident. But I commute for work and a voluntary role. Oxford is a city I love but despise travelling to. Further charges will put people off accessing a beautiful city. As I said earlier, look into trains which could should work. I have to drive to access the theatre as the last train is 10:30pm- work with the rail services to make this a viable option, rather than further obstacles. Additionally, local hospitals have been culled and more and more appointments are now at the JR- look at the reduction of parking here. People do not want to access public transportation if attending a hospital appointment. Oxford there is much work still to do.	See above	Tax on foreign visitors to reinvest into the infrastructure.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Neutral	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add public cycle parking		Very positive	Road space is limited. I prefer a city with fast, cheap buses, to one with slow, polluting, single occupancy vehicles. I think this proposal balances the needs of specific groups who absolutely need to drive, with the wider public interest in free flowing traffic.	I think that the congestion charge is an excellent idea. It will be very good for the health of children and adults, and very good for air quality and mobility. The status quo doesn't work and congestion is only going to get worse without determined action. I think that good publicity, of the kind developed by Zuhura Plummer, is essential to win public support for the scheme.	1. Getting more deliveries off vans and onto bikes. 2. Setting up pollution monitors with LED displays to raise awareness of the harms caused by congestion 3. Allocating funds for publicity to get people behind the changes. 4. Encouraging employers to have bikes for hire to get people to switch to active transport
an Oxford resident	daily	Blue badge holders, Disabled tax cars, School students with special educational needs, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Hearses and funeral cars	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Reopen certain roads that have been closed due to LTNs to ease congestion would relieve emissions alot better and avoid upsetting and irritating the people of oxford	Very negative	Why should I have to pay to drive on roads that arent maintained properly anyway, its a stupid idea designed to squeeze more money out of already struggling people, why not reopen roads so all cars in oxford arent sent down the same roads which then causes traffic jams and mass emissions	It is the most idiotic idea and while cause protest	Make cowley road and iffley road each one way, for example cowley road travels towards the city centre and iffley away from the city centre, then make some of the side roads that are currently closed that join iffley road and cowley one way so people can move more freely instead of the current situation of all traffic is funnelled towards the plain and magdalen bridge
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Improve parking in Oxford.	Very negative	I work full time at the John Radcliffe hospital as a doctor providing electrics services and emergency out of hours care as well. I have to travel between different hospital sites. This charge will cristle me and likely force me to work elsewhere.		
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	I live in abingdon and have to drive to work, i work 7am -6:30pm and have dogs at home, so adding on the extra time of getting a bus won't be feasable for me or my dogs. I have no family in the area to help with them either.	I don't agree that i will have to pay £5 a day when i am already struggling finantially. all because the prjject has taken a lot longer than planned. I am left with very little money every month and this will tip me over the edge massively, my mental health is already bad too, and this will have a big impact on that. Getting the bus makes me very anxious. I also havent paid for a car for it to be sat on my drive Monday - friday	Anyone working in oxford that doesn't live in oxford should be able to drive in.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	No charges	Very negative	No one in the Oxford area wants or needs this. It's very stressful when it's already bad enough with the train station being closed! Absolutely ridiculous	I think this shouldn't even be a prospect. The people of Oxford are NOT happy.	OPEN THE BOTLEY ROAD
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Other	Remove LTN's	Very negative	This is an effective deprivation tax. There are inadequate bus routes from large housing estates to others to discourage driving.		Remove the LTN's which will reduce the traffic congestion which has been caused by their installation.
a resident of Oxfordshire living outside Oxford	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Park & Ride should be free	Very negative	As well being a Oxfordshire resident we run a small business to 6 city centre shops providing products, its very difficult doing deliveries already (lack of delivery bays) so we have to park in a car park to make the various deliveries these additional costs will finish our business. have sooken to other small businesses who feel exactly the same	same areas are hit each time and it wont be temporary. The City centre is failing and this will finish it off sadly	If a congestion charge has been decided just bring it in between 730 and 930 and 1600 and 1800 and Saturday mornings rest of the time traffic is fine especially during school holidays.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Negative	Yet another hurdle for South Oxfordshire residents who need to get to Oxford. Bus service provision ranges from limited to non-existent (especially for those working shift patterns).	For those wishing to visit Oxford for shopping or entertainment it will be easier to go elsewhere such as High Wycombe, Henley, Marlow or Reading, The proposed plan will adversely impact retailers in Oxford.	South Oxfordshire no.11 bus service from Watlington to Oxford is infrequent, with no late service, and of glacial pace. The route stopping at every stop in Temple Cowley & Cowley Road despite these areas being saturated with buses. The journey currently takes over an hour when by car is just 30 mins. Addressing such a problem by making the service an express (limited stop) service would help those trying to get to/from work, and reduce the number of cars entering Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too low	No	Make buses cheaper for all, Make bus services more frequent, Other	Improved cycle routes east west and north south through centre of town around Carfax and Broad Street (especially past the Store hotel)	Neutral	As we live in West Oxford our movement around the city is hugely restricted by the Botley Road closure. Anything after that will feel like freedom, though it is a concern that once it re-opens it will become a stationary queue of traffic trying to park in the Westgate car park. Because we are in the residents zone and do not commute by car the 100 day exemption will likely mean this is OK for us. For the wider population making it impossible to access the central car parks without paying is an error I think due to the reduced number of routes to the centre at the moment.	I believe that congestion charging is a better choice of approach than bus gates, as it does not restrict in the same way. I think it would then be better to just be like central London and be unavoidable for all except where permits exist, so you'd have more cameras (eg under railway bridge), more like the London charge.	With a congestion charge in place, could the High St be re-opened to traffic (making eg Longwall St less dangerous)? Could you bus buses from Queen St like Commarket? But install a central two way cycle lane down both of these, or past the Union, to make cycling through the centre less of a battle. Shared spaces with pedestrians are a little stressful for all, shared spaces with buses are terrible. Road layout around Frideswide - could the block down to the ice rink be made a one way system for cars? Probably anticlockwise given likely queue nature to get to Westgate. Again with cycle lanes across frideswide, not shared spaces. Use congestion charge income to make park and ride buses and car parks free. That is not as convenient or pleasant as parking in town, so it needs to be really financially attractive. Otherwise, to solve shopper traffic you need more space (or parking) to remove the cars waiting to park from the roads. Rework the road network around the Plain. Traffic lights? Use Circus St as a one way system so that cars can exit onto Cowley Road only and enter the plain from Iffley Road only? Max out urban traffic but might be a bit less chaotic for bikes.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Add new bus routes, Make bus services more frequent		Very negative	It'll just increase traffic around for everyone. I can't get a bus in to work, there is no bus where I live at all ever. The closest bus stop that takes less than 2 hours to get in to work has no parking in it (and is a 3 hour walk) and only 10 mins drive anyway making it pointless.	It's not a good idea. It'll increase traffic not decrease. There are smarter ideas, one way routes meaning busanes. Those in Oxford being encouraged to actually take the bus since they are around so those that live out but work in, keeping your city afloat, can actually get in. You aren't London you don't have the public transport capacity to not allow cars. I live outside as a teacher if you make it too hard you'll be lacking another science teacher inside (almost all my colleagues live outside) meaning you'll have no teachers in the city. Stop punishing us for working inside the city but living outside. I can't help you don't offer a bus in my village.	One way routes Ban parents dropping kids off and picking up at school. The traffic halfs when private schools kick out as their SUVs aren't taking up the road
an Oxford resident	daily		I don't	Neutral	Negative	Too low	Yes	Make Park & Ride parking cheaper, Make bus services more frequent		Very positive	Traffic is atrocious in oxford often, and it is not just at private school pick up times. Reducing congestion is critical so the buses don't run at a snail's pace. The congestion charge can't come soon enough.	£5 is cheaper than a return ticket on the bus. SUVs and larger vehicles should have greater charges.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Disability benefit claimants	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Have already drastically increased traffic and pollution with the introduction on LTNs. Local businesses are also suffering and closing down as a result. The statically increased commuting times and traffic and pollution is having a huge negative impact on people's already poor mental health with poor decisions already being made to support the British public by the government.	It will only benefit the council and not the people of Oxford. You guys have already done enough damage with the LTNs. Please just let the people of Oxford have some peace and don't further restrict or subsidise the freedom to move and see family and loved ones easily.	Remove the LTNs. Traffic and pollution was substantially better prior to these being added. Makes buses and trains more affordable and the cheaper financial option to utilise than driving like in all other countries in Europe. This would encourage more people to utilise these methods of transport.
a representative of a group or organisation	daily	Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	daily	School students with special educational needs	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all		Very positive			
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	Not sure	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Very negative	This would involve a massive detour which would mean more congestion on the Banbury Road and more car emissions for the additional time in the car.		
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No			Very negative	You are making oxford a ghost town and no go area which you've already done . Why someone who pays , insurance, road tax and MOT to pay in his own city and street ? This is a stupidest idea like LTNs and bus gates. All council look at ppl's pockets rather than generating their own money through investments etc. May be ppl who are running this council can't think beyond or aren't capable to do something positive rather than upsetting and destroying businesses .Not sure this whole essay would make any impact or will fall on deaf ears like before . Enough said		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I think to impose a charge to the residents of Oxford to drive around their own city is very wrong. I think you could produce more funds for transport if you put a charge to tourists and to buses that bring tourists into the centre and that at the moment park in St Giles. I counted up to 12 buses in front of the side entrance of the Ashmolean Museum. Now you find big tourists buses with driver in the side street of the centre... The problem of the traffic in Oxford exists because to travel by public bus is too expensive for individuals and families.	The six charge locations will not solved the problem of the traffic.. The traffic will still be a problem. There will be more traffic on the ring road which is already very busy. The problem of Oxford traffic would be solved if buses companies would be put into public ownership and if park and ride parking would be free and so their buses. Bus transport is too expensive, unreliable and does not serve the citizens of Oxford, but just make money for the bus companies. I would also substantially reduce the guide buses that travel every 15 minutes, most of the time empty around the centre of Oxford and are suscorted by our taxes.	Cycling is extremely dangerous in Oxford. Most cyclists do not respect the rules of the driving code. They ride through red lights, ride against the one way streets, most do not wear helmets or have lights. This is a problem for buses, vans and cars. The system has been created for bicycles is not safe because there are not proper cycling lanes. You should study a system for cyclists to ride their bikes away from main streets and away from traffic. The only solution to reduce traffic remains inexpensive buses! People do not use buses because they are too expensive. At the moment the bus ride for a family is more expensive then the £5 proposed charge!
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	There should be no charges at all	REDACTED	REDACTED	REDACTED	REDACTED	REDACTED	REDACTED	REDACTED

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	weekly		I don't	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	More money making And making harder to get round Oxford ring road is a nightmare	We all know this is just the start more roads will follow and the powers that be won't listen they will just do what they want No one wants LTN's	Remove LTN's
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	It is ridiculous that you will not be able to get to the railway station to collect elderly infirm relatives or get to the car parks in Oxford without paying a charge.	Remove the LTN's	Improve local bus services from outlying areas, make buses cheaper. It is cheaper to use the car than take 3 people on a bus.
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Oxford does not have suitable other transport links (overground, underground) like major cities such as London or in America where congestion charges have worked. This will ultimately cost the average person travelling into Oxford with no material benefit to local communities, as shown in data from other cities where congestion charges are introduced, benefits are not immediate with behavioural chances not really seen for 24-36 months.	This is not something that should be looked at until such time as there are either more available buses, rail options and a potential tube/tram system introduced from major satellite towns around Oxford.	Serious investment into rail / other transport options needs to take place prior to any congestion charge introduction!!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Oxford council created the traffic with it's own incompetence (Botley road works) and the ridiculous LTNs in Cowley made without the consent of residents and now are punishing the residents again for it's own incompetence.		Scrap the LTNs or move some of the ones in Cowley to Summer town which had any implemented.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	At certain times of the year I need to travel across the city for business and social reasons. I use routes but served by buses and can't cycle or walk. I do this as little as possible and try to keep my routes to a minimum but don't see why I should have to pay to use these roads when anyone else can buy a different vehicle or just pay the charges. The wealthy is their huge polluting and space taking cars will still use these roads with little difficulty to them and no less congestion. This is a tax on those who are most needy and poorest.	Buses are a joke. I use at least twice a week. Have to pay for a parking permit as I can't walk the half mile to the bus stop. Buses overcrowded, poorly driven and uncomfortable. A very unpleasant experience on a regular basis. No incentive to Dutch the car if you can afford the congestion charge.	Stop school run cars for all but genuine need. Change traffic light timings. Get rid of LTNs. Increase bus routes and subsidise costs. Scrap P&R charges. Ban tourist card and coaches from the centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	This will make it more difficult for trades people to get into the city centre for work and also make it more difficult for residents to drop off people into town if needed.	Improve the road infrastructure, don't add more charges this will help Oxford to thrive whereas changes with strangle it.	Create a bypass going past Oxford that does not lead traffic from the M40 to the ring road. Increase the size of the ring road to 3 lanes. Have bus routes that go around the ring road. Create cycle only lanes not just cycle lanes on roads.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Yes	Other	Ideally you wouldn't be implementing this congestion charge at all. Implementing a scheme used in a city with ~60x the population is insane.	Very negative	All this scheme does is penalise those who have to commute into Oxford for work, especially so for those who may not have access to good public transport links. Realistically, once Botley Road reopens, there shouldn't be as much congestion around the centre of Oxford.	Going ahead with the congestion charge will only foment more discontent against the council, as more and more residents of the county will begin to see them as 'out of touch' or 'living in a fantasy world'.	Ultimately, Oxford is a historic city pre-dating modern modes of transport by over a thousand years. Short of demolishing the entire city to widen roads, people will continue to commute in. That being said, with recent talks of extending a rail link out west to encompass both Witney and Carterton, should this come to fruition, I believe that this will help reduce congestion coming in from the west of Oxfordshire.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Positive	Positive	There should be no charges at all	No	Make buses cheaper for all		Very negative	This will kill off any trade in Oxford. Are OCC trying to destroy this city completely? I, as many other, will stop doing any shopping in Oxford and the Crowley Road. Tourist will stop coming and the whole of Oxford will be blighted a no-go city and go somewhere more user friendly. It's likely the majority of Oxfordshire will be against this so OCC need to act accordingly.		Remove the LTN's so traffic can move freely again. It's the LTN's that are causing all the congestion, especially down the Crowley Road. This will be further exacerbated if you put a charge on these roads.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive			
a member of the public living outside Oxfordshire	less than weekly		I don't	Neutral	Negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive	I think a congestion charge is the right step, but I disagree with the number of permits being provided and think the charge level is too low to have a serious effect.		24/7 bus lanes and bus gates, more modal filters for active travel, more pedestrianisation in the city centre, increased parking charges in the city centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses		Negative	I work in city centre	No use, just because closure of botley road is causing traffic. How can 5£ congestion cause no traffic. Bus ticket for 2 is 5.80£ instead people will pay 5£ sit in the traffic and drive by their own car for better comfort.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very negative	I am against the scheme and do not think that people should be charged to drive in or around the area that they live on work.	I think this is a terrible idea! If the LTN's were not enough disruption to our busy, day to day lives!!	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	No impact	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	At the moment buses are unreliable as there's so many cars, especially around school pickup/dropoff times. If this can reduce the number of cars. it's a huge improvement!	thank you for proposing this	keeping safe low-traffic cycling/walking routes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative	You are trying to restrict cars in certain areas however the down side is that you are pushing traffic to other areas that cannot cope already before you have even started. Charging Marston Ferry will push traffic to the Marston intersection and Headington, both hospital routes which you are directly impacting if you push this through. You are driving visitors away from the City already, businesses are shutting because they can't get staff as they can't get to work. Not everyone is able to cycle, or catch a bus, don't have a blue badge nor bus pass so have to use a car. You are isolating these people.	The JR, Churchill and the Manor are huge employers who need staff, and offer parking for them. Are they going to be exempt? This will have a HUGE impact on them and a knock on to patients who need to drive to appointments. The new Warneford development will add to this further.	It would be better to get a better flow of traffic than slamming the brakes on routes. Buses unfortunately take too long and for a working parent having to pick up their child after work buses are not quick enough, not through traffic, but all the stops they make slows the journey. If you own a car it's cheaper to drive than catch the bus. Money you're wasting on these have brained ideas could be put towards improving the traffic flow, better road markings to direct traffic better On the junction of Marsh Lane and Headley Way you have created a curb around the cycle lane. This slows the junction 🙄 Lots is good on paper however when it's implemented it doesn't work. Parking on Headley Way is dangerous, particularly cars parking wide of the spaces, especially for Ambulances. Headington roundabout - the lights don't sequence when coming out of Headington London Road the first set goes green but the next set is still on red for a few more seconds, slowing flow. Also coming from Cowley the lanes would be better marked. The right lane splits to 2. It would be better for the left lane to split and mark the right lane only London. The Horspath intersection is becoming dangerous at certain times of day with traffic queuing to get to Oxford Road. The Boars Hill intersection- use left lane Abingdon only - better marking. Sorting out the flow would encourage people to use the ring road.
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Frequent hospital patients	I commute to the central permit area by car	Negative	Negative	There should be no charges at all	No	Add new bus routes		Very negative	Typical anti car, anti public choice, we all don't use buses,bikes or walk.	Think about the people who generate income for Oxfordshire not the students, tourists or eco warriors	Less empty buses, stop blocking roads, stop tourist coaches in the city use shuttles.
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I don't	Neutral		There should be no charges at all	No	Make buses cheaper for all		Very negative	Oxford is already suffering with store closures, this could be the death knell for many businesses. Already Oxfordshire residents are commuting to Milton Kevnes and Reading to shop due to all these reoulations and issues.		Yes look at cities in Europe, train and bus travel much cheaper than the UK and why?
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	We just won't bother coming into Oxford so will spend our money elsewhere. There is no way I'd consider a job in Oxford now. Getting to the hospitals from Banbury will continue to be hell	Please make it temporary and include a proper, non biased evaluation. So many times temporary fixtures sneakily become permanent.	Make buses cheaper and more frequent/reliable. Abingdon to the JR is a joke if you are feeling poorly. Put pressure on network rail to sort out the Botley love. Improve access to Westminster so traffic doesn't tail back
a representative of a group or organisation	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the roads	Very negative	We don't want a congestion zone to exist in an area we already pay too much to live in.	Cancel all 6 zones	Get rid of double decker busses and bring back the small city zippers as double deckers are destroying the roads
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Business cars used as goods vehicles	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Other	Fix the roads, they are in a shocking state	Very negative	This is not going to make any difference to the traffic levels in Oxford. It is just another cash grab from the council, which is trying to ruin Oxford even more than it already has.	This is just another way for the council to tax the people who live and work in Oxford, while none of the councillors making these decisions live in Oxford.	Remove the LTN's and reopen Botley Road, traffic was barable before these and they have only made the traffic worse. Stop trying to force people to use expensive, unreliable public transport and let people have the freedom of choice of how they travel around the city.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I have agoraphobia and claustrophobia. I cannot take the bus regularly. I have tried. It results in me having panic attacks or be unable to function afterwards from the fear and stress. I dont really qualify for a blue badge. I rely on a car driven by my husband to do daily school commute and go to the gym. The bus network when you want to travel along the ring road is non existent. I need to go to the city centre and then take another bus to go to that area. It is nonsensical. You only do traffic filters and congestion charge when the bus network connects all areas well, there is no gap in provision, is frequent and affordable. You are no where near this and it takes years to build this coverage. You need to make provision for permits for people with conditions like me. You need better cheaper buses NOW. This is just a way to make everyone's life hello and more expensive. It won't reduce traffic. You are just making us pay for a problem you created and are responsible for. In London, people coped with the congestion charge well because there is a fantastic public transport system. Oxford doesn't have this.	Businesses are failing, I deplore the lack of a high street and I blame it on traffic filters and congestion charges. I dont understand why the council is so anti business.	Have peak hours congestion charge only.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Extend hours of operation for buses		Very negative	1. The scheme does not take into account the practical and financial impact on residents. My son takes the bus to school most days even though there is no direct bus route and he has to walk around a mile at either end. However, 2 days per week he has to carry so much (book bag, sports bag, musical instrument, sports equipment, sheet music) that he can barely carry it let alone walk two miles, so I drive him to school. Why should I have to pay for that? 2. My wife and I regularly take the train to London and Bristol for work, leaving early and returning late. Using the bus to get to the train station would add an extra 1-1.5 hours to a 3-4 hour commute and the buses from the station don't even run after 8pm. Under this scheme we'll have to pay the charge on top of parking and extortionate rail fare for peak time travel. 3. The impact on retailers and businesses will be dramatic. Tourists may be happy to spend all day in town but as a resident I want to pop i , do what I need to do and get out again. I don't have to wait for buses and they are impractical for bulky shopping. I'll just switch to online shopping- that'll mean less income for Oxford businesses and more vans on our roads. 4. The A34 and northern bypass are national trunk routes, NOT Oxford's ring road and are not designed to cope with the extra traffic. They already struggle with existing traffic.	I do not support this scheme and do not think that OCC plans take into account the needs of residents and non-residents or the impact on businesses	Stop charging for Park & Ride parking and bus transport. Extend bus service hours and frequency to transport hubs like he railway stations and Gloucester Green bus/coach station 3. Properly segregated cycle routes NOT lanes shared with buses and taxis. 4. Practical bus routes for school runs. Forcing pupils to walk a mile because the bus companies favour a "hub and spoke" model doesn't meet pupils' needs 5. Restraft Oxford's transportation strategy and plan to address all user's needs and recognise the impact on businesses- NOT just the bus companies' needs
a resident of Oxfordshire living outside Oxford	daily		I don't	Positive	Neutral	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive			
a resident of Oxfordshire living outside Oxford	daily	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Neutral	Very positive	There should be no charges at all	No	Add new bus routes		Very negative	there are no busses in the village I live in so i would have to walk three miles to carterton., catch a bus & reverse the process when returning home. i do twelve hour shifts and that would make my working day far far too long. I seriously cannot be paying five pounds every time i work as well - what's the point in working if i am being penalised for it?	As above, there seems to be no consideration for those who work in central oxford who have no access to public transport. i am 62 and i certainly dislike the idea of walking six miles a day on a dangerous road with no pavement.	open up the lins - the congestion on main roads has been so much greater since smaller roads were closed and little thought seems to have been given to actually make the traffic flow easier. For example not allowing vehicles to turn left from cowley road to iffley road at the roundabout at the plain - instead vehicles have to go all the way around adding top traffic jams. Likewise the closing of dawson st, a convenient way of getting from cowley road to st clements, was sold as a community area for the good of all but instead was simply a land grab for more tables for the owner of the two restaurants either side of dawson st. The bollards/cameras at oriel square, effectively closing at 7.30am - this has been a major bunfight since the botley road was closed and more traffic arrived on the abingdon road. Get caught in traffic and miss the deadline by a minute = having to turn round and join all the queues up iffley road. A more forgiving deadline would reduce congestion. I work literally 50 yards the other side of oriel square but i have lost count of the times i've had to turn back through no fault of my own.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	No	Add new bus routes, Make bus services more frequent		Very negative	I frequently travel from East to North Oxford for playing bridge and childminding. I drive around Long Wall St. I also take my husband to hospital at the JR. I would need more than 100 passes to cover these trips.	The congestion is much worse since the introduction of LTNs. Removing them would solve some of the problems. The ring road will become even more congested and was not designed to be used by Oxford residents travelling around the city. Residents should be able to travel freely through the city.	Remove the LTNs.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Very negative	It takes me 2 hours to commute to Oxford by bus, or 1 hour by car. Due to my husband's work, I am often a solo parent to a dependant child (one year old). I need to travel by car so that I can get to my child easily if necessary - I can't afford to be 2 hours away, as we have no other friends/family nearby to help. These proposals don't take into account people like me, who need to use the car because of caring responsibilities, as the buses take far too long. The other solution is to create some additional shorter bus routes from Carterton/Witney to Oxford	For people like me who commute into Oxford multiple times a week, I think 25 permit passes for a whole year is really not enough. I think a minimum of 52 (one per week) would be a bit more reasonable. With that said, I don't think that this proposal to charge people is fair at all. All of these measures just serve to put people off travelling into Oxford. Maybe instead of charging a congestion charge, why not reduce the congestion by not keeping an arterial road into Oxford closed until August next year!	Don't keep Botley Road closed for years at a time!
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Negative	I have lived abroad in a city with a similar scheme. It is successful but only because the public transport on offer is far superior to that on offer in Oxford - Trains, Trams, Buses, all linked from central hubs and minimal change/wait times. Crucially the transport was also very cheap (cheaper than current Oxford prices) and parking was free. The public transport in Oxford is woeful compared to that. Also, be honest, when the Botley Road is open again a seventh site will be added and the scheme will become permanent. Just admit it now.		Invest in roads. Widen them, repair them, open up closed roads to improve traffic flow around the city instead of funnelling traffic down small, narrow roads and then pointing to all the congestion and saying how bad it is - of course it is if you block off large sections of the network and force traffic down unsuitable streets. What did you think would happen? Build a dedicated cycle path network away from major roads rather than making cars and cyclists share roads.
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	Hospital visits should be free		no
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make bus services more frequent, Add public cycle parking		Very negative	The buses are expensive and slow. You need people in town to support business. Not forcing them to use another town.	The reality is you don't listen to surveys. You just do what you have already decided on. This is meaningless lip service.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes		Very negative	I live in temple cowley and work in Headington. I also have elderly parents in Headington. 100 journeys a year isn't enough for my needs. Forcing everyone onto the ring road will bring it to more of a standstill. Headington is a hub for all the hospitals and between these proposals and the LTNs Cowley is trapped. There's going to be a rush of people trying to get through the roads before they "close", so traffic is going to be worse, not better	Once again penalising those who have to use their cars. My parents will really struggle with this. They're 83.	Open up the side roads. Spread the traffic out. Make buses cheaper.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice				There should be no charges at all	As I completely object to any changes for using roads I am unable to answer the question!	Other		Very negative	I rely on my car for work and hospital appointments. I live in Cowley, we have had massive impacts imposed on us by the installation of LTNs already. This will only exacerbate an already ridiculous situation.	As above! Just another money making scheme in my opinion. Not everyone can walk/wheel cycle (I'm so fed up of hearing that endless mantra!) A lot of people rely on their car for a number of reasons, not just for taking leisurely drives around Oxford streets.	Open up the LTNs, no congestion charges, no traffic filters. Let the traffic flow freely then congestion will stop. Yes, there are times of the day when traffic is heavier but tough, it's life.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	The city is too small for this type of scheme. We are not the size of London, Bristol, Birmingham who have similar congestion schemes running. You will kill visitors to Oxford City Centre, the high Street is already dying, killing it further.		Remove the LTNS, and increase speed of Oxford Station bridge repairs - which caused the majority of the congestion which youa re now trying to charge visitors to fix.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Neutral	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Very negative	The permit covers 7am to 7pm. Anybody that works in evening entertainment will be caught by the limit anytime they go into work, as they will be working from before 7pm until midnight. This will include all restaurants, pubs, and theatres. These staff are mainly on minimum wages, don't have workplace carparking, and have to rely on buses, which are not frequent, reliable or quick. I have a friend who works at the theatre, she has to be at work before 6pm, and often doesn't finish until midnight. She currently drives in and parks at Westgate, as although she gas to pay for parking, it is a well lit carpark, with security. The Park and Rude buses stop at 11.30, and the car park is badly lit with no security. Not a nice place to be at midnight for anyone but esoecially a lone female!	It is a ridiculous idea, and will actively discourage me from shopping or going to the theatre in Oxford. The buses from Wallingford, X40, are unreliable and extremely slow, especially once they get to Oxford as they stop at all the stopson the route in Oxford and can easily take an hour + for 30 minute drive	

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on there cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	We use the Co-op nursery near the station, as this is the only nursery we could get a place in and therefore drive from Didcot to drop off our child. The scheme does not consider permits that businesses can issue to customers or employees to ensure they are not affected by the congestion charges. As a parent I need to drive to be able to drop off and pick up my child especially if there is an emergency. If this scheme is brought in then local businesses should be consulted about permits needed for customers and employees to ensure minimum disruption	Last time there was a change to traffic enforcements (closing off some roads) this negatively affected traffic including to the JR hospital meaning it took longer for people to get to the hospital for appointments and in some cases missing appointments.	Yellow boxes on roundabout to ensure the flow around roundabouts is not blocked up, and cameras to enforce this issuing fines for those who stop in these.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	About right	No	Other	Segregated cycle lanes.	Negative	This segregates Oxford into different zones. This is contrary to community building in Oxford, and will prevent mixing between socially different areas (for example the North Oxford area to the west of the Marston Ferry Road cameras and less affluent areas to the east. This will have neoative effects on social cohesion.	The interaction between different permits for the same vehicle is going to be confusing and potentially costly to administer. Please can you ensure that the most permissive permit used for a vehicle is applied for the whole day - and reflect this in the Traffic Management Order.	Make Woodstock and Banbury roads each one way. Install segregated cycle provision on each with the space saved.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Very negative	Your information about permits is completely confusing. This survey seems to suggest that people can apply for a permit that will enable them to drive their cars in to the congestion zone but the information on the council website says a limited number of day passes (100 for city residents and 25 for non-city residents).	I do not understand why the county council is trying to impose charges / restrictions on residents while the city council is continuing to approve development of new office complexes within the ring road on a massive scale. The Old Road Campus, the new Oxford North site, the science park, the expansion of the JR hospital as well as the redevelopment of the Westgate centre have all contributed to pulling significantly more people in to the city causing congestion. Residents have no control over these developments and yet we are impacted by the traffic it brings in to our local roads which we will now be forced to pay to use or, once the bus gates are in, restricted in using.	Stop the massive scale of workplace developments going in and around the areas that are congested. Make it cost prohibitive for those coming in to the city, going past park and rides, to drive in rather than use the park and ride Take more measures to stop bike theft so that people will be more willing to cycle in and leave bikes locked up.
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		No impact	We already pay road fund licence so this is double taxation	Double taxation as we already pay road fund licence. Free buses is a better idea.	Remove most of the anti car measures and let the market decide the natural level of traffic.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of oceration for buses		Very negative	This is seen as a thinly disguised tax on car drivers. It will force more traffic onto an already busy ring road, causing more air pollution from idling cars.	The proposed charges and gates are SUCH a bad idea. We live near the already gridlocked Wolvercote roundabout and along with the Oxford North development will just make matters worked, I am also so fed up with these consultations that seem to be ignored. Looks like another box ticking exercise.	Free park and ride. Make a junction between the A34 and A40 to reduce the traffic on the Wolvercote Roundabout.
an Oxford resident	daily		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very negative	Too low	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	The illegal levels of pollution in Oxford is making me unwell. The amount of traffic also endangers cyclists and pedestrians. I have seen many accidents and near misses. We have a good park and ride system and many car journeys are unnecessary.	I'm not sure why those who have workplace parking in Central Oxford should be exempt. Shouldn't the council be encouraging those commuters who can to use the Park and Ride, etc. Companies in central Oxford with staff car parks are facilitating pollution and congestion-causing journeys.	More bus routes and cheaper buses. More school streets. Levies on private schools such as Magdalen College School and Oxford High School. When private schools are on holiday (but not state schools) the difference in congestion is noticeable. More enforcement of those who park antisocially. On most days cars are parked fully on the pavement on Cowley Road (in front of Truck and Chicken Cottage) and in front of LTNs. No action is taken, even though it would be very easy to issue tickets, etc. This gives the impression that drivers can act with impunity and makes pedestrians feel that even the pavement is not accessible to them.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I don't	Very negative	Very negative	Too high	Not sure	Other	Improve cycle paths. Entry from ring road congestion charge. Open rear entrance to hospital. Enforcement 100percent of speed within city using high technology.	Very negative	Excessive speed and use of mobiles is main deterrent to me cycling or walking. Ring road entry should be the charge point. £5 allows the rich to use the roads and bans the poor. Very decisive. Central residents with cars and commuters to centre are the problem, they should be stopped, free permits or even 5pounsds will not stop them, as majority are richer than average Oxford citizen.	Why is there no investment nor public consultation on improving (and creating new) cycle lanes. Also please declare bus/taxi company shareholders, and projected profits, and cap these profits. Corruption is a real risk here, as is profiteering. Also silly failure is a risk, what's the projected Improvement?	Yes. Consult and widen Oxford's main cycle path using emergency powers. Open rear gate to JR under emergency powers. Either there is a traffic emergency or there is not.
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	Blue badge holders	I commute to the central permit area by car	No impact	No impact	There should be no charges at all		Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	People are already handicapped by the Botley Road/ station bridge closure. Now you are further handicapping travellers. Why blame Botley Road as a reason for reducing Oxford traffic by introducing 'short term' measures. Be honest and declare the real crossect of permanent enforcement when the crossed scheme works.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Make the roads suitable for cars, repair the potholes, take out LTNs, bike lanes and bus lanes to allow transport to flow.	Very negative	In St Clements, people who do not want to pay the congestion charge will turn up Rectory Road and then be forced onto Cross Street, they will then be stuck as the congestion caused by the LTNs will make it difficult to get onto Morrell Avenue. This will effectively close off Princes Street totally as there is an LTN at the Cowley Road end. As a resident of Princes Street, this will not only confine me but also restrict deliveries to my house. It will also make access to the 2 construction sites both Councils have very difficult as they are having problems without the new scheme addina to it.	There is no need for a bus gate/congestion charge in Oxford, take out all the restrictive traffic measures that have been placed in East Oxford over the last 30 years and you will see traffic flow. Stop gaslighting the residents about 'Net Zero', there is no climate crisis, if you want cleaner air, then stop restricting traffic, cars are much more efficient when allowed to be driven as they are designed to be. Place your air quality meters in a position where the most pollution occurs, not in a site that will give you the results that you want.	Register every bicycle in Oxford and issue a number plate, this will make the roads safer, reduce the amount of cycles on the road, reduce the amount of crime and make it safer for pedestrians and motorists. Introduce a cycle proficiency test and make it mandatory for cyclists to wear helmets. Remove the hire bikes and scooters and encourage bus usage by making bus travel free.
an Oxford resident	weekly	Blue badge holders	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Very negative	There should be no charges at all	No	Other	Remove all LTN's and ANPR cameras	Very negative	There are residential areas and this is not being taken into account	Just another money making scheme to punish car users	Already stated above
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	It will push traffic into other areas and will cost those who work daily in Oxford a fortune.	The council is making Oxford impossible to visit with so many restrictions.	Remove the LTN as these have caused traffic to be worse.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	We do not live in London and do not need these extra charges. Household's are struggling enough	It should NOT happen	Take away LTN and traffic enforcement's
a resident of Oxfordshire living outside Oxford	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Should be no charge at all.	Very negative	Traffic is already being forced to use excessive fuel by the introductions of LTN, meaning longer journeys as shorter routes by local roads cannot be used. The idea of now charging a fee to use the roads is completely unfair on those people who cannot afford it and have no choice in the matter.	Not enough traffic survey / air pollution data has been made available to the public. This is clearly a money making scam for the council. If this should go ahead, what guarantee will be given that the temporary charge will not be extended again and again without any further audience to argue the system works.	Remove the LTN's - this enables traffic to move more freely across the city
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	There are a myriad of different considerations that this option given does not address. It may not have the perceived outcome that the Oxford are hoping for. Except for the income generated will likely be achieved. Other global cities have discovered that the solution is a MRT or little rail system. In conjunction with a city grid system for buildings	The current selected locations may have the effect of increasing congestion in Oxford in general.	I have many suggestions based on the information that other cities can provide. I can be required as a consultant by the Council and I will gladly provide other suggestions and solutions as part of my consultation fee
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative	I think it likely the the scheme will generate no surplus income and there will be no impact on the cost of park and ride services which are already expensive. Overall making it more difficult to visit Oxford for shopping or theatre etc where it is already excensive to park.	There should have been more consideration for retail businesses in the Westgate Shopping Centre with a free access route to the Westgate car park. Currently a moderately appealing shopping centre but competing with more accessible shopping locations like Milton Kevnes. Cheltenham. Readina. Not everyone wants to shop online.	Take positive action to encourage more visitors to Oxford but less traffic. This scheme feels like a negative approach to penalise visitors to Oxford. Make Park and Ride more appealing. Truro is a good example – free parking, reliable low-cost reaular buses. One bad experience with P&R can out people off forever.
a resident of Oxfordshire living outside Oxford	weekly	Disability benefit claimants	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure			Very negative	Your gonna cause other areas of oxford to become worse due to traffic being re directed Plus the park and ride is useless Abingdon road is always at a stand still and Sea court cuts off half way		Fix botley road
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Very negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	My family use buses, which are delayed by single occupancy cars. it's ridiculous this is the norm.	This does not go far enough in my view. Central Headington will become further congested by drivers from outside Oxford commuting in. I do not understand why you would grant free permits to those commuters working in central Oxford if the idea is to reduce traffic. Why dive them a free oass when central Oxford is very well served by public transfport?	Introduce the Headington LTNs. Make commuting by private car the worst option. These drivers happily drive past the park and rides and crawl through central Headington, polluting our air.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Extend hours of oceration for buses		Very negative			
a business	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	improve the road network in Oxford for all road users. we must be allowed the freedom to choose how we travel around our city	Very negative	The council must not infringe on the individuals choice of transport.	Temporary congestion charges are never temporary they will remain. The council needs to be truthful about their intentions we all know that you have a hidden agenda be truthful about it and hold a referendum to see if the people of Oxfordshire wish to have their liberties taken awav.	There is no need to do anything
a resident of Oxfordshire living outside Oxford	weekly	Blue badge holders, Unpaid carers, Frequent hospital patients	I don't	No impact	No impact	There should be no charges at all	No	Other	None of the above will help anyone with mobility problems, where they are unable to use public transport, put in a lane where vehicles with more than 1 person can use, so many vehicle only have single occupancy	Very negative	This proposal will cost Joe Public an absolute fortune for no benefit	Don't do it	Build a new hospital on the side of a major dual carriageway then you will halve the congestion and also ambulances will have an easier and faster route to the ED
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure			Very negative	I live in the village of REDACTED. We are not served by bus transport enough to make it a reliable form of transportation. I cycle commute into Oxford. However, I have 2 children attending REDACTED Primary who are driven to school most days by my husband (to avoid cycling along the A34). Car is by far the most reasonable way of getting a family of 4 around. Since most in my community share issues around bad transport, I find the suggested plans unhelpful. I am interested in solutions that think about young children and the elderly and not the healthy young men that this city was designed around.	As a scientist I am disappointed by the level of detail provided in this public consultation. It does appear that most benefits will be to the northeast of the city (Marston), while the problems cited as reasons this is needed are in the South and west (Abingdon and Botley roads). It is clear as a resident of Oxford that when the University is out of term and when schools are out of term the traffic is reduced to levels that are acceptable, and I would be interested (and a university employee and parent of children in schools) to see if there are more targeted solutions available.	Continue to seek ways to make dedicated cycling lanes and paths separate from roads. better bus routes connecting the south of the city to other parts, without needing to get off and walk across the city center to another bus.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Neutral	About right	Yes	Make buses cheaper for all		Negative	I live in Boulter Street and commute to work outside Oxford via the A34 and the M40. This scheme will mean that I will end up being charged £5.00 to go to work on top of all the other costs involved.	I strongly support reducing traffic and congestion for obvious health, safety and environmental reasons. As a resident in a road where a camera is going to be placed on the corner of.. I am concerned about traffic turning at the top of my street where it is already challenging to turn out from because of the high volume of buses which park on at the bus stops on either corner. I am askina vou to consider verv clear sianaae in all directions and well in advance.	further space and better marked lanes for cycles. I also like the protective bollards for lanes - could these be rolled out in busy locations everywhere? I was in Utrecht recently and they have the right idea. It really is a bike first, car second city.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very positive	Negative	About right	Yes	Other	Improve active transport eg cycling infrastructure	Very positive	Reduction in traffic, pollution, noise and wasted time sitting in queues. It will also encourage active transport solutions.		
a business	daily	Business cars used as goods vehicles	I don't	Neutral	Neutral	There should be no charges at all	Not sure	Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes		Negative	traffic on all other (non chargeable or open) routes will get a lot worse		invest in making alternative things easier not making a lot of other peoples only option harder
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Neutral	There should be no charges at all	No	Make buses cheaper for all, Extend hours of operation for buses		Very negative	Why does everything need to cost these days ? It's essentially a tax to be in a place that is currently free.	Don't do it.	More carrot and a lot less stick Cycle paths and affordable trains
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	So many people need to drive around Oxford, particularly for work. The existing LTN's have not worked, apart from decreasing traffic in the streets they are located. What they have done is increase journey times, congestion and subsequent air pollution. The congestion charge will probably put people off travelling into the city full stop. This will have a hugely detrimental impact on businesses that are already struggling to survive. It is just another example of a disengaged Council doing what the hell they like. with no concern for Oxford residents.	It is just a money making scheme, and is of no benefit to the city's residents, businesses and community.	Lift the LTN's and take the pressure off of the main routes so that buses can move quicker and people's journeys are shorter, subsequently reducing air pollution. It's not rocket science.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Negative	I feel the bus gate on Marston Ferry Road is unnecessary. This is already an out-of-town route so doesn't need restricting.	Why are there no restrictions in North Oxford on Woodstock Road and Banbury Road? I don't understand how this will help or be any different to the full traffic filters. This is all because of the Botley Road closure. Make Network Rail and Thames Water pay.	Do something about the private school traffic. The school run and school coaches make up a lot of the traffic issues in Oxford. Traffic is noticeably reduced when private schools are on school holidays. MCS is particularly bad for this. Make those parents who travel into Oxford in large 4x4s pay, not the residents of Oxford, who are just trying to get around their own city. More cycle parking in the centre of town. Improve the park and ride. Make it free. Make more bus lanes.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	None of the above	Very negative	Leave things alone and open up the LTN's. Before this fiasco we as residents had no problems with our roads	Seems like a complete revenue collection exercise enforced only upon the poorest communities in the city. Very discriminative. The residents are the life blood of this city not the students.	Open up all the LTN blockages which is causing the mass congestion within the city. Its forcing dveryine to go the same way at the same time therefore causing the congestion. I've lived here 41 years and we never had congestion until the LTNs
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Positive			1 People who don't use buses are completely ignorant about bus stops and prices. You need a major information sharing as well as obviously attitude changing necessary. 2 Please put up 'Where to board your bus' at Cowley [Templars Square]. 3 I see very few families on buses. It just is too much. It is far too easy to bundle everyone into a car Reduced fares for families would be areat although obviously difficult.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	No impact	About right	Yes	Add new bus routes, Make bus services more frequent, Extend hours of oceration for buses		No impact	I don't usually drive into Oxford. I would like a better bus service to Watlington especially evenings.	No	No, as I said an improved bus service would be very welcome
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	When fares are £2.50-2.80 to get to town and you're charging this congestion charge, it's insane. When you make decisions like these, you don't think about those on low income who are struggling to make ends meet as it is, who will not be able to afford the bus daily. If you really are looking to do this, bus fare needs to be heavily decreased in price, but you're probably not going to do that anyway because it cuts your profit. You'll probably invest it in something which doesn't even directly impact or help the residents of Oxford, and then continue to up the price of bus fare next year and make an excuse as to why you have done so (it's really to get more money from us to invest it into anything else but things that would actually be useful, like fixing potholes).		Heavily reduce bus fare. You're clearly trying to promote people to use public transport more, but then continue to make it even more expensive. Especially with these electric buses, since they reduce emissions, why are we still paying almost £3 to get to town? Who thought that was a good idea?
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Positive	About right	Yes	Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very positive	Oxford is and was never designed for cars. Some parts of the city need to be pedestrianised to a greater extent and some areas still feel neglected and seedy and need to be made more attractive for people. The level of pollution from coaches and cars is also a big factor behind my support of this scheme.	All Oxford buses and taxis should go electric, in an ideal world.	Pedestrianisation, and greening of public spaces. For example, St Giles has too much space (roads and parking) devoted to cars. Why not reduce the width of the road lanes and give some of the parking space over to wider pavements for cafés etc.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Would be harder and more expensive to get my children to school.		Better and more buses, they aren't reliable to get me from Summertown to Parkway station to get a train, I have to leave very early to ensure i get there on time which isn't always doable. Also, free drop off at park and ride for my children onto free Oxford buses to - and from - their schools (both in Summertown).
an Oxford resident	daily		I don't	Very positive	Very negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very positive	Anything which actually reduces car journeys within or into Oxford is welcome.	Commuter privileges of any kind should be avoided as car traffic is too great. Pressure to use public transport, cycle or walk mustbe increased.	Electronic road pricing trial for Oxford and main 'approach roads', following the Singapore model. SEE: https://westerglandbylines.co.uk/news/environment/electronic-road-pricing-a-case-study-for-oxford/ AND big increase in Active Travel spending to complete walking and cycling networks in the City. Non-Exhaust emissions, like traffic congestion, justify a substantially increased pedestrianised area in central Oxford with cross City centre cycle tracks. SEE: https://westerglandbylines.co.uk/news/infrastructure/non-exhaust-emissions-and-the-case-for-expanding-pedestrianisation/
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	I run a GP surgery in central Oxford. I am in danger of losing staff who currently drive here as they work unsociable hours and need a car. This will have a detrimental effect on our ability to look after patients in Oxford	Please don't do this or the bus gates	Sort out the mess that has been created on Cowley Road by getting rid of all the road blocks
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Neutral	Very positive	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Other	Make bus fares cheaper for all as these proposed measures will impact all. And close the Westgate mall carpark to the public on weekends between restricted hours.	Positive	During the pandemic I was classed as essential worker, I work on the railway. Commuting to work especially on weekend is a nightmare, primarily because of Westgate mall. The result is cancelled trains, missed connections / appointments and additional chances for commuters which ultimately pushes commuters back onto the roads.	May God help us all.	Tackle the problem created by insufficient access roads to key public facilities like rail station, bus and coach stations and shopping mall.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	No impact	There should be no charges at all	No	Other	Add a metro system and do away with the need for legacy buses	Negative	Forcing people to use buses isn't always viable. I for one need to walk for over half an hour to get a bus to the JR which takes approx 1hr. And I can't be doing that with my daughter who has down syndrome and is unable to walk — getting a blue badge is overly complicated. It's just going to bring the Eastern bypass + A34 to a standstill with people taking the long way around to avoid the charge. And that WILL directly affect more people. Those roads are bad enough as it is at the minute.	Why are the general public being penalised for Network Rails incompentence? Charge them £5 for every car that passes through. Any excuse for Oxford CC to penalise the motorist. Plus the scheme sounds like it'll be overly expense to set up and administrate for very little gain. Botley Road has already been closed for 2 yrs+. what difference will another year make?	The only reason I go into Oxford is to use the Hospital. It'd be much better if you / government built a hospital OUTSIDE of Oxford with good road connections. That would then get rid of a large amount of traffic around the Headington area. Buses aren't the answer, they just clog up the roads, slow down traffic and are bigger obstacles for cyclists to get around. Oxford CC would be better off investing in a Metro system.
a resident of Oxfordshire living outside Oxford	weekly	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Improve parking in town so we can all use Oxford again for shopping, entertainment and socialising	Very negative	The anti car situation have stopped me, my family and friends from shopping in Oxford, particularly in the covered market, which was a weekly joy, we no longer visit the theatre, the pubs and restaurants. Strange for a town that has benefitted from the motor industry for the past 100 or so years...	I refuse to contribute to this pointless money making scheme. I have enjoyed Oxford and spent a lot of money with a huge number of establishments. I will now go where I am welcome.	Yes, invest in infrastructure before further development.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Personal cars used as goods vehicles for business purposes	I don't	No impact	Neutral	Too low	No	Make Park & Ride parking cheaper, Other	improve cycling infrastructure particularly on routes where there will be more traffic as a result of the "filters"; make buses cheaper for Oxford residents	Negative	I regularly cycle and my children do too. I am concerned that with the congestion charge locations there will be increased traffic in the Headington area and there is not the cycling infrastructure to deal with this. Roads into quarry and around London Road will become busier which will make cycling less safe particularly for children. Without changes to the P&R facility there will be more people parkina in Risinahurst.	I am very keen on finding ways to reduce the traffic in Oxford, but it feels like Headington is forgotten about. There are no new LTNs in Headington and there are several places which desperately need them. Cycling infrastructure in Headington is also really poor and I am concerned these routes will experience heavier traffic when the charge locations are brought in making cycling even harder and less safe than without the charges.	Improve the cycle routes. There are no safe cycle routes (especially with the traffic levels during term time circa 7.30 to 9 and 3.30 to 5) between the Park and Ride at Thornhill and either the Churchill Hospital or the John Radcliffe Hospital. Major roads have to be crossed, or merged into, and back roads are often rat runs. Buses are so expensive for the family to take, there should be discounts available to Oxford residents.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitIt is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitIt is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily		I commute to the central permit area by car	Very positive	Very positive	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I have to be taken by car to bank large amounts of Church cash. This is heavy, having large amounts of coin, and unsafe by public Transport. It will therefore cost the Church £5 per day out of its income to satisfy an anti-car misguided mindset. I also have to take equipment for lectures to Magdalen College auditorium and Rewley House which is too large and heavy for public Transport. This will cost the Charity it is for more of its income for set misguided mindset		Easy. Scrap all street current barriers and install a properly thought out one way system round the whole of the City
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Add public cycle parking		Very negative	This will have a serious negative impact on members of the public who are not eligible for permits but regularly visit services like GP practices. Many patients cannot afford to pay £5 for each visit, making access to medical care difficult and potentially harming their health.	I think the negatives significantly out way the positives (of which there are few), the congestion charge would merely be a way for the council to take more money off individuals already paying a significant amount in various taxes while cost of living is at an almost unmanageable level. All the congestion zones will do is move the traffic from one area to another, likely increasing travel times. Busses are unreliable, inconvenient and irregular making them incredible unattractive.	Making buses more appealing is a crucial first step. One major reason buses are slow is due to frequent, unnecessary stops, some routes have up to five stops with less than 200 meters between them on the same road. This not only slows down the service but also contributes to increased traffic congestion. To encourage more people to choose sustainable travel options like buses and cycling, we need to improve infrastructure by increasing the number of dedicated bus lanes and cycle lanes. These changes would make bus journeys faster and more reliable and cycling safer and more attractive. Rather than forcing people into a transport system that currently lacks the capacity to absorb all car users, we should focus on creating efficient, convenient alternatives that genuinely meet their needs.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	Too high	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Extend hours of operation for buses		Neutral			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Extend hours of operation for buses, Other	Fix the roads!	Very negative	It's unnecessary! Adding admin. Putting off Oxford entirely. You just want money because you relied on income from bus gates. I don't believe this is temporary	Wanting people to use busses more when assaults on public transport is increasing. You should be having security on some routes and bus stops	Open up the roads and stop restricting drivers. If everyone gave up driving tonight, how would you raise funds? It seems like the council want to have their cake and eat it. You don't want the traffic but you want the income it generates
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	This temporary congestion charge should be introduced AFTER Botley Road reopens. Adding more restrictions now will not help the current frankly awful situation, driving traffic to already busy arterial roads inbstud of Oxford.		More and more day visitors from the local area are frankly put off by restrictions, LTN, extortionate parking charges etc., and park and ride parking charges and bus tickets are not cheap. Parking at P&R sites could be made free to encourage uptake.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for young people		Very negative	It will be a disaster for the commercial life of the city. We will no longer do any shopping in Oxford.		
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too high	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Negative			
a member of the public living outside Oxfordshire	daily		I don't	Positive	Very negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very positive			
a resident of Oxfordshire living outside Oxford	daily		I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	The Hollow way charging area will move more cars onto the Slade. The Slade is already over capacity and journey times doubled with the implementation of the LTN scheme. Driving from south Oxford to work at the Churchill, public transport is not a viable option to get to work.	Concerns about the impact of patients visiting and attending the hospital sites.	School traffic has a significant impact on journey times. Could work be done with the Oxford schools to deter local school journeys.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Project to reduce county council spending	Very negative	Oxfordshire County Council have and continue to prosecute a campaign against the local population to remove our rights, freedoms and prosperity. If that also damages local business then that seems be an added benefit for the self serving Council.	Open the Botley road and do your jobs.	Sack the Council.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral	I agree with the clear need to reduce congestion on key routes and that adding a financial disincentive can be helpful for this. I also like that this is less extreme than the traffic filters plan and will allow useful feedback/data to be collected. What I am concerned about is making this scheme clear and easy to understand considering the complexity of it, not just for local residents but also for visitors to Oxford (including those not within the permit areas such as family and friends visiting university students). Having had time to read and process the Oxford congestion charge plan and already being very familiar with the Oxford road network, I feel I have a good understanding of it and would be able to work around it well. But it seems very likely that this will result in misunderstandings from others that will unfairly penalise them. As a comparison, the London congestion charge zone (which I imagine will be a well known reference point for drivers) is clearly restricted to an area, rather than some very specific points on specific roads, which feels more like a toll than a typical "congestion charge". I would therefore strongly encourage making the payments system easier and more lenient, such as allow for pre-payment on days where you know you will drive through the filters, giving more than the extremely short one day period to pay the charge, ideally setting up an auto-pay option, and being lenient with first time offenders who may easily have accidentally driven through a charge point without realising - make them pay the charge and perhaps a £5-10 fine on top but no more (repeat offenders are another matter).	It would be important for me as a Oxford permit holder to be able to easily check how many days I have used, how many remain, and at what date they will be refreshed. I was also surprised to see in the impact modelling document that an assumption had been made that residents would be exclusively using their permits on weekdays. I would expect to use permits more often on weekends than weekdays.	
a resident of Oxfordshire living outside Oxford	daily	Blue badge holders	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Adverse impact on people who cannot afford the charge, or taxis. Adverse impact on the ring road, which is more dangerous than inner city roads. Adverse impact on people with mobility issues, pregnant, more pollution for those living on Woodstock Rd and the ring road. Adverse effect on businesses where customers can no longer pass by and stop.	The permit area explanation is not clear. Danger of the ring road and big crashes there not taken into account. Congestion charge in London did not decrease traffic. No statistical basis of current car usage against which to compare the future usage. No mitigation at all for the groups adversely affected in the Equality Impact Assessment pages 15, 16, 19, 23 25, 27, 34. Impractical scheme without consideration of residents' needs and daily life. Traffic is much lower now since Covid and WFH. Buses are slower because of LTNs and Botley Rd	Remove LTNs. Introduce buses/coaches that go around the ring road and from west to north Oxford. Do not allow more labs and offices with no parking facilities on Botley Rd to which drivers are bound to come. Open western entrance to the rail station. Remove access to the Westgate parking lot from Frideswide Sq to get rid of congestion there, or close that car park altogether, which is responsible for a lot of traffic and congestion in the area.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for young people, Make bus services more frequent, Other	Fix the potholes on the alternative routes that are almost certainly going to see more traffic due to these congestion charges	Very negative	The council should be putting pressure on the Botley Road closure by charging a daily fine for each day it is closed, not charging working people for simply travelling to work. The council's attitude to the average person is appalling.	No, just don't put them in place. This is a perfect example of a regressive tax and it is shameful for the council to propose such charges.	Yes, see my response to point 12 - put pressure on the organisations causing the delay at Botley Road.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Negative	Too low	No	Add new bus routes, Make bus services more frequent		Neutral	Access based on income means there is no fairness in the scheme	Outrageous this comes so close to the election and was not in the ruling group's manifesto. How many would have lost their seats if this was honestly proposed in the election?	Make it push not pull, improve bus frequency and routes first.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice			Very negative	There should be no charges at all	Not sure			Very negative	An appalling proposal being advanced in the most appalling way		Yes
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, School students with special educational needs. Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Improve the roads surface	Very negative	This is a money making effort which will impact the poorer member of society. Oxford has a face of being elite and this makes it more so. Oxford used to be a wonderful place to live with strong communities now it is a ghost town.	They should not go through and should be abandoned	Open all roads and let traffic flow. Ltns have pushed traffic on to roads that didn't have any. Oxford people should decide
an Oxford resident	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure			Very negative	More businesses will be closing.	This is only affect the poor, rich people can go to this place anytime they want because they can afford it.	Abolish LTN. There is no build up of traffic before LTN. Businesses are closing because of LTN.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	It will deter people coming to Oxford. They'll just go elsewhere instead		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	No impact	Too low	Yes	Make Park & Ride parking cheaper, Make buses cheaper for young people, Add public cycle parking		Very positive	I think it is a great idea. We need to promote use of the park and ride by making coming into the city less affordable. Also, as a primary cyclist, having fewer cars on the road will make cycling safer and more appealing to others.		Increase the price of ALL city center parking and use the additional revenue to subsidize park and ride - potentially with an ultimate goal of free park and ride versus expensive city parking. Require pre-booking for westgate and worcester st car parks so people don't try to enter city without reserved parking. Replace a few parking spaces with designated parking for electric scooters/bikes to remove them from pavements. Add bike boxes at ALL city center traffic lights, to increase junction safety.
a resident of Oxfordshire living outside Oxford	weekly	Personal cars used as goods vehicles for business purposes	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	Just another petty council imposing petty schemes and making people's lives difficult.	Stop wasting money and use your resources properly.	Work on road infrastructure in the surrounding areas to take the strain off the centre. It's not rocket science.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Neutral	Too high	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I commute to work, and buses are not an option due to my shift work. I feel like I am being penalised for choosing to live outside of Oxford and then having to pay a charge on top of paying for parking feels like a kick in the teeth. I think that what ever people say. vou will introduce this charge		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Neutral	Negative	Too low	No	Make buses cheaper for all, Add new bus routes		Neutral	I don't really understand the rationale behind this scheme and what it's meant to discourage? And who is the demographic that will be paying this £5 to cross Oxford? Visitors? Everyone else seems to be exempt, and £5 isn't much to disincentivise anyone.. As a central Oxford resident, this will discourage use from using businesses and services in other parts of the city. Moreover.. it will push more traffic to an already congested ring road... especially between Cowley and the Littlemore roundabout, which is already chock-a-block daily.	If the scheme fails to generate a profit, how will the shortfall be paid for and what are the consequences for those that approved the proposal? Will there be an independent body reviewing the changes to traffic and pollution levels to produce an unbiased assessment of these measures to see if they match the projections used to justify the scheme?	1. Offset the bus stops more at St. Clements so you don't have stopped buses opposing each other during rush hour, which blocks up the Plain. 2. During evening rush hour, put an flashing green/red traffic signal after Magdalen Bridge to slow/reduce traffic coming into the Plain to allow more time for London Rd and Cowley traffic to enter the roundabout. 3. Stricter enforcement of any illegally parked/stopped vehicles in bike lanes and on double yellow lines in Plain, on Marston Rd, Cowley, etc.. 4. Charge those who drive children from outside the city into the multitude of private schools in Oxford and Headington everyday.. they are a large contributor to our traffic problems.. twice a day... so make them take the bus, incentivise car pooling, or pay extra to drop off.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	Too high	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Neutral	Giving residents enough free permits is the only redeeming feature of this idea - with everything happening with the Botley Road, we don't trust that any improvements will actually be made as a result of the income.		Create bus routes going around the ring road! It makes no sense that I have to spend over an hour going through the city to get from Botley to Cowley/Headington/Cutteslowe.
a resident of Oxfordshire living outside Oxford	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make bus services more frequent, Extend hours of operation for buses		Very negative	I think it is outrageous you introducing this charge, especially on hospital routes. Getting into Oxford to these hospital from most places in Oxfordshire using public transport is a nightmare and takes way longer than using a car and usually involves changing buses. When you consider the £50m you spent on a park and ride on west Oxfordshire side that can't even be used it ridiculous to expect us to pay these charges too. It is becoming really clear Oxfordshire council is only focused on Oxford city.		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very positive	Very positive	Too high	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Positive	Neutral because I agree that the traffic feels worse now, but I also commute in the city every day and 100 passes a year isn't enough (I live in Headington).	Take away the congestion charge along Hollow Way OR St Clement's.	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent, Extend hours of operation for buses		Very negative			Open up the TLN , reduce bus fare
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I work at a shool in Oxford and like most staff here live outside Oxford. The cost to me and other staff members will be £25 a week.	Many services in Oxford are staffed by people that live outside the city due in large part to the cost of living in the city. For many of us catching the bus is not practical either because no service exists or if it does doesn't start early enough in the morning etc. Unless service workers are provided with passes. I think many will start to look elsewhere for employment....	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Unpaid carers	I don't	Neutral	Neutral	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I am a resident of Yarnton and the minister of a church in Summertown. As with the traffic filters, this proposal will have a significantly detrimental impact on me, on those in my congregation, and on my role. In turn: 1) On me - I have noted I am eligible for a permit for a blue badge but that will only be when travelling with my disabled son, not in day-to-day life. Similarly, it is my wife who will be eligible as an unpaid carer, not me. As such, there will inevitably be expenses I accrue (see later). However, the bigger issue is that, like with the traffic filters, there are none coming in from the north. Currently, travelling in by car to my place of work can be ridiculously slow at rush hour. The 3 mile journey averages 30 minutes and can take over an hour! This is because the Botley Road closure has led to a significant amount of extra traffic coming off the A34 at Peartree roundabout to head into town. If there are extra costs to entering Oxford from other routes, people will no doubt come via the north to avoid the costs. This will further exacerbate a horrendous traffic issue. This is also an environmental issue given how long cars are stuck in traffic, idling and pumping fumes into the atmosphere. When the filters come in, this will be offset by the reopening of the Botley Road. However, combining extra traffic onto an already awful build up is a bad option. It is further exacerbated by the fact that in the last 2-3 years, the regularity of the S3 bus has decreased dramatically meaning getting the bus is often not a viable option without substantial waits for a service. 2) On my congregation - many of them access the church building not just on Sunday but midweek to benefit from vital community. Many of them are lonely, and in a number of cases, not well off. Some will end up having to pay to go through these filters to access the church and its services. This would be a significant and detrimental decision that would negatively impact their wellbeing 3) On my role - I do a significant amount of pastoral visitation as part of my role. For example, when a congregant is in hospital, I would go and visit them. However, the proposed traffic filters would hamper my ability to do so (most pertinently, the Marston Ferry Road is my route to the JR). I do not qualify for a permit by virtue of my role but I am providing a vital service to the community and shouldn't have to pay to do so.		
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	No impact	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	The buses are infrequent where we live and does not stop anywhere close to my children's school. As a result I need to drive my children to school in Oxford. I do not have any income, and with the cost of living rising, I have no idea how I can afford to pay any such charges. Furthermore, with these charges, I have no means of bringing my dogs to the parks in Oxford, as pets are not allowed on public transport. I also go to church frequently in Oxford. This will not be possible with the charges.	This is going to place extreme burden on families, and only allow for the rich to go into Oxford.	Remove the LTNs.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good exemple is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	Disability benefit claimants	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very negative	My daughter is diabled, but doesn't own a car. I don't live in thr area but will travel through congestion zone areas, so not eligible for free passes. My own car is parked in the congestion zone as used by my partner. We alos own a second vehicle - where we would also need free passes for - this is not part of the arrangement.	I am greatly concerned for the ability of local businesses in the congestion zone, e.g. Hollow Way, to survive. These are dependent on passing traffice. The introduction of the congestion charge is extremely likely to affect their tradeability. As a consequence it is very realistic to assume that the introduction forces small and family-run business out. I can't see any one your proposale coming to the rescue of small businesses.	For people tpo want to reduce car journeys, the public tranport network must be frequent, affordable andcater for all living area in and around Oxford. Bus services, for example, in Horspath, are reduced further and further, making it inevitably more of an incentive to use the car. My daughter used to catch the bus inot Oxford, now the long gaps between services makes this impossible. Sad, really. There is no quick-fix, only serious planning and serious initial investment into: more bus routes, more frequent bus services, affordable fares. For example, Luxembourg has introduced free public transport on all buses, trams, trains. The results are impressive and the reduction of, especially single occupant car journeys has significantly dropped. The key is in offering a comprehensive alternative solution first, before punishing the car drivers and the knock-on effects on local business. Somehow, it feels that Oxford's council goes the opposite way: punish car drivers, ban cars and hope that people will suddenly wait for buses for hours, accept long walks to the nearest bus stops and carry all their shopping on bikes. That's not reality, but wishful thinking. And doesn't solve any problems. On the contrary, it causes mistrust and antagonising views. What Oxford needs is a long-term plan, not short-term measures and a complete disregard to the people's views. Congestion charges do not bother the better-off people in big vehicles, big companies, but really hurt the single mothers, the local corner shops, the disabled relying on their own vehicles to get around. You wish to represent the people who voted for you? Please listen to the people who voted for you.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add public cycle parking		Very negative	I think this will only put increased pressure on an already stretched traffic system. Since the LTNs, the main roads have become very congested and dangerous for cyclists with young children. I think the fact that vans and mopeds can drive through the filters will not make it safer for pedestrians or cyclists and for those who can afford to pay the congestion fee in cars, will continue to drive through. This is basically saying to Oxfordshire residents, that you can drive through if you're rich enough and is entirely unfair. With the Botley road closed, there is even more traffic on our roads. We should be looking at removing LTNs and making roads one way. For example, if Iffley Road and Cowley Road were made one way, it would provide ample room for bike lanes, bus lanes and cars. The side streets between Iffley Road and Cowley Road could be made one way to. I believe that this would significantly improve the flow of traffic and make it safer for cyclists and pedestrians too. Since the LTNs, I avoid cycling as I have young children and the amount of traffic on the main roads makes it too dangerous to cycle. I work for children's social care and am very concerned that I will not be able to reach schools in the north of the city because of these restrictions.	I am worried about the central permit area. I don't understand why residents in this area will be exempt and others not?! Surely the area should include all residents living near one of the proposed filters? Or all living in Oxford city within the ring road, as others can use the ring road but we struggle to get to the ring road, due to extreme traffic. If the congestion charge and traffic filters are introduced, I would suggest that they are not 7am until 7pm but just for the busy times like the Hollow Way one. Something like, 8am until 9am and 3pm until 6pm. I think they should also only be in place Monday to Friday.	*Open some LTNs and introduce one way streets (this will make traffic flow better and ease congestion and also allow room for buses, cyclists and pedestrians) -Open up residents parking and introduce 5 categories (Central, North, East and West) this way it is easier for residents to leave their cars all-day and walk to destinations/ schools/pharmacies/GPs/local groceries etc. It will also mean than non-residents don't use the area as much -If there is a congestion charge, residents within the ring road should be fully exempt -More places to safely lock bikes up -cheaper public transport
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	No impact	There should be no charges at all	Not sure	Make buses cheaper for all, Other	Spend yhe founding on better street lights plus on unlock all side streets between Cowley and Iffley	Very negative	I don't understand how it have to improve anything the charges. Anly pain to register and remember to check that you paid it all the time. I see it as a form control of the oecple.	It shall be not introduced at all. Oxford is s to small and only the visitors will be affected. The scheme did not change any traffic consestion. only increase oaeerwork for everyone.	Reduce all blockages put in the Oxford last year's and 20 mph zones, especially on main streets, and you will see traffic consestion magically improve. Plus restore oarkings soaces (essecially around South Park)
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Extend hours of operation for buses, Add public cycle parking		Very negative	Cars will still travel but the already heavily congested roads around Oxford (A34, Abingdon rd etc) will now be gridlocked all the time. This will prevent drivers from getting around or even close to the park and ride services. I feel this will push people away from our city and over to Swindon, MK, Reading. Oxford will feel like a no go zone.	I hate to say it - but this feels like a cash grab, punish the car drivers, push them out to the outside of the city and ban them from coming in from either in the city or visiting from afar. Still not sure where the amount of cash generated will go and we all know once it's in it will never be taken down. Bus gates won't happen and this will stay in place. Don't make the city a no go zone!	Improve the experience for cyclists - riding into the city from any direction is a horrible experience - and there is not really any safe place to leave a bike. Having said that with the new congestion charge coming in we will have a deserted west gate so plenty of places to store a bike!
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative			
a resident of Oxfordshire living outside Oxford	weekly		I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking, Other	Stop abusing car drivers.They are doing nothing wrong.You are abusing car drivers who pay too much money.Stop now, we are not the enemy	Very negative	All you are doing is killing the city with extra charges. When nobody can afford it, stop abusing your powers and overcharging people and nothing is enough. Stop being eagle has car drivers.We do nothing wrong, we play.Enough, already stop you're being evil.We're not the ene	You are abusing car drivers	Stop thinking car drivers are the enemy. Cars are king, you are just abusing them and they have done nothing wrong. We are paying the most tax, the most insurance, and all you do is bashing abuses, so she's wrong in every waystype of room and you are just abusing us remember the car is keen and needs to be accepted, stop the abuse, and it is the highest form of all. Abuse, you are doing.We are not the enemy, you are
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Negative	Too low	Yes	Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes		Positive	It will reduce pollution, reduce climate warming and encourage more people to walk, take buses or cycle. It will improve bus journey times and create a more amenable city environment		Very important to discourage those with unnecessarily large and more polluting vehicles
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	The proposal adds insult to injury for residents and small businesses in a city that is already struggling to cope with the damage done by previous travel policies. Now is not the time to further squeeze traffic on Oxford's roads. If you introduce this charge now, you will force traffic further out (pushing the problem around), you will lengthen journey times (increasing pollution) and you will further alienate the people who live and work here day in day out. Please do not do this. I am strongly against this proposal, as I am against the planned traffic filters and, for the most part, against the LTNs - all are wrong-headed approaches to solving the problem. Improve public transport first. Make bus travel affordable (try making it free for a trial period, and see what happens!).	I am strongly against this proposal, which I think will only serve to further divide communities and alienate the people of Oxford.	Remove some or all of the LTNs that prevent traffic from moving freely between the Cowley Road and Iffley Road - that would immediately free up the ridiculous traffic jams on the Cowley Road and St Clements - it's a no-brainer, but you won't do it. Looking at "ways to reduce overall traffic ... so that walking and cycling is safer and more attractive" is a bit of a silly objective in isolation - many Oxford residents (and people who commute daily into Oxford) are unable to complete their journeys by bicycle or on foot, due to the length of the journey, their state of health, their age, their level of fitness, etc. If buses were A LOT CHEAPER (or free) then more people would commute by bus, which would reduce car traffic. But if all you do is ban car traffic (or make it expensive, with a £5 charge, thus discriminating against the less well-off in our community) then you haven't actually provided a solution, you're just being punitive.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Other	Better alternative options. Upgrade train services!	Very negative	You have used the excuse of buses not being able to get around the city! Very few buses use Marston Ferry Rd Woodstock road bus lanes are infrequently used You have not given any bus statistics showing route time& impact. This is your main reason for the charges!!!	Yes The times if implemented should be early mornings & early evening as it give road users the opportunity to get around the city	Yes stop tourist buses from entering the city! They should use the park & rides facilities. This would generate income & less pollution Better cycle options away from major roads ie along the rivers & canals to encourage a calmer & quieter commodious
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	I live less than 400 yards from the proposed 'bus gate' on Thames Street - at present it is the main way for vehicles to come into Oxford whilst the Botley Road remains closed. If anything blocked the Abingdon Road I would have no other alternative but to drive through the Congestion Charge area - there is no other alternative road that I could take without incurring the charge - THIS IS NOT ACCEPTABLE. Residents in my locality should be given an increased number of passes. All other areas of Oxford where 100 passes have been allocated to residents have more than one alternative route out of Oxford.	RESIDENTS WHO HAVE ONLY ONE ROAD TO EXIT OXFORD WITHOUT TRAVELLING THROUGH THE PROPOSED CONGESTION CHARGE AREA SHOULD BE GIVEN MORE THAN 100 PASSES - THIS APPLIES TO ANYONE LIVING BETWEEN FOLLY BRIDGE AND THE PROPOSED 'BUS GATE' ON THAMES STREET	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	No impact	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I am a doctor based at central Oxford and I have to commute everyday (ie. >100 days/year) to different hospitals in Thames Valley inaccessible by public transport, especially at odd hours (eg. starting my shift in the afternoon and ending at 1am). These hospitals include Wexham Park at Slough and Milton Keynes University Hospitals, all of which would require passing through a concession charge location. This concestion would mean an extra £1325 charge just do my job.	An exemption permit for NHS workers based in central Oxford who need to commute out of Oxford.	
a representative of a group or organisation	weekly		I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	Not sure	Other	Local benefit such as youth groups	Very negative	Short answer: The current traffic restriction plan will negatively affect a vital Youth Group in the city centre, making it harder for disadvantaged teenagers to participate. This will likely lead to more anti-social behaviour and deepen existing social divides. I am a Youth Group Leader (Army Cadets) running a group located in the central area of the city. We have teenagers between the ages of 12 and 18 attending every evening from 19:00 to 21:00. Many parents, especially those from West Oxford, have expressed serious concerns about their 12–15-year-olds travelling home by bus between 21:15 and 21:30, which is both unsafe and impractical. In many cases, the only viable option will be for parents to drive around the bridge, adding a £5 charge per trip or using one of their limited free passes. Our Army Cadets group is free for all and provides vital support, especially for disadvantaged young people. The Army Cadets have been shown to have a significant positive impact on social mobility, employability, and overall well-being (see https://www.gov.uk/government/news/independent-report-celebrates-positive-impact-of-cadet-forces). The proposed restrictions, as they currently stand, will create a barrier for the very young people who need this opportunity the most, increasing the class divide, deepening the poverty trap, and potentially leading to higher instances of anti-social behaviour. Proposed Solution: Change the restriction end time across all locations to 18:00, allowing evening youth activities - including those of the Army Cadets, the ice rink, and others - to operate as intended. This approach still prioritises commuters but ensures that vital youth services remain accessible to those who need them the most.		Proposed Solution: Change the restriction end time across all locations to 18:00, allowing evening youth activities - including those of the Army Cadets, the ice rink, and others - to operate as intended. This approach still prioritises commuters but ensures that vital youth services remain accessible to those who need them the most.
an Oxford resident	daily	Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Non of the above as you shouldn't be collecting revenue from CC	Very negative	The so called measures the Council have introduced already that were supposed to improve traffic conjestion and pollution, also public transport, all of which have had exactly the opposite effect. Remove these LTN's and 20mph zones first and monitor whether the traffic flow improves. We have less cars in Oxford now than prior to the pandemic, yet policy decisions have created the issue you now claim you have to fix as an emergency.	Stop taxing the residents for hair brain net zero aspirations of a few zelot eco warriors such as Andrew Gant and the bike bobbiest... It about time you considered the majority who are opposed to these plans, unlike the LTN consultation you when you ignored the views of the residents and businesses and bus companies and proceed regardless, For once take a step back and listen to the people who live, work and play in this City before you turn it into a disaster zone for everyone and businesses. Mind you the leader of the Council recently came out with a claim that there was no evidence that the Botley Road closures has had any effect on businesses... She needs to wake up and smell the coffee as what she's smelling appears to be a	YES: Take out the LTN's that have caused the connection and remove the 20mph zones which disrupt the flow of traffic causing yet more conjestion, likewise the no turn left at the plain that in effect drives more traffic onto and around the roundabout that would have otherwise turned left, so by result causing yet more connection and delays... Well done OCC
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent		Very negative	It is confusing you're continuously changing your plans. How is anybody supposed to get this right? People are only just trying to work out where they can't drive because of LTN's now you'll introduce this people will be so confused. They'll just get fined and it makes more money for you. I can't see any other benefit for it. I am fed up of the council continuously interfering with the roads. So far nothing you have done has helped your LTNs have only made traffic worse, pollution worse and peoples lives worse. For goodness sake leave us alone. Perhaps you could fix the things you've already started that aren't done well. Cycle paths annd bus lanes are half hearted. Why don't you get those working properly?	I live on the other side of a proposed filter from my child's school which is ridiculous. And let's talk about the London Road: if this is now going to be a very main road where all other traffic is driven onto, how an earth is it going to cope without a continuous bus lane in both directions? I do not understand how buses are going to do anything other than sit in traffic on that road.	Build the hospitals outside the Ring Road! then leave everybody else alone!
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Reastered car clubs	I commute to the central permit area by car	Neutral	Neutral	Too high	Not sure	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very negative	I frequent the ice rink year round and need a car to transport ice hockey equipment. Would I have to pay parking on top of this?		Open the botley road!
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper		Very negative	Because it will impact my journeys by overloading other roads where congestion charges are not applicable. The current LTNs already have a negative impact on my journey times, resulting in longer journeys, higher fuel cost, and general inconvenience of it all	I woul like to know 1. Predicted income from charging gates 2. Impact on bus routes along Banbury road Botley road and Abingdon road 3. Estimated reduction in traffic flow through the charging gates compared to now? 4. It is essential to ensure transparency and effectiveness of the scheme that ALL metrics regarding the effects of the scheme are made public BEFORE implementation so that a TRUE impact analysis can be undertaken. This means expected implementation cost, running cost (including debt recovery) as well as traffic flow comparison before and during scheme, no only on the roads where charge gates are located but all surrounding roads.	Bus gates will not reduce traffic only divert it. To reduce traffic you need to close car parks and permit holder or driveway parking only, if there is nowhere to park P&R will be the only option, of course this assumes the council remember to build a road into and out of the park and ride car parks
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Other	Build more roads. If there's going to be a charge, de-pedestrianise those areas historically pedestrianised. Get rid of the LTNs that also drive traffic to the centre and to the ring road.	Very negative	Oxford is expensive enough without adding yet another tax on ordinary people, and disproportionately on the less well off.	I think it's an awful idea, which is being proposed to try and address some of the issues caused by previous awful ideas such as the LTNs.	
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Extend hours of operation for buses		Very negative	As you will see, I rarely come into Oxford anymore, having been a resident of central Oxford since 1987, then moved out to Beckley. The bus is not an option as I am 70, my husband is 87 and few buses from Beckley, then having to get another bus into Oxford. Visiting friends is becoming impossible. Shopping and cinema visits have stopped completely - preferring to go to Bicester. which is much more people friendly.	We all know that temporary means permanent, once the money starts rolling in - hopefully, people will stay away. You are ruining our beautiful city!	Open up the Botley Road - it is madness that it has been closed for so long and goodness knows how long it will be before it does open! Park and Ride is awful, we had our car stolen from the Headington Park and Ride some years ago. There are a number of elderly people in Beckley and other surrounding villages who are now forced to remain at home due to lack of proper transport - we do not all go to bed at 7am!!!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Unpaid carers	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make buses cheaper for young people, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Resurface the roads, get rid of cycle lanes as they are rarely used as the cyclists ride on the roads and the pavements	Very negative	I live in the St Clements area, why should I be forced to drive an extra 5 miles to get to Abingdon when Residents of James Street don't have to?	Princes Street will be effectively closed off when drivers who don't want to pay the charge will turn off at Rectory Road and along Cross street but will then be held up by the queues at Morrell Avenue. This will mean residents will not be able to leave or enter either end of their road.	Take out all the traffic restrictions employed within the last 30 years, let traffic flow, no bike lanes, register all bicycles, give them a number plate, make them take a mandatory proficiency test, get rid of the rental bikes and scooters, this will reduce crime and danger on the roads and pavements, your anti car ideology is flawed, cars are designed to travel at over 20mph, drivers have to pass a test, make sure their car is roadworthy and pay taxes on the vehicle and fuel. Cyclists and scooters do not have any responsibility and often travel over 20mph. Make bus travel free within the ring road, this will encourage people to use them.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on there cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	No			Very negative	I work at Oxford Golf Club on Hilltop Road in East Oxford and I am concerned the congestion charging scheme will have a detrimental impact on the club. I have 20+ staff who live outside of Oxford due to the cost of accommodation, that have to drive to the club. 3 passes isn't sufficient. The club has experienced the negative impact LTNs have had on congestion and journey times to the club and some of our members have sadly left the club due to this issue. A lot of staff have amended work patterns to avoid traffic. The club is a vital community asset that helps people lead fit and active lives and socialise which helps reduce loneliness. The course is historic and makes golf affordable to people, but it needs support to prevent it becoming cut off. The course has been an integral part of the Oxfordshire golfing community for over 150yrs. Travelling to and from the course will become even harder if congestion charging is introduced. It will further reduce the routes available for people to travel to the club, meaning longer journey times and forcing traffic onto what are already heavily congested arterial roads. The congestion charge would be between 7am and 7pm which is the peak times for the club. It would be incredibly challenging to encourage people to travel to the club by bus, cycle or on foot, with all their golf kit and I fear it will lead to more people either joining clubs outside the city, or worse still stopping playing, which will have a negative impact on their health and wellbeing. We have already tripled equipment storage at the club and added bike racks but we're now out of space. Oxford is unique in having a golf club so close to the city with prestigious links to the University of Oxford. We need transport policies that enable all road users to travel in harmony and it is not possible for everyone to travel via public transport. Many of our members have big kit bags and travel from villages, but would struggle to pay the congestion charge in a cost of living crisis. The proposals would further punish an area that is trying to live with LTNs and a challenging economy.	I travel to the club 6 days a week. The drop in congestion when it's the weekend or when schools are on holiday is significant. If you're concerned about congestion, implement the filters/charges between 7am and 9am and again from 2pm to 4pm M-F. The LTN's were a poorly thought out plan based on irrelevant data. I drive/walk past East Oxford.LTN's all the time - there aren't any kids playing on the streets or riding bikes.	As above: I travel to the club 6 days a week. The drop in congestion when it's the weekend or when schools are on holiday is significant. If you're concerned about congestion, implement the filters/charges between 7am and 9am and again from 2pm to 4pm M-F. The LTN's were a poorly thought out plan based on irrelevant data. I drive/walk past East Oxford.LTN's all the time - there aren't any kids playing on the streets or riding bikes.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Neutral	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	It adds administrative burden to simply travelling around, adds economic strain to the poorest of society (the charges will disproportionately affect people with lower incomes), makes it more difficult for family of elderly or disabled Oxford relatives to visit them, and because there are already multiple different traffic regulations with different webpages for info it makes it more likely people won't know about any charges they may have incurred leading to escalating charges they might not be aware of		More cycle lanes and safety features e.g. bollards, better streetlights which are on throughout the night, more bike parking spaces, discounts in businesses for people who cycle in, more regular bus services running later into the evening, better connectivity across east to west, all bus services to continue to train station
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Other	School buses for private school children - a significant volume of morning traffic is school run traffic, primarily private schools, as when these break up the traffic levels always drop enormously.	Very negative	See 13 below	This, or any, congestion charge is a simple, misguided and unnecessary idea for numerous reasons. 1) The charging hours are ridiculous and draconian - there is nothing on the road at 7 a.m. on any day of the week, whilst after 6 p.m. on week days traffic has usually cleared entirely or is, at worst, back to perfectly normal, acceptable and manageable rush hour levels. Even London's congestion charge ends at 6 p.m. on week days!! Saturday and Sunday charging, as well as charging from 10-3 on week days, is just an obvious money-making ploy - the roads are empty at those times as well you know! If a congestion charge could be justified at all, which it cannot, then at the very most charging hours should be 8-9.30 a.m. and 3.30 - 6 p.m. Monday to Friday only - that's it, no more. Finally, Marston Ferry Road and Hollow Way are not central Oxford roads - they are link roads, vital for the hospitals among many other things - there is absolutely no basis for charging traffic to use these roads at any time. 2) The reasons a C Charge as proposed cannot be justified at all are legion. Firstly, there really, really isn't a problem to tackle. I have lived in Oxford for 14 years. It has a morning and evening rush hour, as every busy and successful city around the world does. The rest of the time, traffic levels are minimal - you are using a sledgehammer to crack a nut. 3) you make no reference in your documentation to school traffic, in particular private school traffic. Any Oxford resident will tell you that, when private schools are on holiday, traffic levels drop dramatically. See my point in 14 below about investing the money you plan to spend on this outrageous scheme in a fleet of school buses instead. 4) Surveys repeatedly show that, other than on boundary roads to which traffic has been funnelled by LTNs, the air quality in Oxford is perfectly fine, so there is no pollution justification for doing this. And no, you cannot use circular reasoning to say that, because pollution and congestion is worse in certain areas AS A DIRECT RESULT of LTNs, that a congestion charge is therefore needed to fix this.	1) Remove the LTNs, which have caused chaos by funnelling all traffic onto a handful of arterial routes and removed the possibility of using other roads, where previously you could divert / avoid traffic. The roads are for everyone, not just those who tick your ideological boxes of travelling by bicycle, bus or scooter. 2) instead of spending money on programmes attacking the motorist, such as congestion charging and pointless / stupid 20mph speed limits, why not invest money in a network of school buses to ferry children - primarily private school children - to and from school. This would have a huge impact on traffic levels. Anybody can see that, when the private schools break up for holidays, traffic levels drop dramatically. 3) increase the speed limit on the ring road from 50mph to 70mph everywhere - 50 is too slow for dual carriageways and causes idling traffic. 4) go back to simple roundabouts at Cutteslowe, Wolvercote and the junctions of Marston Road / Headley Way and Marsh Lane / Cherwell Drive. The traffic lights introduced a few years ago at all these points have made traffic significantly worse than it was before.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	No congestion charges at all!	Very negative	There shouldn't be any congestion charge within Oxford. As it would only make the congested road more congested. There's reason why people choose not to cycle or use public transport, and they shouldn't be punished by paying additional cost for their day to day life. It's outrageous!!!	Should not be introduced	Rethink about the whole city planning. Why is there so many congestion in Oxford is a result of poor road/ city planning. Simply introduce congestion to increase their cost of living does not reduce the congestion. People will drive will still drive.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative		The charge locations are inequitous - the absence of a charge location on neither the Botley Road nor Woodstock Road mean this is preferentially targetting less socioeconomically well off areas (cf Hollow Way). Your own economic and air quality assessments demonstrate that for instance air quality will worsen on those roads and traffic will increase. There will also be considerably worse air quality on the ring road with no proposed solution to improve connectivity on that ring road. There are no clear plans to invest the £4-5 million generated from this scheme per year (as illustrated by including in this consultation questions seeking ideas as to what do to with this money). This is an incompletely thought through and reactionary idea. The decision to grant free access through all congestion locations for businesses and residents in the central permit area does not make any sense - why would they need access through Hollow Way for example (or why would they be in greater need than for instance a resident on the Slade). Surely the Thames road is the only location that one could justify granting access.	Build more and better cycle lanes
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Positive	Neutral	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Positive	I'd say that a congestion charge makes more sense than 'permits', although for those living in the central permit area the permits make more sense. For people from outside Oxford, the congestion charge is way more sensible (provided there's signage to warn people!)	No	No
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Negative	It will stop me parking and shopping and eating out in the Westgate and Oxford. It will stop me considering working in Oxford.	It's a bad idea.	Improve park and ride - capacity, frequency and speedier access in and out of city centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Neutral	As a resident of Wolvercote I will largely be unaffected by this. I don't commute into the City Centre and while the closure of Marston Ferry Road would be a blow it wouldn't really affect me much on a day to day basis at present.	I support the aims to reduce congestion, however I really don't think this scheme will address the problems or give the aims. Will it reduce traffic? No it will just mean like the gates it will force traffic on less routes. Will it improve Bus times? No. While there will inevitably be less traffic on some of the link roads, Marston Ferry, Holly way etc. They will inevitably be held up in other main arterial roads. Take Wolvercote since the new road layout/bus lanes on Wolvercote Road it now takes a bus about 20mins to leave the village at peak times as traffic backs up. In addition - Commuters are what causes the problem with traffic, any measures should be aimed squarely at them. As a resident of Oxford we are being penalised for the actions of commuter. Why should company's who are allowed to park in the city centre be exempt?. Those are exactly the car journeys you want to remove. A commuter would be able to drive more freely around the city then a resident, which I find unacceptable! I don't understand the point of the St Clements camera? would this not send people down Iffley/Cowley Rd.	Make artireal roads one way. e.g. Woodstock Rd Inbound and Banbury Rd Outbound. Likewise with Cowley/Iffley. Could then have dual carriage ways and room for bus/cycle lanes. Congestion Charging/APN - not just on on all arterial roads but free for residents. This will force commuters to use Park & Ride. Make P&R cheaper then Congestion Charge.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	1. This scheme is iniquitous, unreasonable and the ethics of it are highly doubtful. It is yet another attempt to reduce our individual freedoms. There was no suggestion of any such Scheme in the controlling party's manifest just a few short months ago when this MUST have been being considered. 2. The presumption of the need for the Scheme is likely to be false, in as much as the 'congestion' currently being experienced is being exacerbated significantly by the continued closure of Botley Bridge & Road. ANY and EVERY Traffic Scheme should await the re-opening of botley Road to deliver a true congestion assessment FIRST. 3. The whole style of this consultation is fraudulent, not having asked about the rightness of this Scheme until this 10th question. Qs 1 - 9 are all about the detail rather than the principle, as if already a 'done deal' again just like the LTNs were. This is delivering the 'gates' initiative by the back door. 4. My family are Sandford on Thames resident, so only just outside the city boundary. But our Doctor, our Dentist, our Chemist for prescription collection, Our Building Society, Shops & Services we regularly use and Some of our Friends are all within your proposed chargeable area. The proposed allowance level of permits is simply inadequate. 5. This proposal will further support and further accelerate the continuing 'slow death' of Oxford and put us to additionsal costs and nuisance when becoming obliged to shop etc. elsewhere as Oxford becomes a 'no go' zone. 6. Improvements need to be made to the alternatives FIRST if any take-up is to be achieved and any positive impact delivered. 7. The costs of set-up of the scheme - claimed to be temporary - are excessive if that claim was to be true. This is poor use of our rates when other things deserve more focus.	This scheme should simply not be progressed with.	More active management of roadworks in and around Oxford to maximise the amount of traffic support available day-to-day.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Other	Don't even consider introducing new traffic measures. Botley Rd and the LTNs have been so poorly handled and caused such division and chaos. Please address ongoing issues due to poor management before considering further action.	Very negative			
an Oxford resident	weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	Too high	Yes	Make buses cheaper for all, Make bus services more frequent		Very negative	I live and work in an area of higher deprivation and I think this would again be seen as a move by the council to push out the poor from the centre of their community in Oxford. This will no doubt affect the poor more substantially than the rich. Use more carrot, less stick.	Encourage parents by reward to walk/cycle their children home rather than driving. School pick-up time seems to be the big driver of traffic (pardon the pun).	Please include clergy on the list of exempt people if you are determined to bring this in - I have to visit many parishioners in multiple places around the city (hospitals, court, university & college events, etc). I think lowering bus prices would make a difference too, perhaps even an unlimited use bus pass with a monthly subscription - I would happily pay £30-£50 a month for one.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No			No impact	I don't drive into that area. an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Refund the money	Very negative	How do magistrates go to the court? The ring road and main roads like Banbury will get more crowded. Also, I will rather shop in Bicester.	Please drop this silly idea.	There are no particular traffic issues on those routes. On other routes, such as Banbury, bicycles could be rerouted to side streets.
a member of the public living outside Oxfordshire	weekly		I don't	Very negative	No impact	There should be no charges at all	No	Other	Provide a sensible parking solution for rink users that doesn't involve expecting 2 ice hockey teams (max 42 players) plus their kit to get to the rink via public transport on a Saturday or Sunday afternoon in time for their matches.	Very negative	I have played for Oxford ice hockey teams for over 30 years. While I no longer live in Oxford, it is still my hockey home. In that time the ice hockey community at the rink has grown and developed into the thriving club that it is today. Changing cars to access the rink will push players, especially those who travel, to other play at other rinks with easier access. A thriving city is made up of its communities, this action will, over time and coupled with the longer-term traffic management plans, destroy the ice hockey community in Oxford.	Linking exemption for congestion charges (and future traffic control systems) to the existing parking permit system would be a sensible solution. As with the parking permits, exemption could be limited to match and practice days to reduce any perceived risks of exploitation.	
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Oppose congestion charge	Very negative			
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Other		Very negative	I live in an LTN road near the plain. I am long term ill but do not qualify for a blue badge but do have to get to the hospital (both Churchill and JR) a lot and can not mange buses or taxis. The st Clements charge would make my journey ridiculously long and also painful for me which would impact my health. My daughter works in Kidlington and has to use her car for work but because she does not own the car, it is a company car, she would not be able to get permits and this would double the amount of miles she would commute to work each day and also reduce the amount of time she would have to care for me at home. Those of us living in so called LTNs are feeling like we are being squeezed out of our lives and honestly the blocking of temple street where we live has caused far more noise and hassle and trouble that before it was blocked. You ignore the majority who didn't want it blocked then via consultation, so I am sure you will ignore it now. Oxford has become a really horrible and stressful place and it is sad the place I grew up and grew my family up has become like this - this is no quality of life and I believe the stress of all of this is why I have become to ill and am now unable to work as a bus driver.	The whole thing is a total joke which is negatively impacting mainly working class people's lives. As someone who lives in a so called LTN mine and my families life has simple got harder and worse since all of this nonsense which the majority in our street said they don't want. I have become ill from the stress and can no longer work. My daughter may have to leave a good job because commute time will double and therefore reduce the time she is able to care for me. These are public roads for everyone to use and reducing access to even more is simply going to make life even harder.	Remove LTNs so traffic can flow as it used to and so that when there are roadworks (if which there are many) vehicles can take diversions. Also better planning (or some planning at all) over road works with work being done efficiently, not just temp traffic lights scattered everywhere with no one actually working for the majority of the time.
an Oxford resident	daily		I don't	Neutral	Neutral	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Negative	As your plan stands it feels like North Oxford is being "let off " this scheme, with the included chosen areas being those penalised area. Don't get me wrong, I'm in favour of this scheme but as usual, it seems very ill thought out. I also can't help noticing that all affected streets are identical (or nearly so) to those chosen for the now seemingly defunct bus gate scheme!	As your plan stands it feels like North Oxford is being "let off " this scheme, with the included chosen areas being those penalised area. Don't get me wrong, I'm in favour of this scheme but as usual, it seems very ill thought out. I also can't help noticing that all affected streets are identical (or nearly so) to those chosen for the now seemingly defunct bus gate scheme!	The LTN scheme has not work, despite what Andrew Gant claims. I've emailed his on a number of occasions and his replies only ever seem to quote statistics, which is something I'm always very wary of. Statistics can always be skewed to favourably represent whatever narrative you want to push. I therefore get very suspicious of quoted statistics. As a cyclist, I'm always in favour of making the streets safter for all users. As the LTN scheme stands it has made my cycle commute to work far more dangerous. I mentioned this in my emails to Andrew Gant but this consistently falls on deaf ears! With the LTNs in place this has displaced traffic onto the main routes, which are my routes to work. The position of the LTNs are not viable for me to use them for my commute.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative impact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	It will curtail my freedom to drive into Oxford as and when I feel like it.	I don't think there should be any congestion charges at all.	Remove the LTN's and make cyclists stick to the cycle lanes, not use the roads when the pavements have been narrowed to enable cycle lanes
a resident of Oxfordshire living outside Oxford	less than weekly	Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	More hassle and money grabbing		Better ring roads, better traffic management with traffic lights - up and over pedestrian crossings so traffic doesn't start stop
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Other	Open LTNs	Very negative	I live just outside the ringroad and travel across the city for work and pleasure purposes. I am genuinely considering relocating my family and businesses out of Oxfordshire on the basis of vour stupid schemes.		Address the issue of the Chelsea Tractors - you can drive around oxford easily when the private schools are closed. Let's not beat around the bush - these are a huge issue. Stop stiffing hard workina. normal people.
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Very negative	I commute as a scientist to the JR everyday, I'm not a NHS worker so would not be exempt. The drive is already an hour long (from Bicester) and I have to pay to park on someone's drive in Marston already to then cycle to work. I am not paid very well at all and an extra £5 a day would have me quit my job and look elsewhere. I was using the H5 bus from Bicester but some days it took over two hours to get to JR and I could not afford the £8 a day. I also have hip problems and can't walk far and the 15 mins from my house to the bus station made it worse. One of the routes through Marston is not the proposed charge but it is already crazy with traffic some days one mile takes over twenty minutes, this would get worse with everyone avoiding Marston ferry road. I have a tiny Peugeot 107 which I can barely afford as it is let alone to have £5 a day thrown on. Traffic is awful anyway. Improve the roads make them bigger don't charge people a stupid amount of money to drive on the road. For context £5 a day is £100 a month, after my bills I am left with about £80 so I genuinely would be in debt whilst working full time.	Drive from Bicester to the JR just once or from Iddington to the JR and see how awful the journey is anyway and then throw in £5 to have the pleasure in doing so. Make the roads bigger use your own money not people just trying to commute to work.	You have already invested so much in cycling and walking stop thinking about that you've done too much as it is. (I cycle from the car parking space to the JR no feel my input is valid as both a cyclist and car driver). Make the roads bigger invest in better roads and traffic light systems (ones in headington are awful and cause a lot more congestion due to the wrong timing of lights) make more roads, get rid of bus lanes that inhibit drivers taking short cuts (again one in headington would shave 20 minutes off my journey but is a road only permitted to buses). I've cycled taken the bus and driven but I need my car. Also do the journeys yourselves and see rather than just throw a blanket £5 amount on (£5 is a crazy amount of money to drive your own car)
a representative of a group or organisation	weekly		I don't	No impact	No impact	About right	No	Make buses cheaper for all		Very negative	I am the Cadet Executive officer for the Oxfordshire Army Cadet Force, we have a detachment located in Falklands house on Cherwell road.	I am a Youth Group Leader (Army Cadets) running a group located in the central area of the city. We have teenagers between the ages of 12 and 18 attending every evening from 19:00 to 21:00. Many parents, especially those from West Oxford, have expressed serious concerns about their 12–15 year olds travelling home by bus between 21:15 and 21:30, which is both unsafe and impractical. In many cases, the only viable option will be for parents to drive around the bridge, adding a £5 charge per trip or using one of their limited free passes. Our Army Cadets group is free for all and provides vital support, especially for disadvantaged young people. The Army Cadets have been shown to have a significant positive impact on social mobility, employability, and overall well being (see https://www.gov.uk/government/news/independent-report-celebrates-positive-impact-of-cadet-forces). The proposed restrictions, as they currently stand, will create a barrier for the very young people who need this opportunity the most, increasing the class divide, deepening the poverty trap, and potentially leading to higher instances of anti social behavior.	Proposed Solution: Change the restriction end time across all locations to 18:00, allowing evening youth activities—including those of the Army Cadets, the ice rink, and others—to operate as intended. This approach still prioritises commuters but ensures that vital youth services (especially those that are non profit making) remain accessible to those who need them the most. By changing the End Times to 18:00 would have a minimal effect on the overall traffic plans but still give a Maximum output by allowing those 12-18 year old access to a vital service that we provide, the above report backs up the positive impact that the ACF has on the youth of today, the fact that there is very little for Oxfordshire youngsters to do in the evenings, would mean that there would be a rise in antisocial behavior and other issues going forward.
an Oxford resident	daily	Blue badge holders, Frequent hospital patients	I commute to the central permit area by car	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	My son and I are disabled and I work in town REDACTED. I'm not highly paid and to have a "temporary" permit as a blue badge holder, angers me, as I don't see it helping congestion with the tins still in the mix. Feels like you don't want people in the town at all. hence the number of emoty shops....	It's funny how they are mostly university building locations (Brookes or Oxford). Id love to know what the universities thought of these charges. And why do only cars get hit? White Vans are very popular in the town!	Get rid of tins. They are causing massive issues within the town and affecting me greatly - a 10 min journey has increased 3 fold. They are really affecting those with disabilities - I'm becoming a hermit due to those ridiculous limitations that has been implemented.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	Yes	Make bus services more frequent		Very negative	This is a tax on working in Oxford. We already have problems with retention and recruitment in the NHS and in the University. These measures will make more people leave and we will find it increasingly difficult to find good staff. Hospital and University staff cannot afford to live in central Oxford and are forced to commute. These measures make it extremely difficult to do that.	The idea should be abandoned.	I thought this was part of a green agenda. There is no mention of electric cars and hybrids being treated preferentially - one may as well drive a diesel and pollute everywhere!
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Neutral	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	My commute to work passes through 2 gates and the alternative route is much longer in distance and time. I regularly pick up and drop off people at the rail station which I would have to pay £5 a time for. I use the Westgate car park in the evening as I do not feel safe walking home from the bus stop late at night and that will cost me £5 in addition to the car park charge.	You should improve public transport and make it much more affordable which will attract people to use those options. Currently a taxi is cheaper for me and one other than catching the bus! You should consider people working in essential jobs - staff working in city centre schools need to get to and from work often carrying heavy equipment. These schools are already losing staff due to vour orocessed chanaes . Who will then educate these children?	More affordable public transport travelling where people need it without they need to catch 2 buses to travel 4 miles
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent		Very negative	It is madness, trying to restrict people travelling around the city. Businesses will suffer as a result. I come to oxford for education, sport and leisure... I will have to stop doing these things.... which is annoying for me - but even more annoying for the shops and businesses where i will no longer be spending my money.	Generally whenever Ox council do something about the traffic they ALWAYS make it worse.	Yes - stop messing about with the traffic lights, bus lanes etc. Traffic flows so much better when they are broken. Oh - and maybe open some of the closed roads, that would help too.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	Travel into Oxford will become impossible. It's already difficult and expensive for anyone outside Oxford where bus services are negligible	It feels you are set on off-putting day visitors who live, work, socialise in oxfordshire for a vision of cycling/walking in a city that only those wealthy enough to live in cycling/walking distance can attain. No thought to economic future of the city, its businesses, retailers and employers.	More than 1 bus an hour? Free bus travel for under 18's?
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	No congestion charge and to ease traffic stress that is making Oxford inaccessible look fox solutions like busses that loop through routes and link every part every 5 minute and is free. Only then you can persuade people. Stop focusing on punishing people	Very negative		I do not believe that this is temporary, it stealth. There should be no charge to go into your local city for amenities. With the the cost of living no one drives in just because they feel like. Why don't you get the money from people responsible for Botley closure and delays as I do believe this is another unscrupulous way of taking money from people.	There is no point as you would not listen
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	I travel to the railway station on a frequent basis to drop off and pick up family members. As they arrive late in the evening it would not be safe for them to walk to a charae free location. 25 passes would last about two months!	It will be a complete waste of money and will definitely be bad for all businesses within the charging area. To add £5 onto the hich parkina charaes would decimate some of those businesses.	It seems that only during rush hour times is the traffic bad as I can travel in and out of Oxford quite easily after 9.00. There is no aood reason for the current traffic suaaestions other than a political aaenda.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact			Other	Improving road conditions across the county for motorists and adding more cycle paths to encourage different modes of transport, making the A40 dual carriageway to improve travel	Negative	25 passes a year for our household is very restrictive, particularly as I participate in sports within Oxford and need access to central Oxford for this (there are no clubs closer than in the city)		Improve connections for towns outside of Oxford towards the city - dedicated cycle paths are safer than the very narrow cycle lanes; have more of these towards Oxford from Carterton e.g. Improve the cycle path from Eynsham park and ride
an Oxford resident	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative			
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		No impact	With the Botley Road closed, we have no vehicle access to the City Centre.		We need to make public transport more attractive to use. Currently I find it too expensive, unreliable and at certain times and days non existent. I would be in favour of day time closure all the main roads into Oxford (Botley Road, Woodstock Rd, Banbury etc) if there was a rapid, efficient and inexpensive public transport service taking people into the City.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Very negative	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	Reduced congestion will not only make the city a safer place for pedestrians and cyclists, it will improve the air quality and make bus services quicker and more reliable. Reduced congestion, and the reduction of car use, make Oxford a far better place to live.	The proposal to use the congestion charge to subsidies car parking at Park & Ride sites is inherently unfair - our bus system is already poorly funded and fares too high, and the correct use of fines collected from cars is to reduce bus fares and improve service provision, as well as to improve public transport in the city as a whole, including by subsidising the introduction of passenger rail services between Cowley and Oxford Parkway.	Undertake a review of bus routing and timetabling in the city to prioritise ensuring that residents have easy and frequent access by bus to the Railway Station, the hospitals and major community/commercial centres. Additionally, investigate further bus priority measures on busy roads and at junctions, including 'green wave' systems that reduce the time buses spend at red lights, and allow them to leave junctions ahead of other vehicles. Furthermore, investigate more options than buses and private hire taxis for public transport in the city - the Very Light Rail system currently under development by Coventry may hold a great deal of promise for use in Oxford, and has the potentialnto dramatically change mobility in Oxford for the better.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	Why only 100 free passes for residents? Why not eg 350 - or 365 ie to allow daily use?? Charging should be confined to those vehicles NOT from Oxford permit area. Also: Oxford state school employees incl. and especially non-teaching staff will be adversely affected if they are not exempted from congestion charge. Daily after-school carers eg grandparents likely also to be adversely affected and therefore should be exempt. What is reasoning for the current list - as given at preamble to this consultation?	No	Increase frequency of - and additional routes for - buses.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Positive	There should be no charges at all	Yes	Other	More parking bays	Very negative	Need to travel to work and can't afford £5 a day to do this. Bus isn't an option due to travel times. As per usually the rich will still be able to travel and those on lower income and vulnerable will suffer	Take notice of the consultation this shouldn't be a tick box exercise that is then ignored. The Botley Road opening and filters being out in is also strongly opposed so please take notice of what local people want	Get a tram system.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	My bus is threatened with being cancelled. I can't cycle. I need my car. This will effectively bar Oxford city to me, coupled with the ZEZ charge this is prohibitive and impacts those who don'tcan't cycle the most. The bus companies are private and so the income won't improve the service, they will just claw in even more money at citizens expense. Why not charge for tourist buses and bring in a digital booking system for the Westgate car park which needs to be done in advance of travel.		FREE buses. Make sure the 400 bus continues to run up Westminster Way. Sort out the rail bridge fiasco.
an Oxford resident	daily		I don't	Very positive	Very positive	Too low	Not sure	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	I don't use a car and want to be able to get in and out of town faster. I hope the funding goes towards better bus services because I only live 2miles from town but some of the buses in the evening only go every 45mins - it's like being a teenager waiting for a lift in Oxfordshire compared to London where I lived before. Otherwise I will need to consider learning to drive.	Great idea for all non-service providers (including carers)	Pedestrianise more roads in the centre
a resident of Oxfordshire living outside Oxford	daily		I commute to the central permit area by car	No impact	Very negative	There should be no charges at all	Not sure	Add new bus routes		Very negative	Hospital worker on minimum wage this is too much money do you want our hospitals staffed or not?	I think you have this all wrong you are doing what you think is right but not what the people who voted for you wanted	Buses that go directly to the Churchill or Nuffield . Make parents send their kids to the nearest school.
a business	daily	Community health or care workers who need to visit multiple locations or travel urgently, Personal cars used as goods vehicles for business purposes,	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	DO NOT IMPLEMENT THEM	Very negative	We are a huge GP practice and are located in Hollow Way we have a vast number of patients attending appointments on daily basis. you do not have the right to take away their access to NHs services neither do you have the right to penalise my staff for working and offering essential services	If you remove the LTN's then traffic would flow freely and not cause congestion	you could make some roads one way only
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Make Park & Ride buses cheaper, Add new bus routes, Add public cycle parking		Very positive	This will incentivise people to use other means of transport within Oxford, which reduces congestion and makes the city a much more pleasant place to be for all.		The way the congestion charge area is defined has a big gap: it still allows cars to drive all the way into the city centre through St Giles. It continues to surprise me that in 2025 we still have a sea of tarmac for car parking in the centre of a historical town like Oxford.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	The charges are unnecessary	Very negative	It's just another tax on the people who are already taxed to use and maintain the roads, through car tax and council tax! These charges will force even more motor vehicles onto the already congested fragile ring road, any minor incident on the ring road already floods areas struadina with LTN's it will be double when the extra traffic is pushed there!	When this proposal is implemented as we all know it will be regardless of what business and residents think there needs to be improvements made to the Ring Road to make it an attractive alternative to driving through Oxford!	The LTN's are the biggest factor behind the increase in congestion around East Oxford, they could be removed and replaced with a traffic calming chicane system!
an Oxford resident	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Very positive	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I just won't go into Oxford anymore. What's the point of the Westgate car park if you can't get into it without paying an extra £5	You will turn Oxford into a tourist / student town, people will shop elsewhere	Move the Westgate shopping centre out of town and get the Botley Road open
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add public cycle parking		Negative			
an Oxford resident	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Very negative	I have no bus service close to me. Closest is over 1 mile away on a unlit road. Where I live is for over 55s all residents have cars due to no bus service. It is already causing me and many others severe anxiety getting anywhere because of the LTNS	This is just another way of driving Oxfordshire residents from not going into Oxford. It already is just a place geared for tourists and due to the closure of roads and the congestion this is causing. Many business and shops closing making alot of Oxford look like a very scruffy and poor city	Get rid of the LTNs as these have caused the problems with the traffic and congestion
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Very negative	I live on Banbury road and I work outside of Oxford, I need to pass everyday through the congestion charge locations and I'm not eligible for the new permit. It means it will take me hours to commute	You need to create new permit even for the people who lives nearby and need to commute through the charges location	
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars, School students with special educational needs, Unpaid carers, Community health or care workers who need to visit multiple locations or travel urgently, Frequent hospital patients, Emergency service vehicles, Firefighters, Taxis and private hire vehicles, Registered car clubs, Business cars used as goods vehicles, Personal cars used as goods vehicles for business purposes, Driving instructors, Hearses and funeral cars	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Repair the roads	Very negative	No,one wants a congestion charge, not a system of bus gates or the itns except fir special interest groups, environmental extremists and councillors who don't live in the city. Leave us alone	Scrap the plans immediately and let Oxford residents and councillors decide what's best for our city. Oxford is being choked by rural councillors who are ideologically driven	Yes however this is not the forum to discuss a bold approach to tackling Oxfords traffic issues.we need a separate discussion about this when the greater Oxford council is operating
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	Yes	Other	Fund a children's play area in central Pxfoed	Negative	It's so stressful and expensive living four miles from central Oxford with a young family. Half my salary goes on nursery fees. We're barely paying the mortgage. I can't take a baby and three year old on the bus into town because I can't fold up the pram and manage the baby and toddler on the bus if I need to. How can I fold a pram when I am holding my baby and also keep the toddler safe? I wouldn't cycle into town with my young children because the baby is too young to travel by bike and it's not safe. A mum and baby have already been knocked off a bike on the Botley road this year. My workplace in central Oxford already charges £4 per day to use the carpark and now with this charge as well I'm basically paying to work. My mental health is being affected by how expensive and complicated it is to bring up young children in this city. The lack of central playing spaces for children in the city combined with these anti-driving policies make it clear that Oxford is a place for wealthy people who can afford to live in the centre of town and for people without young families. Clearly we need to look at moving elsewhere because daily life is becoming impossible. What good is 50 passes to me when I need to get to work every week day and drop my kids off at nursery? What good are buses when I'm charged by the minute by the nursery for picking my children up late?	West Oxford and Vale of White Horse residents in Botley and Cumnor have been through so much in the past few years with the closure of the Botley Road. It's made daily life so much more complicated and stressful, not to mention the impact on businesses in the area. Please stop with these new initiatives and let us live our lives in peace.	I really don't think congestion is that bad for a city the size of Oxford. It's very possible to drive into work in the city each day and get the kids into nursery by car. A bit of congestion is to be expected. Please give struggling working families a break and rethink another expensive and stressful addition to daily life. Please don't do this. We are literally begging you.
a member of the public living outside Oxfordshire	weekly		I don't	Neutral	Neutral	About right	No	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Positive	I think it will make my bus quicker which will give me more time to get up in the morning, which I would value because of my disability	No	No
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Neutral	There should be no charges at all	No	Add new bus routes, Make bus services more frequent		Very negative	The permits are insufficient for regular trips into Oxford, and so we will have to give up those activities. The most direct consequence will be a reduction in commercial activity in Oxford - if we have to avoid travelling into Oxford in general, then we will stop shopping, eating and visiting entertainment in Oxford also. Since Oxfordshire County Council is responsible for this, we will ensure that we transfer those activities outside of Oxfordshire entirely.	It is disingenuous and deceitful as a way of raising money and I do not trust the council to spend the money correctly. Put congestion charging next to the council's car park so that the council is affected.	
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for young people, Extend hours of operation for buses		Very negative	So I am a young person who is finishing there degree and is living in shared student housing who is going to in the near future begin commuting from Oxford to a place of work outside of Oxford everyday and since there's 6 of us living together who all need to drive I can't imagine considering we rent that the council would be granting 6 passes to us meaning we would probably have to sav daily.	It says it to ease congestion related to botley road but it doesn't appear that many of the zones are actually anywhere near botley therefore are effected e.g Marston	Allow cars to use the through roads around Iffley and cowley roads and up towards headington rather than forcing all traffic to head into one bottle neck at the main roundabout that heads into the city centre.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very positive	Hopefully get cars off the road so buses run quicker.		
a resident of Oxfordshire living outside Oxford	weekly	Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	People will stop visiting Oxford even more - which will make traders/shops go out of business. Trains are expensive, buses as well now since the £3 each way bus hike. Villages don't have a choice - my village has a terrible bus service - no longer direct to Oxford, you have to go via Bicester, so most don't bother	Terrible idea	Remove LTN's -bad for environment - ask people in St Clements, Cowley road and any other road where the traffic is sent, because of LTN's
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	No impact	Too low	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	I cycle daily or use the bus, this proposed scheme would have a hugely positive impact on our family and commuting times, also pollution and noise from all the traffic is awful.	Please improve cycle routes into town and cycle parking in town. Also increase parking charges in the city centre higher to encouraae people to use P&R. and make P&R busses more affordable.	More LTNs, improve cycling infrastructure. Increase bus routes to encourage people to ditch their car.

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of larger cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Add public cycle parking		Very positive	I am hopeful that an introduction of a congestion charge will lessen the amount of traffic going through Oxford. At the moment, there are far too many vehicles on the roads in Oxford leading to congestion, traffic jams, reckless driving, danger to cyclists and pedestrians, increased pollution, etc.. There are also too many larger cars now on Oxford's narrow streets which cause more congestion and present greater risk to cyclists, both when the cars are parked and driven. If the congestion charge helps to reduce the number of vehicles in Oxford - which I feel it will - this can only be a very good thing.		I would suggest more traffic wardens who would focus on dangerous or illegal parking (looking in particular at the Cowley Road).
a resident of Oxfordshire living outside Oxford	less than weekly		I don't	Very negative	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive	Reducing cars in the centre will make it more efficient and viable for public transport and cycling.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Neutral	Too low	Yes	Make Park & Ride buses cheaper		Very positive	Traffic levels in the city are too high. As someone who commutes in by bus to central Oxford it is vital that traffic is reduced in order to encourage more active travel and/or the use of public transport. Until the traffic filters gates can be fully implemented once the Botley Road is reopened then this a practical idea to address the traffic issue.		Improving the ability to cycle safely in from satellite villages such as Bennnsfield via the A4074
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	It is not the fault of residents that the Botley Road has been closed for so long, the penalty for having the road closed should not fall to Oxford(shire) residents to have to pay.	Residents should not have to pay for a road closure that is not remotely their fault. They are already being inconvenienced hugely	Get rid of the low traffic neighbourhoods, they only cause more congestion on larger roads and make travelling around Oxford worse. Have more bus routes that go between Oxfordshire villages rather than all having to go into Oxford or having some villages with no public transport at all, forcing residents to drive. Put in a proper cycle route between Botley and Eynsham (and similar for other surrounding villages) to make it safe for cyclists.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Positive	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Very negative	I am unlikely to visit central Oxford for shopping, theatre and eating out.	If you want to reduce traffic, you need to provide better public transport infrastructure and secure bike parking and safer cycling routes. Just fining people is not the answer.	A better train station and more frequent local service as well as improved buses and free parking/buses at the Park & Ride locations are a good start but I would like to see something cleaner than buses like a monorail system.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Positive	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Very negative	I will choose to go to other towns and not visit Oxford which will impact on business. My husband requires regular hospital visits which will cost us more money, as there is no way we can get there except by car.	They should not be considered.	More regular buses from outside Oxford
a resident of Oxfordshire living outside Oxford	weekly		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent		Very negative	This is fine if you are in an area that is served by Public Transport, but if you live an area with at best an intermittent bus service, and have no choice but to use a car, this is simply an additional tax for no additional benefit. Some routes are fine, as they have very frequent and early/late bus availability. Some of us live in areas served by a single bus route that runs on a less than hourly basis, and does not run into the evenings. Because of this, we either have to drive, or pay for a taxi, which is prohibitively expensive. This is all stick, and no carrot; we know our bus service will never be improved because it is not considered economical at current levels. The nonsense about buses being able to run more frequently is, sadly, wishful thinking. It requires money up front to do that, and this will not generate anywhere near enough money to make any difference.	The locations will simply increase congestion elsewhere, for example around Headington, as people use alternative routes to get to where they need to go. The one on Hollow Way will penalise people who need to access the hospitals, and are already being penalised by having to pay to park. Also - having to pay online is simply not going to be possible for some residents, who do not or cannot use online payment services. Walking and Cycling may be made more attractive for people in Oxford, but that's not always possible for people who live outside of Oxford and cannot walk or cycle in. Oxford relies on people from outside Oxford for Oxford's prosperity - increase the cost of access, and people will simply go elsewhere and spend their money elsewhere.	Make the Park and Ride service free, or at least make the parking free. That will encourage more people to leave their cars in the P&R sites. At the moment, if you want to go to the Westgate for a couple of hours, it's cheaper to drive and pay the parking charge there. Make the P&R the cheaper option, and more people will use it. You are instead just making it more expensive overall at a time when households are struggling with day to day costs. Use positive encouragement rather than adding to the financial burden of residents of Oxfordshire.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Frequent hospital patients, Personal cars used as goods vehicles for business purposes	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Other	No	Very negative	You won't be able to reduce car trafic in Oxford this way. It is going to make it worse	It is stupid idea as the other roads will get congestion	Open the roads you already closed like LTN
a resident of Oxfordshire living outside Oxford	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make bus services more frequent		Very negative	This is a tax on the people not rich enough to live in Oxford who have to commute for work	Get rid of the LTNs and the traffic will flow better. Will result in no shops in Oxford and more profit for Amazon	Open the LTNs. Open Botley road. Build a skyrail like Disney land, above the roads.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	Not sure	Other	There should be no charge	Very negative	There should be no charge at all.		Have eco days where drivers are encouraged to not enter the city on x days and reward them with discount at shops not in the city.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very negative	I'm living outside Oxford and volunteer in activity class for children in Oxford which I don't get paid for. I'm also on maternity leave taking care of a young baby and tried to use the bus but I don't feel safe putting my baby in there as the drivers are too fast and my baby is shaken in the pram, the buses are dirty with people leaving spilled drinks on the floor and I have to wait for too long before the bus come in a bus stop where people can vap or smoke next to my baby. I choose to use the nearest parking in town which cost a fortune. The money made by the council for the parking should be used to improve the transport community instead of making people pay even more.		Make westgate parking contribute to the bill and pay part of the improvement of transportation. They could make a donation and in return get free advertising on Oxford buses. Add free/discounted bike access in park and rides parking. Make buses safer and accessible to everyone. Give discounted bus passes for families and young people.
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice. Registered car clubs	I don't	Very positive	Positive	Too low	Yes	Make buses cheaper for all, Add new bus routes, Other	Road layout improvements to narrow or pedestrianise central city streets.	Very positive	I believe the reduction in private vehicles will help traffic to flow better and reduce pollution from particulates and engine noise. This will be positive to the health of all Oxford residents.		Continue with existing plans to create better and additional park and rides. Pedestrianise George Street and move existing bus stands to Beaumont Street. Westgate car park should be converted into a delivery hub.
a resident of Oxfordshire living outside Oxford	less than weekly	Disability benefit claimants	I don't	No impact	No impact	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		No impact	It doesn't impact me at all because I only travel to the hospital, if I had the choice I wouldn't visit Oxford at all.	This congestion charge idea is a joke, especially when people are already hurting from increases in domestic fuel prices, increases in council tax, increases in water rates, increases in food prices, all manufactured and aren't the real cost that we should receive. It won't stop people driving cars, most of us drive cars/vans for a reason. Permits to travel to certain areas? what is this a dictatorship?	Yes, in fact I do, open all LTN at rush hours and 20mph speed limits should only be part time. There is no reason for roads to be 20 mph at 9 or 10pm and before 6am being as there aren't a lot of vehicles on the road at that time. Here's another idea, in London, other traffic can use bus lanes after 7pm and before 5am or something like that. Get rid of the bus gates especially those that force 1/3 of the residents to have to drive THROUGH the estate to get out of the estate and be forced to drive passed a school. That causes MORE pollution, a bottle neck and safety issues. (kings grove new builds in grove). All these things you keep doing do not stop pollution (that's impossible whilst humans are alive), it causes more on the outskirts of the city. It also costs more for drivers in both finance and time. Oxfordshire as a whole is in the lowest pollution group already. These stories about 4000 dying from air pollution each year...nonsense, in the last 20 years only 1 person was thought to have died from air pollution but they could not be 100% sure. All the people who have died have had underlying issues. If you try to use the asthma issue, well, Oxfordshire has quite a lot of sufferers because Oxfordshire is in a valley, the air is always denser
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Negative	There should be no charges at all	Yes	Make Park & Ride buses cheaper, Add new bus routes, Make bus services more frequent		Very negative	Timings of closures not helpful and permits offered may not be helpful either . This will mean using the ring road which will be busier than ever. Working around LTNs is infuriating enough - longer journey already!!!	Cancel these now and in the future for the East. How about adding some LTNs and congestion charge locations around North, West and South Oxford before they get close to the City - that would solve some congestion and pollution.	An overall parking charges except Park and Ride buses. Increase the use of double yellow lines, and probably traffic wardens. Keep all bus fares very low and free for some groups e.g. those in education or on benefits - would need to apply for a oass as with older people. Remove all LTNs.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Neutral	Very negative	There should be no charges at all	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Other	Like Manchester, free buses within the city centre and better routes would help.	Very negative	So many, one area of concern is people making urgent visits to the JR and with the Botley Road out of action, there is no way to get to the train station without having to pay a fee. This fee feels like it will damage so many people in Oxford and the cost of implementation has not been provided. We all want a greener city, but this feels the wrong direction.	Please do not even start to do this until Botley Road is open, please could you let the public know about the cost of putting this in place. We all want a much cleaner city with a better environment for all, however, having safer, cleaner and cheaper public transport would be a much better way of doing this. I hardly ever drive but one journey i do make is to the train station as often the No5 bus can feel intimidating.	Increase all parking charges except Park and Ride buses. Increase the use of double yellow lines, and probably traffic wardens. Keep all bus fares very low and free for some groups e.g. those in education or on benefits - would need to apply for a oass as with older people. Remove all LTNs. Please take a look at what Cork has done as a city, with some roads being one way or bus only. Clean, well funded, safe, cheap public transport, running longer hours (and with extra safety at night) going to a wide range of locations. As an employer in Oxford, I do hear terrible things of lone women having terrible issues using public transport at night in Oxford and in several places buses to places such as Bampton finishing before work has finished. We need a better connected city and county.
a member of the public living outside Oxfordshire	daily		I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for young people		Very negative	There is no engagement with people living in rural areas outside Oxfordshire having to bring children in to school or to work.		Reopen the LRNs they have worsened congestion, travel times and air quality.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Very negative	I travel from Kidlington to my workplace. I do not wish to have to pay to get to work it is an unfair EXTRA cost to our life when things are already tough.	Please stop interfering in traffic management and making Oxford such an unappealing place to live and work. Think about the middle income workers who are trying to make a living who are working in the hospitals and schools who will have to move away from Oxford due to the rising living costs	In the last 12 months I have bought a bike (cycle to work scheme) and try to ride to work in order to reduce congestion. I DO NOT feel safe and have already had one accident which meant 7 hours at A & E at the JR and one week off work. I do not wish to ride on iced roads in the dark during the winter months because I cannot afford to pay an extra £25 to drive to work. This scheme is affecting the wrong people. Charge the Land rovers and SUV's and 4x4 vehicles which travel around Oxfordshire dropping their children at independent schools. There is a noticeable difference of less traffic congestion during independent schools holiday when they are not on the road. This scheme will not stop them, they'll just pay the money!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	Negative	About right	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Add new bus routes		Positive	It should reduce the amount of traffic on the roads, making bus travel quicker and more attractive. If it also results in cheaper bus travel then that's even better.	I'm not 100% sure about the idea of permits for commuters with parking in the city centre. In particular why are they going to be entitled to permits for three vehicles? Also why unlimited? Why not..say, 250 passes - enough for 5 day working week - a lot of holidays etc? Otherwise there seems to be no incentive for them to adopt alternative methods.	Not really. You often hear opponents of these schemes saying its all stick and no carrot, but there seems to be a large percentage of motorists who will just refuse to eat carrots regardless!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	Too low	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	At present, there is no viable alternative to driving in Oxford. Bus services are insanely expensive and slow; while walking and cycling becomes more dangerous every year as vehicles become larger and drivers ignore more and more rules (especially the growing number of delivery drivers). We need an intervention now before we are permanently locked into this increasingly dangerous situation.	I think that the congestion charge is too inexpensive and does not do enough to incentivize walking, cycling, and public transport.	Make all public transport free of charge and increase the frequency of buses, with the aim of eventually reintroducing a tram service. The goal should be to ensure that one doesn't have to think about getting around Oxford: public transport needs to become easier and more convenient than driving.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses		Negative	I live and work outside Oxford, but contribute significant volunteer hours to contribute to the cultural life in Oxford, primarily singing in multiple choirs (including at Christ church, which attracts upwards of 50 tourists per day). Such a congestion charge would decrease the financial feasibility of this, meaning I would not be able to continue contributing in this way. Buses are not always feasible or safe due to late night finishes or early Sunday starts	More permits are required for those who live just outside the ring road. I live in Abingdon because I cannot afford to live in Oxford, so having an additional fee to continue to volunteer in Oxford is counterintuitive	More frequent buses outside of working hours. Improved safety features on late night buses. Increased bike theft protection in Oxford
a member of the public living outside Oxfordshire	less than weekly		I live in the central Oxford permit area, or visit a resident of the central permit area by car	Negative	Negative	There should be no charges at all	Not sure			Very negative			
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Neutral	Positive	Too high	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Negative	I know no other city that charges people to access its transportation and amenities such as the train station. I typically access the city via public transport 90% of the time, but the ability to collect people from the train station or visit the city centre by car where necessary is inhibited by this proposal. Whilst the 25 permits a year for the wider Oxfordshire residence would make this easier, I feel it sends a negative message to the people of the city about accessing their own city.	Separately, you have proposed the Greater Oxford Council which would amalgamate six existing Oxfordshire councils including Kennington. If either of these projects go ahead, why is it that many of these six councils are excluded from the 100 permits a year that you propose for Oxford residents? For example, Kennington residents are just as close to Oxford city as many outskirts of Blackbird Leys is. If we are to be controlled by Oxford City Council in the same way as other suburbs due to the Greater Oxford Council proposal going ahead, you must be planning for equity now in your proposals such as the Congestion Charge (and how income is used).	Diversity the bus services in frequency & routes and reduce the cost For example - use the ring road! At the moment all roads lead into Oxford but many people work outside the city. E.g it takes hours to get from Kennington to Headington by Public Transport. This de-incentivises people. Consider bus gates in areas were congestion is worse, such as the Abingdon Road. I am not incentivised to take public transport due to how long it takes! Bus reliability is also a big issue in many areas outside Oxford. The Oxford Bus company is not really help to account due to its monopoly on the services… they are inconsistent and poor at communicating. Create dedicated cycle lanes and cycle amenities (such as bike traffic lights as well as car traffic lights) - don't just try and squeeze bike lanes into existing roads Make a bikes and e-scooters available further out from the city
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Other	Dedicated cycle infrastructure	Very positive	Because I don't drive so anything which will reduce car traffic and make other modes of transport easier, safer and more pleasant. is a benefit to me.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It's quite frankly a ridiculous, unrealistic and unfruitful proposal. Oxford traffic is already terrible and this will make it worse. Even though you apparently think it'll help, it will not. It's not always feasible for people to get a bus or cycle or walk and the roads you've chosen to place these charges on are a ridiculous choice, especially Marston Ferry Road having two schools on it and being so far outside the centre. It honestly makes me want to ask, why do you hate the public so much?	How are you going to prove to us that this money that you're essentially thieving from people is actually going to go towards the things you say it will? I don't think many people are convinced you'll actually do anything with it, we're all convinced you're just trying to make a profit out of making people miserable in their day to day life in Oxford.	Stop putting road works on at the same time across the entire city. The organisation of these seem terrible. Have more buses the go laterally across Oxford and stop sending everything through the city centre. How is someone meant to get from Iffley to Headington without getting on a million buses?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very negative	Makes visiting family much more difficult		
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make buses cheaper for young people, Make bus services more frequent		Very negative	You have not taken into account elderly people or those over 70 years of age when doing this survey. We rely on our car to drop off at Gloucester Street for the buses to LHR or London. We also need to get to Oxford Railway station and the John Radcliffe hospital. Dropping our cat at the Cat clinic in Marston every six months. Owners of smaller pets can be even more frequent. We live off Woodstock Road and Westgate and Oxford City Centre is where we shop. We rarely go far as we are over 70 years of age.	I doubt very much this will be temporary and appeal to you to think outside the box. The reason for the congestion in Oxford is caused by massive housing adding more car owners to the area you are proposing to charge. Also you are proposing a football stadium in Kidlington which will increase the burden on us locals. This is what is causing increasing congestion.	Do not charge locals within a 3 mile radius. Otherwise more shops will close and all that will be left is places to eat in Oxford, if that.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Blue badge holders, Disability benefit claimants, Disabled tax cars	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	None	Very negative		Crime will increase more accidents on bigger roads. More traffic on the main roads which make it unsafe to cycle as it leads most cyclists on the path which I have seen hit pedestrians walking on the path.	Tax house holds on having more cars than people in the family. Open ltns so traffic can move which Oxford has been doing last 80 plus years
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice, Community health or care workers who need to visit multiple locations or travel urgently	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make bus services more frequent, Extend hours of operation for buses, Other	Create footpaths and cycle paths away from roads. Leave road for the cars and lorries that need to be on the roads.	Very negative	Pedestrians and cyclists can, and usually would prefer to, use side paths, cycle paths, footpaths to get to their destinations. Our current local economy is set up around Oxford being accessible by car. In particular Headington, which houses 4 large teaching hospitals, Brookes university, and many private schools - all of which need regular vehicular access multiple times a day. The council need to utilise the roads fully and properly for vehicles (and get rid of stupid and dangerous schemes like the LTNs) and provide access for pedestrians which is well away from the roads! Charging people who already pay council tax and road tax and need their vehicles to live and work, is desperately unfair.	Please scrap this ridiculous and unworkable scheme.	Firstly, open up the roads (including those shut by LTNs) Secondly, create footpaths and cycle paths away from roads. Thirdly, make bus travel free. Fourthly, invest in subsidised shops and businesses, by lowering business rates in residential areas so that people have shops and resources within walking distance (possibly talk to Tesco Metro, Sainsbury's Local, etc.). Invest in nurseries/childcare, Libraries, and GPs, to have outreach premises/clinics in residential areas so that people don't need to travel to access these services. Fifthly, encourage the use of electric cars. Sixthly, stipulate that any entity digging up the road needs to have a permit from the council, so that there can be coordination and multiple roadworks for different teams (water, gas, road maintenance, electricity) can't be working on the same stretch of road at the same time. The permit would be time-limited, if the work runs over, the organisation either has to pay for an additional permit, or pay a fine for everyday the work overruns.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, 25 day passes for residents in the Oxfordshire permit area, on days of your choice. Registered car clubs	I don't	Neutral	Neutral	Too high	No	Other		Negative			
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Add new bus routes, Extend hours of operation for buses		Negative	I live in a village with very limited public transport into Oxford. While it's great to see the council trying to deal with congestion in Oxford it never results in a better public transport connection to Oxford so everyone still has to use their cars and it just costs them an arm and a leg. No worries for those with tonnes of cash to pay their way round it, but normal people are made to suffer as oer.	Love that it's already admitted in the thing that it will cost as much to set up as it will generate meaning the whole thing is an exercise in madness. Does this make the GDP jump? Is it a "growth" thing? Just waste the time providing a better bus service would you?	Finish the park and ride at Eynsham. Invest in buses. Accept that nothing done to benefit people and our lives makes "business sense" so stop trying to make it make moneyinot loose money.
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Negative	Negative	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses		Negative	It would mean I would not visit Oxford	I think this is against civil liberties especially given the Botley road closure and this has been extended. It seems nonsensical that to access the west gate car park people would be charged to use the car park. This will have an impact on local businesses and economy in the city centre, I think people who do not live in Oxford but live in Oxfordshire will avoid travelling to Oxford at all and go to other places particularly for leisure. It would also mean taking a job in Oxford would be less desirable and retention is difficult particularly in the health and social care sector	
a resident of Oxfordshire living outside Oxford	less than weekly	Unpaid carers	I don't	Negative	Negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Negative	We already pay to use the roads through taxation. This scheme is just a way for the council to have extra control over and monev from the public.	Priority should be completing and getting rid of the works on the Botley Road. Not trialling money making schemes under the guise of intorovino things.	Make trains nationally owned and decrease fares. Run more buses from rural areas.
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Not sure	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Very negative	I cargool into central Oxford once a week for a choir rehearsal. We currently park in the Westgate Car Park. Under this proposal it will mean an additional £5 cost per trip. Park and Ride buses are too infrequent at 21:45 when our rehearsals end. In winter it is not nice to have to wait for a bus if we take the S1 back to Eynsham	Could you change the time so that it ends at 18:00? This would solve our problems and also help theatre users I am a volunteer driver taking people to hospital/medical appointments. Would we be eligible for passes when we are doing these drives?	1) slip road from A40 onto A34 both ways so that you don't have to go to Wolvercote and out to Prar Tree 2) why has the A40 been reduced to 1 lane approaching Wolvercote? Until the A40 is made into a dual carriageway all the way from Witney and the Eynsham Park and Ride ooens it is a huge traffic bottleneck
a resident of Oxfordshire living outside Oxford	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Neutral	There should be no charges at all	No	Other	Stop messing up central road systems as it impacts on our patients.	Very negative	Our patients cannot afford it and it will prevent them accessing healthcare when they need it. You've already made it difficult to reach us due to closing half the roads to cars. Not all humans can cycle everywhere and buses are hopeless sun always late	Please don't do it	Introduce penalties for the dangerous cyclists that cause accidents all the time. Get rid of the dangerous eScooters. Reopen the side roads linking main route like the cowley road and iffley road to reduce buses having to queue for hours.Make buses and bus aasses cheaper

Survey Response													
I am responding to this survey as	How often do you travel in or around Oxford?	Please tick which of the following free permits and passes you think you may be eligible for	Do you live in, visit a resident by car or commute by car to the proposed central Oxford	Central Oxford residents' permitit is proposed that residents in the central Oxford	Central Oxford permit area commuters' permitit is proposed workers commuting	We are proposing a single charge of £5 to allow cars without a day pass or permit	Do you think that charges should vary, with drivers of longer cars paying more and	Income generated by introducing the proposed temporary congestion charge would be used to cover the set-up and operating costs of the scheme.	If other improvement, please state	Taking into account all the information we have provided about the proposal to	Please explain your answer	Do you have any other comments about the proposal for six temporary congestion charge locations in Oxford that you have not already shared in this survey?	Do you have any suggestions for other ways to reduce traffic and tackle congestion in and around Oxford?
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	Negative	About right	No	Make buses cheaper for all, Make bus services more frequent, Add public cycle parking		Positive	I am hoping it will reduce traffic.	I am concerned this, like the fingers, will increase traffic through Old Marston at peak commuter times.	An aerial egg lift linking Thornhill P&R > Osler Road / JR hospital > Town Centre.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	Too low	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Make bus services more frequent		Positive	Could go further, eg restricting hours of access for "other" vehicles (delivery etc) to outside normal peak times		Reduce the amount of parking currently available with a aim to discourage driving into the centre
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Negative	Too low	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Extend hours of operation for buses, Add public cycle parking		Positive		I think 3 cars for commuting is excessive	restrict larger vehicles such as trucks and vans within certain hours - so not during peak schools hours (7:30-9, and 3:30 to 5). This would make cycling with kids safer and more appealing.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Not sure	Make buses cheaper for all, Add new bus routes, Add public cycle parking		Very positive	Would expect to see fewer cars crossing the city centre, so buses would be faster/more timely and walking/cycling would be safer and more pleasant	Seems like a good way to test out the traffic filter ideas before going into the trial proper	School term times seem to produce the heaviest traffic, finding better ways for children to get to schools (rather than being driven in and out individually) could make a big difference. A shift away from the near-universal 9-5 working hours could also help soread out "rush hours".
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Yes			Very negative	I'm an NHS manager, working almost 24/7, working every day after job planned hours from hime, additional commuting time will have neoative imoact on my service		
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	Too low	Yes	Add new bus routes, Make bus services more frequent, Add public cycle parking		Very positive	It is currently quicker to cycle in and around the city than to go by bus. The roads should be clearer for people who *need* to use their cars and permit the free flow of traffic. Buses will be quicker, and therefore more appealing to use, and cycling will be safer.	Owing to the timing of sessions, there needs to be provision for access to the ice rink, whether that is by improving bus services or adjusting the congestion charge for users. Otherwise, training would be affected to such an extent that competitive skaters will need to move to other rinks, such as Swindon, which are further away, which will affect the rink's ability to operate and remain competitive.	Look to other medieval cities abroad that have put cycling first and see what measures we can adopt. A good example is Uppsala, in Sweden, which is also a medieval university town and is almost entirely car-free in the centre. Cars should be used for getting out of Oxford, and not necessary for getting into or around Oxford.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Negative	I will have to leave my job at the school where I work part time because the most direct route includes one of the charging zones and going the long way would take too long and will use too much petrol. Going there by bus would take ages as there is not a good direct service available.	They are not a good idea because the rich can afford to pay and will continue congesting the road, but those on lower income will struggle.	Removing the LTNs in East Oxford would be a good start. Have more bus routes that cover the entire city and better connection services to the surrounding villages.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	No	Make buses cheaper for all		Negative	Push traffic onto already busy alternate routes already impacted by LTNs		Use the river to provide alternative transportation into Oxford
an Oxford resident	daily	Taxis and private hire vehicles	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Make BUSES FREE FOR LOCAL PEOPLE BETWEEN WORKING HOURS AND SEE WHAT IMPACT THAT HAS ON TRAFFIC AND SCHOOL RUNS	Very negative	Will hurt people that come to Oxford to work and who live locally .. turning Oxford into a Prison	All the surrounding roads will be impacted massively, there wasn't a congestion problem before that LTNS went in.. SUMMERTOWN IS THE WORST FOR PEOPLE THAT DON'T LIVE LOCALLY	Free bus passes, council has the ability now to run its own bus services due to changes in the law, also bus ticket prices are extortionate for such small journeys and cause issues financially, Park and Ride should be free and buses to and from them should be one pound no more, if you want people to use Oxford and use it services make it cheaper for them to access them.
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Other	Fix the badly managed roads and roundabouts	Very negative	It's literally a money making scheme. Not everyone falls into the same category of 'they should walk, get a bus or cycle' I now live in Abingdon, but I grew up in Cowley, I work in Cowley, my partner works in Cowley, my daughter goes to nursery in Rose Hill, I still have a lot of friends and family in Cowley that I see regularly, usually after work. You have already made that difficult with LTNs, I have to sit in a lot more traffic now than I ever did before. People will not stop driving! We pay for our cars, our insurance, our tax, and you want to charge us more just for the privilege of driving in our own city! There is no bus route that will allow me to go to drop off my daughter at nursery, go to work, then to pick up my daughter, and then to visit my family! And if there was it would probably double my journey time! I cycle to work when I can, but not if I have to do the nursery run. I have never ever had a problem cycling round Oxford! The majority of families and households rely on these cars to go about their daily business! Stop trying to penalise them!	You never spoke about this pre election as you knew you would struggle to get voted in! You have ruined Cowley with your LTNs already! You as a council are not listening to residents. Just look at the petition with over 10,000 signatures against!! Look at the comments! Put your congestion charge in areas where you were voted in! Leave Cowley alone! Majority of residents do not want your greedy schemes! You seem to be targeting the poorer areas! If you really want it, then open up some of the LTNs so that the traffic can flow freely!	Open up the LTNs! Simple!
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice, Frequent hospital patients	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	I am over 80 years of age and a regular patient to the JR and Churchill Hospitals . I regularly use a car to get to Oxford City Centre for Dental and shopping requirements as well as being given a drop-off for buses from Gloucester Green.	I fear that the alleged temporary nature of these charge locations will be overruled nearing expiry causing endless problems and inconvenience.	Urban development in these inner areas has continued without thought for the problems that have now warranted this policy not to mention the stadium at Kidlington the effects of which when complete will cause even more congestion just by its very existence .
an Oxford resident	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all, Make bus services more frequent, Other	Save the money and do not set up the permit scheme or the traffic filters scheme.	Very negative	The new schemes proposed (both the permits and the traffic filters) will just cause more frustration driving around Oxford. In order to improve traffic, the LTNs should be removed and driving should be prioritised over unnecessarily wide cycle lanes. Oxford needs more access to roads. not more restrictions.	The congestion charge is a ridiculous idea.	Remove the LTNs. Make road markings clearer and repair potholes to reduce accidents and subsequent road closures. Limit roadworks to during the night.
an Oxford resident	daily	Community health or care workers who need to visit multiple locations or travel urgently	I commute to the central permit area by car	Very negative	Very negative	There should be no charges at all	Not sure	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	It will make patient travel to and from our surgery very challenging. Also our staff , essecially admin, will strusdle to trave which will have an impact on our services.	A lot of our patient rely on cars for different health (physical, mental and social) reasons .	Improve buses network inviolng timing and timetable and envourage people to use . Rather than imposing a charge on them if they drive a car
an Oxford resident	less than weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very positive	Very positive	About right	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all		Positive	Anything to reduce car usage is a good thing		A full congestion charge scheme for the whole city is something that should be evaluated
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice, Unpaid carers, Frequent hospital patients	I don't	Neutral	No impact	About right	Yes	Make Park & Ride parking cheaper, Make buses cheaper for all, Make bus services more frequent		Neutral		Consider regular blood donors/platelet donors as eligible for permits	
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I commute to the central permit area by car	No impact	Very positive	There should be no charges at all	No	Other	Park & Ride should be free to park and free to use if you want to stop cars in Oxford	Very negative	I cannot afford all this indirect taxation on going to work.	This is a knee jerk reaction to the wasting of all the money already spent on introducing the cameras in the first place.	Park and ride working earlier and later than it already does, remove charges for parking in the park and rides and using the park and ride bus service. Fix the amount of time you can park at park and ride to 23 hours and use the cameras in the park and ride to enforce. Enable shoppers to have a means of taking their goods from Oxford to the park and rides without charge. (Where they would have used their car previously). It's either a way of reducing traffic in Oxford or a means to generate revenue, the free park and rides would show the former.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very positive	Very positive	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Other	Re-do Headington lights and St Clements & Plains, they are poor.	Very negative	Oxford's urban planning and transport policies are increasingly creating the perception that the city primarily serves a limited demographic, particularly those who cycle and individuals with mobility needs. This narrow focus appears to overlook the diverse requirements of many residents and visitors. Families with young children face particular challenges in navigating the current urban landscape. Parents pushing prams or managing multiple small children often find cycling impractical or unsafe, while walking long distances can be difficult with toddlers in tow. Similarly, families collecting children from after-school sports activities frequently cannot rely on public transport due to timing constraints, equipment needs, or the simple logistics of managing tired children with sports bags and kit. The car restrictions and cycling-focused infrastructure, while well-intentioned from environmental and accessibility perspectives, may inadvertently exclude these family demographics from easily accessing the city centre, local amenities, and services. Parents often need the flexibility and practicality that private vehicle access provides, particularly for trips involving multiple stops, heavy loads, or time-sensitive journeys. This situation suggests that current planning decisions may not adequately reflect the full spectrum of Oxford's population. The composition of planning committees and consultation processes may benefit from broader representation that includes parents of school-age children, working families, and other groups whose transport needs differ from the current policy focus. A more inclusive approach to urban planning would seek to balance environmental goals with the practical mobility needs of all residents, ensuring that policy decisions consider the daily realities faced by families, elderly residents who cannot cycle, and others who may not fit the current planning paradigm. This could involve more comprehensive consultation processes, diverse representation on planning bodies, and transport solutions that accommodate multiple modes of travel rather than prioritising one demographic's preferences over others.	PLEASE ALLOW MOTORCYCLES AS YOU PROMISED THEY WOULD BE ALLOWED THROUGH THE NEW BUS GATES.	You need a more dedicated metro system. The answer is not in the roads or planning, it is in using trains/metro.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	Very negative	There should be no charges at all	No	Other		Very negative	The impact of additional traffic in the ring road will cause addition pollution and stress to those living just the overside of the ring road. Thus the impact is that it is more difficult to go about ones daily business outside of the congestion zone in Oxford, let alone inside of it. Green Road, Cuttleslowe & Wolvercote Road amounts, already struggling will likely see even more additional traffic at peak times. Situations such as A34 closure will mean Oxford grinds to a standstill.	I do not agree that HGVs and private busses should be exempted in a blanket nature, for the following reasons. - Larger vehicles of this nature are incompatible with Oxfords Medieval road layout. Using Sat Nav devices if the ring road is at a standstill is could direct the HGVs through Oxford to rat run, thus creating significant safety and health issues for pedestrians and cyclist. Take for example Marston Ferry Road, home to two Schools. - Large HGV's will under these rules be allowed pass at will at the start and the end of a School day. Therefore this opens up the legal question of why HGVs cannot use any School Street in Oxford at anytime of day to? - The County Council really needs to up its game in the communication of its message, which every time is hijacked by lobbying groups, political groups (including the current cabinet) and personal conflicts of interest. OCC fail to get a clear message out, it all becomes jumbled, and it comes over as the people of Oxford are being dictated to by the lobby groups pressuring the County Council. The county council needs to distance themselves from the lobby groups. There is way too much politics in all of this to actually understand who is representing the facts fully, but that is down to the failure of messaging from the last cabinet member for transport around 2019/2020 on LTNs, who in my opinion turned many against these due to the nature of their implementation. The same, even at the last cabinet meeting continually playing the City Council off against the County Council, at odds. This should be above politics as it is clearly about something big that affects us the people of Oxford, not the current cabinet trying to score points over the city council, it degrades the whole thing and us that live here. That was and still is when the trust of many of the people of Oxford was lost, as playing one up politics is very different to getting a very diverse community onside with any proposals. Due to this failure, only by regaining that trust will anything ever be fully achieved when it comes to reducing congestion. Once trust is lost it is very difficult to get back and I do not see that happening anytime soon as the people of Oxford deserve better respect across the board.	'- Oxford Tube & Airline Busses should terminate at Thornhill Park and Ride and not Central Oxford. The size of the buses are too big for Oxfords medieval street layout and cause damage to the road infrastructure. They also contribute significantly to congestion On Oxford High Street and St Clements due to their size when stopping at too small bus stops. This is based on my lifelong experiences of using a bus too and from Oxford - Private School busses should be prevented from causing congestion by not being allowed to park on the Plain Roundabout - All HGVs should be permitted, with deliveries to central Oxford at off peak times. These large vehicles are not compatible with the road layout and with HGV's on free pass could end up with rat running of HGV's through places say from the Eastern bypass, along the Iffley Road to the Plain, along Marston Road to the Marston Ferry Road to cut out a queue to reach the Cuttleslowe or Wolvercote Round-a-abouts. Or the Eastern bypass, off at The Slade, Old Road, Morrell Avenue, Marston Road to the Marston Ferry Road. Therefore cutting through Oxford rather than around it. It encourages HGV traffic. - Park and Ride parking MUST be free to encourage it's use, otherwise there is no incentive to go there.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Positive	Positive	There should be no charges at all	No	Add new bus routes, Add public cycle parking, Other	Extend the 3 & 3A to the rail station	Very negative	Young professional living in Oxford. Family and friends visit (often by car because of distance and numbers visiting) and this proposal makes me feel like I'd need to be cautious about inviting people to come to Oxford so we don't run out of permits. Trains are great but train tickets for 4 quickly add up and we're based in Cowley so that must also be factored in when making plans.	I worry these proposals will alienate citizens and make it harder to make green changes in the future	Free park and ride
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Positive	No impact	About right	No	Make Park & Ride parking cheaper, Add new bus routes, Add public cycle parking		Positive	Less traffic in the city centre.		
a resident of Oxfordshire living outside Oxford	daily	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	Very negative	There should be no charges at all	No	Other	Fix all the pot holes in the roads, thus making driving safer and more environmentally friendly as wear would be reduced	Very negative	I live outside Oxford city but work in the city during the night, 11pm till 7am. THERE IS NO BUS SERVICE! I try to cycle as much as possible, but I drive when it rains. I have an electric car too, which is zero emission. So by implementing this my journey will increase 40%. Madness. I'm not alone. Every college in Oxford has employees working nights. We all finish at 7am. When I drive through St Cross Rd and St Clements at just gone 7am there is NO traffic. It might be building up by 7.30 am, but that's half an hour later.	I don't see why it needs to start so early in the morning. Most people I know start/finish their shift at 7am. They won't be making congestion as their cars are parked up. The whole idea should operate from 8am until 6pm only. Also, like the proposed bus gates, as I work nights any payments or permits would expire at midnight. So I would need to pay £10 or use two permits once the bus gates are implemented. Quite frankly this is extortion.	Make cycling safer by maintaining the cycling infrastructure properly, getting rid of the VOI scooters (I've been hit twice), until food delivery e-bikes and Uber taxis that appear to drive even worse than the established ones. Or police them at least. (My Council tax includes a payment for TVP. OCC take the money so have an obligation) Soon Oxford will be consumed by the University and become one giant campus. Until then I suggest if you really want alternatives to the car, busses need to be £1 and visit every village in Oxfordshire at least 4 times an hour. Cycling needs to be made considerably safer and whom ever is trialling or instigating changes need to get out on their bike in the dark too. I don't believe for a minute any of the recent initiatives have taken nioht time ridina into account.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Negative	About right	No	Make buses cheaper for all, Make buses cheaper for young people, Add public cycle parking		Positive	Be less cars to avoid when cycle commuting		Better speed enforcement Clearer cycle lanes Live NOX ppm counters like speed measuring signs
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	Any initiative that will reduce congestion and encourage uptake of public transport will be a benefit for the city	Drivers should be given more than one day to pay the charge - it's easy to forget	Create more segregated cycle lanes, rather than painted lanes that provide no protection for cyclists.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	Too high	Yes	Add new bus routes, Make bus services more frequent, Extend hours of operation for buses	I will be affected by two of the proposed locations. Holloway and Marston ferry as I live near Holloway and work at Cherwell School. The position of the filter/charge on Holloway will extend my journey to join the dual carriageway which is the only route I use. The bus routes available are significantly longer than taking my car which also gives me greater flexibility around my job and needing to bring work home. The Marston ferry filter/charge makes no sense to me as the purpose of this road is to link two areas of Oxford. My issue is not with the idea of charges but the fact that charges are not for reducing emissions so all cars are treated the same and also the placement of them doesn't make sense to me. When I am leaving currently it seems like more people are leaving the dual carriageway to head into headington via the Slade and wood farm than people using the dual carriageway as I am. If the route into headington via the Slade/wood farm was targeted by a filter that would make the bus service travel better and make it more like that I could at times switch to the bus.	Very negative	The Holloway location is not correct as the bottom of Holloway is already clogged with traffic and the filter will exacerbate this issue. Also the traffic coming off the dual carriageway and up to headington via the Slade and wood farm is not affected meaning there will be no benefit to the buses using that route.	A emission charge first and then a congestion charge or the filters. Also the placement of the outer filters is the issue rather than the idea. More refurbishment of cycle tracks.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Very negative	No impact	There should be no charges at all	No	Add public cycle parking		Very negative	The cost will be too high to drive out of our area	This should not go ahead	Get rid of tfl's
an Oxford resident	daily	Disability benefit claimants	I don't	Very negative	Very negative	There should be no charges at all	No	Make buses cheaper for all		Very negative	This won't cut down traffic and damage to the environment. Limiting and cutting down unregistered car travel won't stop people from travelling. Rich people will just pay the fine as it means nothing to them and for poorer people, they will struggle. LTNs didn't cut down traffic and neither will this. The way to cut down on traffic is letting people go to where they need to be.	I'm a frequent bus passenger and I've witnessed daily how the traffic gets worse when you keep limiting travel. The buses are packed, the bus drivers are doing their best to be on time but they struggle, with Oxford, actually being a city. It will still be busy, this won't change anything. You're not thinking for the majority this will effect. It doesn't effect me but I feel very strongly that this is not the way to do.	Drop this idea and get rid of the LTNs, you will see how very quickly traffic will drop. Co2 levels will follow without so many being struck in traffic and limited to where we need to be, Oxford is a small city, not a small town. We need to treat it accordingly and think of your constituents who voted for you and pay their council tax to you. Think of the majority this will effect, your unpopularity will only increase. Free travel, don't limit it.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	No	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking	I don't need to travel through the proposed charge locations on a regular basis, so the 100 free day passes would still cover my needs. I also don't need to travel on the ring road often, so if traffic congestion is worse as a result of people taking alternative routes this again has not much impact on me directly.	Neutral	I worry about impact on businesses in the city centre - Westgate parking is already very expensive, adding another £5 to get to it may cause people to stay away - maybe consider if it charge on route in/out could be at peak times only rather than 7am - 7pm? I'm also worried that Ring Road traffic and traffic around the hospitals/Headington University sites/London Road at peak times will be at a stand still when Marston Ferry Rd and Hollow Way Filters are in operation.	Avoid new housing within the city boundaries - it seems that new dwellings are often proposed to be 'car-free', but in reality people are using cars. Better cycle path design (avoid going on and off roads, avoid shared pedestrian/cycle routes).
a resident of Oxfordshire living outside Oxford	weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper		Very negative	This is a charge to further penalise people that already cannot afford to live within walking distance of Oxford.	Introducing charges before making the park and ride fit for purpose is the wrong order.	Make the park and ride free first, change behaviours with benefits rather than punishments.
an Oxford resident	weekly	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	Yes	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Add new bus routes, Make bus services more frequent, Add public cycle parking		Negative	This scheme penalises South Oxford residents for the delays of the works on Botley Road. The main impact is for residents coming from the South or East with negligible impact on North Oxford residents.	Personally, I cycle to the centre whenever I can. However, this is not possible for all residents. The council also recently worsened the bus routes available to me and my neighbours into the centre so this will lead to a lot of discontent from residents, especially outside of the unaffected North Oxford area.	More parking for bikes in the centre. Don't remove bus routes for residents. Better options for bus pricing etc. safer cycle routes (such as the Cowley road scheme). Do not offer largest parking area within the centre I suppose? As most visitors will default to the west gate which is now within this charge zone and parking closer to the centre is sparse otherwise
a resident of Oxfordshire living outside Oxford	less than weekly	25 day passes for residents in the Oxfordshire permit area, on days of your choice	I don't	Very negative	Negative	There should be no charges at all	Yes	Make buses cheaper for all, Add new bus routes, Make bus services more frequent		Very negative	Very negative (& despite the exceptions) given the differential burden borne by private car owners & the likely increase of traffic volume and pollution on roads not affected – the ring road not least. I am similarly opposed to your planned bus fillers		As soon as a bus stop is at a distance from one's home or place of work, or worse, when a cross city journey involves the use of more than one bus (and the bus stops in question may be distant from one another), journey times are lengthened, painful walking is imposed on the frail, carrying shopping and other loads is more tiresome, and so forth — in short, all the things Gant knows already but is determined to ignore
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	There should be no charges at all	No	Other	Improve the quality of roads in oxford not just temporary patch jobs on potholes which will later fail again	Very negative	Oxford used to have zero traffic and congestion problems prior to the introduction of LTNs. the traffic used to flow freely with multiple routes to one destination. The new proposal will only force current road users onto even more limited routes creating more congestion. This will only increase the pressure on the oxford ring road and increase travel time thus increasing the amount of time cars are on the road, resulting in more emmissions. Furthermore, local oxford businesses have been heavily struggling as this poor missmanagement of our roads deter the influx of potential custom. The westgate has great car parking facilities only for it be blocked by a paywall during the daytime hours.	Why not implement one way roads like how Magdalen road and howard street were prior to LTNs. This is widley used in other cities and will allow the road tax payer to use the roads they are paying tax for. this will decrease the stress on the suggested congestion points and will allow cars to travel with pricing out residents who now have to add another cost to their travels. or at the very least shorten the window to the rush hours. the suggested congestion points are not congested for the full 7am-7pm times proposed. there are periods during that window where congestion is not an issue. congestion was not an issue until it was created by the LTNs.	Why not implement one way roads like how Magdalen road and howard street were prior to LTNs. This is widley used in other cities and will allow the road tax payer to use the roads they are paying tax for. this will decrease the stress on the suggested congestion points and will allow cars to travel with pricing out residents who now have to add another cost to their travels.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I live in the central Oxford permit area, or visit a resident of the central permit area by car	Very negative	Very negative	There should be no charges at all	No	Make Park & Ride parking cheaper, Make Park & Ride buses cheaper, Make buses cheaper for all, Extend hours of operation for buses		Very negative	Stop putting the costs into car drivers	No	Make the lane by the westgate two lanes both sides to get traffic past quicker
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	No impact	No impact	About right	Yes	Make buses cheaper for all, Make bus services more frequent, Extend hours of operation for buses		Very positive	I have lived in Oxford for forty years and traffic has been a persistent problem for all of that time. This seems to be a sensible pragmatic attempt to reduce car ournevs and improve public transport into the city.		Charge, or increase charges, for organisations who provide private parking spaces for their employees within Oxford. Incentivise "car-free" residential developments.
an Oxford resident	daily	100 day passes for residents in the Oxford permit area, on days of your choice	I don't	Neutral	Neutral	About right	Yes	Make Park & Ride buses cheaper, Make buses cheaper for all, Add public cycle parking		Positive	Lower traffic when I need to drive through the center, and less traffic for buses into the center.	I would have a more positive response if more permits were given to residents.	Tackle school traffic with something other than cost - commuting in school holidays is a breeze. Private school parents won't care about a £5 charge to continue to drive their huge cars right up to the school gates. Shuttle buses for park and rides and walking/cycling "buses" could help.
